There is another point which I wish to recall to your memory. You will remember that at a general meeting at this hotel, on February 9, 1905, when Mr. Benjamin Densham was in the chair, he was repeatedly questioned by different shareholders as to what was going to be done with the huge sum of money appearing on the balance-sheet as being invested in gilt-edged securities. (Hear, hear.) He was pressed by several shareholders to say right out whether there was any scheme on hand by which these securities might be jeopardised. (Hear, hear.) He asserted, in answer to these questions, that the shareholders would be taken into the confidence of the directors when a scheme was initiated. I think it only right to tell you that we have now found out from the books that at that time 150 shops had already been taken, which in effect, owing to the manner in which the scheme was carried out, committed the company to a larger sum of money than the investments amounted to. As to this, at our meeting on March 27, 1906, Mr. Frost, Mr. Benjamin Densham's solicitor, stated:—"Mr. Chairman,—May I, on behalf of Mr. Benjamin Densham, who is seated by my side at this moment, but who does not want to intervene personally in this meeting if it can be avoided, say one thing with regard to the point which was raised by my friend Mr. Levy, I think it was, and by a gentleman in front, as to the assurance that was given by Mr. Benjamin Densham when he was the chairman of the company, as to what would be done and what would not be done with the reserve funds which were then standing to the credit of the company. I am asked by Mr. Benjamin Densham to say that that incident is one incident which he personally regrets so far as his personal action and his personal connection with the company are concerned. The position was, as any man of business will know, that this scheme which was then under consideration was dependent entirely for its chance of success upon complete secrecy until it was ready to be launched, and yet, while that was the state of things, Mr. Levy most unfortunately pressed a question at the meeting as to what would be done with this reserve, which would, of course, have to be utilised in carrying out the scheme which was then proposed. I may fully admit on Mr. Benjamin Densham's behalf that it was very difficult for him to answer that question quite strictly on the one hand, and yet without jeopardising what was then thought to be the interests of the company on the other. He then accepted the suggestion that was made on the spur of the moment by the late managing directors, that the shareholders would be consulted, and that in the nature of things was not able to be performed. Mr. Benjamin Densham desires you to recognise in that connection that he was placed in a very difficult position, but, nevertheless, he desires to express to the shareholders now present his personal regret that he should have been placed in a position that he had to give that assurance which was not able to be carried out." There remains a question whether proceedings should be taken against the late board or against the late chairman, or both. It is clear, from the facts now before us, that if any proceedings were taken against the late board, Mr. Benjamin Densham must be associated with the late managing directors. The question which has been presented to us is this. In the interests of the business, is it wise to take proceedings

against the late board including the late chairman, and the managing directors, or some of them?

This matter was also discussed at our last annual meeting, when a resolution was put by Mr. Cresswell that the shareholders should appoint a representative body to meet the directors and their solicitor to decide what action, if any, should be taken, and notwithstanding the fact that this resolution was not carried, the directors invited a number of the largest shareholders who were present at that meeting to meet them on April 12, 1907, at Tower Hill, when all the facts, including the opinion obtained from the most eminent counsel, were laid before them, and the matter was thoroughly discussed. The shareholders present decided that, in view of the serious interruption which any action or proceedings would cause to the business, no proceedings should be taken at that time, and that we had better then use the energies of our present board in rebuilding the business, seeing that, assuming success, it is not so clear what the result would be in nett cash to your undertaking. Mr. Benjamin Densham has already refunded to the company the amount he promised in respect of the liability that the company was open to under the five years' agreement with the two late managing directors. What we would ask you to do in the matter is to place the same confidence in us now as you did last year, and leave it to the discretion of the board, should any new factor arise in the future, or should it become necessary for the company in self-defence to take proceedings, to act at once under the advice of the best counsel. But, after what was said by Mr. Howard at the last general meeting, we may tell you that Mr. Benjamin Densham could not be dissociated from others in any proceedings that might have to be taken.

Mr. A. C. Oswald: As one who is in close touch with the business and our customers, I should like to congratulate you upon the marvellous recovery we have made in the business. We stand exceedingly well with our customers and agents at the present time, and we look forward with great hope to the future. I was very much impressed with the remark made by our auditor, Mr. Arthur Whinney, at the meeting here last year, when he said: "The business is sound and well-founded; I know of no other business in the City of London which would have stood the buffeting that this business has stood and come through the ordeal with success."

The Chairman: There is one point in Mr. Rose's speech which I should like to touch upon, and that is where he asks you to again repose sufficient confidence in us to leave it to the board as to whether action should be taken if any new factors should arise. I am the largest shareholder in the company, holding as I do nearly £57,000 worth of shares, and consequently I am the greatest sufferer from what has taken place, and, as such, you may be quite sure that even for my own sake I shall do what I consider best in the interests of the shareholders generally. There is one further word I should like to say. You will remember that last year, when Mr. Cresswell proposed that a committee of inspection should be formed to go into the question as to whether proceedings should be taken, I welcomed the suggestion on behalf of the board. When the proposition was put to the meeting, however, only eight shareholders voted in favour of it. The remark was made, "We have absolute confidence in you and the board and will leave it in your hands." Well, we at that time were not disposed to take the responsibility, and when we got back to the office we selected from the shareholders who had signed the attendance sheet for that meeting 30 or 40 of the largest shareholders and invited them to a special meeting at Tower Hill, feeling that by so doing the responsibility would be taken off our shoulders. I think, therefore, you will realise that the board do not want to keep anything whatever from the shareholders. Now at this meeting I must refuse to have any wrangle. Mr. Benjamin Densham has denied the accuracy of a certain statement which has been made to-day, and what I would propose is that he should come to Tower Hill and face the directors, together with a committee of shareholders which should be selected at this meeting. We shall then be very pleased to prove absolutely that all that Mr. Rose has said is correct.

Mr. Frost (solicitor to Mr. B. Densham) said the statements made by the directors at the present meeting by way of an attack upon his client were quite *ex parte*. It was therefore only a matter of common justice to Mr. B. Densham that he (the speaker) should have the opportunity of saying, on that gentleman's behalf, that he absolutely repudiated all the allegations which were made against him. He desired it to be understood once and for all that Mr. B. Densham did not admit one single atom of moral or legal responsibility in respect of the loss that had come upon the company, more than rested upon the present chairman.

Mr. B. Densham said he would welcome any action that the directors might bring against them. He himself was the largest shareholder, and what he had done had been done in the interests of the shareholders. Had he known this matter was to have been reopened he would have brought letters there which, he might say, would have opened the eyes of the shareholders. He could not understand what object the directors had in making this attack at the present time.

After some further remarks by shareholders the motion for the adoption of the report and accounts was carried.

A discussion ensued upon the suggestion which had been made by the chairman for a committee of shareholders to meet Mr. B. Densham and the board at Tower Hill, but a desire was expressed that the dispute should not be continued, and that in the interests of the company the energies of the board should be devoted to improving its business, and the Chairman intimated that his colleagues and himself were in agreement with the suggestion.

It was resolved that the dividend on the preference shares at the rate of £5 per cent. per annum for the half-year ended December 31, 1907, be paid. The retiring directors, Mr. J. L. Densham and Mr. H. Rose, were re-elected, as were also the auditors, Messrs. Whinney, Smith and Whinney.

The proceedings then terminated.

METROPOLITAN LIFE ASSURANCE.

The ordinary general meeting of the Metropolitan Life Assurance Society was held, on Thursday, at Cannon Street Hotel, E.C., Mr. J. B. Wimble presiding.

The Secretary (Mr. Bernard Woods) having read the notice convening the meeting and the auditors' report,

The Chairman said: I will proceed to make a few remarks regarding our stewardship during the past year before I ask you to adopt the report and pass the accounts. Taking first the revenue account, I would say that surrenders are somewhat heavier than we have been accustomed to during the past three or four years, and although we are sorry such is the case, we feel that the cause of this increase is largely owing to the financial depression which unfortunately existed in this country during the past year. Turning now to the balance-sheet, this seems to me to need very little comment. Our investments, you will see, are well distributed, and are of the very highest class. As you all know, during 1907 a severe decline took place in the value of such securities as we hold. Owing to the depreciation I have referred to, your directors have deemed it necessary to put aside out of the surplus shown in the revenue account a further sum of £20,000, thereby increasing the investments reserve account to £50,000. This sum amply covered the depreciation in our investments at the end of last year, and I am pleased to say that since our valuation was made there has been an advance in the price of the securities we hold. This fall in securities, although much to be regretted, enables us to invest any funds we now have to invest to return us a more favourable rate of interest than we have been able to obtain for many years past. Now, as regards business done during the past year, the report shows that we completed 193 policies assuring £197,490, of which sum we have deemed it advisable to reassure £15,000, leaving the net amount of our new business £182,490. These figures are eminently satisfactory, and show that during 1907 the society has done more new business than for the past twelve years, and I sincerely trust that through the good services of our members (for it is to them we are bound in a great measure to look for our new business, for we employ no agents and pay no commission), the year 1908 may show as good a record of new business as 1907 has done. Claims by death are again favourable, and less than 75 per cent. of the amount we might have expected. They amounted to £122,738, as against £168,247 provided for. Not less than 80 per cent. of the lives were aged at death 60 and upwards, and the policies have averaged the age of over 33 years. In fact, for many years our mortality claims have been light, and give evidence of the careful selection of lives which has been exercised in the past. In order to provide against a possible adverse mortality experience in respect of any one year, we have deemed it advisable to set aside from the surplus shown in the accounts the sum of £15,000 to form a reserve fund to strengthen the reserves of the society against any such exceptional mortality. After setting aside the amounts we have done to the investments reserve fund and the reserve fund, we carry forward a surplus of £20,038. Looking back on the year's work, your directors feel sure that you will agree with them it is very satisfactory, the only drawback being the depreciation in securities, and, as you are well aware, we are not singular in this respect. The ratio of our expenses as compared to our premium income continues to decrease, and now amounts to 6.65 per cent. of the premium income, as against 8.93 per cent. in 1900; that is to say, over 2¼ per cent. has been saved during the past seven years. (Hear, hear.) Owing to the largely strengthened reserves of the society, the diminution of the expenses and the consequent increase in the rates of abatement, the prospects offered to new members are now extremely favourable, and I trust you will all do all you can to bring us new business.

Sir William Lee-Warner, K.C.S.I., seconded the resolution for the adoption of the report, which was carried unanimously.

Forth and Clyde and Sunnyside Iron Companies.—Profits for 1907 were £7,000 and £6,904 was brought in, making £13,904, out of which £1,668 is written off for depreciation, and after meeting the preference dividend 6 per cent. is paid on the ordinary shares, leaving £7,337 to be carried forward. The property is valued at £27,212, goodwill stands at £9,057, and stock at £22,495, so that the capital of £90,000 gives a considerable margin for working capital. Much of it is held in cash, that item amounting to £15,088, and sundry debtors are also large at £17,489, while only £3,862 is due to creditors.

United Limmer and Vor Wohle Rock Asphalte Company.—Mines and factories produced a profit of £16,894; deducting general expenses £2,153, a nett profit of £15,023 is shown, giving, with £1,249 brought in, £16,272 available. A dividend of 10 per cent. is paid for the year and £6,000 put to reserve, making it £29,011, after appropriating an unstated substantial amount towards depreciation of property, which now figures at £71,666. Investments are £17,124, debtors exceed creditors by £16,252, and cash is £7,664.

The Investors' Review

EDITED BY A. J. WILSON AND SON.

Vol. XXI.—No. 534. New Series. SATURDAY, MARCH 28, 1908. (Registered as a Newspaper.) Price 6d.

Replies to Inquiries about Stocks and Shares.

These are given each week in the INVESTORS' REVIEW on the following terms:—

One Reply to **One** Question — **One Shilling.** Any number of questions may be put and will be answered at the rate of **One Shilling** each. The questions should be numbered and a copy kept, as securities cannot be named with comments in the printed replies.

For a fee, however, of **One Guinea** per annum paid in advance, a **Key** to the previous week's replies will be sent early in the following week to Subscribers.

Deposits of "Query Money" may be made in advance, and will be acknowledged in the "Answers" column. Notice of exhaustion will also be given there.

If tempted to speculate by circularising brokers Readers should pause and ask the INVESTORS' REVIEW first; its reply will probably save them from many a loss.

Telegrams advising about new securities cost **Half-a-Crown** each, plus cost of the telegram.

Private Letters in answer to inquiries can be had if desired. The minimum charge for such letters is **Ten Shillings,** but for this three questions will be answered if desired. For every question beyond three replied to in any one letter the charge is **Half-a-Crown per question.**

Correspondents can have their lists of investments overhauled and advised upon by letter on precisely the same terms.

Also models of grouped investments will be supplied according to directions given and on the following terms, each list being distinct and never a mere repetition:—For any number of stocks up to **Five, One Guinea;** for from **Six to Ten** securities **Two Guineas,** and so on at the rate of **One Guinea** for each **Five.**

Deposits may be made for letters just as for replies given in the Paper, but letters are never volunteered.

PUBLISHERS' NOTICES.

The Investors' Review is a Subscription Journal, and will be delivered to subscribers in London by the first post, or sent to the country and abroad by the first mail, on Saturday Mornings on the following terms:—

One Year - £1 1s. Six Months - 11s. Three Months - 5s. 9d.

Short of Three months the Price is **6d.** per Copy *Inland,* and **6½d.** *Abroad, Post Free.*

Subscribers can change their address as often as they please, but notice of change must reach the Publishing Office not later than the First Post on Friday Morning.

For a fortnight before the Subscription expires the **Investors' Review** will be forwarded in a different coloured wrapper.

Cloth cases for binding the Half-Yearly Volumes price **1s. 6d.** postage **4d.** extra. Bound Volumes **15s. 6d.,** or **16s. 3d.** post free.

Cheques and P.O. Drafts should be made payable to

CLEMENT WILSON,
"Investors' Review" Office,
Norfolk House, Norfolk Street,
London, W.C.

The Editors cannot undertake to return rejected communications.

Letters from correspondents must, in every case, be authenticated by the name and address of the writer.

The Editors desire it to be understood that a charge is made for the insertion of reports under the heading of Company Meetings, and they cannot accept responsibility for statements made therein.

The Investors' Review.

The Brewers and the Bill.

Before beginning to discuss again the licensing proposals of the Government we must put ourselves right with the *Grocer* newspaper. The information given to us about its shop assistant advertisements was wrong, and we regret much to have given it publicity. In a copy of the paper sent to us from its publishing office we found not a trace of any such phrase as "must be a good averager" or any words to that effect, and we therefore exonerate it altogether from participation in the encouragement of a reprehensible practice which unquestionably exists. Thanks to the dishonest habit among "off" licence holders of a certain class, householders who entrust to their servants the duty of marketing, of buying the commodities required for domestic consumption, are often encouraged to purchase spirits and other articles for themselves which, although paid for by the householder, never appear in the weekly or monthly accounts rendered, and the dishonourable practice is much more prevalent, not only among the servants of large householders, but among well-to-do artisans than the defenders of the drink-seller are willing to allow. It is probably a dishonest usage that no law will stop, but its existence at least serves to warn the temperance reformer that a mere reduction in the number of public-houses will not necessarily bring as its sequel a reduction in the consumption of intoxicating drinks. Until the masses of the people rise to higher pleasures and acquire a sense of self-respect less rudimentary than they now possess, no law making or mending will do much to lessen the drink curse.

Look at the experience afforded by clubs. We are told that in the city of Norwich for every two public-houses closed at least one new club has been opened where drink can be had by so-called members to any extent. At many of these clubs the consumption of intoxicants is indulged in to an excess no mere publican dare permit under penalty of losing his licence. The debasing evil of drunkenness is thus encouraged and spread among the lower-middle and working classes of the community to a degree positively horrible to look upon. A mere police inspection of such drink dens will do little good. If the Government is sincere, as its members undoubtedly are, in wishing to abate the plague, it must devise stronger measures, stop proprietary clubs altogether, and among other remedies compel the committees of mutual clubs to send in returns of the average attendance of members and of strangers frequenting the place each month, together with the amount of drink consumed in that time. Some curb must be applied if the condition of a society minus public-houses is not to become worse than it is now. Clubs of all kinds, indeed, require more severe treatment than they now receive for the amount of drink consumed in the great clubs is often enough a painfully suggestive index of the habits of its members. Are there not great clubs in London itself in whose smoking rooms men the worse for liquor may be found any night in the week? We have heard of members of such clubs who habitually consume from one to two bottles of spirits per diem, and though they are doubtless the exception, drinking often prevails in such places to an extent no mere publican dare allow.

But these are mere side issues, and the question still is, what of the Government's new drink Bill and its

proposals for the reduction and redemption of licences? Is not the attitude of The Investors' Review changed towards the measure by the scenes of brutal savagery, the drink debauch, accompanying the Peckham election, by the Meux board's subscription letter, by the lamentations of Lord Burton or the fulminations of Mr. Cosmo Bonsor and all that clamour of rage, vituperation and revenge with which the mental ear has been deafened since the Bill was introduced? No, it is not changed by any of the manifestations of trade selfishness or indecency to which the nation is being treated, nor yet by the able and thoughtful arguments such as those of the *Manchester Guardian* in favour of the Bill. It is on the one hand perfectly true that the worst shouters against the Bill are found among the people whose brewery companies bear the most unwholesome reputation as dishonest company promotions—companies like Meux's, which long before the present Bill was heard of had admitted a loss of £800,000 of the original capitalisation, or like Mr. Bonsor's Watney, Combe, Reid perfection, at least half of whose original £15,000,000 of capital has long since disappeared, or—but what need to go on when there is hardly a single large joint-stocked brewery possessing tied houses, and few small ones, whose capitalisation is not more or less excessive, whose tied houses have not been taken over by the company at unreasonable valuations or at valuations often fraudulently inflated by the vendors with the intention to cheat for their private profit. All this is true enough, and the fact is also true that the manufacturers of all these knavishly inflated values had had ample warning of the yearly tenancy nature of the licences they so unblushingly trafficked in. As the leader writer in the *Manchester Guardian* reminded us in its issue of the 17th inst., Mr. Thos. Nash, legal adviser to the Licensed Victuallers' Association, warned "the trade" 24 years ago that "there was no such thing as a vested interest in a licence," and his view was in harmony with that enunciated in the Over Darwin case decision given in 1882, and supported in the "even more notorious Sharp *v.* Wakefield case." Yet in contempt of this warning, and relying upon popular heedlessness, these opinions and legal decisions only stimulated the company promoter to do his utmost, or impelled the former owner of public-house property to sell it to the careless investor as soon as he could and at the highest price he could get, on the assumption that his licence was a freehold.

The perpetrators of financial crimes of this kind get no sympathy from us whatever, and never have got any. Their misdeeds and the fruits thereof have been chronicled in The Investors' Review, and denounced without circumlocution year after year, and will continue to be exposed in the years to come. We regard the average vendor of brewery and tied house property to joint-stock companies as among the very worst specimens of that depraved class of men who live and grow rich by swindling their fellow citizens. But their conduct and the outcry of their victims have for all that little to do with the real question which the Government is called upon to decide, in the first place because no legal decision, however just and well-based on the actual state of the law, could or did alter the overmastering fact that for its own ends—the raising of revenue—successive Governments took care to do nothing effectual to emphasise the precarious tenure of the licence-holder. Exchequer necessities made the public-house inviolate, and it was the mere "curate in charge," so to say, who occupied the position of a tenant at will. Custom, therefore, overrode law, and sustained the investor, great and small, in his belief that when he invested his money in brewery debentures he possessed a genuine security.

If this be not the right view, why this "time limit" complication? The supporters of the Bill are proving too much, for if they are in the right there should be no question of time limit at all, for if the Government has the right and the law on its side now it can provide for the cancellation of licences as fast as it pleases without troubling itself in the least what becomes of the brewery share and debenture holder. The time limit and the compulsory provision for compensation laid upon the brewers are therefore unnecessary complications, having no real connection with a reduction in the facilities for getting drunk. By incorporating them in his Bill, Mr. Asquith has brought upon himself, not without giving cause, the charge of inconsistency, and the accusation of "socialist confiscation," and he is not likely to get out of his difficulties by any expedient short of a provision for compensation out of the abounding revenue of the State. Were his Bill in other respects good, one calculated to emancipate the people from slavery to the drink habit, and to free politics from the most degrading influence national interests could be swayed by, we should say "Pay the price, and end the power of the tankard." But the Bill conveys no assurance to the unprejudiced mind that it will do either of these things. As far as we can judge, if it becomes law it will have no appreciable effect in reforming the habits and tastes of the people, nor will it, as we have said before, emancipate politics from beer. Moreover, as regards a large part of the alleged grievances, there is no urgent call for any new legislation because the mischief is in the way to cure itself. The debased traffic in overvalued licences is bringing its own punishment, and the brewers now would be only too glad to drop many of their licences at once if they could find a decent pretext for so doing, because these possessions are a source of loss instead of profit. Can zealous ministers be really oblivious to the meaning of such a history as that of Allsopps, or to the general trend of the whole drink trade? If they are the nation must pay for their ignorance, that is all.

A word about the position of the innocent holder of brewery securities. Is he to be regarded as altogether a pariah, a being who by his investments has deprived himself of all rights or claims to consideration? That is how he is regarded by the reforming supporters of the Government, including his Grace of Canterbury. And for the life of us we cannot see why. A brewery security may be just as clean, and more wholesome morally than an investment in blood-smeared national debts, or in loans raised upon the security afforded by the helpless and voiceless Indian natives, or in Kaffir shares, whose profitableness may depend upon labour regulations and expedients revolting to the mind in their ruthless brutality. If it came to high or transcendental morals there is hardly an investment of any description to which some objection more or less plausible could not be brought, and on broad, commonsense, non-faddist or fanatic grounds, a holder of brewery debentures or brewery shares may be, and usually is, quite as honourable and respect worthy a person as the proudest bank shareholder who cultivates a sense of his own superiority. What justification, then, has the Government for penalising this large body of honest and honourable people? "They will not be hurt," the enthusiasts for what they call reform assert. But they have been hurt, they are being hurt, and if the Government Bill passes it looks as if no small part of their number may be nearly ruined. And even if not, the Government has no right to act towards any body of respectable citizens as if it mattered not whether they were ruined or not. From this point of view the Bill seems not merely unjust, but crude, and it will have to be either amended or dropped. If amended the Exchequer, *i.e.*, the taxpayer will have to pay the damage. But we had much rather see it disappear without hope of resurrection. For when all is done it remains the fact that the drink traffic will be a monopoly as long as the tax demands of the Government compel it to depend upon that traffic for £37,000,000 to £38,000,000 per annum.

Shawinigan Water and Power Company.—Earnings for February were $55,450, being at the rate of $665,400 per annum, compared with $42,571, or at the rate of $570,852 per annum a year ago.

Great Northern Railway.

By itself this is one of our smaller railways, the length of its owned lines being only 725 miles, brought up to 975 by 250 miles of lines joint owned. As the metropolitan link of the great East Coast route to Scotland, and as serving some of the most important of our South Yorkshire coalfields, the Great Northern none the less occupies an important, and in some respects dominating, position. It is the Southern outlet of the North-Eastern and North British Companies, and therefore deserves a place in the first group of English railway companies. Last year its gross income from all sources came to £6,276,255, or £216,211 more than in the previous year. Nearly the whole of this, however, disappeared as usual in augmented working expenses, the total of which was £4,113,532, or £196,283 more than in 1906. The company paid £19,730 more for maintenance of way and works, £143,712 more for locomotive power, £12,393 more on repairs, £28,543 more on traffic charges account, £11,657 more on general charges account, and £6,653 more for compensation. The total of the traffic expenses alone amounted to £1,130,000, which seems large for a company so small in mileage, but the figure is no doubt augmented by its position as the Southern link of a through route, and after all it comes to a smaller average per train mile run than the similar outlays of either the North-Western or Midland companies, which compete for the same kind of business.

When we come to analyse the sources of revenue we find the company earning from passengers, parcels, mails, a total of £1,565,260 in the past year, or £5,902 more than in 1906. Of this large total, however, first-class gave only £171,251, which was £48,207 less than the receipts from this source in the preceding year. Second-class gave so poor a return at £15,835 that it might as well be abolished, but the decrease in this instance was only £2,640, so that puny section is dying slowly. None the less the outlook would have been sombre enough but for the increase of £10,305 in the third-class traffic, whose total was £1,378,174. The season ticket traffic yielded £230,130 or £7,023 more, which shows uniformity with the experience of other companies. From merchandise the company received £1,862,235, or £17,888 more, but this was little compared to the growth shown by the mineral traffic from which the gross receipts were £136,864 more during the past year at a total of £1,155,043. This fact is significant because the mineral traffic on all our railways is likely to suffer considerably in the current year, if not for some time longer, and if we had any means of estimating the profitableness of the various branches of the business it might be possible to forecast what the results of its diminution in this one direction may be upon the nett revenue. Unfortunately we are completely in the dark upon points of this description, and can only mention the probable course of events as an inducement to those who follow the fortunes of our railways to watch whether the loss in gross mineral receipts affects the nett earnings as markedly as a loss in merchandise or passenger income might.

The nett revenue left after meeting all working expenses came to £2,160,724 from the working of the line or an increase of £19,929. Other sources of income gave £53,738, or £9,343 more, so that altogether the nett income of the company was increased by £29,272 and amounted to £2,214,462. Of this round figure debenture stock interest absorbed £455,453 or £3,376 more, and rents and leases, &c., took away another £198,625, an increase of £3,843, general interest charges alone having swept away £46,926. The total prior charges for the year on account of guaranteed and preference stocks amounted to £873,940, or £3,971 more. The ordinary stocks then got £674,523 or £23,679 more, the dividend on the deferred ordinary stock having been raised ¼ per cent. for the year to 2 per cent. as compared with 1¾ per cent. for 1906. It is noticeable that the fixed and interest charges continue to eat into the nett earnings, though only in a small way, and as the working expenses also increase year after year at a greater ratio than the gross income, the prospect is not at all reassuring to holders of the inferior stocks. Last year working charges amounted to 65.71 per cent. of its receipts, and that is a higher figure than any of its greater neighbours attained to.

In the matter of capital expenditure the Great Northern cannot stand alongside any of these neighbours, the total laid out to the end of last year having been only about £52,000,000. It is still spending, however, with considerable assiduity, the length of its lines considered, and added £376,455 to the total last year. Of this £135,257 went into lines open for traffic and £81,711 was laid out on new works. Upon rolling stock the year's capital expenditure was £63,313, making the total capital spent to date in that direction £7,856,123. It has also laid out £116,693 on docks and steamboats, the largest single item in this figure being £55,000 sunk in the never completed and now ruinous Sutton Bridge Dock. We have often called attention to that item in dealing with half-yearly reports because it is a signal example of the loose and regardless-of-consequences methods of our English railway management. Capital may be completely lost, but it iss carried as if alive and revenue yielding year after year, would be carried to the end of time if shareholders did not wake up and insist upon an overhaul and a writing down. How much of the imposing totals of capital expenditures by our English railway companies is really money lost we should not like to guess, but were the methods so virtuously recommended to the London County Council by those eminent accountants Messrs. Pixley and Peat enforced upon our English railways we fear a reduction of 20 per cent. on the total capital figuring in their accounts would not cover the depreciation Utopian purists of this description would require. As may be judged from the large mileage of part owned route, the Great Northern Company has contributed liberally to other undertakings, having subscribed up to the end of last year £7,720,000 in these directions, of which £96,173 fell within the year, it along with the Midland and Great Central being part owner of the Cheshire lines. And it also owns jointly with the Midland, lines in the east of England and North Norfolk.

Balance-sheet figures relating to capital show a comparatively modest overdraft on that account, amounting to £519,000 at the end of the year, against which the company held £993,000 of trust funds, including £162,224 of savings bank money, and £686,198 of superannuation moneys, besides £145,137 of insurance, pension, renewal and guarantee funds, a curious mixture, partly, however, invested away from the business or entered as if so. The balance-sheet further shows that the floating debt under sundry outstanding accounts was £384,487, but against this the company had traffic accounts due to it amounting to £877,000, so that statistically at least the balance-sheet does not look so unseemly as some. It is better than the exhibit made by several of its immediate neighbours.

Amongst minor items to be noted and regarded is the fact that the company has succeeded in reducing the burden of rates and taxes borne by it to £208,948, a decrease compared with 1906 of no less than £22,005. It should be added that the nominal increase in the company's capital amounts altogether to £8,528,871, but that the company deducts this before setting out the actual amount of capital received. This is a praiseworthy improvement in detail on the exhibit made by some of its neighbours. Thanks, no doubt, to the through character of the most important portion of the company's passenger traffic, it still keeps adding to its coaching stock out of capital, and for the past year six new first-class or composite coaches were put in use, and twenty-two new third-class coaches, the additions including one sleeper and one saloon coach. The balance-sheet shows that the company owed at

the end of the year £324,717 to contractors and tradesmen, in addition to the £148,043 due to other companies, and the total of its outstanding traffic accounts given above is exclusive of the amount due to it by the Clearing House and the Post Office, or of the £207,937 owing to it by other companies. The credit given to its general customers would thus appear to be large, but that is usual enough. As noted above, superannuation money to the amount of £90,000 has been invested and also £53,385 of savings bank money, these sums representing the cost price of the securities acquired, so that there has been no writing off for depreciation here more than on any other part of the company's multifarious sources of wastage.

Economic and Financial Notes.

Budget Prospects.

Were the figures for the remaining eight working days of the fiscal year to be as good as those of the past week the Chancellor of the Exchequer would have to deal with the largest surplus realised for many a day, for last week's income jumped to the dazzling figure of £7,120,000 or about £2,143,000 more than the gatherings for the corresponding week of last year. We cannot, however, look for any such abundance, because some gathered up balances as usual went to swell last week's total. The Post Office, for example, gave £1,790,000 as compared with £170,000 in the week ended March 23 last year, but this merely means that the departmental accumulations had then been paid up the week before, and leads to the inference that for the eight working days remaining the dribbles will be small from this source. There was also a sensible increase in estate duties, which gave £997,000 last week or about £767,000 more than in the same week of 1907. Excise also brought in the unusual total of £1,404,000 as compared with but £897,000 received in the same week last year, and the receipts from Customs were £68,000 larger at £618,000. Property and income-tax was £53,000 better too at £1,605,000, and the result is that the Imperial budget anticipations for the entire year have already been made good within £374,000 with eight working days still to be accounted for or three more than in 1906-7. Were the same daily rate of Treasury receipts to be reckoned on for these eight days the budget surplus would exceed £8,000,000, but we must not go guessing on any such basis. Taking, however, the average daily receipts for the past four weeks, it is not unreasonable to expect a surplus over and above the estimated expenditure for the coming year of from £6,000,000 to £6,500,000. That is to say the estimates of outgoings now all published and including the same amount of £11,200,000 to be paid to local bodies for next year as this provide for an expenditure of £153,000,000 in round figures, or a decrease of little more than £207,000 on the estimates for the current year, while the revenue on the basis just stated would amount to about £159,000,000. This is so comfortable a result that one almost hesitates to put it forward, but the probabilities undoubtedly lie in the direction of its attainment. The surplus netted can scarcely be much less than £5,000,000, and the most interesting question will be, what is Mr. Asquith going to do with it? Obviously his first duty is to reduce taxation. Our revenue is still collected largely upon a war basis and ought to be brought down. He should have enough elbow room in his surplus on any estimate to be able either to further reduce the tea duties or, if he prefers it, to abolish the sugar duties. That he will undertake any sweeping reform in our system of taxation is not to be anticipated, but reductions of a material description ought to be his first endeavour, and if he does not amongst the changes possible remove the war tax on brewers he might at least retain it for the sole purpose of providing a compensation fund to mitigate the blow given to the trade by the contemplated severe curtailment in the number of licensed houses—not licensed men, be it observed, but houses. In fact, with a surplus such as is now in prospect, a skilful Chancellor of the Exchequer might almost change the whole political outlook for his party and turn the present exasperation against the Ministry amongst the monied classes into, if not loyal support, at least good-tempered acquiescence in a Government they now curse daily up hill and down dale. Reduction in expenditure must also come some day, but it is perfectly useless to talk about anything of that kind in present circumstances with "old-age pensions" and other doles in contemplation.

The London and India Docks Purchase.

Mr. Lloyd George bids fair to be the most successful administrator of any member of the present Cabinet, and his conciliatory and reasonable attitude towards the dock interests in London affords one more proof of his business ability. He does not approach business questions in a doctrinaire mood, and being prepared to give and take, he makes progress, abates opposition, and reaches an agreement where many of his colleagues would fail. As it stands we can see no objection to the proposals for acquiring the property of the London and India Docks Company, a great undertaking which controls about 80 per cent. of the port accommodation. The bargain is a simple one in virtue of which the seven stocks of the dock company will be converted into two, viz., an "A" stock bearing 3 per cent. interest and taking priority, and a 4 per cent. "B" stock. Into these two securities the whole of the stocks of the dock company will be converted on the basis of par value down to and including the preferred ordinary. That is to say, the existing 3 per cent. "A," "B" and "C" debenture stocks of the company will be converted into a 3 per cent. "A" priority Port stock, and the "A" and "B" preference and preferred ordinary stocks will be converted into the 4 per cent. "B" Port stock by an exchange of securities pound for pound. The only difficulty on a simple plan of this kind that could have arisen had reference to the deferred ordinary stock, but that has been equitably surmounted by giving its holders 75 per cent. in the 4 per cent. "B" Port stock for every £100 nominal surrendered. That is a very good bargain for the holders of this stock, and not at all a bad one for the citizens of London or the Docks company as a whole. No doubt the deferred stock and the preferred also may have often seen lower prices than the 4 per cent. "B" stock is likely to sink to, but that really had little to do with the question at issue and still less with the object in view, which was to get the assent of the most powerful joint-stock interests connected with the Port of London to the surrender of their property, and it must not be forgotten that as recently as 1904 the preferred stock of the company touched 108¾, and that its price now is not far short of par. The deferred stock, too, which began life, so to say, in 1901 with a price as low as 38, has been as high as 88, and although the average dividend paid upon it for the past seven years has been little more than 1 per cent., while its holders will get 3 per cent. by the new arrangement, it must not be forgotten that the dividend was 3 per cent. for the past year and that holders now surrender their reversion. It should be added that the new port authority to be constituted under Mr. Lloyd George's Bill, about to be introduced, will have the option of redeeming Port stock at par at any time after twenty years from the date of transfer on giving reasonable notice. The new Act, we are also informed by the secretary of the London Docks Company, will not actually constitute the Port stock a special trustee stock, but it will enable trustees who are empowered to hold Dock stocks to continue their holdings in the substituted security.

The Japanese Budget.

An interesting summary of the income and outgo of the Japanese Empire for the twelve months ended January 31 last has been furnished from special official sources. The mere figures, however, do not teach so very much, because they fail to indicate with precision

the source of quite half the revenue. What is called the ordinary revenue amounted to 252,745,132 yen in the past year, which was 22,621,589 yen, or say £2,270,000, more than for the preceding year, and more than the entire increase thus shown came from the first item called "tax" which we cannot interpret. It gave an increase of 24,452,496 yen at 183,221,175 yen. All other sources of public revenue gave comparatively minute increases except the category described as "other internal taxes," the increase in which was 15,651,667 yen at a total of 69,559,493 yen, and stamp receipts, the falling off in which was 5,258,041 yen, to a total of 18,576,290 yen. The significant fact, however, about the figures of ordinary income is that they did not provide half the amount shown as the total receipts for the year. This total was 596,334,650 yen or 302,171,630 yen more than the income of the preceding year, but amongst the items going to swell the figures to this magnitude there is 212,739,717 yen described as "transferred from surplus from special accounts for extraordinary war expenses." That is to say, this money represents the proceeds of unspent loans, or part thereof, and it is probable enough that the surplus of 65,975,447 yen or 8,814,953 yen more than in the previous year described as "surplus of the previous year transferred" is also a product of borrowing, and the only item of any importance amongst the extraordinary receipts not loan money is 47,452,485 yen representing the money paid to Japan by Russia for the cost of maintaining Russian prisoners of war. When we come to the expenditure, moreover, we find a nett increase of 56,506,622 yen, or nearly £6,000,000, in spite of a small decrease of 1,518,742 yen in the ordinary expenditure, which has been brought down to rather less than £28,000,000 or 276,956,104 yen. It is the extraordinary expenditure therefore which is mounting and the increase in that for the year was no less than 58,025,364 yen, the total being 132,707,758 yen, bringing the entire expenditure for the year up to 409,663,863 yen, or about £41,000,000. Even so, however, there would appear to be something like £20,000,000 of unspent borrowed money still left to protect the finances of Japan from shocks, trials and adversities during the current year, and perhaps for some years to come, so that the only point one has to be doubtful about is the capacity of the ordinary revenue to sustain the ordinary expenditure. In the past year the excess of ordinary expenditure over receipts was 34,211,000 yen or nearly £3,500,000, and we fear this shortcoming is more likely to increase than to diminish in coming years unless the Government of Japan can see its way to slacken the pace at which it is rearming and preparing for another struggle for mastery in the Far East. We have the greatest sympathy with Japan in the difficulties that have sprung up around her since the war ended. They have arisen largely because the war really settled nothing, the result being at best a drawn battle. Japan was sufficiently victorious to demonstrate her fighting capacity and the ability of her commanders on land and sea to handle troops and ships in the European manner and according to the latest methods in use, but she did not beat Russia to the ground nor for more than a moment stay the onward march of the Russian people towards the Pacific. Already Russia has consolidated herself in Northern Manchuria, strengthened her position in all the regions of the north, fortified Vladivostock to an extent that makes it far more impregnable than ever Port Arthur was, at least if we are to believe Mr. Putnam Weale, who visited it recently and records his impressions in his latest book. Japan is, therefore, kept on the alert and at the same time goaded to make almost superhuman exertions in order to conquer foreign trade and to develop the resources of the empire so as to be able to meet the crushing charges imposed upon her people by the expenditure involved by the war. That she will succeed in overcoming her financial difficulties we do not doubt, except upon the supposition that the continued expansion of her armament both on land and sea added to the enormous charges imposed for the debt, charges to some extent unwisely heavy at the present time, will prove too much for the nation's strength. Because of the anxiety of the Government to redeem debt, it is overloading the people, and it is the pace that kills. We feel sure confidence would be greater in the future of the young empire if it did not go so fast. Russia will be in no position for many years to come to renew the conflict, and will have plenty of domestic troubles to occupy the attention of her statesmen from now onward. No other Power is really hostile to Japan, and none is likely to become hostile unless the aggressiveness of the Japanese in pushing their wares into all markets, in competing for the ocean carrying trade of the East and in hustling up China or coercing Korea, should bring enemies into the field. We do not believe that there is the slightest foundation for the stories current about Japanese designs on the Philippines, or that the wanderings and junketings of the United States fleet in the Pacific have anything more behind them than a desire to show the world what a fine fleet it is. Therefore Japan might cut down its extraordinary expenditure on various heads, especially under debt redemption, and ease the strain upon the war-worn and over-taxed people with no danger to her independence.

Professional Accountants upon the Figures of the London County Council Tramways.

There was no other course open for the victors at the last County Council election. They and their unscrupulous wild Indians of the Press roundly charged the late majority of the Council with cooking the accounts of the Tramway system whose success as a public undertaking was already so emphatic as to excite unreasoning envy and rage. Why it should be so we do not know, but there the fact was. All sorts of insinuations were made against the honour and business capacity of the Progressive majority of the old Council, and exposure was threatened which was to dissipate their reputations for ever. Therefore, when the triumph of the self-styled reformers came about they had to get in chartered accountants to go through the books of the Tramway department and make a report so as to save their face. The report has now been issued, more than a year after all these charges were levelled at the men who had initiated and carried on the public-spirited policy of the Council since its start. Two eminent men in their profession, Messrs. William B. Peat and Francis Pixley, have gone into the accounts, and now deliver judgment. Have they said anything whatever to warrant the accusations made against the late County Council? They have not said one word; not a single mistake, still less malversation, has been discovered and brought to light by these gentlemen; nothing has been perverted or misstated. Not only are the accounts accurate so far as capital expenditure is concerned, but the profits shown in the various published statements are exactly as originally given. The allocations to reserve and to depreciation, or to the redemption of the debt of the Council, are all likewise in accordance with the published accounts.

This is rather a disastrous result to follow so much mud-throwing and misrepresentation, but the accountants no doubt felt honourably bound to do something to screen the unscrupulous methods adopted by the reactionaries who have got hold of the Government of London to its hurt, and in their ingenuity they fall back chiefly upon the question of the valuation of the tramways. Everything would appear to be all right with the electric portion of the line, even according to their view, but these eminent gentlemen venture upon the assertion that the capital spent upon the horse system taken over and now supplanted, or in course of being supplanted, ought to be treated as dead loss and written off. If this were done the undertaking would for the time being show a heavy deficiency. "The Council," they say, "includes in its capital account

up to March 31, 1907, the outlay on both the horse traction and the electric traction tramways the horse traction having cost £2,380,737, and the electric £4,356,001." In their opinion this is not sound, and the Council ought to have written off £1,017,942 as the original cost of the permanent way, including goodwill, of the old horse traction system, because the old track has been replaced by a new one. They would also like to see some other items written off, and after allowing for what had been got back by the sale of old materials would, according to their scheme, bring the Council accounts out to the bad by £1,027,652 lost on capital account. We make the present majority of the Council welcome to this recommendation, and as there are company directors amongst them we trust they will take the lesson to heart, and apply a similar rigid purism to the adjustment of capital accounts in which they are personally interested. That the money has been spent is no doubt true, and that the County Council had to pay a very full price for much of the horse traction system taken over by it from the various companies that originally laid it down, is also true, but that this sum, whatever it may have been, should be at once charged against profit and loss when the Council's whole system of finance is based upon the regular and systematic redemption of its tramway debt within a given period of years, is a rather pitiful absurdity. Messrs. Pixley and Peat must have been very hard put to indeed before they lighted upon a financial mare's nest of this pitiful description. There are many other recommendations of a finicking kind, more or less to the same purport, but take it as a whole this report, disinterestedly hostile to the former management of the tramway system as it is, and undertaken for the purpose of sustaining the brutally false charges made against the men who built up the local government of London, is an excellent justification of their work and of the probity of their system of finance. We shall now take delight in noting the application of their principles by these accountants to the balance-sheets they audit. Mr. Peat at least should have something refreshing to say about the accounts of the Metropolitan Railway.

The Savoy Hotel, Limited.

We do not augur well for the prospects of this great company's business in the current year, and have again, we regret to say, to take a less sanguine view of its position and prospects than the directors. They are always abounding in hope, and tell us that the result of the past financial year's trading again compares favourably with that of the preceding year, the balance to the credit of the trading account being the largest since the Savoy extensions were completed. This is no doubt so, but the increase in nett income was only £1,379 at £160,420. With the balance of £6,366 brought forward the total amount available for distribution was greater by only £1,885 or so at £166,786, and of this £952 more was taken away by debenture, mortgage, and other interest, which amounted to £94,283. The directors, however, give the ordinary shares 5 per cent. for the year, and devote £13,060 to the reduction of the mortgage and debenture loans of the company, making £51,507 thus applied out of profits during the past five years. Then £2,000 is reserved for doubtful debts, and £2,500 set aside for depreciation of the power station and machinery, while the general reserve is augmented by £15,000. All this done, and the preference and ordinary dividends paid, £7,054 will be left to carry forward. There is thus progress of a kind, but it is minute, and we have bad times now to encounter when the expensive class of hotel and catering businesses are likely to suffer. The directors, moreover, continue to spend money, and the total valuation of its properties in London and Rome exclusive of prior lien mortgages on some of them taken over by the company is about £2,420,000. Debentures and mortgages directly the obligation of the Savoy Hotel Company amount to £1,731,363 after allowing for £16,000 redeemed, and in addition the company is liable for a mortgage of £219,745 on Claridge's Hotel (leasehold), and for one of £116,731 on the leasehold Berkeley Hotel, upon which it has also spent £68,559 of additional money and is still spending. Moreover, some branches of the business have not been quite good even last year. The Savoy Hotel itself, with its annexes, did better than in any previous year, and Simpson's also did well, while all the shops on the Strand front are now let, but Claridge's Hotel gave a less good result, and the improvement in the returns from the Berkeley Hotel was insignificant. As for the Grand Hotel, Rome, it showed a falling off owing to the marked reduction in the number of American visitors. Signs of reaction are thus not wanting even according to the story of the board, and we should have been glad to see the company's free resources better husbanded, for the reserves altogether amount to no more than £152,121, including the accumulations made for the redemption of the first charges on the Claridge and Berkeley Hotels, and the Savoy Company's own reserve is barely £119,000. Moreover, it owes on rents and to sundry creditors £171,424, and the whole of its stocks and debtor balances, after providing for bad debts, come to only £143,305, while cash stands at £40,893. There will soon be a pinch if earnings fall off. Gross receipts, it may be added, amounted to £569,711, including £35,410 from rents, &c., but the working expenses and outgoings for provisions, wines, and so forth took away £409,291 of this. Various improvements are pending at the Savoy itself, and may help to augment its business. Also they may not just yet.

United Collieries.

We are happy to note the progress made by this unfortunate enterprise towards a better order of things, but it will not be wise to look for a continuance of the present rate of recovery. It is quite probable that 1907 was top notch for a good many years to come, and trade can never be good enough to free the company from the consequences of gross capital inflation when it was in the making. Schemes and modifications without number have been brought forward since the formation of the combine, and the agreement of July, 1904, was hit upon as the best plan to save the concern from irretrievable disaster. Its provisions have been referred to and commented upon on many previous occasions, but sundry alterations were sought and approved in the summer of last year, in order to assist the company with funds for the development of its properties and leases. In this way the company obtained permission to retain out of its annual profits sums not exceeding £60,000 in all for capital expenditure and development, and further, that when all arrears of interest on the first debentures have been paid a sum not exceeding £25,000 may be kept back for the same purposes before making provision for payments on account of the sinking fund. We think the debenture-holders showed wisdom in agreeing to these proposals, more particularly as no depreciation can be written off until all interest and sinking fund arrears on the first debentures have been made up. From the profits of the past year ended December 31 a sum of £30,948 was taken for capital expenditure, and when this had been done the directors were still able to make substantial progress with the liquidation of interest arrears. Two years' payments were made during the period under review from the revenue of the year, and one-half year from the 1906 income, while another half-year will be paid on June 1 next, so that since the issue of the last half-yearly report three years' interest will have been paid or provided. Output of coal showed a further increase of 196,107 tons, and the gross profit on trading account increased £134,502 to £222,345. Revenue from all sources was £222,784, an increase of 196,107 tons, and the gross profit on trading account increased £134,502 to £222,345. Revenue from all sources was £222,784, an advance of £133,986, and after providing administrative and

other charges, including prior lien interest, there remains a balance of £152,116. Discount on debentures written off was £4,798, and when all the payments mentioned have been made it is possible to reduce the debit at profit and loss from £52,841 to £50,264. With the exception of a drop of £42,871 to £162,021 in the postponed interest account changes in the balance-sheet are not important. Capital expenditure came to £24,248, raising the total to £2,804,101, and consisted largely of the completion of new pits at Blackrigg, Woodmuir, and Knownoblehill, with certain other outlays for machinery and plant. Sinking operations and developments are being proceeded with in other directions, and the directors have continued the introduction of coal cutting machinery where it has been possible to do so to advantage. They have also proceeded with the policy of renouncing leases which have proved to be unprofitable, doubtless a proper course, but one that can only be met by capital reorganisation at some future date. Loose plant shows an increase of £17,250 to £141,476, and stocks of coal, &c., have advanced £11,491 to £65,471. A total sum of £129,489 is due to sundry creditors against debtors £139,164, bills £595, and cash £26,945. The outlook for the current year cannot be regarded with great confidence, but the company is declared to be in a better position to withstand a time of depression than in former years, and the directors will not hesitate to close down unprofitable pits where the conditions of working render that course desirable, which is both heroic and wise.

Rio Tinto Company.

The state of the copper markets of the world during the last six months has caused the annual report of this great company to be anticipated with unusual interest. Add to that the many and remarkable rumours afloat within the same period as to the condition of affairs on the property, and the document becomes one of the most important ever issued by the directors. Now that we have it, the stories circulated can be judged at their proper worth, and we are entitled to assume that nothing likely to prove in the slightest way detrimental to the future operations of the concern has taken place. It is admitted that a larger number than usual of houses adjoining the south lode ore body have been ruined by subsidences caused by the excessive rainfall of the past winter, but the cost of erecting these elsewhere is immaterial, as compared with the value of the ore, which can now be mined by an extension of the low cost opencast system. From which it is almost made to appear that subsidences are helpful rather than otherwise. The rumours that the mines might have to cease operations, some said temporarily, others for two or three years, and that numbers of workmen declined to go into certain parts of the workings can be summarily dismissed because undoubtedly the report would have dealt fully with these matters had they a shadow of foundation. As a matter of fact, a deputation of directors has quite recently returned from Spain, where they found all matters of moment progressing very well. Except in regard to the price of copper, the board reports its entire satisfaction with the company's affairs in general, and its prospects for the future. Nothing can be plainer than that, and the stories concerning the fire in the mine towards the close of last summer must also have been of the wildest kind, as it is palpably untrue that the sulphur contents of a million tons of ore were destroyed. What puzzles us is how these sensational statements get into circulation, and it might be worth while to endeavour to trace their origin; up to the present the directors have merely ignored them.

The quantity of pyrites extracted during 1907 was 1,906,948 tons, a slight decrease compared with the previous year, of which 641,858 was for shipment, and 1,265,090 for local treatment. Cupreous ore invoiced to consumers was 607,944 tons against 632,307 tons in 1906 and 660,723 in 1905, and of the year's deliveries Germany took 332,259 tons, the United Kingdom 116,035 tons, and the United States 159,650 tons. The deliveries of sulphur ore, which had been 308,184 tons in 1905, and 477,843 tons in 1906, were in 1907 619,814 tons. Production of copper showed a substantial reduction owing to the shortage of water during the dry months, the amount secured by treatment at the mine being 21,251 tons, and the fine copper in pyrites shipped 11,066 tons, an aggregate of 32,317 tons against 34,098 tons, sales were 31,361 tons against 33,079 tons, and here we get a notable omission. There is no mention of the average price realised, a matter of the highest importance, and, so far as we can remember, the figures have never been absent from any previous report. In 1906 the average was £87 9s. 3d. against £69 12s. in 1905, and £67 13s. 6d. in 1904. It will be interesting to see what explanation the chairman gives for this departure from time-honoured custom. Expenses of every kind having been provided for the profit on sales and other items of revenue make up a total of £1,875,962, including the balance brought forward. For 1906 the figure was £2,268,707 and after deducting £37,205 written off extension, development and overburden account, the sum left is £1,838,677, a decline of £399,482. Depreciation of securities, plant gone out of use written down, and £4,000 or £1,000 less placed to the provident fund require an aggregate amount of £94,081 against £66,892, and after meeting the preference dividend the dividend on the ordinary shares will be 87½ per cent., a decline of 22½ per cent. compared with the previous year, leaving to be carried forward a sum of £26,784.

It is satisfactory to learn that the company is able to earn fair profits with copper at its present price, also that European consumption is good, and when confidence becomes more thoroughly re-established in the United States better prices, say the directors, may be looked for. Unfortunately the greatest possible doubts exist as to when affairs in America will again become normal, and the shrinkage in profits to be faced on account of the current year must in any case be very severe. The general development of the property appears to be quite satisfactory, and the water difficulty cannot recur for a good long time at any rate. The heavy rains of the past winter have filled the old reservoirs, and partially filled the new one now nearing completion, so that requirements for the next two or three years are practically assured. Capital additions during 1907 were on a moderately large scale, and the balance-sheet valuation of the property is now £2,982,850 against which the reserve stands at £500,000. Investments in Consols and other securities are £623,350, but the cash balance is very small at £51,364 and compares with £483,175.

American Business Notes.

New York bank and trust averages as published continue to support the spring campaign for the rise which is being so strenuously conducted on Wall Street. Last week's Associated Bank averages showed an increase of about £187,000 in loans, a mere trifle, however, in comparison with the increase of £1,500,000 in the specie average and of about £366,000 in the greenbacks held. Thanks to these three augmentations, deposits have risen by £2,050,200, and in spite of that increase the surplus reserve, thanks to the accumulation of idle currency, has risen by £1,352,000 to £7,485,000 against only £942,000 a year ago. Outside banks and trusts also make an important exhibit to a certain extent, but we begin to grudge space given to these figures because they must be delusive for reasons already mentioned. Still the record may be useful one day so we repeat the figures. Loans and investments amount to £155,068,000, an increase of £278,200, and deposit averages rose to £125,093,400 or £457,600 more. The total specie held is also up £13,600 at £8,682,600, but there is a slight decline of £38,600 in the average stock of greenbacks, which is £2,035,400. According to the New York telegrams this reserve of £10,618,000 in all represents 27.1 per cent. of the deposit liabilities

against 26.5 per cent. the previous week, but the figures as given indicate a reserve of barely 8½ per cent. against deposit liabilities, so that we still remain in ignorance as to what constitutes the real liability against which the visible reserve stands.

Meanwhile business continues to shrink and the Bank clearings, as summed up by Bradstreet's Agency, showed a decrease of 46.9 per cent. for New York and of 38.3 per cent. for the entire country outside New York in the week ending March 21st. Thanks to the accumulations of idle bankers' money and to the diminished mercantile requirements, the price of floating balances on Wall Street hangs around between 1½ and 2 per cent., prompting gamblers to renew their play and create dangerous risks once more.

Until we have the details it may be indiscreet to criticise at any great length the accounts of the United States Steel Corporation for 1907, but a summary of the figures as cabled makes as usual an imposing show and illustrates the unbridled zeal of the spenders of borrowed money during the greater part of the year. So tremendous was the business done by this company in brittle rails and every other form of iron and steel production in the early part of the year that the collapse of business in the last two months of it left very little trace on the accounts of the twelve months. Gross earnings amounted to no less than £151,403,000 and showed an increase of £12,052,000 on the earnings of 1906, but as in the case of the railways, this enlarged gross revenue was mostly swept away by increased expenses, wages, coal and materials, all, especially wages, having risen to such an extent that the nett earnings of £32,193,000 brought out were only £868,200 more than those of the previous year. These, moreover, were not real nett earnings, because the wastage is so great in connection wtih this business that about £22,000,000 had to be taken off to pay for new works and renewals, new works having absorbed £10,800,000, and maintenance, renewals and repairs, &c., £11,166,000 in the past year, or £800,000 more in the one case and about £1,500,000 more in the other, but the board was none the less able to meet all charges and to give the ordinary shares 1 per cent. for the year, and still had a balance over of £12,548,400, which was only £1,288,000 less than the surplus of the preceding year. Cash, however, shows a diminution of £2,735,000 at £10,793,000, and yet the final surplus shown on the accounts was £488,000 up at £3,036,000.

Amongst the items of information added are a statement that since the trust was formed no less than £41,215,000 has been taken from revenue to pay for new construction and that 22,403,000 tons of ore were mined last year as compared with 20,645,000 tons in 1906. The amount paid in wages and salaries was £2,612,000 more at £32,165,000, so that the benefits accruing from the shelter given by the tariff to this corporation were substantial to a degree. There were, however, difficulties ahead even last year, and the Steel Trust was only able to maintain prices at home and force materials upon the domestic consumer at excessive price by exporting the surplus product. The company's exports, presumably of steel, amounted to 1,014,000 tons last year, a decrease of 6 per cent., but the gross receipts increased by 16 per cent. It will be another story this year with prices everywhere shrinking, and the directors are plainly aware of the fact, for they plead that in order to obtain maximum benefits from exports during times of reduced activity in the domestic market, they think it wise to sell continuously in the neutral markets of the world, "even at times when the foreign trade conditions do not result in prices so near those ruling at home as prevailed last year." A most delicate way of indicating the intention to dump abroad at any sacrifice in order to prevent a break in prices at home. Mr. Cory, the president of this gigantic industrial combination, cheered the market by intimating that the March orders received were 25 per cent. more than the February orders, and the February orders 25 per cent. more than those of January, and the January in turn 25 per cent. higher than the December orders, but there is very little real encouragement in that statement, because in December little or no new business at all was done, and the railways are now buying only the routine quantities necessary to prevent their lines from becoming dangerous to travel over. They have compelled the Steel Trust and other rail producers to improve the quality of their goods so as in some degree to diminish the annual slaughter on the lines, and orders held back have therefore been given out.

On the question of profits and cost interesting particulars illustrative of the benefits of protection to the few at the expense of the many were recently published by the *Chicago Daily Tribune*. They are to this effect, the figures being quoted from the last *Quarterly Journal of Economics*, which states that the United States Steel Corporation can put down ore at Pittsburg for about $3 per ton, its coke and limestone costing less than $3 more, while white labour and maintenance charges at the furnace mean another $1 per ton, or $7 in all. Allowing for everything, the total cost of producing a ton of iron does not exceed $8 to this combination, and yet for many months in 1906-7 its price to the consumer was $20 per ton. Equally marked is the discrepancy between the selling price of steel, and the cost of production. To convert pig-iron into steel costs $7 per ton in the less efficient plants, but at Pittsburg the cost is about $4 per ton, and the rolling of rails from ingots in the modern mill adds another $2, so that at the outside the entire cost of manufacture, including the $8 assumed as the cost of making the pig-iron does not exceed $15 per ton. The Steel Trust could, therefore, sell its steel rails at $16 per ton with a very fair profit, but it demands and gets $28, or 75 per cent. more than the lowest remunerative figure. Hence the magnificent revenues it shows. But the import duty on steel comes to only $6.72 cents per long ton, while the profit grabbed by the Trust is $13 per ton, and the contention of the *Tribune* is that it does not require any duty at all to enable it to carry on its business at a reasonable profit. It simply utilises its monoply strength to force the railroads of the country to pay excessive prices for their rails. At $20 per ton, or $8 less than it charges, its profits would be handsome in the extreme, but as long as United States railroads can raise money in Europe with which to pay the Steel Trust's monstrous charges, there will be no redress—unless, of course, the people revolt.

Only preliminary figures have so far come over relating to the annual report of the New York Central Railroad Company, but they are worth giving for reference. The gross receipts of its own system amounted to £19,674,000, an increase of about £1,256,000 on the receipts for 1906, but the nett income of £4,513,200 shows a decline of £652,400, so that actually the company was well on to £2,000,000 to the bad on the year's business. It, however, received an increased income from its investments in the Lake Shore, Michigan, Southern, and other properties, which were instructed to pay increased dividends, so that the aggregate nett revenue of the year was £101,200 better at £6,808,400. None the less, and after paying the reduced dividend for the year, the final surplus left was but £13,400.

It is announced that the Hammond Steel Car Company has shut down its works, throwing 5,000 hands out of employment. On the other hand, the American Woollen Company has declared a regular quarterly dividend of 1¾ per cent. For the first time in its history the American Sugar Refining Company has given some particulars about its business. They are of the scaffold-pole order, but it informed those concerned and the curious that the nett receipts for 1907 came to £1,750,000, and that the nett surplus after all charges were met amounted to about £490,000. The Union Pacific board is preparing the way for an

issue of new mortgage bonds to the modest amount of £10,000,000 it is said. The Knickerbocker Trust has opened its doors again, and may be able to hoard its waste paper after all.

Passing Events.

In answer to Mr. Swift MacNeill, who asked him on Tuesday to account for the £9 2s. 11d. per cent. difference shown in the average cost price of Consols to the Post Office Savings Bank compared with the average shown by the trustee savings banks, a difference unfavourable to the Post Office, Mr. Asquith gave an ingenious and, on the whole, not unsatisfactory reply. The trustee savings banks, he pointed out, began to buy the stock in 1817, and the Post Office did not begin until 1861. The long interval naturally gave a great advantage to the older banks, especially in recent years when the price of Consols was abnormally high. From 1895 to 1899 the Post Office bought £25,000,000, while the trustee savings banks bought only £5,700,000. This is no doubt all true enough, but the answer only illustrates the futility of all this State promoted "thrift" business. Nobody was helped by these purchases. The habit of collecting savings and putting these into dead stock representing money long spent and done with, dead money in fact, never helped any industry in the country, never fructified in the hands of the people. It only assisted the market in keeping prices high on the Stock Exchange, and afforded the Governments of the day opportunities to carry out financial operations often enough hurtful to the community as a whole. Therefore, we should like to see Mr. MacNeill, or some other ingenious member, ply the Chancellor of the Exchequer with questions directed to bring out the waste thus shown, and the danger to the taxpayer of these purchases and accumulations of securities that rise and fall through political influences, the state of the Money market, and so on. It might be possible to drive into the official mind a higher ideal with regard to savings bank money, and to induce the Government to elaborate some method by which the savings of the people could be turned to fructifying uses.

Mr. Buxton, the Postmaster-General, in reply to Mr. Laidlaw, gave some particulars with regard to the timing of Indian mails under the new contract now in operation. According to these arrangements the homeward mails are delivered at Brindisi at eight p.m. on Wednesdays and received in London at ten p.m. on Fridays. How much acceleration this implies we do not know, but in the monsoon season, May to October, the time is 36 hours later. Now, the London hour is, any way, too late. What is the use of letters that arrive late on Friday night? They cannot be dealt with in time for the outgoing mail at present made up on Friday evening. Either the time of delivery in London should be accelerated, or the hour and day at which mails from London to the East are despatched should be put back. We should think improvements might be made both ways, and that it should be easily possible to deliver the arriving Indian mails by the first post on Friday morning, and to postpone the despatch of the outgoing mails to, say, Saturday afternoon, or, better still, Monday morning. The time occupied in transit between India and the United Kingdom is now so much shorter than it used to be that changes of this description ought not to be difficult to arrange, and the advantage they would give to business men is a consideration which ought to have some weight with the Government.

The Russian Minister of Finance, M. Kokovtsoff, has been unfolding to the Duma the new Siberian railway scheme. It is politically indispensable, he told the legislature, that a second trans-Siberian line must be built, and also a line down the north bank of the Amur river. The construction of neither of these roads can be postponed, he declared, and it will take about five years to build them. He estimated the approximate cost at about £36,000,000, or between £7,000,000 or £8,000,000 per annum. This would be in addition to the outlay of about £32,000,000 on national defence during the next four or five years, so Russia is not to have a period of rest any more than Japan, and, the Minister added, "famine is perennial in Russia," consequently there are "three branches of extraordinary expenditure which will have to be provided for, and which will involve a yearly outlay of £15,000,000." New loans are accordingly inevitable, only the Minister has again and again told us that the money is to be raised at home. We shall be curious to see how he does it.

What ails these unhappy gentlemen in the House of Commons who keep badgering the Government about Chinese labour? They have even been deserted by their friends in South Africa, and if they would only study the facts it might save their worryings. Here is Mr. Louis Reyersbach, who presided at the annual meeting of the Rand Mines, Limited, held on Wednesday in Johannesburg, giving details of working costs which demonstrate that the business has improved remarkably in profitableness in proportion as the Chinese have been withdrawn. For the past year, he said, out of every sovereign's worth of gold produced, 12s. 7d. was spent in winning it, and 4s. 8d. was actually divided. "But this [divisible] proportion will increase in the future," he says, partly because of the aids to economy furnished by amalgamations, but more because working expenses are coming down. The working costs of the Rand Mine group had been £1 1s. 2d. for the past year, which was 1s. 4d. per ton lower than in 1906, and by February of this year the costs had been reduced to 19s. 10d. per ton, and all the while the Chinese were being sent home as their contracts expired. What, then, do these malcontents desire? There is plenty of native labour, said Mr. Reyersbach, and he even thought it possible that something might be done to give work to the unemployed whites. They have been chastened, and will doubtless work cheap now!

A correspondent, who is well informed always, gives us the following account of the position of Japanese Exchequer bonds:—"There are three series of 5 per cent. Exchequer bonds now current, the first and second for 100 million yen each, the third for 80 million yen. The second and third series do not mature until 1910 and 1911 respectively, and there is therefore no reason why the Japanese Government should make any arrangements for redeeming them now, and they are not likely to do so. The first series, however, amounting to 100 million yen, matures in December, 1908, and it is no doubt these bonds to which the rumour in question refers. Of course, the Japanese Government is not in the habit of proclaiming its intentions a long while in advance, but it is probable that it will arrange to redeem the bonds before that date. Any holder who wishes for repayment at the end of the year will, of course, be able to get it, but the probability is that attractive terms, of either repayment or conversion, will be offered before then."

A circular has reached us from dissatisfied shareholders in M. B. Foster and Sons, Limited, dealing with the annual report and balance-sheet for 1907, and asking support from the shareholders in efforts to get at the bottom of the causes which have brought the company to such a desperate pass and to reform the management. We have not seen the report of this company for the past year. It used to come to us regularly enough, but it is not to be wondered at that the board should now keep it out of our hands, if what is said in the circular issued by Messrs. Harris, Stubbs and Vanderpant is true. They tell us that the profit for the year earned upon an issued capital of £240,000 was only £544, and that the arrears of dividend up to December 31 last on the cumulative preference shares amounted to £24,000. M. B. Foster and Sons used to do a very fine colonial business, and from the very start untoward events falsified the anticipations of the prospectus, so that the company has been, with very little intermission, going from bad to worse all through. The fault may not lie with the present board. Those who floated the company may be to blame. Whatever the reasons for the disastrous conditions now prevailing, the shareholders ought to support the men who have sent out this circular, and get at the bottom of the trouble.

Continental Memoranda.

All Continental markets are still more or less weighed down. German bourses are overshadowed by the approach of the date of issue for the Imperial and probably enough the Prussian loans, and the industrial position there is by no means improving. Doubts also seem to be expressed about the prudence of banking management, and it is remarked that some of the banks would have shown pitiful results in the way of profits for 1907 had it not been for the very high rates prevailing for money towards the end of the year. In proof of this an analysis of the figures of nine banks, all of them more or less important, and headed by the Deutsche Bank, shows a decrease in the nett profits of seven out of the nine; in fact, the Deutsche Bank and the Disconto-Gesellschaft alone show increases, and that of the Disconto is very small, although it managed to keep its dividend at 9 per cent.

As for Paris, although prices seem fairly good there, and although toying goes on with Tinto shares and other Bourse favourites, the participation by the public is quite insignificant, and during the past week market and public alike have had a bad shake through the failure of a company promoter named Rochette. This young man, for he is only 32, is said to have had a wonderful carer, beginning life as a servant in the station refreshment room at Mellun, and rising within a few years to a position of great notoriety as a promoter of companies, amongst them a Franco-Spanish Bank. At first, after his arrest, rumours about losses were of the most exaggerated description. People talked about the arrest and the consequent stoppage of the company floating and share punting business as the worst blow to the French since Panama. It is happily nothing like that, although nasty enough, and likely to be a source of considerable loss to that class of speculative small investor which always rushes in first when any new bait is thrown to him. Upon the official Bourse his manufactures in the form of company shares had no recognition whatever, and the utmost the outside market is likely to lose by him is now put at about £120,000. But the losses of the public may run into a million or two, although we should hope not, since much of the business and fireworks display of premiums on shares and so on were the result of M. Rochette's own manœuvres. His Franco-Spanish Bank, however, declares itself solvent and seems to have some cash. But one firm has failed in consequence of its connection with the man, and if he got many people to help him in his price rigging there will be a good deal of trouble to come out. The nominal capital of his companies is said to be £3,000,000, and he seems to have rigged prices more than once to a total of over £4,500,000. M. Rochette was quite up to date.

No abatement in the state of crisis has come to the Diamond market, and it is probable that, with the shutting down of the Dutoitspan Mine and other stoppages or curtailments of production, the total output of South African diamonds for this year may not be half what it was last year when the round figure of £10,000,000 was reached in spite of the falling off at the end of the year. Certainly it would be impossible to place more than £5,000,000 worth of new diamonds on the world's markets this year, for the stock in hand is put at £6,000,000 by an Antwerp cutter, and that figure probably refers only to the stock held by the principal syndicates. What the second, third and fourth rank groups hold there is no means of knowing. We should put the total very much higher than that.

Rumours persist on the Paris Bourse that the Japanese Government is contemplating further loan issues, but it will be difficult to place any of them in Europe, and we sincerely hope for Japan's own sake that the attempt will not be made this year.

Apparently Messrs. Baring Bros., with their associates Messrs. Hope, of Amsterdam, managed to take the Moscow loan out of the hands of French houses who had been after it, but Paris still hopes a good deal of the scrip will find its way into the hands of French investors, and that is likely enough, partly because Russian securities continue rather unpopular here. Moscow, however, ought to be able to give as good security for whatever it borrows as any city in Europe, for it is one of the wealthiest amongst them.

Coal is at last coming down in price on the Continent, and in Germany coal syndicates have agreed to reduce the cost of the fuel employed in the manufacture of goods to be exported by 1½ marks per ton. That is not much of a concession, but monopolists can do as they like with their own, and the public must suffer. In France, however, the price has not yet been brought down, although Belgium has either followed or set the example to Germany, and lower prices must come everywhere, so that the yield of coal mining shares is likely to dwindle for a time.

During 1907 there were 12,919 applications for bankruptcy proceedings and 9,888 announcements of failures in Germany, amongst them being 445 joint-stock companies. The liabilities of these companies amounted frequently to millions, and their failure necessarily had a decided influence in weakening the economic position. Compared with 1906 the increase in number was upwards of 1,000.

French investors have not done well by their participations in the fortune of Russian industrial companies. At present the shares of such appear to be attracting considerable attention on the Bourse, but their prices have not improved much, and it was only the announcement of that metal combine mentioned by us last week which started dealings. We do not imagine they will go very far, because internally the affairs of Russia are not by any means in a satisfactory or tempting position.

We keep wondering when that motor industry crash is coming in France and Germany. The facts about the Italian Fiat Motors Company prompt us once more to ask. It is said to have lost 7,500,000 lire in 1907, so that the whole of its reserve and two-thirds of its capital is estimated to have vanished, said capital amounting to 9,000,000 lire. or say £350,000.

A depressing exhibit is made by the report and accounts of the North German Lloyd Company, whose dividend has been brought down to 4½ per cent. Its trade with Asiatic countries has increased, but the results of working the line connecting Australia with Japan were most unfavourably influenced by the ruinous competition of the Japanese company, the Nippon-Yusen-Kaisha, which receives important subsidies from the Japanese Government. Traffic with the German colonies and the Pacific, on the other hand, developed satisfactorily, but for all that the earnings decreased, and prospects at the moment are not particularly encouraging. A year ago the dividend was 8 per cent., and the decline seems excessive in view of the fact that the nett profits are brought out for the past year at about £1,635,000 compared with £1,965,800 in 1906, while the writings off differed very little at £805,400 against £817,200, but the amount put to reserve is only £92,300 against £247,850 a year ago. The average dividend for the last ten years has been 5.8 per cent., but that is not very comforting in present circumstances, especially when it is remembered that £1,250,000 was added to the capital of the company in 1906, and that last year it put out a like amount in fresh debentures.

Most encouraging accounts are given about the economic condition of Denmark, which has not been hurt to any sensible extent by the recent bank failures in Copenhagen. The business of the country goes on as before, its people are wealthy, and the wealth is so widely distributed that there are only 83 people in the whole country possessed of incomes of more than 100,000 kronen, or say £5,000 per annum. The number of poor people is strikingly small. Savings Bank deposits have risen from 254,000,000 kronen, the property of 500,000 depositors, in 1880 to 834,000,000 kronen, belonging to 1,500,000 depositors in 1906. Taxation is extremely light, both State and local, communal and other debts are small, and the trade of the

country keeps up in a most satisfactory way, the skilful and industrious Danish farmers having had excellent harvests of late years. Much of the banking trouble arose through excessive building speculation in the form of luxurious hotels and flats in Copenhagen, but the crisis therein is to be relieved by the State and the city, which are to undertake important public buildings, so that Denmark as a whole has easily surmounted its local financial troubles. All the capital and reserve of the bank that pulled up seem, nevertheless, to be lost.

Hopes are now entertained on German Bourses that the amended Bourse law will, after all, be passed, and permit greater elbow room in speculation. But that is not yet certain, although the Socialist or Labour wing of the Reichstag has been pacified by some concessions to labour, and will no longer, it is thought, join the Agrarian party in blind obstruction.

The cause of the downfall of the Union Bank of Commerce in Rio de Janeiro is stated to have been imprudence in increasing its holding of bills which brought a corresponding increase in its liability on deposits. Unfortunately, this bank is not the only one in Rio which has followed somewhat unwise tactics, the Bank of Brazil itself being conspicuously guilty as comparison of the figures on January 31, 1907, with those of the same date this year reveals. At the earlier date bills to be discounted held by the bank amounted to 12,106,000 milreis, and on January 31 last the total was 36,727,000 milreis, while within the same time the liability on guaranteed current accounts rose from 10,238,000 milreis to 20,329,000 milreis, and on various current accounts, exclusive of the Federal Treasury, from 21,613,000 to 94,653,000 milreis. These figures seem to point to inflation. Foreign banks in Brazil, on the other hand, have been reducing their engagements.

Bulgaria appears to be a successful emulator of the financial methods of New Zealand. Its revenue surpluses have aggregated more than £2,500,000 in the past four years, and within the same period the public debt has been increased by £6,000,000.

Critical Index to New Investments.

City of Moscow Five per Cent. Loan, 1908.

This much-talked-of loan made its appearance on Wednesday, when the actual total proved to be Rs.3,00,00,000 or £3,174,603, of which £1,889,560 was offered here by Messrs. Baring Brothers and Co., Limited, at the price of 87½. The loan is required for the repayment of temporary advances made for the purpose of developing the industrial enterprises of the town, and for the further extension of such enterprises. It is redeemable by annual drawings calculated to repay the entire amount at par by September 14, 1957, and the first drawing will take place not later than June 14, 1909, for repayment on September 14 following. According to a letter from the President of the Municipal Council the book value of the assets on January 1, 1907, was £13,989,418, while the indebtedness on that date amounted to £4,250,899 on outstanding bond issues, including £267,513 forming part of the amount now created, and £1,742,434 on temporary loans. The revenue for 1906 was £2,539,471, and for the current year it is estimated at £2,926,032, while the interest and redemption of the total indebtedness will require £384,146 per annum. There would seem, therefore, to be ample security for both principal and interest.

North Metropolitan Electric Supply Co., Limited.

This company was incorporated in 1900 to provide electrical energy in bulk in an area of about 326 square miles in the Administrative Counties of Middlesex, Hertfordshire and Essex, and has a share capital of £500,000 in £10 shares, of which 40,002 have been issued, 30,002 being fully paid, and 10,000 £5 paid. In addition an issue of £126,500 5 per cent. mortgage debentures has been made, of which £96,500 has been allotted, and the remaining £30,000 having been sold at 96 was offered this week by the company on behalf of the purchasers at 100. The business has grown rapidly since 1904, and the sales have increased from 1,858,553 units for a gross revenue of £10,687 in that year to 11,183,316 units and £60,237 in the past year. On December 31 the assets were valued at £547,282, and showed a surplus of £441,154 over liabilities other than the share and debenture capital, balance from revenue account, and depreciation and renewals fund, so that there is plenty of margin. The debentures are redeemable at 105 per cent. on or after October 15, 1914, on six months' notice, or they may be converted at any time, at the holder's option, into £105 4 per cent. perpetual debenture stock, and it is provided in the trust deed that not less than £2,000 per annum must be set aside out of profits and invested in securities outside the company's business.

McIntyre, Hogg, Marsh and Co., Limited.

Owing to the decease of a partner it has been decided to convert this business of shirt and collar manufacturers, which was founded more than 60 years ago, into a limited liability company. The capital is £246,000, divided into 126,000 ordinary and 120,000 participating cumulative 5½ per cent. preference shares of £1 each (the latter being entitled to an extra ½ per cent. for every 1 per cent. in excess of 7 per cent. paid on the ordinary shares), and £120,000 in 4½ per cent. first mortgage debenture stock. Amongst the assets acquired are freehold and leasehold properties valued at £57,230, plant and fittings £44,178, stock £124,494, guaranteed book debts £49,000, and goodwill £55,000, while in addition to £14,734 in cash the vendors are to provide £21,364 for working capital out of the price they receive. These items make up a total of £366,000, of which the vendors take £42,000 in ordinary shares, £40,000 in preference shares, £40,000 in debenture stock, and £244,000 in cash, the remainder of each class of security being offered for subscription. Profits for the five years ended November 30, 1907, after providing for bad and doubtful debts, and deducting £5,050 per annum for partners' salaries, were respectively £37,686, £22,593, £29,622, £35,160, and £31,444. Although these amounts show wide fluctuations, the poorest of the figures would have sufficed for the debenture interest and dividends, while on the average profits of £31,301 a surplus of £10,181 would have been available for directors' fees, reserves, and further dividends. As industrial securities, therefore, the debenture stock and preference shares seem rather attractive, and the ordinary shares might also be worth picking up as a more speculative investment.

General Accident, Fire and Life Assurance Corporation, Limited.

Out of a total capital of £1,000,000 this company has already issued £700,000 in £5 shares, on which 25s. per share has been called up, and it now invites subscriptions for the remaining 60,000 at a premium of £1 15s. per share. Upon completion of this issue the Corporation will have a paid-up capital of £250,000, and reserves of over £700,000, including the reserve for unexpired risks and outstanding claims. During the past year the nett premium income from all departments was £968,545, and the revenue balance, including £20,212 from interest on investments, amounted to £125,128. For the four years to December 31, 1904, the dividend on the ordinary shares was at the rate of 10 per cent. per annum, and in the following three years it was raised to 12½ per cent. It is estimated that with the additions to be made out of the present issue the investments will produce an annual revenue of £30,000, and on this basis it will be necessary to take only £1,254 from the trading balance in order to maintain the distribution at the rate of 12½ per cent. per annum on the total capital. The company's position, therefore, would seem to be excellent, and as it is skilfully managed the shares should be an attractive investment.

Lobitos Oilfields, Limited.

This company has been formed to acquire from the Peruvian Petroleum Syndicate a property of about 11,170 acres, situated on the northern coast of Peru in the Province of Piura, for which it pays £115,000 in cash and £85,000 in shares. The Syndicate has erected a pier on Lobitos Bay with facilities for discharging the plant required, and for loading with despatch, and has also supplied tankage for the storage of 14,000 tons of oil, offices, workshops, electric and steam power plant, drilling and pumping rigs. It has also acquired and shipped material for another 5,000-ton tank at Taltal, and has contracted for a tank steamer of 6,000 tons capacity at a cost of £70,000, both of which are included in the property to be handed over. Notwithstanding that during the last eighteen months a large proportion of time and labour was devoted to exploratory work on test wells, and that little was done to push production for shipment, the Syndicate sold and shipped 17,576 tons of oil in 1906 and 25,821 tons in 1907, while on December 31 it had 4,916 tons in stock. Of the total capital 360,000 £1 shares form the present issue, of which 275,000 were offered for subscription, and it is estimated that after deduction of preliminary and formation expenses, the cash portion of the purchase price and the cost of the new tank steamer £68,000 would be left as working capital. The venture is necessarily speculative, but the names of the firms interested are sufficient guarantee that it is an honest one.

The Week in Mines.

The Carry Over.

Quite a number of incidents have cropped up in the Mining markets this week, but before beginning to talk about them we may as well get the fortnightly adjustment out of the way, although it did not commence until Tuesday. The professional account remains small, and with bankers' charges distinctly light in view of the reduction in the Bank rate, continuation rates were not onerous as things go. The bulk of South African things were carried over at 5½-6½ per cent., with the regular exceptions in the case of leading shares. Randfonteins were taken in at 5-6 per cent., Gold Fields, Rand Mines and Modders at 4½-5½ per cent. and East Rands at 3½-4½ per cent. In the Diamond group De Beers were arranged at 2-4 per cent. and Jagers at 4-5 per cent., but Premier, after starting at 4½-5½ per cent., went off to a back. On New Vaals the rate was 5-6 per cent. The general Rhodesian rate was 5½-6½ per cent., Tanganyikas being easier at 2-4 per cent., Zambesias at 4-6 per cent., and Chartered at ¼d. West Africans could be borrowed on at 5-7, together with Broken Hills and Australian Copper shares. Rio Tintos were done at 3-4 per cent. and Anacondas at 2-4 per cent. Siberians could be carried over at 6-7 per cent., West Australians at 5½-6½ per cent., and the American group at 6-7 per cent. The making-up list has looked worse, but it gave the bulls little to shout about. Diamond shares were better. De Beers preferred showed a gain of ⅞, the deferred, together with Premier deferred, rose ¾, and Premier preference ⅝. Chartered were half-a-crown down, and Beira, Mashonaland and Rhodesia Railway debentures were 2 to 5½ lower. In the Gold list Modders put on ⅜, but Ferreiras fell 1¼, Hudson's Consols ⅝, Kaffyfontein Estates and South African options ¼, Zambesias 7-32, Witwatersrand Townships 3/16, and a host of others 1/16 to ¼. West Australians were better here and there, Ivanhoes and Kalgurlis gaining ¼, and Great Fingalls 5-32, but Hainaults were 3/16 worse. Broken Hills gave a rise of ⅜ in Block 10, ¼ in Norths, and ⅛ in Proprietarys and South Blocks. Copper shares showed an all-round advance under the lead of Rio Tintos, which put on 3½. Anacondas were up 1 3/16, Great Cobars 11/16, Utahs ½, and Mount Elliotts ⅜. Among Tins Redhills receded 7/16, and in the American section Frontenacs improved ⅜ and Esperanzas 5-32, but Alaska Treadwells dropped 3/16. Waihis made up 5-32 to the good and Nundydroog put on ⅛.

Kaffir Shares.

South African gold shares have not given rise to much excitement, and highly satisfactory news regarding the native labour supply failed to arouse the slightest enthusiasm. It is said that large numbers of boys are going South, and difficulty is being experienced in placing them out among the various mines. This means 2s. 6d. a day each for their keep on the compounds, which will doubtless be regarded as a fresh grievance by the magnates. The cessation of recruiting by De Beers, Premier, and other diamond companies is doubtless an important influence, as it naturally directs the natives towards the Rand. The market commenced decidedly weak, and there was a sharp dip in Ferreiras, not due to any adverse news, but probably to a realisation of the fact that the price was much too high considering the comparatively short life of the mine. Paris was a seller of the regular counters, and quotations offered little resistance. The Wernher-Beit group were also a poor market, and while bears were not aggressive they naturally took advantage of the absence of support. Later on, however, there was a slight change for the better, Paris bought where it had been a seller, and things looked like improving. Unfortunately the better tendency did not last, and great difficulty was experienced in maintaining the slight recovery.

Rhodesians, Land and Diamonds.

But when we come to Chartered shares the story is very different. To say that they have been blazing good is to put things mildly. There has been a veritable boom. It did not come all at once, and at the end of last week talk was so persistent that the debenture issue was likely to prove a miserable fizzle that the shares of this great and glorious Chartered Company fell to 10s. or 50 per cent. discount. This kind of thing spelt disaster, and the wise men of London Wall again put their heads together to see what could be done. There is evidently a tame genius on the board (or do the ideas come from Warnford Court?), and after much hard thinking a further scheme for helping to extract cash from empty pockets was devised. This financial legerdemain takes the form of permitting subscribers to exercise the option on the new shares without converting their debentures into shares as set forth in the second proposal. Such a brilliant idea was considered to have vastly improved the prospects of the issue, and before you could turn round prices were blazing away in a most alarming fashion—for the bears. There was simply no holding the market and before the fireworks were over 12s. 10½d. had appeared on the marking board. It was a great feat, considering that no legitimate buying took place, and one not likely to be excelled in our day. Rights rose at a great pace until they touched a penny each, the premium on the £1 of debentures was threepence, and option certificates were called 5s. 3d. in case a buyer came along, but the effort was wasted. It looks as though the directors themselves are feeling more confident because they have decided that the minimum subscription on which they will go to allotment is £750,000. But there are other aspects of the matter which need not be referred to just at present. Rumour added one or two new members to the board, Sir Ernest Cassel and Sir George Farrar. The remarkable Chartered outburst quite overshadowed the rest of the Rhodesian section, but Zambesias managed to get down to the imposing price of 7s. before recovering a little, and other things were dull. Jumbos rose no less than 2s. 6d. on a cable that the vein has been struck in the Camp shaft, the first three assays giving 23 dwts. over a width of 60 inches. That reads all right, but the news will be more convincing when say 50 assays have been made. Land and Finance things kept in the background, but Central Minings rose above 11 once more. Diamond shares have not been very

prominent, but prices have shown a tendency to improve. Paris gave trifling support, and bear repurchases on the shortage disclosed at the carry-over helped Premiers. A further meeting of the syndicate and others is said to have been held this week, but no arrangement can be fixed up, and the prospect is said to be most uncertain. The full report of the Premier meeting, held on February 25, has just come to hand by mail, but it contains nothing new except that the syndicate's option to extend from time to time the agreement with the company was for four years from March 31. An interesting letter has been written by Mr. R. H. Henderson, ex-Mayor of Kimberley, in which he points out that the 40s. per carat which was regarded as a fair price for diamonds by Mr. Cecil Rhodes has been more than doubled, thus limiting the sale of stones to a few wealthy Americans. He advocates a reduction in price and the abolition of the syndicate. There can be no question that the monopoly system is responsible for much of the present trouble.

Australasians and West Africans.

Broken Hill shares have kept up very well, the Colonial market being strong and sending a few orders. The metals, too, were better. Fire has again broken out in the Proprietary mine, but no serious consequences are apprehended. A number of West Australians improved, Kalgurlis, Horseshoes, Ivanhoes, and Great Fingalls being prominent, but the Oroya things were dull and Hainaults weak. The first interim dividend for 1908 by the Horseshoe is announced at 6s. per share, being the same as for the corresponding period. New Zealand kept up well. West Africans were quite idle, but the market was firm.

Copper, Tin and Miscellaneous.

A further rise in the price of the metal greatly assisted Copper shares, and the Yankee manipulation was an added source of strength for the time being. For the moment the bulls are having the best of the fight, but the bears are not routed yet by a good deal, and look for things to come their way again before long. It is quite certain that the rush up in American shares cannot continue, and a collapse there must inevitably involve copper and other securities. However, Rio Tintos have been a fraction over 65, and all the other prominent shares, such as Amalgamated, Anacondas, Elliotts and Cobars have had a pretty good week. The movement has not been all one way, but nothing fell much. Tin and tin shares were strong. In the Miscellaneous sections all the Indian shares showed strength, and the American issues were also good as a rule.

MINING NEWS.

*** *Frank and unbiassed answers are given to all questions relating to Mines. Address Editor Mining Section and enclose* One Shilling *for each question asked. No bucket shop circular or advertisement should ever be responded to without first consulting the* Investors' Review.

Rhodesian Mine Crushings.—The following table gives the total monthly returns for 1908, and the previous four years:—

	1904. ozs.	1905. ozs.	1906. ozs.	1907. ozs.	1908. ozs.
January ..	19,359	32,531	42,950	47,048	50,521
February..	18,673	30,131	38,037	40,482	47,683
March ..	17,756	34,927	44,574	46,887	
April ..	17,862	33,268	42,423	49,772	
May ..	19,424	31,332	46,729	52,668	
June ..	20,402	35,256	47,664	54,918	
July ..	24,339	34,093	48,485	54,271	
August ..	24,669	35,765	50,127	54,558	
September	26,029	35,785	48,410	53,622	
October ..	24,919	33,383	45,644	53,823	
November	26,183	32,861	48,503	50,891	
December	28,100	37,116	48,329	53,113	
Total ..	267,715	407,048	551,875	612,053	98,284

West Rand Central Gold Mining.—Hitherto it has been the custom to hold this company's meeting during the closing days of the year, but this has been altered, and the gatherings will in future be held during the early months. The change is welcome because such a large number of hopelessly rotten concerns drive their meetings off until the last moment so as to make it as difficult as possible for shareholders to attend. Operations in the year to September 30 were not very successful. There was a falling-off in the value of the ore, 29,901 tons treated by amalgamation and cyaniding and 11,101 tons by the slimes plant producing only 9,906 ozs. of fine gold, realising £43,280, including £145 from by-products. Happily an improvement in the grade of ore was apparent in September, and this has been maintained more or less up to the present time. Balance of profit was £5,841, and after providing £3,175 for depreciation the remaining sum of £2,666 is added to the credit brought forward, making £20,171 in all, which is carried to new account. Purchase of the Leander claims was completed in June last, and while conditions have not favoured the active development and equipment of the newly-acquired property, it has been decided to continue the sixth and seventh levels from the old to the new ground, to sink a shaft to intercept these levels, and to augment the present reduction plant by tube mills and accessories. So far the reef has not been picked up, but the manager is confident this will happen in due course. The company has little in the way of free assets, but neither has it many debts.

Henderson's Transvaal Estates.—That was a very important judgment of the Court of Appeal restraining Henderson's Transvaal Estates from proceeding with the reconstruction of the company, and shows that the law affords greater protection to dissentient shareholders than many supposed. Of course, the directors are in a hole now, especially as the debentures are due almost immediately. So Messrs. Archibald Coats and George Lawson Johnston have issued the circular urgently appealing to all shareholders to "support the liquidator in his efforts to carry out a scheme of reconstruction which, following as nearly as may be the lines of the scheme so widely approved, may, nevertheless, be freed from the technical objections which have, so far as the Court of Appeal is concerned, been declared to be fatal to its validity." In their opinion, it is obvous that the value of the assets of the company with the provision of adequate working capital would be immeasurably greater than if these were realised under the present depressed conditions in South Africa. It remains to be seen whether shareholders will be insensible to this appeal, but we should take the eighteenpence that can be got for the shares in the market.

Southern Land Company.—Just about one-third of this company's capital has so far been lost, the accumulated debit balance being £32,866 against the issued amount of £97,259. And it must be admitted that the company's prospects of turning the corner in the proximate future are remote. The wretched state of the diamond market led to the breakdown of negotiations for the prospecting of the company's farms along the Vaal River, and the increasing depression in South Africa prevents people from coming forward for the company's lands. The farms along the railway and the Vaal River are let at satisfactory rentals, but the company suffers from the competition of the Government and the Rhodesia Railway Company, which are selling at low prices farms not saddled with heavy quit rents. Endeavours have again been made to come to an agreement with the Government by which the company would be relieved of future payments of quit rents on the surrender of a portion of its land, but the new Cape Government has declined to entertain the proposal. Revenue for the year ended June 30 last was £1,155, and the outgo £3,589, a total which includes £295 for bad debts in South Africa, £750 loss on investment and £629 for quit rents, so that the debit for the year was £2,434. Company's farms are valued at £49,146 and the investments at £14,152.

Ooregum Gold Mining of India.—The directors of this Indian mining company do not definitely commit themselves to the policy of charging all future capital outlays to revenue as in the case of the Mysore and Nundydroog companies, but they will probably be compelled to make a virtue of a necessity. In May last 137,000 new ordinary shares were offered to proprietors, but only 38,544 were taken up, and on account of the year ended December 31 last no less than £43,543 was appropriated from profits in order to strengthen the financial position. This led to a curtailment of dividends, notwithstanding a substantial increase in profits. During the twelve months 124,160 tons of quartz were crushed, yielding 64,084 ozs. of bar gold, while the treatment of 89,164 tons of tailings gave 9,068 ozs., and with 410 ozs. obtained on the dismantlement of the old No. 3 mill the total production was 73,562 ozs. The yield from the battery was 10 dwts. 8 grs., and from the tailings 2 dwts. 1 gr., an increase compared with the preceding year of 21 grs. and 3 grs. respectively. Total returns exceeded those of 1906 by 4,681 ozs. Value of the production was £278,898, from which the royalty of £13,822 is deducted leaving £265,071 as the nett proceeds. Transfer fees, interest, rents, &c., bring this up to £267,888 against which the expenditure was £173,434 leaving a profit of £94,454. Balance forward and £666 from dividends on power station shares raise the available sum to £96,482, and in addition to the special appropriation of £43,543 already mentioned a sum of £8,705 is allowed for ordinary depreciation. Income-tax is £2,755 and the amount for appropriaton £40,922. From it the preference shares get 17½ per cent. and the ordinary 7½ per cent., a drop of 5 per cent. in each case. Development work again proceeded on an extensive scale, and the directors draw attention to the improving condition of the lode in the deeper workings of the mine. Ore reserves have increased by 8,632 tons to 143,988 tons, and the stock of tailings, slimes and concentrates on hand is estimated at 70,000 tons.

Broken Hill Water Supply.—Consumption of water for the six months ended December 31 was 186,398,750 gallons or 194,610 gallons over the previous six months and 43,397,400 gallons in excess of the consumption for the corresponding period. This makes the total quantity of water delivered to consumers during the year 1907 372,602,890 gallons. Quantity conserved during the past half-year was 837,563,000 gallons,

and on December 31 the estimated contents of the Stephens Creek reservoir were 933,883,000 gallons. Revenue including interest was £48,331, and £18,879 was brought forward, making £67,210. After providing working expenses and administration charges the balance over is £59,539, of which £4,335 is written off for depreciation and £31,011 goes to the sinking fund for replacement of capital. Two 6d. dividends take £7,500 and £16,673 is carried to new account. Investments on account of sinking fund now total £71,011, and construction account amounts to £126,432.

North Broken Hill Mining Co.—This company's operations for the half-year to December 31 last were on what is known as a record scale. Quantity of ore extracted, 59,368 tons, and the quantity milled, 59,323 tons, were the largest in any six months, the latter comparing with 53,433 tons in the previous half-year. Grade showed very little variation and recoveries were again excellent. Capacity of the mill has been further improved to 2,500 tons per week, while the work of constructing the new mill with a capacity of about 4,000 tons per week is well in hand and will be pressed on to completion as soon as that policy is justifiable. Revenue from concentrates produced was £116,530, and expenses came to £63,002, leaving a profit of £53,528. Balance from previous account was £59,741, and interest gave £493, in all £113,761. Out of that sums totalling £19,655 are written off under various heads and two dividends of 2s. 6d. each, absorbing £35,000, are paid, the balance remaining to be carried forward being £55,776. Development work was very extensive, and costs under this heading came to 3s. 8d. per ton of ore earned, against 2s. 11.7d. in the previous six months, it being the policy of the board to extend work and improve the equipment during periods of high metal prices, so as to be in a position to go slow when low quotations prevail. Ore reserves are placed at 1,000,000 tons. In view of the fluctuations in prices, a certain advance in returning charges, and the necessary expenditure to complete the new mill, the directors decided to reduce the dividend paid last January to 1s. per share. Capital expenditure during the period under review was £30,914, and the total cost of the new shaft to date is £31,598, of which £21,598 has been written off. Balance of liquid assets over liabilities is £45,717.

London and Western Australian Exploration.—A year ago the directors of this enterprise raised the drooping spirits of their shareholders by paying a dividend of 5 per cent. after a blank period reaching to fully five years. But any hopes of happier times that this action may have aroused are quickly dashed, and the report for the year 1907 is one long story of unfulfilled anticipations and disappointments. It is perhaps unnecessary to say more than that the company's principal investments are in the Zinc Corporation and the Lancefield Gold Mining. With their unfortunate history all are painfully familiar, but the directors refuse to allow pessimistic thoughts to prevail, and consider that in time all will come right. The new plant erected by the Zinc Corporation has recently commenced work and favourable results have been reported. It is also believed that the problems in the treatment of the Lancefield ore have now been overcome, and that it is only necessary to increase the capacity of the plant to place the company on a dividend-earning basis. All this was pointed out in the report of the company dealt with in a recent issue. But meanwhile the depreciation on investments is paralysing, and while, in view of what the directors consider the improved prospects, each individual holding will not be written down to current quotations, it is proposed to provide a general reserve for depreciation. Cash profits realised on sales of shares, after deducting losses, came to £1,721, dividends on investments produced £5,817, and other items £1,019, a total of £8,557. But general expenses in London were £2,843, and in Australia £9,414, while £493 was spent on advertising and income tax took £527. Outlay on options abandoned was the considerable sum of £6,628, and it was necessary to provide £13,419 for loss on investments, so that in the profit and loss account there is a deficiency of £24,769. Provision for depreciation of investments is allowed to the tune of £100,000, making £124,769 in all. Deducting the sum brought forward and a debit remains of £119,857. It leaves the investments in the balance-sheet at £168,956, and it is to be noted that £19,523 has been raised on loan. There is a contingent liability in respect of shares held of £26,321. Sundry debtors are larger than creditors, and the cash and bills take £8,548.

Clitters United Mines.—This company had an unfortunate experience during the year to December 31 last, with the result that the operations turned out unfavourably. Just when it was highly necessary to reach the richer ore available at depth in the Hingston mine there was a severe influx of water, and great difficulty was experienced in draining it. To add to the troubles the electric pumping plant which was installed proved a failure, and serious questions arose with the contractors, but a compromise is in course of negotiation by which the contractors are to supply new plant capable of dealing with every eventuality. The directors say the general appearance of the main lode in the bottom of the mine is far more settled and consistent than in the upper levels, which points to the importance of promptly proceeding with the sinking of the main shaft and extending the lowest existing levels east and west so as rapidly to make available large bodies of rich ore. Ore value per ton in 1906 was £1 9s. 7d. against £1 2s. 6d. in the past year, and the working costs were 2s. 2d. higher at 19s. 6d., the mineral contents per ton, exclusive of arsenic, being only 20.48 lbs. against 27.93 lbs. Fortunately the prices secured for the mineral recovered compared favourably with 1906, with the result that the sales amounted to £29,759 as compared with £30,327. Balance of profit was £3,018 and a further credit of £1,108 came in from refining the arsenic from the company's Hingston mine as well as arsenical mundic purchased, a total of £4,126. Depreciation, debenture interest, reduced directors' fees and all other charges turned this into a debit of £241, and as the company paid a sixpenny dividend absorbing £2,763 on the strength of the earlier results, the total deficiency is £3,003. Moreover more capital is required to put the finances into good order, and it is proposed to create 160,000 B shares of 5s. each, 118,826 being offered to the shareholders in proportion to existing holdings.

Bearpark Coal and Coke.—This company's affairs can be dismissed in few words. Profit for 1907, after paying debenture interest and directors' fees, was £71,593 and £1,641 was brought forward, making £73,234. Dividends for the year total £62,842 or 35 per cent., a sum of £2,000 was written off for depreciation, loss on farms was £229, and £8,162 is carried forward. Depreciation to date written off the property account is £87,250, leaving it at £191,570, and the debenture debt is quite trifling, but we should like to see a reserve commenced, especially as results for the next year or so may not be so good, thanks to the fall in coal prices.

Answers to Correspondents.

**** A Key to these Answers will be posted early each week to Subscribers of ONE GUINEA per annum, 11s. for six months, or 5s. 9d. for three months.***

Deposits against future queries may be lodged with the Publisher.

F. E. D.—Yes, a fair purchase at present, as there is six months dividend in the price.

Dee.-Don.—Company has done considerably better in the past year, and would have progressed still more rapidly but for the high cost of materials, which cannot prevail always. As you hold only preference shares you should stick to them.

Chester.—All of your selections are perfectly good, but for choice we should say No. 1, 3, or 4. If you know a local banker give the order through him.

J. S. H.—(1) We do not think it is in the least likely that anything will happen. (2) The increase is warranted by extensive improvements, and we should not recommend a sale now.

T. M. R.—No, we fear these can hardly be described as a good investment. The high rate of interest offered is alone sufficient to show that they carry a good deal of risk.

Inquirer, Liverpool.—It is one of the best of its kind, but the immediate outlook of the industry is not promising, and it is probable that dividends must be reduced. In any case, part of these are really "return of capital" and your shares ought to be written down.

J. B. C.—(1) These rank immediately before the preference on which the full dividend is being paid. Some re-arrangement of capital is on the tapis. At its present price the stock seems high enough, though this company is certainly doing better. (2) During the last three or four years interest on this issue has been earned, and the company is doing better. Prospects look good, and the stock should be secure enough for the present. (3) Security is represented by bonds received from the Government in payment of the old undertaking. According to the last report the deficiency of value represented about 50 per cent. of the junior security. The senior has a fair margin and seems fairly good; it is being redeemed gradually. (4) Both principal and interest are guaranteed, but the date of repayment is not far off, and allowance must be made for loss of premium. (5) There appears to be ample margin for these as the ratio of mortgage is low. (6) Nor should there be any undue risk attaching to these, though the company may not do so well for its shareholders in the near future. (7) These must be got below redemption price to make them worth touching as the drawings take place each year. They are quite good. (8) There is a possibility of the Government taking over the undertaking, if so, these debentures will be quite safe to buy.

D. H. C.—We fear the debenture will go lower unless amalgamations can be effected, and that you might do well to get out. We do not think you should put the money into any similar security just at present. This rules out both Nos. 2 and 3 in your list. No. 1 is not a bad thing of its kind, but we think you might do better with some of the new issues noted in our "Critical Index" last week and this.

W. W.—We do not like prospects much for this company, and yet its Government connections ought to enable it to pull round in time. For all that were the case ours we should be disposed to sell.

India.—At present price the yield is barely $3\frac{5}{16}$ per cent., so it would be possible to exchange, for other stocks, practically as good, yield more. Money rates have more effect on this stock than the cause you mention, but a new issue would help to keep price down.

Cardigan.—We fear you can do nothing else but hold at present. The company seems to have had a series of misfortunes, but there ought to be some value in the property. Efforts are being made, we are told, to pull the company out of its troubles; if successful, your holding should recover to some extent.

W.—We have not heard of the new patent, but the company is always picking up little things that help to continue its life, else it would have been wound up long ago. On the whole, we should hold, as the company has good investments.

TRADE AND PRODUCE.

Wheat.—Under the influence of liberal shipments and lower American cables prices appeared somewhat irregular earlier in the week. Merchants were willing to make small concessions for spot parcels and future positions receded about 1¼d. below opening quotations. Later more firmness was visible, and though prices reacted again a little the close was firm, but with demand very quiet in all sections. English samples have been in fair supply, and sold without change in prices, farmers' deliveries for last week coming to 39,172 qrs. averaging 31s. 7d. against 69,183 qrs. averaging 26s. 10d. a year ago. Imports were 470,447 qrs. against 404,157 qrs. in the same week of last year, and the quantities of wheat and flour estimated to be on passage to the United Kingdom are 4,490,000 qrs. against 4,595,000 qrs. last week. To the Continent they are 2,755,000 qrs. against 2,765,000. Fears of drought were the chief bull factors in America this week and kept prices up most of the time, and the firmer tone was helped by some foreign buying and smaller receipts, and the visible supply showed a decrease of 1,031,000 bushels on the week.

Wool.—The London sales, as they continue, do not bring any improvement in the prices of either crossbreds or merinos; on the contrary, in many cases they have dropped further still. Some coarser descriptions of crossbreds are now fully 20 per cent. below January rates. Withdrawals have resulted so far of about 15,000 bales, as holders are not always inclined to meet the market, and buyers, though in large enough attendance, and for one or two classes of wool competing with some keenness, do not seem anxious to buy freely. Nor has the announcement that the sales will close on April 3 instead of 7 had any beneficial result. Bradford and Leicester markets are more depressed than ever, and yesterday's business in the former was said to have been the worst for years. Prices are extremely low, have slumped down in fact, but even this does not tempt buyers, and English wools have suffered to nearly the same extent as colonial. Manufacturing centres are not much better off, the weakness of home demand and the scarcity of fresh orders having already caused employment to be curtailed.

Cotton (from our Manchester correspondent).—Our staple industry is getting into a worse and worse condition. The demand for yarn and cloth throughout the week has been disappointing. Many producers on a large scale are doing scarcely anything, and although orders have been pressed for, the business arranged has only reached quite small dimensions. It is scarcely likely at a time when values are on the decline that buyers will operate with any freedom. It is still feared that we have not reached the bottom in prices, and orders are said to be carried about in the hope of better terms being secured by waiting. American cotton has been more irregular in price, the tendency being towards easier rates. Very little interest is now being taken in the supply of the raw material. It is too early yet for reliable information relating to the prospects for next season. It is scarcely necessary to mention particular markets for piece goods. Sellers have reported that the demand from all quarters has been very dull. Shirtings have moved off very slowly. Here and there small lines have been put through in bleaching and printing cloths for Madras. China buyers are thought to be nursing orders, and, with a steadier tone, more could be done for Shanghai. The near Eastern markets remain unsatisfactory, and remittances are still poor from certain outlets in the Levant. Now and again rather better reports have come through from South America. Speaking generally, however, sellers have met with disappointment, and large houses which are usually not at a standstill, are practically doing nothing. In the meantime, more and more looms are standing idle, and weaving sheds throughout the country are working short time. Manufacturers who both spin and weave are now worse situated than those who use bought yarn. In home trade cloths drapers are asking for deliveries to be deferred, and the labour unrest on the North-East Coast is causing a restriction in the turnover. In American yarns for home use very little has been done either in twists or wefts. There is little to choose now between these two qualities, considerable irregularity showing itself in quotations. Spinners have sought buyers, and low prices have been quoted, but the turnover reaches quite small dimensions. It remains to be seen what will be done with regard to short time on an organised scale, but it is thought in well-informed circles that the members of the Federation will support the proposal for stopping a full week at Easter. The general demand from abroad has again been unimportant. Fine yarns made from Egyptian cotton are in a poor way, and more mills are working four days a week. Considerable pressure for fresh orders shows itself.

Sir Jacob Behrens and Sons, in their market report, state that weather reports from America continue favourable, but the offtake by the trade shows very little sign of improvement, and the drop in Liverpool on the week is 16 points. Egyptian cotton is also weak and neglected, and has lost $\frac{1}{16}$d. per lb. since last week. The yarn market is, no doubt, largely influenced by the weakness of the raw material, and shows no progress whatever to a better state of things. Stocks are accumulating at the mills, and supplies are held back by request in very frequent cases. Two-fold American yarns are idle, with practically no demand. The fact that Egyptian single yarns are now cheaper than the same numbers of American has caused a slightly increased demand, more especially in reeled yarns.

Coal.—Reports as to the conditions of trade vary according to the district from which they come. North of England shipping is so active that collieries have difficulty in supplying demand and prices for both gas and steams have been raised. Round Sheffield and South Yorkshire it is more a "between seasons" period, and owners are willing to meet buyers in order to keep pits going. House coals also, both here and in Lancashire, are easier in tendency. Welsh prices in these last, on the other hand, have remained steady up to the present, though merchants say there will be a slump in April. Welsh steams have not been quoted appreciably lower since last week, and the tone of the market is considered satisfactory, though the question of the Eight Hours Bill is causing some unsettled feelings and buyers are acting very cautiously, and rather on the hand-to-mouth principle.

Copper.—Prices have exhibited a steadier tendency this week. A good increase in business with consumers, some fair orders to manufacturers for export, and considerable speculative support under higher cable quotations from New York have all helped to stimulate the market. Yesterday's prices closed at £61 cash and £61 7s. 6d. three months. To-night's were: cash 61¼-½, three months 61¾-62.

Tin.—Up till Wednesday the market was under strong bull control, and with a sharp rise in Eastern advices prices went up to £146 10s. cash and £144 three months. But yesterday, in spite of a further rise in the East to £146 c.i.f. London, a lull in demand appeared here, offers for forward delivery were more pressing, and three months metal fell to £142, cash closing at £144. To-day's market was steady, and the final quotations were: cash 143½-144, three months 141¾-142¼.

Iron and Steel.—The slight spurt in West Coast hematites has disappeared, and things in this district are quieter than ever with a further reduction in output announced, but elsewhere conditions seem better. Orders for East Coast are good enough, though they are chiefly on export account, and have kept prices firm, for of stocks in public stores there are none and producers have not allowed theirs to accumulate. Cleveland pig-iron business is satisfactory, and the strength of this and Scottish markets is having a good effect on other smaller ones. Prices are again up higher than they have been since last October, and with the scarcity of prompt iron, very fair shipping and the opening of the spring season a fairly good trade is expected for some time. All the same, warrant buyers are not committing themselves too far ahead, and the three months price paid is more than 2s. below prompt quotations. Production has been increased by the resumption of two furnaces which have been idle fifteen weeks. The steel trade is only moderate, and so are the manufactured branches of iron, and the reduction in prices has not helped them in the least. Scotch bar makers have again reduced their quotations, and are asking from 10s. to 15s. less than makers in the north of England.

Tea.—Indian teas have shown a distinct advance in prices this week, all classes hardening to some extent, and good and fine qualities were from ½d. to 1d. dearer. 35,230 packages were offered, of which 33,393 packages were sold on garden account at an average of 8.04 against 17,693 packages averaging 8.50d. in the same week last year. Demand for Ceylons was also good, but not so much alteration appeared in prices, only fine qualities going slightly dearer, and for the 23,371 packages offered the average obtained was 7.81d. against 8.28d. in 1907. Java sales consisted of 2,526 packages, which passed firmly at last week's rates, supplies of this growth continuing only moderate. Contrary to the usual state of affairs, say Messrs. W. J. and H. Thompson, little or no disturbance to trade is being occasioned by the near approach of the budget announcement, and this calmness they regard as being a good sign of the healthy state of the market. Complaints of the quietness of country business still continue, but the fact that in spite of this the tone is improving is but another proof of the tendency of buyers to stock little beyond their immediate requirements.

Sugar.—Another animated week, says Mr. Czarnikow, during which May moved between 11s. 2d. and 11s. 5½d., owing to Cuban reports, which now estimate the crop nearer 900,000 than 1,000,000 tons, and raised prices in New York from 4.12½ to 4.36 cents for centrifugals, and from 5.05 to 5.25 cents for granulated. Beet sales have been made up to parity of about 4.36 cents, whilst Javas to arrive in September are quoted about 4.30 cents, therefore it seems that refiners prefer to buy sugars arriving before the Javas, though these no doubt will be wanted in due course to supply August-October meltings, unless old crop beet is then cheaper. The large quantity of Javas sold during the last month or two to refiners and speculators in America and on this side is not likely to press on European markets unless United States meltings are reduced, but this week's meltings are again raised to same figure as in 1907, after last week's falling off. The Cuban receipts were 40,000 tons, which was fully up to expectations, but 27 centrals have already finished work against three and none in the two previous years respectively, and more are finishing shortly.

On the New York market less interest has been shown for non-preferential sugars, notwithstanding that they are now below the parity of these last. Landings in the three ports for the week were 28,000 tons, and with meltings 40,000 tons stocks were reduced to 210,000 tons.

Mr. Walter Chamberlain, J.P. (brother of the Rt. Hon. Joseph Chamberlain) has joined the Board of the Commonwealth Oil Corporation.

RAILWAY TRAFFIC RETURNS.

FOREIGN.

Alberta Railway and Irrigation.—Earnings for the 7 days ended March 21, $3,676, decrease $714; aggregate from July 1, $175,428, increase $41,745.

Argentine North Eastern. — Traffic receipts for week ended February 21, £3,616, increase £88; aggregate from July 1, £104,444, decrease £4,552.

Assam Bengal.—Traffic receipts for 7 days ended February 22. Rs. 92,500, decrease Rs. 2,378; aggregate from Jan. 1, Rs. 6,52,126, decrease Rs. 1,14,010.

Bilbao River and Cantabrian.—Traffic returns for February, £8,522, decrease £1,085; aggregate from January 1, £16,228, decrease £4,563.

Buenos Ayres Central.—Gross receipts for February £9,865, decrease £3,555; aggregate from Jan. 1, £81,976, decrease £2,531.

Canadian Northern Railway.—Traffic receipts for 7 days ended March 21, $142,800, increase $33,400; total from July 1, $6,780,500, increase $1,840,100.

Egyptian Delta.—Traffic receipts for week ended March 7, £5,422, increase £495; aggregate from January 1, £257,409, increase £17,570.

Lucknow Bareilly Railway.—Traffic receipts for 7 days ended February 22, Rs. 31,621, decrease Rs. 13,093; aggregate from January 1, Rs. 2,59,308, decrease Rs. 51,487.

Midland Uruguay.—Receipts for month of February, £3,000, decrease £3,573; aggregate from July 1, £45,157, decrease £3,335.

North Western of Uruguay.—Traffic receipts for Feb., $14,400, decrease $7,277; aggregate from July 1, $154,129, decrease $12,666.

Quebec Central Railway.—Traffic receipts for the 3rd week of March, $22,251, increase $7,241; aggregate from January 1, $201,877, increase $54,676.

Quebec and Lake St. John.—Traffic receipts for Jan. $36,275, increase $431, aggregate receipts $36,275, increase $431.

Rohilkund and Kumaon Railway.—Traffic receipts for 7 days ended February 22, Rs. 20,434, decrease Rs. 7,597; aggregate from Jan. 1, Rs. 1,55,614, decrease Rs. 29,775.

Uruguay Northern.—Gross receipts for month of Dec., £1,712, increase £3; aggregate from July 1, £11,422, increase £970.

White Pass and Yukon Railway.—Traffic receipts for week ended March 14 amounted to $13,500.

ENGLISH.

Cleator and Workington Junction.—Receipts for week ending March 21, £1,208, decrease £194; aggregate from January 1, £12,903, decrease £3,071.

Cockermouth and Keswick Railway.—Receipts for week ending March 21, £686, decrease £47; aggregate from January 1, £7,840, decrease £620.

East and West Yorkshire Union Railways.—Traffic receipts for week ended March 21, £471, decrease £8; aggregate from January 1, £5,463, increase £51.

TRAMWAY AND OMNIBUS RECEIPTS.

HOME.

Bath Electric.—Traffic receipts for week ending March 18 £595, decrease £7; aggregate from Jan. 1, £6,210, decrease £483.

Blessington and Poulaphouca.—Traffic receipts for week ending March 18, £10, decrease £1; aggregate from Jan. 1, £69, decrease £8.

Bristol Tramways and Carriage.—Traffic receipts for week ending March 20, £4,324, decrease £359; aggregate from Jan. 1, £54,200, decrease £382.

British Electric Traction.—Receipts of all the Associated Companies for the week ending March 20, £25,696; 428¾ miles.

Burnley Corporation.—Traffic receipts for week ending March 21, £1,107, decrease £21; aggregate from January 1, £13,731, increase £315.

Dublin and Blessington.—Traffic receipts for week ending March 18, £111, decrease £1; aggregate from January 1, £1,058 decrease £4.

Dublin and Lucan.—Traffic receipts for week ending March 20, £111, decrease £10; aggregate from Jan. 1, £1,074, increase £35.

Dublin United.—Traffic receipts for week ending March 20, £5,034, increase £36; aggregate from Jan. 1, £53,954, increase £2,080.

Hastings and District.—Traffic receipts for week ending March 19, £717; decrease £107.

Isle of Thanet.—Traffic receipts for week ending March 21, £236, decrease £40; aggregate from Oct. 1, £6,505, increase £89.

London County Council.—Traffic receipts for week ending March 14, £30,598, increase £3,008; aggregate from April 1, £1,550,805, increase £240,812. Miles 117½, against 113⅝.

London General Omnibus.—Traffic receipts for week ending March 21, £17,192, decrease £3,118; aggregate from Jan. 1, £207,114, decrease £13,139.

London Road Car.—Traffic receipts for week ending March 21, £7,080, decrease £699; aggregate from Jan. 1, £73,179, decrease £4,883.

London United.—Traffic receipts for week ending March 21, £5,243, decrease £460; aggregate from January 1, £59,445, decrease £438.

Provincial Trams.—Traffic receipts for week ending March 21, £1,330, decrease £98; aggregate from Oct. 1, £35,866, increase £1,145.

Rossendale Valley.—Traffic receipts for week ending March 13, £198, increase £9.

Sunderland District.—Traffic receipts for week ending Mar. 18, £447, increase £43; aggregate for 20 weeks £8,852, increase £1,128.

Yorkshire (West Riding) Electric.— Traffic receipts for week ending March 22, £1,014, decrease £76; aggregate from January 1, £12,647.

FOREIGN.

Anglo-Argentine.—Traffic receipts for 7 days ending March 18, £18,872, increase £1,145; aggregate from January 1, £201,259, increase £27,201.

Auckland Electric.—Traffic receiptsfor 28 days ending February 28, £11,997, increase £1,909; aggregate from January 1, £25,888, increase £3,582.

Brisbane. — Traffic receipts for month of Febuary, £13,390, increase £2,390.

British Columbia Electric.—Nett earnings for January $80,436, increase $24,715. Aggregate nett earnings, including income from investments from July 1 to Jan. 31, $583,042, increase $166,336.

Buenos Ayres Grand National and New Tramways.—Traffic receipts for 7 days ending March 24, £7,790, increase £922.

Calcutta. — Traffic receipts for week ending March 21, Rs. 45,602, increase Rs. 2,524; aggregate from January 1, Rs. 6,02,398, decrease Rs. 37,668.

Cape Electric.—Traffic revenue for month of February, Cape Town, £10,497; Port Elizabeth, £2,984.

Carthagena and Herreiras.—Traffic receipts for the month of February, £2,279, decrease £3,013; total from January 1, £4,772, decrease £6,119.

Geneva Trams.—Earnings for February, fr. 173,497; increase fr. 19,986.

Kalgoorlie Electric.—Gross receipts for February, £3,417; aggregate from January 1, £7,055.

Lisbon Electric.—Earnings for January, milreis 119,627.

Madras Electric.—Traffic receipts for fortnight ended March 15, Rs. 21,149, increase Rs. 4,320; aggregate from January 1, Rs. 96,918, increase Rs. 13,814.

Melbourne Tramways and Omnibus. — Traffic receipts for February, £49,000.

Mexico.—Nett earnings for month of January, $194,398, increase $65,167; aggregate nett earnings from January 1, $194,398, increase $65,167.

Monte Video United.—Gross receipts for February, £22,617, increase £3,259.

Perth (W.A.) Electric. — Gross receipts for week ended March 20, £1,507, decrease £59; aggregate from January 1, £16,989, decrease £712.

Rio de Janeiro.—Gross earnings for 9th week 1908, $29,046; increase $6,791.

Sao Paulo.—Traffic returns for January: nett earnings, $128,025, increase $8,962; aggregate from Jan. 1, $128,025, increase $8,962.

Twin City Rapid.—Traffic receipts for the month of November, $497,428, increase $38,791; aggregate from January 1, $5,552,879, increase $402,984. Nett traffic receipts, $233,018, decrease $649; aggregate from January 1, $2,852,445, increase $105,004.

SHORT AND UP-TO-DATE CONDITIONS.
Head Office: 1, Cornhill, London, E.C.
Applications for Agencies invited. HUGH LEWIS, *Manager & Secretary.*

The Investors' Review.

The Week's Money Market.

Bank Rate 3 per cent. (Reduced from 3½ per cent. on Thursday, March 19.)

Norfolk House, Friday Evening.

As anticipated, the lower Bank rate has done nothing this week to bring ease to the open market, which has continued very hard up; indeed, so much so that it has had to borrow £3,018,000 more on other securities, bringing the total of that item in the Bank exhibit up to £37,248,000, or about £10,000,000 more than the figure touched on October 12 last, before the Wall Street complications developed, and £11,400,000 more than the total at the end of January last, when the market was still in the Bank's debt for bills discounted. For most of the fresh money wanted this week borrowers have paid 3½ per cent. on seven-day loan, and it really is hopeless to expect easier conditions until next month. How the patience of the market stands the strain put upon it by the Treasury accumulations is impossible to explain, but there it is, and thus it will continue to be until some mischief arises. This week again Treasury balances were increased by £274,000 to £19,843,000, or £3,927,000 more than at the same date last year. Because this is so, the increase of £6,765,000 shown on the year's comparison in the banking reserve of £30,951,000 has done no good to the market whatever. People say the heavy borrowings are due to "window-dressing," but that does not follow at all, because quarter day fell this week, and if bankers had to force their clients to go and borrow at the Bank of England it was because their customers require them to provide the necessary term accommodation. Open market rates have stood around 3½ per cent. on call, going up, however, to 4 per cent. occasionally, and seven-day money has been 3¼ per cent. the whole time. Yesterday afternoon and to-day there has been less scarcity, the Stock Exchange settlement being over, and balances are offering at 3 to 3½ till to-morrow. In spite of this the market had to renew all the large amount due this morning, and to add a little to its debt over and above.

In the discount market the decline has been arrested by the dearness of short money, and the published quotations have never given a lower rate for three months' remitted paper than 2 11/16 per cent., with the alternative of 2¾ per cent. For all that business has been done at lower figures, and yesterday mixed parcels of three, four and six months' paper of this class could be disposed of at 2⅝ per cent., and some of the joint-stock banks have been buying June bills from the brokers at 2⅝ per cent. We may call the rate 2⅝-2¾ per cent. for bank bills of all usances of over two months, and two to three months' paper is hardly better than 2 11/16 per cent.

Foreign exchanges have naturally gone against this country as a consequence of the reduction in the Bank of England rate to 3 per cent., and the Paris cheque is now down to 25.13½, but it is from Berlin that we have most to fear, as notwithstanding the gradual recovery of strength by the Reichsbank the open markets there continue hard up, and although lower than it was, the open market discount rate in Berlin is still 4⅜ per cent., driving German paper to London and also Paris, as we partly explained last week. The *Standard's* City Editor, whose information is always good about bullion, says also that the German banks are making free advances on raw gold arriving in Europe within the next six weeks. The Imperial Bank does not get strong enough to avert the necessity of importing gold, although the note circulation shown in its last return was £9,414,450 below the legal maximum compared with £8,327,500 below in the previous return. It is therefore in no way surprising that the gold in the open market on Monday should have been snapped up by foreign buyers.

Altogether there was less than £500,000 in bar gold to be disposed of in the open market last Monday, and of that between £250,000 and £300,000 went to Paris, the price rising ½d. to 77s. 9½d. per oz., where it remains. This is not an incident to start beating the alarm drum upon, nor yet the fact that the Bank itself lost a little by export on the week, for it is now comparatively rich with a stock of £40,763,000 in coin and bullion, or £5,767,000 more than a year back; but if these gold purchases continue, as they seem likely to do, and if the Bank also loses a little now and then on balance the tendency of open market rates to go further down will be checked and that is well. These are not times in which ease can be depended upon. Gold though will bridge all chasms for the time, and about £1,000,000 of it will be in the market on Monday.

We hear that the India Council is offering exchange on London at 1s. 3 29-32d. in order to prevent exports of gold from India to London and to sustain the exchange. The information is interesting, and if the adverse position of the exchange continues may hasten the issue of another Indian loan. Meantime money is becoming cheaper in India, and both the Bank of Bengal and the Bank of Bombay have reduced their minimum rate of discount as usual at this time of year.

Calls on new issues due next week amount to nearly £2,000,000, of which £750,000 is payable on Canada new 3½ per cents. next Monday, and about £1,200,000 on Tuesday, that total embracing £400,000 on Vickers' debentures, £161,000 on Montreal Street Railway debentures, and £125,000 on Bank of New South Wales shares.

Silver.

The bazaars continue to buy silver to a moderate extent, and in the present state of the markets their requirements have sufficed to keep prices steady round about 25 9/16d. per oz. for cash and 25 11/16d. per oz. for delivery two months forward. A slackening of this demand caused a drop of 1/16d. per oz. in both positions on Wednesday, but it was quickly recovered, and the market closes steady at the above quotations. Although nearly £2,000,000 of the metal has been shipped to India since the beginning of the year it is thought by some people that an increased inquiry from that quarter may be looked for during the next two months, owing to the number of Hindoo weddings. Applications for Council drafts on India have dwindled to very small proportions, no more than two tenders for bills, amounting to Rs. 35,000, having been sent in this week. Of these Rs. 20,000 were at too low a price, so that only Rs. 15,000 at 1s. 3 29-32d. were allotted. Next Wednesday another Rs. 20,00,000 will be offered. Both the Bank of Bombay and the Bank of Bengal have reduced their minimum rate of discount from 8 per cent. to 7.

BANK OF ENGLAND.

The Stock Markets.

A rather better week has been spent on the Stock Exchange. Business has revived to a small extent owing to the reduction in the Bank rate, and there is some disposition to speculate for the rise in the belief that next month will bring cheap money and all sorts of good things in the way of advancing prices. It cannot be said that there is much solidity in the movement, but as long as Wall Street manages to put on an appearance of reviving prosperity it will be imitated on this side of the Atlantic. The impulse, indeed, has come from the Yankees. They have succeeded in forcing in the bears and in organising a weak, but up to the present successful, campaign for the rise. How long it will go on depends probably upon the extent to which Europe may be willing to come to its assistance by supplying the railroads with fresh capital. They all want money, some of them many millions of it, and if they can get it here to anything like the amount necessary or demanded, the extravagance which came to a disastrous stop last October will develop again and lead to another and a worse catastrophe.

As yet, however, the appetite of our public does not seem to have been stimulated either to buy American Railroad bonds or any other security, for the new issues already made for other borrowers have not been very successful. The underwriters of the New South Wales loan have had to take about 91 per cent. of their subscriptions, and the Charing Cross Electric Company's issue has only been absorbed by the investor to the extent of about 40 per cent. Equal coldness is displayed in other directions, and in spite of its attractiveness, for it ought to be a good security, very few people with money to put away are coming forward for the Moscow loan or for the Brazilian port issue. Whether this is because the investing public is not yet possessed of large means after its recent rough experiences, or whether the passion for speculative purchases is for the moment dormant, we cannot determine; but one inference seems justifiable: the underwriting business has been so overdone that it defeats itself. Formerly, anything like a general or public underwriting of a good security was never so much as thought of. The houses in charge of the issue might sell portions of it outright to their *clientèle*, but they did not go round and get the whole issue placed with intermediaries at a more or less substantial discount upon the price at which the security was to be offered to the outside public. Now every security is placed in this manner, and the commissions paid or discounts given tend to increase. A year or two ago it was comparatively easy to get a really good security underwritten for a commission of 1 to 1½ per cent. Now we doubt whether the very best stock, away from perhaps British Government stock, could be underwritten for less than 1½ per cent, and the general run of commissions given to participants in this kind of business is from 2 to 5 and 6 per cent. Naturally the public takes note of this kind of first-fruits, and investors consider that they may as well wait on the chance of the underwriters being embarrassed and obliged to part with all or a portion of their commission in order to dispose of the paper left on their hands. Undoubtedly this underwriting business is at bottom an unfair thing, were it only that it puts the broker in an invidious position towards his client. That the fashion will be abandoned is improbable, because all markets are still overloaded with unplaced paper of all descriptions, and furthermore, in proportion as the underwriting custom prevails the improbability of successful direct appeals to the outside investor increases, so that those who have money to raise are driven to get a guarantee for the subscription of the securities they offer. Thus one evil produces another, and what the end of the mix will be it is impossible to guess.

This has been a week of victory for the "reform party" on the Stock Exchange. They have put all their men on the committee with a fine vote and majority, and we shall now wait with curiosity to see what the result may be.

Contangos.

Stock Exchange money with the banks dropped by about ½ per cent., borrowers never paying more than 3¼ and often only 3 per cent., the finer rate being that charged to money brokers and some others. This decline was reflected in rates inside the "House"; indeed, on Foreign Government securities money was about 1 per cent. cheaper, and rarely cost more than 4 per cent., often only 3 per cent. On Home Railway stocks, also, money was lent at 4 to 5 per cent., speaking generally, against 4½ to 5½ per cent.; in no instance were contangos higher. On American Railway shares

the rates were much the same, about 4 per cent. as a rule, but that signifies little in the present condition of our market. There was still something of a scarcity in Grand Trunk third preference stocks, otherwise the rate on these was about the same, but the bear account is so enormous in Canadian Pacific shares that bargains in them were often carried over even. On South American Railway securities money was seldom as much as 5 per cent., and generally 4½ to 4¾ per cent., or about ½ per cent. down. On Mexican Railways also the rates were easier, and borrowers on Hudson's Bay shares seldom paid more than 2s., often less. Altogether an easy settlement, encouraging to the operators for the rise.

Trustee Securities.

A general improvement in prices is shown in Home Government stocks, and quite an emphatic advance has taken place in Transvaal 3 per cents, it is presumed because preparation is being made for the issue of the Transvaal loan or a portion of it. Consols have not risen much, but the market is firm, and we expect quotations to improve still further because the realised surplus on the completed Budget year will on any conjecture give a substantial sum to be utilised as the "old" sinking fund for redemption of debt. Home Municipal securities have also been firm, County Council issues having been strengthened by the inference that a further creation of floating debt will postpone for a time an issue of new inscribed stock. On the other hand Colonial loans have been neglected, and several Victoria issues are ½ to 1 lower. New South Wales 3½ per cents have also gone down on the non-success of the new loan. In Foreign and Colonial Municipal stocks business has rarely been visible.

Foreign Government Stocks.

In some respects the reduction in the Bank of England rate to 3 per cent. has had more effect on Continental bourses than at home. In Paris it has kindled the hope that the Bank of France rate will soon be reduced to 2½ per cent., and in Germany the argument is that after the end of the quarter the Reichsbank will be obliged to come down in spite of its comparatively weak position, and the scarcity and dearness of bankers' money in the open market. Accordingly prices have been good in "foreigners," without much business on our exchange to account for the strength. Argentine bonds have recovered, Brazilian too are steady or rather more, and there has been quite a rally in both Japanese and Russian issues, with a fair amount going on in Japanese 4 and 4½ per cents and in Russian 1906 bonds. Every other day we are assured that the Russian Government will issue no foreign loans this year, and the latest news is that preparations are being made to launch an internal loan of £15,000,000. In spite of the firmness on German bourses, however, there has been no elasticity displayed in the market for German or Prussian stocks.

Home Railway Stocks.

Within the last day or two efforts have been made to put life into the Home Railway market, but they have not been very successful, in spite of the industry with which the plausible argument about traffic receipts has been applied. "It is quite true," the reasoners say, "that traffics are bad now, and the decrease of nearly £85,000 in last week's earnings, bringing the total up to almost £430,000 for the twelve weeks elapsed, hardly constitutes a bull point, but you must remember how splendid the figures were a year ago, and note that the decreases now shown are rarely or ever so great as the increases were then." This would be good reasoning were it not the fact that last year's swollen gross income did almost nothing to increase nett income. If, therefore, expenses cannot be brought back in the current year to a degree proportionate to the decline in gross earnings, a general reduction in dividends is inevitable. The question, therefore, is, are expenses being reduced? and to that no answer is possible for another four months, but there is little or no indication that economies in working are being carried out on a well-thought-out and systematic scale, and coal is not yet much cheaper. On the week, however, prices have been firm, in spite of some dips and hesitations at the beginning, and in Metropolitan stock there has been a quite substantial rise of 4½ since last Thursday night. Great Western, District, North British, North-Eastern, North-Western and Brighton deferred stocks have also all risen with more or less emphasis, say, from 1½ to 3, and Central London ordinary and deferred are respectively 5 and 3 higher. The very fact that such advances should have taken place in minor stocks serves to indicate how speculative, and in a manner light-headed, the whole movement as yet is. Amongst the better-class of debenture and preference stocks prices are steady, but Cambrian debentures and Great Central preferences still fall back, and Lancashire and Yorkshire preferences have also gone down. But there has been a rally in Chatham preferences.

Indian and Colonial Railway Stocks.

Most Indian Railway stocks have maintained last week's figures and East Indian "C" annuities have risen a little, but the stock of the Bengal and North-Western Railway has dropped back 3½. The bull party still has the best of it in Canadian Railway securities, and Canadian Pacific shares have been worked up about 5 during the week in the face of seriously declining traffic receipts. This rise is due to the interesting process of squeezing the bears, and until that sanguine and usually too intelligent class of operator has been more or less eliminated there will be no extraordinary recoil in prices. Grand Trunk stocks have also been maintained, and the new Grand Trunk Pacific issue is finding buyers. A lift of 2½ has also been given to the guaranteed debentures of the Mashonaland Railway, as expressing perhaps the hope that after all the Chartered Company will get money out of its dupes to pay the interest with for another year. Beira Railway debentures, however, have been put down with emphasis.

United States and Foreign Railways.

Here, as explained above, has been the great central motive force driving markets up, and the list of improvements shown on the week ranges from $5½ in Union Pacific shares, $4½ in Louisvilles, and $4 each in New York Central and Southern to $1½ and upwards in Milwaukee, Norfolk, Southern Pacific and Missouri shares. Baltimore and Atchison shares, too, are up 1½ to 2½, and speculation has broadened considerably until in Union Pacific common it has sometimes almost assumed the old aspect of dementia, but it is all professional on both sides of the ocean, and the dealings in bonds, which are also higher in price now and then, are few and hesitating.

Foreign Railway stocks have also gone up, and a welcome recovery has taken place in some of the Argentine ones, but business in them has not developed very satisfactorily, although the leading issues like Great Southern, Pacific, Rosario and Buenos Ayres Western are 1 to 2 higher. In the Brazilian group Leopoldina stock has risen 2½ and San Paulo stock 2. There has also been a recovery in Antofagasta stocks, at least the preferred alone shows a noticeable relapse on the week's comparison, but United of the Havana has gone down until the latest quotation is only 62. It cannot go on falling for ever, and should soon be worth picking up.

Banks, Breweries and Docks.

Bank shares have rather fallen back on the week, Chartered of India alone showing a rise of as much as 1. The shares of various Egyptian banks, however, have also improved a little, and the declines have never amounted to much, the most noticeable amongst Home banks being a relapse of ½ in Barclay and Company's shares, due to some nervousness, quite unwarranted so far as we can estimate, excited by the disclosures of the serious commitments of this bank in the ravelled affairs of Sir James Laing and Sons.

Nothing whatever in the way of a stimulus to business in Brewery securities was given by the "beer" victory in Peckham, and the changes in that group on the week have mostly been adverse with nothing at all going on. Watney, Combe's debenture stock, though, has been marked up 2, and Whitbread's debenture stocks are 1 higher. There is even a rise of 1½ in Allsopp ordinary, but that does not lift it to two figures.

London Docks stocks, on the other hand, have been raised *en masse* by the published particulars of the bargain made with the company by Mr. Lloyd George. Dealings have not been important, indeed have not been visible in most of the issues, but the preferred and deferred have attracted buyers and have risen 3 and 4, while the "C" debenture stock has been put up 4½. This is not an indication that the President of the Board of Trade has made a bad bargain but an expression of the difference in market value between the security offered by the company and that provided by the whole population of London.

Commercial and Industrial.

Changes here are of the usual description. A mingling of trivial movements up and down scattered over a long list. It is unnecessary to dwell upon most of these changes because they never result from active business, but we may say that Nitrate shares continue to drag and also the securities of Motor companies, that Portland Cement shares are again weaker, but that debentures as a rule keep steady and sometimes advance as in the case of the Bibi-Eybat Petroleum issue and the debentures of Pawsons and Leafs. Walkers, Parker's debentures, on the other hand, have dropped back to about 87, but that is the only serious decline all through the list, and against it we may note improvements of 2 in Robinson and Cleaver's debentures and of 1 in Van den Bergh's debentures. Sansinena shares are 4 up.

Electric, Financial, Gas and Insurance.

Edmundson's debenture stock has been put down to about 60 this week, but Canadian General Electric preference shares have been raised 8½ on a few purchases now and again, and most other Electric securities have neither moved nor been actively dealt in.

Changes are more numerous in the Financial Land and Investment group than we have seen for some time, but the stream of business is very thin, and selling seems to have predominated, although Hudson's Bay shares have been lifted 2 by the pressure on the bears. Pekin Syndicate shares are still flat and the rally in Peruvian Corporation preference stock and debentures has not prevented a further decline in the ordinary stock. Some of the Argentine land companies' stocks are also a little weaker, and the changes amongst Financial Trust issues are, if not numerous, in the main unfavourable, Gas, Water and General issues being all put down without sign of business, and Alliance Investment deferred has also been flat, no important rally having taken place anywhere.

Gas stocks keep firm with improvements in some of the Gas Light issues. Insurance shares, on the other hand, are still weak, and with the exception of a rise of 5 in Royal Exchange stock, now up to about 210, the changes are all the wrong way, Northern Assurance shares being as much as 1 lower and others suffering to the extent of from 2s. 6d. to 10s.

Iron, Coal and Steel, Tea, Telegraphs, Tramways, &c.

Movements have been fairly numerous in the Iron, Coal and Steel group, but most of the changes are quite insignificant, from 1s. 3d. to 2s. 6d., with, however, an improvement of 5s. in the two share issues of Pease and Partners. Dunderland first charge debenture stock has been put back 5, and there never was any ground for the recent advances. Cammell, Laird's shares have been steadier, but the 5 per cent. debenture stock is 1 lower, and United Collieries debentures have been put down 2, but the whole assortment of Carnegie Steel Trust issues have been put up 3, with a brisk gamble in the common. Nothing happened worth recording in the Shipping list, and the changes amongst Tea, Coffee and Rubber securities are far from interesting. Generally losses are shown, especially in India Tea shares, Anglo-Ceylon consolidated stock, for example, being quoted 2 lower and Eastern Assam shares ¾ lower. All the changes, however, are not adverse, and Dooars, Nedeem and Ouvah shares, amongst others, have improved. All is dead calm in the Telegraph and Telephone market, and the only noticeable incident under Tramways is a recovery of 5 in London General Omnibus ordinary stock. British Columbia Electric Railway securities have also been firm, as well as the shares of the Mexican Tramways Company, but the shares and debenture stock of the London United Company show depression.

Friday Evening.

Prices have been firm to-day for Home Railways, but flat in spells for Yankees, and not particularly lively in any other section. Both Canadian Pacific shares and Grand Trunk stocks, however, have been lifted by the bear fidget, and Copper shares have shown strength on a little rigging of the metal. The Kaffir market, too, seems to have made at least a show of being alive, although the news about the Chartered Company and its hunt after money is not good. How any body of men, even a "Chartered" board, can expect to extract from the public the large sum wanted by a mere repetition of the stale confidence trick is inconceivable when such securities as the new Moscow loan are given the go-by. Its scrip to-night is quoted par to ¼ premium, which means that the loan is not going off, and underwriters will be in a manner thankful if they have to take up no more than 60 per cent. of it. Central London deferred stock, by the way, seems scarce, and consequently the price is firm, both for that reason and because it is being "tipped" for a rise. Only £600,000 is wanted at once of the £1,600,000 in new capital the board of the Antofagasta Company has got power to issue.

THE WEEK'S PRICE MOVEMENTS.

Pref. 1-32, to $\frac{3}{4}$-$\frac{7}{8}$, Potteries Pref. $\frac{1}{16}$, to $\frac{7}{16}$-$\frac{11}{16}$.

Baku Russian Petroleum.—Production of crude oil for week ending March 21, 195,000 poods, equals 3,144 tons.

Company Reports and Balance Sheets.

*** *The Editors will be much obliged to Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-sheets direct to the Office of the* Investors' Review, *Norfolk House, Norfolk Street, W.C., so as to ensure prompt notice in these columns.*

QUEENSLAND NATIONAL BANK, LIMITED.

Gross profits of this bank for the half-year ended December 31 after providing for interest and rebate on bills amounted to £84,687 or an increase of £16,182, and as expenses only took £2,995 more at £41,080 the nett profits were £13,187 better at £43,607. Of this £23,607 has been transferred to contingency account against £14,420 a year ago, leaving a balance of £20,000, of which £15,000 goes to private depositors' repayment fund, raising it to £23,152, and £5,000 is transferred to reserve. During the first six months the bank paid off £86,097 of its debt to the Queensland Government on promissory notes and has now redeemed a further £86,098, leaving eleven notes for £1,033,172 still outstanding, of which the first is not due until june 30, 1910, so that the bank has been able to make a good deal of headway in clearing off its old debts. Deposits by the Queensland Government are £51,188 up at £473,978 and those of the Commonwealth are £165,757 higher at £332,488, while private deposits have risen by £286,285 to £2,302,704, and bills payable and other liabilities show an increase of £279,507 at £597,314. Against these cash assets are £425,614 up at £2,545,038, the principal increases being £89,097 in coin and bullion, £100,065 in Government stocks, £41,299 in bills remitted and in transit, and £160,000 in money in London at call and short notice, but cash balances are slightly smaller at £102,357. The holding of Treasury notes included in the above total of cash assets is £38,766 up at £220,582, but against this there is on the debit side a Treasury note deposit of £322,000. Advances to customers, bills discounted, &c., have been increased by £372,188 to £5,595,953, but considerable progress has been made with the liquidation of the private ledger accounts, or debts in suspense pending realisation of securities, and the total outstanding is £174,614 down at £251,805.

NATAL BANK, LIMITED.

A further very heavy drop occurred in the nett profits for the year ended December 31, and although £20,285 or £4,851 more was brought forward the disposable total was £15,523 down at £67,762. The dividend, therefore, has to be again scaled down to 9 per cent. compared with 12 per cent. for 1906 and 14 per cent. for each of the preceding four years, while the reserve again gets nothing and the contribution to the pension fund is reduced by £1,000 to £2,000, leaving a slightly larger balance of £20,762 to be carried forward. Owing to the shrinkage in business in the colony practically all the items of the balance-sheet show declines of a more or less important character, the most important being a drop of £248,444 to £3,512,167 in deposits and current accounts. Balances due to London and other banks are £47,923 smaller at £112,304, the note circulation is £8,409 down at £97,862 and bills for collection, which appear on both sides of the accounts, are £95,084 down at £276,796, but bills payable and other liabilities come to only £902 less at £203,261. On the other hand, coin and notes are £13,084 lower at £710,467, bar gold in hand and in transit is £24,893 down at £187,917, remittances in transit come to £200,003 or £43,447 less and balances with sundry banks have dropped by £172,237 to £33,750. Bills of exchange are £1,876 down at £310,661, and the only upward movement is an addition of £8,481 to the British Government and other securities held at £220,023.

DELHI AND LONDON BANK, LIMITED.

Gross profits for the six months ended December 31 again improved by nearly £1,000 to £23,632, but expenses rose by £787 to £14,791, so that the gain in nett revenue was only £168 at £8,841. With £5,889 or £925 more brought forward the available total was £14,730 compared with £13,627, out of which the dividend is maintained at 4 per cent. per annum, but an extra £500 at £2,000 is applied in reduction of doubtful accounts, £594 is added to the sum carried forward making it £5,978. Current and deposit accounts are £45,198 higher at £1,386,153 and bills payable come to £86,378 or £83,360 more, but loans on securities have been reduced by £8,000 to £49,000. Against these cash has risen by £91,103 to £219,761, Government securities are £11,254 higher at £107,267 and other securities are £94,098 up at £173,746, but loans and bills discounted have dropped by £73,539 to £1,366,777. A year ago the directors were able for the first time to reduce their estimate of the amount required to wipe out certain irregular accounts from £17,000 to £14,000. That seems to have effectually broken the ice, and we are glad to note a further reduction to £10,500 as the maximum now believed to be necessary.

IONIAN BANK, LIMITED.

Gross profits for the year ended January 13 (December 31 o.s.) improved by £2,762 to £60,255, and with £32,797 or £3,965 more brought forward the total income amounted to £93,052 compared with £86,325. Management expenses, however, took an extra £3,581 at £21,426, interest on deposits was £1,482 heavier at £16,918, and rebate on bills rose by £724 to £2,040, leaving the nett balance only £940 up at £52,668. An interim dividend of 2s. 6d. was as usual paid out of the surplus from the previous year before arriving at the above-mentioned figure, and a final dividend of 3s. 6d. per share is now declared, making 6 per cent. in all, or the same as for 1906. The note circulation showed a slight increase at £237,129 without taking into account the £82,090 in one and two drachma notes;

current and other accounts, including a loan of £20,000 from bankers, rose by £13,916 to £558,697, and deposits bearing interest were £41,745 higher at £449,844, while liabilities on bills payable came to £84,236. On the other hand cash and notes of other banks rose by £42,932 to £95,555, but money at short notice in London which a year ago stood at £80,000 has apparently all been called in, and money at call with the Greek Government has been reduced by £19,508 to £15,210. The Government guaranteed gold loan relating to specie advanced against forced currency and the other loan in one and two drachma notes are both unaltered at £79,976 and £82,353 respectively, investments are £18,838 up at £176,129, bills receivable come to £23,369 more at £40,385, and bills discounted to £26,273 more at £239,829. The largest increases, however, are £155,927 to £471,043 in advances against securities and £154,087 to £253,981 in loans and current accounts, while advances and current accounts secured on mortgages have dropped by £5,566 to £150,522 and £3,758 to £45,262, and mortgaged property taken possession of is £7,808 higher at £19,777. The directors state that the drachma assets and liabilities in Greece were converted into sterling at the rate of 42.50 per pound, and as the ruling rate on January 31 was only 28.20 the reserve created on excess assets for the nominal depreciation of the capital was £29,986 more than was required. It is proposed to increase the capital to £600,000 by the creation of 56,898 additional £5 shares.

OTTOMAN RAILWAY FROM SMYRNA TO AIDIN.

Passenger traffic on this line continues to improve, and for the half-year ended December 31 yielded £3,077 more at £37,734, but goods traffic was adversely affected by a very small grain harvest and by scarcity in Northern Anatolia, which caused the Government to prohibit all export during December and January. In spite therefore of the fig crop being the largest on record receipts from goods, live stock and minerals fell off by £7,835 to £160,705, and the revenue from all sources was £4,716 down at £198,770. At the same time expenditure on floods repairs and protection works took £12,134, and this special outlay resulted in working expenses being increased by £10,540 to £73,573. Nett income was therefore £15,256 down at £121,197, and as interest produced £2,160 less at £1,247 the available total, including £33,254 brought in, only amounted to £159,698, compared with £177,111. Interest on the first debenture stock and sinking fund contributions having been provided, £3,250 is again transferred to wagon reconstruction account, but there is no special charge to correspond to the £600 written off for discount on 4 per cent. debenture stock a year ago. Of the available surplus of £115,793 interest on the second debenture stock absorbs £31,095, and after payment of the preference dividend the ordinary shares again receive 6 per cent. for the year, leaving £43,092 or £17,134 less to be carried forward. The reserve fund has been increased through the addition of interest to £112,569, of which £46,894 is invested in the company's own debenture stock and £62,246 is in Consols and Local Loans, while the sinking fund, after deducting £3,007 for debenture stock cancelled, stands at £6,450. During the year £4,737 was spent on capital account, against £2,145 received, and the credit balance is now £78,832.

PARAGUAY CENTRAL RAILWAY CO., LIMITED.

Under its new arrangement with the Government this company has power to fix its own rates, and took advantage of that power to impose a moderate increase in August with beneficial results to its revenue. Receipts from passenger traffic for the half-year ended December 31 improved by £3,514 notwithstanding a reduction of 15,963 in the number carried, while goods traffic and live stock produced £2,564 more. Gross receipts from all sources were £7,679 up at £47,123, while working expenses rose by £3,247 to £19,286, and with £10,551 brought in and £131 from miscellaneous receipts the available balance after deducting £515 for general interest amounted to £29,453. Since the meeting in October last resolutions for the voluntary winding-up of the company, the reduction of the capital and the issue of £600,000 prior lien debenture stock have been passed and confirmed, as well as the scheme of arrangement embodying these resolutions and another giving a bonus of 25 per cent. or £125 debenture stock to holders of £100 5 per cent. debenture stock in full discharge of all claims for principal and interest. This scheme was sanctioned by the Court on February 25 last, and as the bonus above mentioned covers all prior claims the balance of nett revenue only becomes available towards payment of a dividend on the 5 per cent. debenture stock after that date. It is therefore carried forward, and with the profits for the current six months should, the directors think, ensure the company being in a position to pay a dividend on the debenture stock at the close of the financial year in June, as all extraordinary capital expenditure will be met by a small issue of the new capital instead of being charged to revenue as heretofore. This new capital is authorised for the extension of the line to Encarnacion to meet the Argentine North-Eastern Railway, and so complete the link for a through service between Asuncion and Buenos Ayres. According to the general manager's report the outlook for the company seems very promising, as the tobacco crop is said to be the largest ever produced in Paraguay and is now quite safe from rain and locusts, while the sugar plantations, maize, alfalfa and other crops are in very good condition, and fruit also promises to be plentiful. The demand for Paraguayan timber fell off suddenly during the past half-year, but is already showing signs of a recovery, and it is hoped that the excellent crops in the Argentine will lead to further improvements.

LONDON UNITED TRAMWAYS.

We regret to say that this company continues to fulfil our worst expectations. The days of an 8 per cent. dividend on the ordinary shares appear to be over for a long time to come, and from the profits brought out in the accounts for the past year the directors have only been able to pay an interim dividend at the rate of 2 per cent. or 1 per cent. for the year as against 2 per cent. in the preceding year. They blame the bad summer for this result, and no doubt it had an adverse influence, but all the same the progress is not satisfactory from any point of view, least of all in relation to the heavy capital expenditure. Up to December 31 last £3,846,723 has been sunk in the business, £297,479 having been added last year, and the gross receipts from all sources came to only £345,570. After meeting working and general expenses and paying for maintenance and repairs to a total of £214,672, £131,747 was left as nett income or £11,228 less than in the preceding year. This enabled the company to meet the interest on its debenture stock, to pay the full dividend on the preference shares and the above-mentioned minute distribution on the ordinary capital, leaving £1,287 to be carried forward against £849 brought in, but this result could not have been reached if the board had not charged £6,472 to capital account as part interest on the debenture stock and on temporary loans. In other words, the total amount of these charges was £65,584, but the sum brought in to the revenue account is only £59,112, and the profits of the year did not permit any assignment to the renewal fund which accordingly remains at only £10,000. In all the reserves are only £26,057, and there are contingent liabilities in connection with construction contracts, business claims and the rating appeal of an unrevealed amount kept out of the balance-sheet. In spite of the larger mileage worked the nett revenue of £131,747, including the small balance brought forward, was £12,344 down on the year's comparison, and the company still owes £273,869 on temporary loans in spite of the large addition made to the capital paid up within the twelve months. A year ago there was £2 payable on 39,933 £10 ordinary shares which was called up at the end of March last, so that there is now only £250,000 in authorised ordinary capital to be issued, the whole of the authorised preference capital of £1,250,000 having been called up. In addition to its debenture debt of £1,395,689, the company owes sundry creditors £33,454, and debtors, &c., owe it only £8,346, while costs in connection with the rating appeal so far incurred, amounting to £5,646, are taken into the balance-sheet as an asset. When the extension of the company's system opened in June last from Raynes Park to Wimbledon, adding 6½ miles to the tramway and bringing the total in work up to 55¼ miles, has been developed and the company's connection with the County Council lines at Tooting effected, there may be considerable expansion in the earnings, but there must be great lee-way to make up, and the only good we can see as likely to arise out of the severe reduction in dividends is that it may give an opportunity to the board to put its finances in a stronger position before high dividends, or even moderate dividends, are resumed.

GATESHEAD AND DISTRICT TRAMWAYS CO., LIMITED.

The number of passengers carried during 1907 increased by 318,348, and although the average receipts per passenger were the same at 1.03d. the total revenue from all sources rose by £1,687 to £54,310. Power and running expenses took £20,698, of this repairs and maintenance came to £4,269 and administration expenses to £3,989, and after providing for mortgage interest and writing off £420 for cost of abandonment of the Whickham Light Railways order £23,133 was left. Adding £623 brought forward the sum to be dealt with was £23,756, out of which £3,500 is transferred to depreciation and renewals account and £1,701 to the sinking fund for redemption of mortgages, and £609 is written off investments. The surplus then remaining is sufficient to meet the dividends on both classes of preference shares and to pay a dividend of 7 per cent. on the ordinary shares with an increase to £1,739 in the balance carried forward. Outlay on the property during the year was fortunately trifling at £333, but the aggregate is now £222,231 quite apart from the £89,746 originally paid for the old lines, which if Messrs. Pixley and Peat's opinion is correct ought long ago to have been written off as pure loss. That it ought to have been written down as rapidly as possible is clear, especially as the undertaking can be taken over by the municipal authorities in about another 16 years, but the company is not making very much progress in that direction as the depreciation fund now amounts to no more than £15,392 or about 5 per cent. of the total expenditure, and even of this only £5,421 is separately invested. Sundry creditors at £6,678 exceed debtors by £4,566, but stocks are valued at £2,295 and cash balances are large at £20,952.

STEWARTS AND LLOYDS.

Another excellent year's business is recorded by this company in the report and balance-sheet for 1907. Its board is again able to pay 10 per cent. on the ordinary shares, viz., 4½ per cent. in September last and 5½ per cent. now, leaving £72,808 to carry forward against £61,571 brought in, or an increase of £11,237. Moreover, £30,000 has been added to the reserve, bringing it up to £350,000. In the balance-sheet the debts due by the company are set out at £250,152 and the debts due to it at £600,008, this latter figure showing an increase of £106,321. Against that increase, however, there is a decrease of nearly £119,000 in the stock of goods, work in progress, stores and loose tools entered at £501,438. During the year £44,251 was spent on capital account, that being the total less the amount written off old plant, bringing the gross expenditure up to £1,387,417, but the allowances for depreciation have brought this down by £440,000, no less than £70,000 having been written

off out of the past year's earnings for depreciation over and above the £30,000 placed to reserve. The nett capital outlay is thus brought down to £947,417 or £55,780 less than a year ago. Cash and bills receivable amount together to £151,286 or £27,451 more, and investments at market prices of December 31 last are entered at £259,825. Shares in Stewarts and Lloyds (South Africa) and other companies at £26,601 show an increase of £8,814 on the year. The gross revenue, it should be added, amounted to £282,124, or an increase of £12,717 as compared with an increase of £36,549 in 1906 over 1905. In their report the directors mention that it has been customary for members of the board to be repaid their travelling expenses and outlays in connection with their attendance at board meetings, these meetings being held in Birmingham, London and Glasgow. This has been done as a matter of course, but the board now thinks that the expenditure ought to be open and recognised by the shareholders, who will accordingly be asked to approve of it by a resolution to be submitted at the general meeting to this effect. Altogether an excellent and straightforward display.

ROBERT STEPHENSON AND CO., LIMITED.

The locomotive works at Darlington were fully employed in 1907, the graving dock was also profitably employed and the new foundry at Hebburn was at work during the greater part of the year, and is well supplied with orders. Against these favourable circumstances the tonnage delivered by the shipyard fell off by 5,298 to 30,199, and profits were adversely affected by the high cost of coal and material and by the adverse money market. Profits on works completed consequently fell off by £2,391 to £50,341, and as the company had no special receipts to take the place of the £2,796 of debts recovered after being written off as bad the total income from all sources was £5,568 down at £51,517. Debenture interest required £698 more at £17,374 and interest and bank charges were also £1,594 heavier at £7,747, but only £12,673 or £8,847 less was spent on repairs and renewals, and the directors were content with £1,375 compared with £1,849. A sum of £1,779 was then written off investments against £2,825 for loss on stock, &c., last time, £582 was charged for cost of removal from Newcastle to Hebburn, and £8,718 was provided for doubtful debts and contingencies. Balance left was £1,269 against £9,073 a year ago, and as no provision had been made for depreciation the directors write off this small surplus, so that the preference shareholders have to go without even a repetition of the half-year's dividend they got for 1906. The reorganisation of its finances in 1906 did not provide the company with any great amount of working capital, and it still has to depend very largely on credit. Secured loans from bankers against instalments on account of work in progress, bills receivable and scrip deposited, &c., are £6,178 down at £107,000, but this decrease is accompanied by an advance of £14,194 to £113,443 in sundry creditors, while there is a contingent liability of £321,186 for bills discounted. On the other hand, work in progress less £51,750 received on account is £25,692 down at £139,421, stores are £2,818 lower at £26,837, investments are valued at £4,686 or £2,319 less and cash has dropped slightly to £16,875, but sundry debtors show an increase of £5,675 at £42,872 and bills receivable are £7,541 higher at £39,891. Outlay on capital account was £27,813, making a total of £615,711, against which the reserve is trifling at £2,945.

SIR W. G. ARMSTRONG, WHITWORTH AND CO.

In 1907 this renowned company made a nett profit of £619,466 out of its various undertakings and dividends and interest gave £39,512 over and above. The balance brought forward, £102,944, has also to be added, making the total at credit of profit and loss £761,921 on December 31. After paying directors' fees £5,306, interest and bonus on employees' deposits £13,716, and interest and charges on mortgage debentures £60,200, or £79,222 in all, the free balance was £682,699, and out of that £50,000 was credited to reserve and another £50,000 to fire insurance. The balance-sheet shows £800,000 at the credit of reserve and £190,000 at the credit of the fire fund, but whether these totals include the sums just mentioned we do not know, not having the previous figures before us. After meeting all charges and the preference dividend the directors are able to declare a 3s. dividend on the ordinary shares, or 15 per cent. per annum, of which 1s. was paid as interim, leaving 2s. to be distributed now. The balance remaining to be carried forward will then be £161,199, but whether or not this includes the £100,000 set aside to reserves we are not sure from the way the report is drawn up. The directors state that "a revaluation of the property of the company has been made, and the result confirms the course adopted in the past with regard to depreciation." No allowance on this score has been made for the past year owing to this revaluation, from which it is to be inferred that the board must have been unusually liberal in writings-off in former years. The balance-sheet makes a fine display. Its aggregate is £8,198,259, and of this £4,641,311 represents property and plant, no less than £355,136 having been spent last year on additions. Work in progress—the value less instalments received—stock on hand, stores, &c., make £1,033,805, and debtors owe the company £1,102,127, while its investments in other companies, including their debentures, amount to £737,191, and cash and bills together make £683,824. Among the liabilities over and above the capital, debenture debt and reserves are £590,155 due by the company to sundry creditors, £222,505 owing on employés' deposits and several items—provision for expenditure on experimental account £90,000, for liability under Workmen's Compensation Act £60,000, and special provision for renewal of plant £33,400—making £183,400 in all, round off the account down to the profit balance already dealt with. Could some shareholder oblige us with the loan of a series of this company's reports covering the past ten years? They will be carefully returned when done with.

P. AND W. MACLELLAN, LIMITED.

This engineering business is in the fashion with a set-back of £5,355 to £56,816 in its nett profits for the year ended December 31, but it brought forward £7,904 or £3,421 more, so that the total available was only £1,934 down at £64,720. Out of this the usual £7,500 is written off for depreciation, but £2,500 less at £15,000 is put to reserve, and after paying dividends of 6 per cent. on the preference and ordinary shares both classes again receive an additional distribution of 3 per cent. and the balance carried forward is increased by £566 to £8,470. With these additions the reserve and depreciation funds now aggregate £108,000 against works, lands and buildings valued at £226,321, and as goodwill, patents, &c., were written off some time ago the position is decidedly satisfactory. Expenditure on property for the year was £5,409 and fixed plant, machinery, &c., was increased by £8,920 to £76,569, but loose tools, &c., are £1,520 lower at £27,251. Sundry creditors and bills payable come to £227,184 or £45,263 more, while debtors are £1,520 down at £228,731 and stocks have been reduced by £12,282 to £94,763, but cash has risen by £19,839 to £30,768 and bills receivable stand at £10,783. Work in progress is valued at £88,798 or an increase of £38,954, so that the new year has at all events started well.

HARVEY UNITED STEEL CO., LIMITED.

The decline of £38,437 to £36,741 in the income from royalties for the year ended December 31 is probably due to the expiry of the French patents, but the fall of £31,058 to £11,046 in interest on investments is not so easily accounted for and it is a pity that the directors offer no explanation. Charges were reduced by £1,219 to £15,232 and with £4,957 or £1,264 less the nett profits including £46 from transfer fees were £69,569 down at £37,558. A year ago the directors were able to put £60,000 to reserve and to write £10,000 off their holding in the French company in addition to paying dividends of 15 per cent., but the surplus now is too small to permit of their doing more than repeat the dividend with a slight addition to the sum carried forward making it £5,388. Patents still stand in the balance-sheet at the £130,000 to which they were written down in 1905 and the company's holdings in the Harvey Steel Company of New Jersey and in the French company remain at £99,448 and £12,900 respectively, but against these items there are the reserve of £180,000 and the sinking fund on account of the New Jersey company of £103,231. In addition the share capital of £204,253 is more than represented by Consols and Bank of England stock valued at £199,657 and other securities £51,410 even allowing for the fact that depreciation has not been allowed for. Sundry debtors owe £36,770 against £28,580 due to creditors, but cash has been reduced by £44,921 to £5,032, possibly through investment operations.

FAIRBAIRN, LAWSON, COMBE, BARBOUR, LIMITED.

Trading profits for the year ended December 31 amounted to £129,948, in addition to which £4,136 came in from interest and transfer fees, and after providing for debenture interest and all charges and writing off £14,144 for depreciation the nett balance was £98,693. With £15,137 brought forward the disposable total was £113,830, out of which the preference dividend is paid, and the ordinary shares receive dividends and a bonus aggregating 8½ per cent., or the same as for 1906. Then an extra £5,000 at £30,000 goes to extension reserve, but nothing is added to general reserve against £25,000, and the sum carried out is increased to £26,330, subject we imagine to directors' additional remuneration. Outlay on the properties during the twelve months was £37,290, making this item £23,146 higher on balance at £864,662, against which the reserves now reach a total of £180,000. Investments representing these funds stand in the books at £125,400, or £8,490 in excess of their market value on December 31. Trading accounts are very decidedly in favour of the company, floating liabilities being £100,585 against debtors £205,045, while cash and bills amount to £104,286, and stocks and work in progress are valued at £150,722.

UNITED ALKALI COMPANY.

Again this company pays a dividend of 4s. per £10 ordinary share for the year 1907, but it does this only by reducing the amount credited to the reserve fund from £75,000 to £25,000, and with that addition the reserve is only £200,000 against a nett capital outlay of £8,032,365 arrived at after writing off £850,000, the amount allowed for depreciation up to December 31, 1906. Another £50,000, the same as a year ago, is, however, added to this depreciation fund, bringing it up to £900,000, and thanks to the reduction in the amount carried to reserve the balance left after meeting the preference and ordinary dividends is £10,409 up at £60,655, although the nett profit has fallen off by £39,590 to £380,409. But this figure is arrived at after transferring £15,000 to the debenture redemption fund, so that the position is in some ways considerably better than it looks. At any rate it is one showing considerable improvement on the exhibits of former years, and some of the changes in the balance-sheet are pleasant, the mortgage upon the Buitron Railway and Mines, for instance, has been brought down by £20,000 to £180,000, the mortgage on the Sotiel Mines is less by £2,943 at £61,836, and debts due by the company are £56,155 down at £390,367. Changes in the assets are less satisfactory, although the additional expenditure on capital account for the year was, at £123,084, £224,883 less than that of the previous year. Stocks, however, are up £150,591 at £911,022, and debts owing to the company are £59,638 higher at £374,172, this total including

£32,203 representing consignments outstanding. Investments at an aggregate of £433,224 show a reduction of £25,408, of which £22,271 represents a decline in the company's risks in subsidiary and other companies now amounting to £325,962, while £107,263 represents what are called general investments, which show a decrease of £3,137. The most startling change of all is in cash and bills receivable, which at £187,829 shows a decrease of £223,191. It is impossible to give any judgment upon most of these changes, but one fact stands out clear enough, gross profits were materially less last year, in fact they fell off £45,466 to a total of £543,339, and apart from general charges which came to £37,246, the heaviest item in the meagre profit and loss account on the outgoings side was income-tax £22,774.

ROBURITE EXPLOSIVES COMPANY.

Excessive competition is again the reason put forward for a further decrease of £1,227 to £14,695 in trading profits for 1907. Carriage and cartage charges were £332 heavier at £2,221, and after providing for commissions, administration charges, &c., the nett surplus was £1,697 down at £4,486. Of this £449 or 10 per cent. goes to reserve, and as the 10 per cent. dividend on the preference shares requires £4,939 the balance brought forward has to be reduced from £1,422 to £520. The ordinary shareholders, who a year ago saw their dividend cut down from 2½ per cent. to 1, now receive nothing, and must get what comfort they can from the statement that the directors anticipate better results from this year's business. Patents and goodwill still figure in the balance-sheet at £63,109, and the auditors only certify the correctness of the accounts subject to depreciation of these assets. Creditors amount to £5,215 against debtors £6,548 and cash £3,859, while stocks are valued at £8,773. Reserves come to £7,253, and are represented by investments nominally worth £9,815, but of which the market value was £1,131 less.

WEBLEY AND SCOTT, LIMITED.

This business of manufacturers of arms and ammunition had a hard time of it last year, as not only was the general trade unfavourable, but there was an entire absence of Government orders. Profits, after providing £3,000, or £1,167 less, for repairs and depreciation, dropped to £4,059, compared with £9,668 for the previous 15 months, but there is nothing to write off for reconstruction expenses against £1,545 so applied a year ago. The directors therefore are able to put another £1,000 to reserve against investments, and to meet the preference dividend with an increase of £128 to £141 in the sum carried forward. In the early part of the year the directors, anticipating the depression which has since taken place in the motor-car industry, considered it advisable to rearrange the motor department. This they did by amalgamating it with the general engineering business of F. E. Baker, Limited, taking shares in that company in payment, but whether the deal has proved profitable or otherwise we have no means of knowing. Property and plant, less £1,088 transferred to F. E. Baker, are valued at £54,802, and goodwill, patents, &c., stand at £79,218, a figure which can only be regarded as out of all proportion to their true worth. Sundry debtors, too, seem abnormally large for the business done at £25,427, and stocks at £34,766 are also heavy, but sundry creditors fortunately are light at £2,670, while £4,778 is held in cash and bills.

ALEX. PIRIE AND SONS, LIMITED.

The directors report that there was a considerable increase in the sales of higher grade papers during the year ended December 31, but the extra profit due to this increase did not fully meet the great advance of about £8,000 in the cost of coals. Nett profits consequently dropped by £1,957 to £35,052, but £509 more was brought forward, making a total of £36,568 compared with £38,016. Out of this a dividend of 4 per cent. is again paid, and £9,056 or £3,056 more is written off the expenditure on water power reconstruction, but as nothing is put to reserve against £5,000 in 1906 the sum carried out is raised by £496 to £2,012. Outlay on the water power reconstruction was £26,797, making a total of £29,056, which is, however, reduced to £20,000 by the amount now written off, and after allowing for this the capital expenditure shows an increase of £17,288 at £725,014. Sundry debtors at £98,768 exceed floating liabilities by £38,919, and stocks, including those at branches abroad, have risen by £11,398 to £203,818, but cash has dropped by £12,572 to £26,283. The suspense account in connection with the Don Fishery action stands at £14,747 against which there is a reserve of £13,000, and the directors state that although the proposals they made last year were not favourably entertained, fresh endeavours are being made to arrive at an amicable arrangement, which, it is hoped, will end all litigation.

GENERAL ACCIDENT, FIRE AND LIFE ASSURANCE CORPORATION.

This Scotch insurance company, whose headquarters are in Perth, is one of the most energetically-managed we know, and yet last year it made very little headway with its new life department, whose total accumulated funds now amount to but £13,605. Its annuity business was also minute, as well as the capital redemption business, but in the accident department it did remarkably well, gathering in £850,358 in premiums at a cost of about £357,000 in commissions and expenses of management, or 40.2 per cent. of the premium income. Also £409,551 was paid away as claims or are outstanding. Then £201,662 was set aside out of the income against unexpired liability, as compared with £134,822 a year ago, and the balance of £17,216 is carried to profit and loss. The fire account also shows good results, the premium income having been £105,583, losses reaching £61,024 and expenses and commissions together £31,610, or at the rate of 50.5 and 30 per cent. respectively of the premium income. Then £42,233 was reserved against unexpired risks compared with £35,178 a year back, and £5,892 carried to the profit and loss account as nett gain for the year. Altogether the company has accumulated funds to the amount of £614,468, including a profit credit of £46,930 in all, out of which dividends aggregating 12½ per cent. have been paid to the shareholders for the year, leaving £25,061 to be carried forward.

LONDON, EDINBURGH AND GLASGOW ASSURANCE COMPANY.

This company's business grows, and it seems to be gradually establishing itself in a strong position. The total revenue for 1907 was £612,438 or £46,098 more than in the previous year. In the ordinary branch the increase was £6,575 and in the industrial £34,356, while the accident branch gave £2,827 more. No business is now done in the health branch. Interest and dividends gave £31,740 or £2,124 more. Claims took £40,677 in the ordinary, £202,048 in the industrial and £16,273 in the accident branch, the total claims of all kinds reaching £259,264, making a total of over £3,000,000 paid in claims and grants since the company started. Funds were increased by £94,470 in the course of the year and now amount to £913,671. This is the largest addition ever made in any one year. Profit came to £21,076, written down to £11,603 by various allowances, and out of that £5,850 has been utilised to cancel debenture stock, the remaining £5,753 being carried forward, out of which a dividend at the rate of 2½ per cent. per annum is to be paid on the ordinary capital. The writings down are the most pleasing thing in the balance-sheet, and the debenture stock outstanding is thereby brought down to £74,800. The establishment and extension of business account which stood at £334,535 at the end of 1906 has also been brought down by various writings off to £309,695. If this goes on the company will become rich in time.

AMERICAN INVESTMENT TRUST CO., LIMITED.

As its name implies the investments belonging to this company are exclusively of American origin, and it says much for the care and intelligence with which they must have been selected that out of almost 200 separate securities less than a dozen failed to make a return during the past year, and almost all the exceptions are held in trifling amounts. Income received in the twelve months to March 15 amounted to £85,550, including £1,154 on account of arrears and after deducting income-tax. This is an increase of £1,580 and when general expenses and debenture interest have been allowed for £62,675 is left. Add it to £29,041 brought forward and the disposable credit is £91,717, from which £20,000 is placed to capital reserve. Dividend on the preference stock absorbs £23,750, and 6 per cent. together with a bonus of 1 per cent. are given to the deferred stockholders, leaving the considerably reduced credit of £14,717 to be carried forward. Sales and redemptions of securities during the year resulted in a profit of £10,937, which was added to reserve, making aggregate appropriations for the year of £30,937. On the other hand £25,597 has been applied to writing down securities, leaving the capital reserve at £200,983 against investments standing at £1,719,681, and which show only a small depreciation.

FOREIGN, AMERICAN AND GENERAL INVESTMENTS TRUST CO., LIMITED.

Lord Eustace Cecil presides over the destinies of this concern as he does over the American Investment, and there is but little to choose between the results achieved. Total revenue in the year to March 15 was £110,553, being an increase of £8,680 against the preceding year, and the allowance for expenses and income-tax leaves the available credit at £86,970. A sum of £35,625 has been already distributed in the shape of interim dividends, and the board now proposes to make the dividend on each class of share capital to 5 per cent., giving the deferred a bonus of 1 per cent. as well as carrying forward £7,719 against £16,623 brought in, after placing £17,500 to capital reserve. The reserve also gets the benefit of £14,139 realised from the sale and redemption of securities, but £27,293 is applied to writing down securities, leaving the fund at £64,215. The investments, which stand in the balance-sheet at £2,078,520, number about 340, and of this total 29 were not interest bearing in the period under review.

GENERAL INVESTORS AND TRUSTEES, LIMITED.

The first report of this company shows that the revenue for the year ended January 31 amounted to £27,300, of which £4,322 was absorbed by administration charges, leaving £22,978 as nett revenue. Preference dividend having been paid, the ordinary shares receive a distribution at the rate of 5 per cent. per annum and £1,544 is written off preliminary expenses, leaving £2,960 to be carried forward. With a paid-up capital of £500,000 the company has borrowed £30,000 on securities, and in addition owes £6,547 for stocks bought but not delivered and £1,179 to sundry creditors. On the other hand investments, less £10,750 for existing mortgages on real estate and after deducting £2,166 for profits on realisations, are valued at £442,247, loans against securities come to £96,000 and cash stands at £8,085, the remaining assets being made up of preliminary expenses £4,632, sundry debtors £104 and furniture £305. Although the directors do not disclose the actual holdings of securities they give three distinct classifications of them, the first of which states that £274,249 is in mortgage debentures and bonds, £41,844 in preference shares, £79,781 in ordinary shares and £46,373 in real estate. According to the second table, £177,730 of the total is in industrials, £131,098 in railways and £77,176 in tramways and electric light and power, only £7,050

being in mining and £2,240 in Government and municipal issues. The third table gives the geographical distribution, an arrangement which has become something of a fetish amongst a certain class of investors, and from it we learn that £164,598 is invested in America, £146,348 in Great Britain, £89,240 in Europe, £28,394 in South America, £7,039 in Mexico and Central America and £6,628 in British colonies. Depreciation, we fear, must have been heavy on most of the investments, and the directors would have thrown more light on the position if instead of drawing up such elaborate details they had shown the difference between market and book values.

DICKINS AND JONES, LIMITED.

After charging repairs and renewals, providing for depreciation and bad debts and transferring £8,700 or £748 more to the leasehold sinking fund, the nett profits for the year ended January 20th showed a satisfactory improvement of £1,946 at £76,287. Directors' fees and other charges took a trifle more at £8,172, but a larger balance of £20,419 was brought in, and the amount to be dealt with was £3,689 up at £89,533. Preference dividend having been paid, the ordinary shares again receive a dividend and bonus making 14 per cent., and last year's appropriations of £1,500 for special repairs and £5,000 to the reserve for equalisation of dividends are repeated. Then £530 or £30 more is put to the accident insurance fund, and the sum carried forward is increased by £3,659 to £24,078. Including this surplus the total accumulations now aggregate £141,273 against £122,914 a year ago, of which £50,000 is the preference shareholders' special reserve, and is invested in £56,971 Consols at a cost of £52,492. Sundry creditors have risen by £14,045 to £34,310, against which stocks are £22,608 higher at £137,634 and sundry debtors owe £119,886 or £17,345 more, but cash has dropped from £16,523 to £7,394. Additions to freehold and leasehold premises were £2,218, raising the total to £463,311, but fixtures, &c., were reduced on balance by £639 to £30,051.

STANLEY BROTHERS, LIMITED.

Judging by the particulars given in the prospectus of the debenture issue made a year ago, this business of brick and tile makers has been on the down grade for some years. A dividend of 20 per cent. was paid in 1900, but that seems to have marked the top of its prosperity, and although for the next three years the ordinary shares got 12½ the distributions fell to 6 per cent. in 1904 and 1905 and to 5 per cent. in 1906. Last year a lower depth than ever was reached owing to stagnation in the building trade, keen competition, high costs of production and low selling prices, and the gross profits amounted to no more than £24,055. After providing for all charges and writing £8,949 off for depreciation and £512 off debenture issue expenses the nett profits were £10,595, of which debenture interest took £2,426, leaving £8,169. To this was added £7,287 brought forward, making a total of £15,457, which the directors deem it advisable to carry forward, so not only do the ordinary shares get no dividend but the preference shareholders suffer a like fate. Why this course should have been adopted is not very clear, as the current position shown by the balance-sheet is not unfavourable. It is true that the company owes £40,984 to sundry creditors and on bills payable and that cash and bills are trifling at £578, but it has £52,404 to come in from sundry debtors and stocks are valued at £60,551. Properties stand at £294,800 and goodwill at £15,000, against which there is a reserve of £26,529, all, however, in the business.

CHARLES BAKER AND CO., LIMITED.

Profits on trading and income from investments for the twelve months ended January 31 showed a decrease of £692 at £26,800, but profit on sales of shares in I. Walton and Co. and on redemption of debentures came to £412 more at £747, so that the falling off in the total income was only £280 at £27,547. Balance brought in, however, was £328 smaller at £677, making the amount available for distribution £28,224 against £28,832, out of which £1,013 is written off fixtures, &c., and £479 or £122 more off bad debts and £1,927 is added to leasehold redemption fund. There was no special item to write off compared with the £2,055 loss in South Africa and the directors take advantage of this to transfer £1,000 to reserve and to raise the dividend by 1 per cent. to 6 leaving only £272 to be carried forward. Liabilities on fixed deposits have been reduced by £2,429 to £28,265, but any advantage derived from this is lost in an increase of £4,061 to £38,403 in sundry creditors. On the other hand, stocks are £4,886 up at £179,315, which is surely a very heavy figure, and while debtors have risen by £467 to £14,632 cash has dropped from £7,107 to £5,603. Freehold and leasehold premises stand at £131,187, a reduction of £266 only, goodwill is unaltered at £57,406 and the nett decrease in fixtures, &c., is no more than £599 at £23,825, while on the other hand the reserves of various kinds have been increased by £3,234 to £24,165. Part of these is invested in preference shares of Isaac Walton and Co. valued at £11,175 and the directors again trot out their pet theory that the difference between this figure and the estimated value constitutes an additional reserve of nearly £15,000, although 930 of the shares were disposed of during the year, the profit taken as usual to swell the revenue. Another £3,240 of the debenture stock was redeemed on account of the leasehold fund leaving £110,405 outstanding.

LINGHAM TIMBER AND TRADING CO., LIMITED.

Reconstruction has not done much to mend the affairs of this company, partly because it appears to be waterlogged even now, and the report of the second year's trading makes melancholy reading. The directors ascribe the very unsatisfactory results for the twelve months to June 30 to the continued depression in South Africa, and state that every possible economy is being introduced, but that the extensive property, equipment and organisation make the task of cutting down expenditure extremely difficult. Including allowances for depreciation, &c., the loss on trading was £15,494, which was increased to £22,906 by administration charges, debenture interest, and £914 balance of preliminary expenses written off; and as a debit balance of £16,741 was brought in, the total deficit is £39,647. The liquidation of the old company is not yet concluded, and the balance-sheet consequently is a rather mixed affair, but sufficient details are given to show that no inconsiderable portion of the capital is represented by unrealisable assets. In addition to the paid-up share capital of £256,802 the company has raised £95,700 on debentures and owes £30,762 to sundry creditors. On the other hand, freehold and leasehold buildings, plant, &c., are valued at £214,451, but this includes £26,115 for a cold storage property taken over from the North American and African Cold Storage Company, now in liquidation, regarding which the directors say they are not in a position to state what the actual value should be. Another item to which the same remark applies is the holding in the Waterberg Lands and Timber Company, standing at £7,515, while the purchase of business account of £39,564 and the liquidation suspense account of £10,703 are on the face of them decidedly intangible. Stocks are valued at £51,481, although from the directors' remarks it would seem to be doubtful if that figure can be realised; debtors owe £15,601, and cash and bills come to £6,720.

BRANDON'S PUTNEY BREWERY, LIMITED.

Brewing profits showed a decline of £1,436 to £41,634, but with £763 more at £7,401 brought in and various reductions in outgoings the sum available is higher at £20,551. On repairs, depreciation, &c., at £7,948 there was a saving of £492. Directors' and trustees' fees took a little less at £1,589. Leases depreciation and licence compensation together required £1,466 less at £2,884. Income-tax took £1,342 and debenture interest and preference dividend, as before, £14,725. The dividend on the ordinary shares is maintained at 5 per cent. Similar appropriations of £5,000 and £1,000 are made on account of reserve and freehold property account, and the carry forward of £7,426 is, after all, £25 higher. Additions of £9,857 have been made to property account during the year, and with £2,000 written off freeholds and £3,172 off leaseholds, &c., this item will be £4,686 higher at £531,841. Trade debtors owe £3,390 less at £9,438 and floating liabilities are £9,068 lower at £43,277. Consumable stocks have risen £2,671 to £20,224 and cash balance is practically unchanged at £10,841. Trade loans have been repaid to the extent of £22,545 and now stand at £62,155, while the loan reserve, being premiums from tenants on sale of sub-leases, is £12,077 down at £53,355. General reserve now amounts to £25,000, a hardly adequate protection against possible depreciation of property in these wayward times.

MINOR NOTICES OF COMPANY REPORTS.

African Steamship Company.—The 56th annual report shows a profit on voyages, &c., of £132,919, and after deducting general expenses and £23,226 interest on debentures and £74,966 depreciation of steamers, £27,347 is carried out, making with £1,278 brought forward £28,625 available. A dividend of 16s. a share or 5 per cent. is paid for the year and £1,640 carried forward. Capital account is overdrawn £317,141 and the balance of £4 a share is being called up. This is outstanding on only a few shares, and will bring in £24,304. Debtors owe £118,571 and floating liabilities are £349,933. Reserve, including underwriting, is £112,873, but has no separate existence, and with only £3,271 in cash the company does not seem too well prepared for any serious emergency.

Antwerp Water Works Co., Limited.—Antwerp receipts improved £6,436 to £73,703. Charges, however, at £24,712 were £3,750 higher, of which wages and materials accounted for £1,786 and pumping over £1,000, so that the working balance is only £2,726 better at £47,744, with £3,254 or £2,818 less brought in, the sum for appropriation is £192 lower at £51,294. The dividend is raised ¼ per cent. to 8¾ per cent., but no allocation to reserve is made against £6,072 in 1906, so that the carry forward is increased to £7,878. Additional expenditure of £4,373 increases the overdraft on capital account to £24,422. Investments at market prices of December 31 are £22,230, and cash amounts to £12,849.

Bath Stone Firms, Limited.—The directors of this company make up the dividend for the year 1907 to 8 per cent. and have £9,537 left to carry forward, or £2,768 less than was brought in, but £5,992 was set aside for depreciation during the year, bringing the total up to £108,009. No improvement has yet taken place in the building trade, and we fear none is coming soon, so that it might have been better to reduce the dividend in spite of the provision the directors say they have made for its equalisation by carrying forward large undivided balances. These will soon disappear unless trade improves. The total reserves come to £21,000, including £1,000 set aside under Workmen's Compensation Acts. Stocks in hand amount to £100,123 and £127 was spent on capital account last half-year, bringing the total capital expenditure up to £330,250 before deducting receipts from sales of various properties owned aggregating £13,435, so that the nett capital expenditure is £316,815. Cash and bills receivable come to £10,845, and the position is in that respect fairly comfortable. Nett profit for the half-year, it may be added, was £6,257, and the dividend took £9,084.

Browett, Lindley and Co., Limited.—Gross profit on completed work amount to £9,859, and with £15 from investments total revenue is £9,874. Interest takes £2,191, depreciation £6,365, including £3,173 on machinery, and £2,505 on upkeep of patterns, and £1,319 is carried to reduction of debit balance of £15,368, leaving profit and loss account still £14,949 the wrong side. Higher wages, dearer coals, and materials and competition have conduced to poor results, but prospects are declared to be hopeful. Balance-sheet items are:—Land and buildings £19,865, machinery, &c., £56,063, patterns £10,296, goodwill and patents £8,516, stocks, work in progress and completed engines £28,736, debtors £21,906, and cash no more than £49, while liabilities are:—To trade creditors £15,569, loans £7,405, bankers £19,128, secured as to £12,000 by that amount of debenture stock, which is included in the issued amount of £30,000.

Cabins (1901).—Gross profits for 1907 were £34,113 and after meeting all expenses the nett income including £745 brought in and £110 from interest, &c., was £9,934. Of this £1,543 was written off for repairs and renewals together with £517 for special repairs and other charges absorbed £1,708 leaving £5,265 out of which the preference dividend is paid and the ordinary shares receive 4 per cent., and £1,000 is put to reserve leaving £1,183 to be carried forward. Goodwill, leases, &c., are valued at £88,057 and in addition to its capital of £62,349 the company has borrowed £6,428 on debenture stock and £14,500 on mortgages on ground lease. Sundry creditors including rents, taxes and wages accrued come to £6,043 against stocks £661, debtors £1,767 and cash £1,925, and the position generally is one that would stand considerable amendment.

Carrizal and Cerro Blanco Railway.—The decrease in traffic noted in the first half of 1907 continued throughout the six months ended December 31, but owing to the lower value of currency the gross income was $19,681 up at $164,715, of which $141,887 or $14,134 more came from goods, minerals, &c. Expenses, however, increased at a still more rapid rate, mainly because of heavy expenditure on renewal of sleepers and of the high price of fuel, and nett profits were $4,047 down at $54,934. Of this $10,000 is put to the fund for repairs and $1,230 is written off extraordinary renewals, and after providing for interest, &c., the surplus was $42,293. Adding $7,637 brought in the disposable total was $49,930, out of which $423 or 1 per cent. is put to reserve, and a dividend of 3 per cent. absorbs $45,000, leaving $4,507 to be carried forward.

Dairy Supply Company.—Gross receipts for the year ended December 31, including £2,179 from rents, &c., were £842 down at £58,533, while expenses, in spite of reductions of £350 to £3,500 in cost of repairs and £307 to £1,544 in bad debts written off, took a trifle more at £39,777. A considerably larger balance of £9,088, however, was brought forward giving a disposable total of £27,844 against £25,163 out of which £5,000 is again put to reserve, but £50 less at £900 is written off leases and pension fund gets only £300 against £1,000. The dividend paid is then increased by 1 per cent. to 9 and £11,519 or £2,431 more is carried forward. Capital expenditure is down to £82,043 while the reserves and insurance funds with interest added come to £5,449 more at £16,651, of which £11,050 is invested in Consols and £3,000 is in Middlesex County 2½ per cent. stock. These, however, are taken at cost and there would appear to be a considerable depreciation on them as the auditors think it necessary to mention that the reserves are subject to the difference between book and market values. Liabilities are £1,214 up at £31,143, but debtors have risen by £4,708 to £54,950, stocks are £2,363 larger at £17,158 and cash comes to £23,328 or £1,140 more.

Dominion Savings and Investment Society.—Gross earnings of this Canadian company for 1907 were £20,622, of which £10,327 was retained as net profit. Of this the usual half-yearly dividends at the rate of 4 per cent. per annum have been paid, £2,055 is put to reserve, raising it to £20,548, and £590 is added to the contingent fund. Liabilities to the public on debentures and savings bank deposits are £224,481 and to the shareholders for stock, reserve funds and accrued dividends £220,154, or a total of £444,635, against which mortgages taken at their cash value amount to £433,569, and £10,861 is held in cash.

Edinburgh Life Assurance Company.—Nett premium income in 1907 was £317,855 and the interest and dividend income £171,094. Claims took £294,696 exclusive of £19,510 paid as surrender values and bonus additions. Claims were within actuarial expectation. The assurance and annuity fund was increased by £131,676 to £4,242,840, but the directors took off £50,000 from the profits of the past five years against depreciation in investments, reducing the fund to £4,192,840, but its total funds of every description still came to £4,307,590 at the end of the year, and the company on the five years' valuation of its assets and liabilities is able to show a surplus of £284,450 after writing off the £50,000. Of this sum one-tenth belongs to the proprietors and the other nine-tenths goes to the policyholders, enabling the board to give bonuses ranging from 5 per cent. to over 23 per cent. on its profit-sharing policies and to declare a dividend of £2 per share payable half on April 13, half on October 5 next, tax free.

Edwards Air Pump Syndicate.—A small decrease to £10,440 in the income from royalties in 1907 was more than made good by the revenue from other sources and the total showed an increase of £425 at £11,555. Expenses were reduced by £441 to £4,262, and although the balance brought forward was decidedly smaller, and nothing came in from profit on sales of securities against £159 a year ago, the nett gain was £509 at £7,357. Of this the directors again transfer £2,500 to patents redemption fund, and after repeating the dividends of 20 per cent. for the year carry forward £578 or £515 more. The redemption fund now amounts to £15,000 or the same as the price originally paid for the patents, and as it is practically all separately invested it would be difficult to imagine a stronger position. Investments have been increased by £5,204 to £14,154 at the cost of a reduction to £2,757 in cash and bills, but debtors, including £3,661 due on contracts, amount to £12,335 or £2,113 more against only £3,502 due to sundry creditors.

Gandy Belt Manufacturing Co.—Including £1,654 brought forward the nett profits for the year ended December 31 were £16,755. Preference dividend having been paid, £942 is written off buildings, plant and machinery, and £3,000 off goodwill and patents, and £2,000 is put to reserve, after which the ordinary shares get 7 per cent. for the year, leaving £1,931 to be carried out. Freehold property now stands at £20,694, the depreciation allowances to date being £2,080, and goodwill and patents are down to £44,035, but plant, &c., is slightly higher at £12,795, while the reserve with the present addition is only £5,000, of which £3,224 is separately invested. Debtors and bills receivable at £20,075 exceed creditors by £5,284, stocks are valued at £56,820, and cash comes to £8,217.

Henry Tomlinson.—This Sheffield brewery made a gross profit in 1907 of £21,299, of which £15,122 was retained as nett and with £1,395 brought forward gave a total of £16,517 for disposal. Debenture interest and preference dividend having been met the ordinary shares receive 15 per cent., £3,000 is put to reserve and £268 is written off for preference share issue expenses leaving £2,366 to be carried forward. The directors' feelings with regard to the Licensing Bill have apparently been too deep for expression at any length, but they announce that after careful consideration they are of opinion that a reduction of the dividend paid in the past is absolutely essential to provide towards future contingencies should the Bill become law, either in its present or a revised form. Freehold and leasehold properties, &c., less an unspecified sum for depreciation stand at £211,650, and as the share capital is only £102,630 the company has had to raise £50,000 by debentures and £42,847 by advances on deeds of newly-acquired properties, while the reserve of £26,500, which includes £15,000 from premiums, is also employed in the business. Sundry debtors at £12,123 exceed creditors by £4,014 and stocks are valued at £11,876 but £3,750 has to be found for the final dividend, and there is not a single penny of cash in hand.

Jones and Higgins, Limited.—Trading profit, after making allowance for bad debts and depreciation, shows a further decline to £28,341, and with £1,616 from rents, £26 fees, and £2,892 brought in, £26,752 is available, £6,123 being absorbed by directors' fees and debenture interest. Interim and final dividends make 13 per cent. for the year as before. Directors and managers get £5,000, reserve fund £3,400, making it £68,567, and £1,452 goes forward. During the year £5,000 debenture stock has been redeemed. Trading accounts are small and on the right side. Freehold premises and goodwill, which would be more satisfactory if given separately, together are valued at £226,104. Stock £49,439 and cash abundant at £20,505.

Lanarkshire and Ayrshire Railway Company.—A small increase of £207 to £12,800 is shown in passenger receipts over the last corresponding period, a decrease of £4,569 in merchandise and £51 more from miscellaneous, so that gross revenue is £4,518 down at £37,526; but expenditure has been lowered by £2,058, entirely in working expenses, maintenance, &c., so that nett revenue is only £2,459 less at £15,204. After providing for prior charges a dividend of 1 per cent., comparing with 1¾ per cent. is paid on the ordinary and £203 goes forward. Additional £3,314 has been spent on capital account, increasing the debit to £326,208, and for the current half-year the estimated expenditure is £7,000.

Landed Banking and Loan Co.—Including £2,079 brought forward the gross revenue for the year ended December 31 was £35,969, and after providing for all charges £19,659 was left. Two half-yearly dividends at the rate of 6 per cent. per annum having been paid, £205 is written off premises and £8,219 is added to reserve, leaving £2,343 to be carried to the new account. With a paid-up capital of £143,836 the company has a reserve of £71,918 and owes £302,771 on savings deposits, debentures, &c., while its assets consist of "cash value of securities" £479,479 and municipal and other bonds, loans and cash £41,732.

Licenses Insurance Corporation and Guarantee Fund.—Premiums in 1907 £106,151 nett and total income £114,906, while total expenditure, exclusive of additional reserve for unexpired risks, was £86,294, showing a balance of £28,612 made up to £36,517 by £7,905 brought forward. From this £15,230 has been appropriated for obligations under mutual brewers' class and £10,000 to reserve for depreciation of investments, so that £11,201 remains, out of which the ordinary shareholders get 6 per cent. for the year, leaving £7,074 to be carried forward. Management expenses took £35,072 and the reserve for unexpired risks was increased by £76 to £28,096.

Lima Railways.—An interim report for the half-year ended June 30 last has just been issued which shows a decrease in gross revenue of £5,053 at £16,112, mainly in goods, but as the lease with the electrical companies came into operation on May 1 the figures cover only four months against six a year ago. Expenses were reduced by £4,357 to £13,819 leaving £2,293 as nett revenue, but debenture and loan interest requires £2,498 and the debit balance carried forward is therefore increased slightly to £16,447. The directors announce that the agreement for leasing the lines and that with the Government have been definitely completed, so that the Callao, Magdalena and La Punta sections are

now the company's property in perpetuity. They regret that they have been unable to proceed with the reorganisation scheme, but promise that the matter will be concluded as soon as possible.

Madras Electric Tramways.—Gross profits for the year ended December 31 amounted to £9,248 and after charging interest and London office expenses, transferring £1,500 to depreciation and renewal fund, and £604 to sinking fund and writing £310 off discount and expenses of capital increase the nett surplus was £1,892. With £176 brought forward the disposable balance was £2,068, out of which a dividend at the rate of 6 per cent. per annum was paid on the preference shares for the six months to June 30, when the shares were converted, and the preferred ordinary shares now receive 4½ per cent. per annum for the second half-year leaving £221 to be carried forward. Outlay on capital account was £7,921, but £11,000 was issued in 5 per cent. debenture stock, and the position now is that with an issued share capital of £114,760 and a debenture debt of £64,800 the company has spent £174,354 on its undertaking. Reserves consisting of the sinking fund £1,083 and balance of depreciation fund £459 are small, and as stores have cost £9,405 it follows that floating liabilities are comparatively heavy at £6,876. Sundry debtors owe £1,027 and cash comes to £2,481, and it looks, therefore, as if the company were rather pinched for working capital.

Mersey Railway.—The passengers carried during the half-year ended December 31 again showed an increase of 332,771, and with an addition of 824 to the number of season tickets issued the income from this source was £3,580 up at £47,148. With miscellaneous items the total receipts amounted to £51,027 or £3,668 more, but expenses took £37,308 or an extra £1,424, of which law expenses accounted for £825. Nett revenue was therefore £2,244 better at £13,719, but fixed charges required £17,624 or £699 more, and as general interest yielded only £86 the British Westinghouse Company had to provide £3,809 against £5,334 on account of interest on the new first perpetual debenture stock. By this arrangement the deficit for the half-year is restricted to the usual £10, but the debit balance to date is now £8,481. A note attached to the balance-sheet states that the British Westinghouse still disputes its obligations with regard to two sums of £500 each transferred to permanent way renewal fund and locomotive and generating power renewal fund.

Millar and Lang.—It is to be hoped for the sake of the many investors now interested in the pictorial postcard industry that the directors of this art publishing business are correct when they ascribe the falling off in the demand to the wet summer last year, but these things have already had a long spell of favour, and popular fancy is proverbially fickle. Whatever the cause may have been the shrinkage in the turnover during the twelve months ended February 29th would seem to have been considerable, as trading profits dropped by no less than £4,009 to £13,829. The balance brought forward was £1,492 larger at £2,865, making the total income £16,694, against £19,211, and the directors very wisely deem it better to reduce the dividend from 15 per cent. to 10 per cent. rather than cut down any of the other appropriations. They are therefore able to write off £975 for depreciation and another £162 off preliminary expenses, and after transferring another £2,000 to reserve have £2,799 or £66 less to carry to the new account. Heritable property is £283 down at £11,047, but plant, &c., is £657 up on balance at £14,494, and goodwill and patents, &c., are unaltered at £33,746 and £3,500 respectively, against which the reserve will now amount to £6,000, one-third of it being separately invested. Stocks have been increased by £2,407 to £29,928, but debtors and bills receivable come to £1,116 less at £15,143, and cash has dropped by £1,974 to £8,886. Fortunately, however, floating liabilities are light at £1,644.

Newhaven Harbour Company.—Harbour tolls and dues produced £18,396, and sundry receipts brought revenue up to £19,531 for the half-year to December 31. Outgoings, including £127 interest and £420 repayments on loans from Public Works Loan Board and £9,188 interest on stocks, amounted to £22,960, leaving a balance of £3,429, which is borne by the London, Brighton and South Coast Railway under the working agreement. There have been no expenses or receipts during the half-year on capital account, which remains with a credit of £1,339. Loans due to the Public Works Loan Board redeemable out of revenue are now reduced to £7,365.

New Inverted Incandescent Gas Lamp Co., Limited.—The fifth annual report shows nett trading profit after providing all trade charges £10,150. Fees, interest and tax require £886 and £9,280 is carried to balance-sheet, making with £16,049 brought in £25,329 available. A dividend of 6¼ per cent. is paid as against 5 per cent. the previous year, £12,500 is written off original patents, making in all £16,500 so written off, reserve account is opened with £6,500 and £1,374 carried forward. Patents still represent £66,563. Stocks on hand are valued at £13,034. Debtors owe £18,357 against creditors £8,349, which has been paid since December 31, and cash is £2,073.

Pryce Jones.—Trading profits for the twelve months ended January 31 rose by £803 to £19,386, and with a reduction in interest and administration charges the nett profits including £1,378 brought forward were £1,157 better at £16,535. Out of this a dividend of 6 per cent. or 1 per cent. more is paid on the ordinary shares leaving £2,535 to be carried forward subject to directors' fees which a year ago amounted to £1,000. Property account shows practically no change at £209,825 and against this the only accumulation is the depreciation fund of £9,200, a figure which seems far from adequate. Floating liabilities have been reduced by £5,688 to £35,730, while stocks are £2,000 down at £52,316 and cash is £1,674 smaller at £7,464, but sundry debtors have risen by £609 to £27,048.

Royal Bank of Queensland, Limited.—Gross profit for the half-year is £2,555 higher than in the coresponding period at £37,869 and nett profit £13,772 shows an increase of £1,380 over the previous and £871 over the corresponding half-year, with £822 less at £1,146 brought in. The dividend is raised ½ per cent. to 4½ per cent., £1,000 put to reserve, making £70,000, but only £1,000 against £1,500 to contingency fund, which does not figure in the balance-sheet, and £611 is carried forward. Coin, bullion, notes and stock amount to £400,912 or £39,241 down, representing 35.8 per cent. of the liabilities, and bills discounted and all other debts due are £72,851 higher at £1,211,788, against liabilities and deposits £1,075,710, up £18,883, and bills payable £5,389 down at £9,389. With a thoughtfulness deserving of imitation, the dates of the balance-sheet are to be altered to March and September in order that the staff may enjoy their Christmas holidays. The balance-sheet aggregates £1,676,411.

Scottish Accident Life and General Insurance Company.—Total revenue for 1907 £85,454 and total claims £36,128 or 44.64 per cent. of the gross premium income against 45.78 per cent. in the previous year. The balance-sheet shows total funds to the amount of £243,342, of which £114,981 represents life funds and £87,771 accident and general insurance funds, the balance being a paid-up capital of £30,000. But against this aggregate claims amounting to about £10,500 have to be set. The company does as yet a very small life business, but in the accident and general line its premium income last year amounted to £85,388, and expenses of management, &c., took about £32,000. Fifteen per cent. is again paid to the shareholders and £1,487 was written off cost of buildings, &c.

Scottish Amicable Life Assurance Society.—Modest progress is shown by this old company's accounts for the past year, the premium income having risen by £2,388 to £58,297, but a much smaller annuity business was done bringing in £8,866 of capital against £19,979 in the previous year. Claims took £265,197 or £11,126 less, being 80.4 per cent. of the expectation against 87.3 per cent. in the preceding year, and a large number of the death claims arose on the lives of very old people, no less than five persons having died at the age of 90 and upwards during the past year and 45 at the age of 80 and upwards. The total income was £516,132 or £2,922 up, and the total claims £15,224 down at £387,061. Expenses of management and commissions took £43,016 or 13.8 per cent. of the premium income against 14.76 per cent. in the previous year, so that the record is good throughout, and at the end of the year the company's life funds were increased by £129,071 to a total of £5,046,400, the interest income having been £195,463, the average rate earned subject to income-tax being £4 0s. 1d. per cent. on the total funds invested and uninvested.

Sheffield and South Yorkshire Navigation Company.—Receipts for the past year were £1,099 less at £52,456, while expenditure was reduced by £1,220 to £27,015. Interest took £80 more at £2,030, so that with £121 or £61 less brought in the disposable sum of £18,831 is only £40 less. This provides 3 per cent. on the preference stock and leaves £81 to go forward. On capital account £1,369 was spent, but this sum is reduced to £252 by sales of land, &c., and the debit balance is thus £40,724. Cash in hand is £190 and £6,794 is owing to the bankers, while £33,551 is due to the Aire and Calder Navigation Company on account of the joint canal from Bramwith to Syke House. The toll earnings from this undertaking amounted last year to £1,259, of which this company is entitled to half.

South Wales Electrical Power Distribution Company.—Few signs of improvement are to be traced in the report and accounts of this unfortunate enterprise covering the year 1907. The nett addition to the accumulated loss on working the business was £11,771, so that the debit on revenue account is brought up to £82,838. The new board, however, arranged with its creditors to settle claims amounting to upwards of £78,000 by giving them preference shares for that amount. It is still spending capital, and orders for about £26,000 worth of new modern plant have been given out. In some respects, however, progress is being made, and the business may perhaps yet pull round if the subsidiary companies actually working or in contemplation prosper. The total capital in the business is now £930,609, and the capital account is overdrawn by £96,311.

Standard Property Investment Co., Limited.—Income amounted to £7,436 and expenses in Edinburgh and Glasgow to £3,155, leaving profit for the year of £4,282, and with £667 brought in £4,948 for appropriation. Reserve is credited £500, depreciation reserve £901, a dividend of 10 per cent. paid, and £547 carried forward. Loans granted are about £8,000 lower at £540,090, and amount due to depositors and debenture-holders at £509,181 shows a decrease about £9,000. With the year's contribution reserve is now £30,000, equivalent to the issued capital, and depreciation reserve unaltered at £3,000, the appropriation balancing various debits, while investments including £2,500 Consols purchased during the year total £29,381, and temporary investments £2,359. Cash at bank amounts to £3,607.

Tricolor Nitrate Company.—The directors state that the production of nitrate during the year ended June 30 was not continuous nor was the intermittent manufacture being carried on under normal conditions as in addition to the very serious labour troubles the company was hampered by unexpected difficulties with its water supply. No profit and loss statement is possible under the circumstances, and the accumulated expenses together

with a trading loss of £757 have been carried to a suspense account, which now amounts to £34,618. This means that a lot of financing has been necessary, and although a further £25,000 of shares were issued at 21s. per share this was quite insufficient to meet all requirements. Cost of the property at the date of the balance-sheet was £141,135, tools, &c., stand at £5,783 and general stores at £12,609, while the share and loan capital amounts to £155,000 and there is a premium account of £1,250. Borrowing, therefore, has been heavy, and the company owes no less than £32,245 to its bankers and £20,086 to sundry creditors against which nitrate stocks are valued at £9,827, sundry debtors come to £3,284 and cash balances to £1,324.

West of Scotland Insurance Office, Limited.—This office has reached its 21st year, and its report contains a summary of its business since the commencement. The figures are interesting and show that the total losses have absorbed 45 per cent. of its total receipts from all sources, and expenses of all kinds and commission 30½ per cent., leaving 24½ per cent. for dividends and reserves. During the past year fire and burglary losses amounted to 40.7 per cent. of the premiums, a decrease of 14.6 compared with the previous year, the total receipts being £33,396. In the employers' liability section, which is new, the premiums amounted to £2,220, and the ratio of loss 9.8 per cent. Working expenses were lower at 34.5 per cent., a reduction of 1.4 per cent., but are still high compared with the average of the 21 years. During the year 10,000 new shares were issued giving a nett premium of £10,200, which has been carried to revenue account. But for this the addition of £10,000 to reserves could not have been made, these funds now amount to £42,000 in all. A dividend of 10 per cent. and a bonus of 2½ per cent. were paid on the 2nd inst., requiring £3,750, leaving a balance of £1,052 to be carried forward.

White, Tomkins and Courage.—In its year ended January 31 last gross earnings came to £16,977 and nett to £12,439 after allowing £3,350 for depreciation. The preference share dividend was met and out of the balance a dividend at 2 per cent. per annum was paid on the ordinary shares, leaving £3,701 to carry forward against £3,863 brought in. No mention is made of depreciation allowances, but the report says that all plant and machinery was well maintained out of revenue and full depreciation provided for. In the balance-sheet £16,750 appears as depreciation reserve against a capitalised value of premises, goodwill, trade marks, machinery, &c., of £287,172. Stock is entered at £49,851, debtors at £63,582, investments at £11,856, and cash and bills receivable at £7,785. Creditors are owed by the company £27,998, and there is a reserve of £5,988, a modest enough figure.

DIVIDENDS ANNOUNCED.

RAILWAYS.

Buenos Ayres and Rosario.—For six months ended Dec. 31, 1907:—On 33,209 7 per cent. preference shares of £10 each 7s. per share, making the full dividend of 7 per cent. for the year; on £4,304,360 consolidated 7 per cent. preference stock, 3½ per cent., making the full dividend of 7 per cent. for the year; on £16,786,930 consolidated ordinary stock, 3½ per cent., making a dividend of 6 per cent. for the year; on the instalments paid on the new shares, 1906, from the due dates of such instalments to Dec. 31, 1907, at the rate of 7 per cent. per annum—namely, 6s. 0·88d. per share. For the year ended Dec. 31, 1907:—On £811,797 deferred stock, 6 per cent.

Buenos Ayres Great Southern.—Interim on the ordinary stock for half-year at the rate of 6 per cent. per annum, carrying forward £106,596.

Buenos Ayres Western.—Interim for half-year ended Dec. 31 at the rate of 6 per cent. per annum on the ordinary stock, carrying forward £114,868.

Taltal.—Interim for half-year to Dec. 31 at the rate of 3s. per share.

Western of Havana.—Interim of 6s. per share on the ordinary shares.

BANKS.

Chartered of India, Australia, and China.—For past half-year at the rate of 15 per cent. per annum, making 14 per cent. for the year; placing £50,000 to reserve, £10,000 to the officers' superannuation fund, writing £25,000 off premises account, £17,068 in payment of interest on the new capital to Dec. 31, 1907, and carrying £129,483 forward.

Russian for Foreign Trade.—25 roubles per share for 1907.

INSURANCE.

London.—20 per cent., being £2 10s. per share, payable as follows:—£1 5s. on April 1, and £1 5s. on Oct. 1, free of income-tax.

State Fire.—5 per cent. on the paid-up capital, placing £28,000 to reserves, and carrying £4,041 forward.

MINES.

Crown Reef.—100 per cent. for half-year ending March 31, payable May 5.

Ferreira Deep.—Interim of 17½ per cent. for half-year ending March 31, payable May 5.

Golden Horse Shoe Estates.—First interim for 1908 of 6s. per share, payable April 29.

Ivanhoe.—Fourth and final for 1907 of 9s. per share, payable April 28.

Jumpers Deep.—Interim of 5 per cent. (1s. per share) for half-year ending March 31, payable May 5.

Mount Morgan (Queensland).—1s. per share, payable April 1.

North Broken Hill.—1s. per share, payable April 29.

Talisman Consolidated.—Interim at the rate of 1s. per share, payable April 25.

Tharsis Sulphur and Copper.—20 per cent. from the profits of 1907, after writing off £28,738. £42,896 is carried forward to 1908.

MISCELLANEOUS.

Bell's Asbestos.—Balance of 2s. per share and a bonus of 6d. per share, making 15 per cent. for the year, carrying forward £12,180.

Burroughes and Watts.—Interim of 6 per cent. for half-year ended Dec. 31.

Coltness Iron.—Interim at the rate of 8 per cent. per annum on the ordinary shares.

Dundee (Natal) Coal Estate.—3¾ per cent.

John Barker and Co.—Balance on the ordinary shares of 1s. 10d. per share, making 12½ per cent. for year ended Feb. 19.

Lincoln Corn Exchange.—12 per cent. for past year.

New Zealand Shipping.—Interim for half-year ended Dec. 31 at the rate of 5 per cent. per annum.

Schweppes.—Full dividends on the preference and ordinary shares, and a 4 per cent. on the deferred shares, placing £8,000 to reserve and carrying £6,783 forward.

Val de Travers Asphalte Paving.—Further of 1s. per share, making 1s. 6d. per share for 1907.

MINING RETURNS.

Alaska Mexican.—Crushed 20,650 tons ore; value, $30,926 saved, 309 tons sulphurets; value, $23,799.

Alaska United.—Crushed 36,186 tons ore; value, $46,925; saved, 600 tons sulphurates; value, $29,685.

Broken Hill Proprietary.—Refinery products (including product from ores purchased).—Silver (fine), 357,778 ozs.; soft lead, 6,486 tons; antimonial lead, 48 tons. Including 50,574 ozs. fine silver and 2,035 tons lead from ores purchased. Zinc concentrates 5,529 tons, containing: Silver, 90,623 ozs.; lead, 588 tons; zinc, 2,205 tons.

Broken Hill Proprietary Block 10.—Treated 11,933 tons crude ore, producing 1,946 tons concentrates containing 1,148 tons lead and 62,272 ozs. silver.

Chinese Engineering.—Output, 26,000 tons; sales, 25,000 tons consumption, 1,325 tons.

Duff Development.—Recovered 218 ozs.

Hyderabad (Deccan).—Output of coal 36,032 tons.

Mills, Day Dawn.—1,939 tons; value, including residues, £6,700.

New Chuquitambo.—Crushed 1,800 tons for 8 kilos 538 grs. gold, 238 ozs.

New Ravenswood.—Crushed 1,584 tons ore, value £4,048; 140 tons concentrates, value £1,347; tailings treatment plant, 111 tons concentrates produced value £1,240.

North Broken Hill.—Treated 2,560 tons crude ore, assaying 15·9 per cent. lead and 6·6 ozs. silver per ton, producing 427 tons concentrates, containing 295 tons 14 cwt. lead and 8,711 ozs. silver.

"O.K." Copper.—Treated 836 tons crude ore, producing 60 tons fine copper.

Ouro Preto.—5,910 tons ore, produced 1,979 ozs.

Pfeiffer's Day Dawn.—Treated 1,630 tons quartz, value, including residues, £6,475.

Rhodesia Matabeland Development.—Crushed 320 tons, 157 ozs.

Golden Frog—Crushed 87 tons, 59 ozs.

Tasmanian Copper.—Shipment of ores 906 tons.

Westralian Mount Morgans.—Crushed 5,350 tons, 800 ozs.; cyanide 2,750 tons, 601 ozs.; slimes 2,675 tons, 493 ozs.

Whim Well Copper.—Shipped 130 tons copper ore 22 per cent.

The offices of the Sheffield District Railway Company have been removed from Chesterfield to 71, Finsbury Pavement, London, E.C.

Sir Robert Harvey has been elected as a director of the Antofagasta (Chili) and Bolivia Railway Company, Ltd., to fill the vacancy caused by the death of Sir Lepel Griffin, K.C.S.I.

Messrs. J. Henry Schröder & Co. have received a cable from their Santos agents advising them that they have further encashed £15,850 in respect of the surtax collected weekly, for the service of the State of San Paulo 5 per cent. Exchequer Bonds, making a total of £709,500 encashed since August 1.

Russian Petroleum and Liquid Fuel.—Production of crude oil for week ending March 21, 237,000 poods, equals 3,821 tons.

It is announced that Mr. Bertram Abel Smith, a director of the Union of London and Smiths Bank, Limited, will at once take up his residence in Nottingham, and will undertake the duties hitherto performed by the late Mr. Francis Abel Smith.

We are glad to hear that the dispute between Messrs. Barclay and Co. and Sir James Laing and Sons, Limited, of Sunderland, has been amicably settled, the bankers being now satisfied that there has been no misrepresentation or other cause of complaint. The voluntary liquidation will now proceed.

COMPANY MEETINGS.

SCOTTISH WIDOWS' FUND LIFE ASSURANCE SOCIETY.

The 94th annual general court of the Scottish Widows' Fund Life Assurance Society was held on the 17th inst. in the society's office, Edinburgh, the Right Hon. the Earl of Dalkeith (one of the vice-presidents) presiding.

The Secretary having read the minutes of the last annual general court, held on March 26, 1907, which were approved, the report by the directors for the year 1907 was taken as read.

The Chairman said: Gentlemen,—In the absence of our president, the Marquis of Tweeddale, it falls to my lot to take the chair at this general court of the Scottish Widows' Fund, and I have all the more pleasure in doing so as the report which is now submitted is an eminently satisfactory one.

I should like to direct your attention to some of the more prominent features in the report which is laid before you. As usual, it gives evidence of solid progress and prosperity. You will observe that the new assurances for the year amount to the sum of £1,645,000, which is greater by £108,000 than the business of last year, and, in fact, has never been exceeded, except in bonus years, when, as you know, we expect, and have always obtained, more business than in any of the other years of a septennial period. We confidently hope that such will be the result in the year that has now opened, for this is our bonus year. The cumulative advance made by the society during the past six years has been very satisfactory, for it has issued policies amounting to £880,000 more than in the corresponding period of last septennium. With a start like this we should do our best to add a substantial amount to the business of the current and final year of the septennium.

You will be glad to learn that the increased business to which I have referred has been obtained at a moderate cost. The society has always maintained a high position as regards economy of management. The average expenditure of British offices is 13½ per cent. of the premium revenue against 10 per cent. in this society, so that for every £1 it receives it puts away 18s. to the credit of the policyholders, whereas the average office only puts away about 17s., and in many of them that 17s. is still further reduced by dividends paid to shareholders. You can quite well see the superiority, from this point of view, of this society.

Coming to the assurances which have become claims during the year, it is interesting to note that the amount is practically the same as it has been during the two previous years—namely, £1,120,000; those of 1905 and 1906 were £1,123,000. Of the total claims in 1907 those payable in consequence of death amounted to £975,000, divided among 763 members. The sum is a large one, and is evidence of the widespread character of the society's operations; but it represents less than three-fourths of the amount which it was expected the society would have had to pay had the mortality corresponded with the basis on which the society's calculations are made.

The profitable character of the society's policies from the policyholders' point of view is shown by the statement in the report that the society paid £153 in respect of every £100 originally assured under participating policies, and that actually in 77 cases the sum payable was more than doubled—in one case a policy for £1,000 was increased by bonuses to £2,928.

Coming to the accounts, the revenue account shows that the funds of the society increased during the year by £590,000. You will, however, to-day, I imagine, desire that I should furnish you with information as to the position of the society in regard to its investments. We are all so fully aware of the depreciation in gilt-edged securities which has been taking place for the last few years, and which reached a maximum about the close of 1907, that you cannot but be anxious to know how it has affected the society. The directors also felt that it would be satisfactory to the members to be advised as to the position of the society's securities at what we may reasonably hold to be the most unfavourable time, and a valuation was acordingly made of the Stock Exchange securities held by the society. This valuation showed that in consequence of the careful selection of our investments, and in consequence also of the reserve accumulated in the past, the additional depreciation amounted only to about 1½ per cent. of the society's total assets.

There were two grounds which would have justified the directors in ignoring this shrinkage in values, if they had seen fit to do so. In the first place, there was every reason to believe that before long any depreciation in the class of securities which the society holds would be more than made good; and the second was that as we did not divide any profits at the end of the year, it was not really necessary that an alteration in the value of the assets should be made. As you know, a thorough scrutiny and valuation of all the assets is made at investigation periods, when the usual divisions of profits take place, but it is not customary to make an adjustment at other times.

With these points in view, the directors had to decide if they should make any alteration in the accounts. After careful consideration they decided, as you will see from the report, to increase the investment reserve fund from £124,000, at which it stands at present, to a round sum of £400,000, and thus provide in full for the shrinkage in the society's assets at the end of 1907. The members of the society may therefore have perfect confidence that the assurance and annuity funds are represented by 20s. for every £1 at which they stand in the society's books.

On referring to the report of the annual meeting of the society last year, I observe the chairman made some remarks as to depreciation, of which I should like to remind you, as they have an even more important bearing on the position to-day than they had then. From the special conditions of life assurance offices, temporary depreciation in Stock Exchange values is probably more of an advantage than a disadvantage. The Scottish Widows' Fund is a continuing corporation, with a revenue far more than sufficient to meet its outlay, and consequently it does not require to realise its investments, but can afford to retain them till better times arise. Further than this, the securities themselves are of the best class, and the larger portion is repayable at fixed dates, so that the society may confidently expect to receive the full value at maturity, however much the market value may vary at different times. On the other hand, we gain an advantage from the fact that depressed prices furnish an opportunity of finding new investments at highly remunerative rates of interest. Such was the tenour of Sir Henry Cook's remarks last year, and I think you will agree with me that they apply equally to the present condition of affairs.

I should now like to say something about the bonus year and the preparations for the valuation. We always look for help from our policyholders to increase the business of the society, and as in this, the bonus year, we look for a considerably greater amount of new business than in the other years of the septennium, we wish you to make a special effort during the current year. The additional reserve which has been made, while it should appeal to you as policyholders, should also give you greater confidence in asking your friends to join the society. As I have already mentioned, a full valuation, both of the society's assets and of its liabilities under its policies, will be made by the directors at the end of the current year, in order that the profits of the septennial period may be ascertained; but a trial valuation of the liabilities as at the end of 1907 has already been made, which shows that even after the withdrawal to reserve fund of the considerable sum I have mentioned, the surplus available indicates that the society will be able to continue the handsome rate of bonus it has given in the past, and assuming a normal state of affairs, the directors have every confidence that the result will be satisfactory.

You will have observed that I have occupied the most of your time with an explanation of the methods that have been employed to place the stability of the office beyond question, for the absolute guarantee that our policies will be paid at maturity is the consideration of far the greatest importance—but it must also be kept in view that the society, while giving security of the very highest order, is also one of the most productive of bonuses on its policies. We look to you and the other members to make known to those likely to assure that they will find in the society that combination of security and profit which constitutes the true ideal of an assurance office. If you will only do so heartily, the bonus year, which has now begun, will show results with which we shall all be gratified.

In conclusion, I consider that we can all congratulate ourselves on holding policies in the Scottish Widows' Fund, and that our sincere thanks are due to those who have so admirably managed our business.

Sheriff Fleming, K.C.: In seconding the motion which has just been proposed, perhaps you will allow me, as one of the ordinary directors, to add a few remarks to the speech of our vice-president on one or two subjects which cannot be known personally to him. Your directors, in their endeavour to administer prudently the enormous interests entrusted to them, have kept steadily in view that their primary duty is the maintenance of the high reputation for stability which the Scottish Widows' Fund has always had. When, therefore, in making up our accounts for last year, we found ourselves face to face with the abnormal depreciation which reached its limit just about the period of our balance, we had to consider in what way that depreciation should be met. It is true that the depreciation in our investments as at the date of our balance has already been partly recouped by the subsequent recovery in market values, and we might have contented ourselves by simply stating that the depreciation, great though it was, is amply covered by our surplus profits, and letting the matter rest there, in the hope, which I for one think would have been well justified, that the end of the present year will show a complete recovery. But after most careful consideration we came to the conclusion that the more desirable and the more correct course was to set aside at once such an amount as would amply meet the depreciation in the book value of the society's investments.

You will observe that our total net funds, after deduction of all liabilities due at the date of the balance, are nearly £19,000,000, including our reserve of £125,000. This £19,000,000 is what we have in hand to meet the liability on the policies we have issued. What remains over, after providing for that liability, forms the surplus or profit fund, out of which is provided the bonus which is declared at the close of each septennial period. We therefore have in effect transferred from this profit fund the sum of £275,000 to bring our special reserve up to £400,000, and we have still the prospect of a sufficient surplus at the end of the septennial period to justify a continuance of our bonus at the rate declared at the four last divisions.

The investment of the funds of the society is unquestionably the most important of our duties as directors, and you may be satisfied that we give the greatest care and the best intelligence we possess to making a careful selection. We endeavour, as far as possible, to proceed on the principle of not putting too many eggs into one basket, and of spreading our funds over as many classes of security and as many different countries as are

likely to provide a safe medium for investment. But there are certain classes of securities which we do not touch, and in view of recent legislative proposals, it may interest you to know that the obligations of breweries and distilleries have always been included in that proscribed list. I would also direct your attention to the fact stated in the balance-sheet that the amount of our investments in Feu duties is only £22,000.

The resolution for the adoption of the report was then submitted to the meeting, and unanimously adopted.

The usual formal business having been disposed of, a vote of thanks to the chairman and directors terminated the proceedings.

LONDON UNITED TRAMWAYS.

The sixth ordinary general meeting of the London United Tramways, Limited, was held yesterday, at Winchester House, Old Broad Street, E.C., Mr. C. J. Cater Scott (chairman of the company) presiding.

The Secretary (Mr. W. G. Verdon Smith) having read the notice convening the meeting and the auditors' report,

The Chairman said: Before we pass to the remarks which I wish to make on the report and accounts, which have been submitted to you, I would like to apologise for the little delay which has arisen in calling you together. It is due, in the first place, to the absence of our friend, Sir Clifton Robinson, on a very well-earned holiday, which he availed himself of to inspect many important tramway enterprises in many parts of the world, and past master as Sir Clifton Robinson is in the management of all tramway undertakings, I am sure he will be the first to admit that he and ourselves will gain advantage from such an exchange of views. Then the delay has been also partly due to the enforced absence of myself. I am sure, therefore, you will overlook the fact that we are some three weeks later than usual in calling you together. Now a year ago when I was addressing you on the subject of the London United Tramways, I alluded to the fact that we were then completing the last portion of our Surrey system. Since then that portion of our work has been completed, and now by means of our Surrey system we have brought that much larger portion of our undertaking which lies in Middlesex in communication with the important enterprise of the London County Council in South London; in fact, we have linked up two systems. There is a gap of a few yards only between the railhead of each system. We have built up to the extreme limit of our territory, and it is not for us to complete those few remaining yards, but we hope it will not be very long before the L.C.C. see their way to construct those few yards, and thus bring about an actual physical connection with ourselves, and enable us to give to the many millions of people—I might almost say—in the South of London the advantage of being able to travel through from South London right to the pleasure and holiday resorts in the Thames Valley. The time has arrived, to which I alluded a year ago, when we have to take a little breathing-time to allow our undertaking to consolidate and to develop. In other words, until this has taken place we do not consider it wise to undertake further construction works. To this, however, I must make one small exception. We probably have to face the electrification of our Kew and Richmond line, and with that the construction of about two furlongs of tramway over Kew Bridge. For the power to cross Kew Bridge we are now going to Parliament, and I am glad to say that so far, in spite of some opposition, we have been successful, because we have passed the standing orders in both Houses, and in doing so we have done one thing—we have upset the veto claimed by the Surrey County Council and the Middlesex County Council on our works. They claimed that we have no right to go to Parliament for the power without having arranged with them, and as in the first place they chose to ask from us the sum of £4,000 a year for crossing Kew Bridge I think you will agree that that veto was used for a most improper purpose. (Hear, hear.) In fact, it only brings me back to what I said about a year ago—that, in spite of the desire of many companies to provide facilities for the traffic of London, they have always met with the greatest opposition on the part of the local authorities. Perhaps you will excuse me now making a little digression on this point. We have to pay very heavy wayleaves to various bodies, and I shall show you presently they amount to £3,600 a year. Then the two County Councils of Surrey and Middlesex have begun by asking £4,000 a year for the right to cross Kew Bridge, but I believe it has since been reduced. In addition to that we have had to pay for street improvements and widenings an amount of £943,991, which represents 24¾ per cent. of the total capital expended by us in the construction of our tramways. I want you to take those facts and think them over, because they show how impossible almost it is for companies to give facilities for London traffic under the existing circumstances. With the opening of the new line we have a total route mileage of 55½ miles, and, as I have told you, for the moment the days of construction have ceased. Then, again, we have been hampered by the fact that our lines in Wimbledon were not opened in part when they might have been. The Wimbledon local authority had the power to say: "You shall not open any portion of this mileage until the whole is complete," but we never thought they were going to exercise that power, it seemed so selfish and so unwise. Sir Clifton Robinson informed me that such a power has never been exercised anywhere else before. When we had completed a certain portion of our mileage, and were well on with the construction of the rest, we applied for permission to open what was ready, but we received a negative reply, and so for a good many weeks we were deprived of the benefits of the traffic we should have had, and the people of Wimbledon were deprived of the advantage of the trams. That is another instance of the way we are dealt with by local authorities.

Mr. Smith then turned to the accounts, and after signalising the influences retarding receipts, went on to explain the elements governing the expenditure. The increase in traffic expenses is explained by the larger mileage worked and dearer supplies. There is one amount in that which I admit at once is most unsatisfactory; you will find an item of compensation and legal expenses—that is legal expenses in connection with the compensation—these amounted to £12,144, or an increase of £1,416. That, I admit, we do not like, but I do not know how we are to avoid this. It seems to be generally assumed that a tramway company is fair game to be shot at, and we find that a sleepy carter going to and from the London markets, and others with all sorts of heavy traffic, invariably prefer to travel on our tram-lines to the road on either side of them. Then, if they are in the way, and collisions ensue, somehow the public sympathy seems to go with the carter or other person, and to such an extent do we find this that we invariably endeavour to settle all these claims out of Court rather than face the unknown in Court, but at the same time I cannot help thinking that it means a good many cases in which we accept liability, and compensate people, when, in fact, no blame really attaches to this company. Among other items, he mentioned that rents have gone up £597; that is due to our having now to pay the rents of certain offices which were necessary during our construction period, and which now fall on our own shoulders, but I believe that as our leases run out, and they are not running for very long, we shall be able to make a very substantial reduction in that item. Rates and wayleaves account for an increase of £2,194, of which the increase in wayleaves amounts to £1,354, and the balance is rates and taxes. Over those amounts we practically have no control. Then I come to maintenance and repairs, and the first of all, rolling stock and power plant. I might remind you that the increased mileage we have had has necessitated the bringing in of an increased number of cars—and I might, perhaps, for your information, tell you that our practice is that every car in our service goes through our shops every year, so that it is thoroughly overhauled, thoroughly repaired, and leaves those shops as good as new.

Summing up the revenue account, we show that the increased expenses have amounted to £29,752, showing a working percentage on traffic of 62.71 per cent. against an average of 59.62 for the six years 1902-7 inclusive. Perhaps I might say here that what I have said about revenue is amply confirmed every day. The future will depend very largely on whether we have good or bad weather, and will also be affected by another matter that I shall speak about presently. With regard to nett revenue account, I think I need not say anything; it simply shows you that we have earned our interest on debentures, stock and loans, our 5 per cent. on our preference stock, and the 2 per cent. for the half-year or 1 per cent. for the year which we distributed in the middle of the year on the ordinary stock. Then the only remark I would make on the balance-sheet is that, however much to our regret, we have not been able to add to the reserve fund either for contingencies or for renewals. I know many shareholders think, and not only shareholders but debenture-holders think, very strongly that we ought to build up both these funds. We agree most absolutely with them; but when you have not got the money, of course it is quite impossible to apply it to reserve. It is our policy at present, and it will be in the future, to increase these reserves as much as we ever can until they amount to a substantial sum.

Proceeding, the Chairman said: As to the future, I do not know there is very much to say, except this—I, for one, see a good deal of the working of the tramways, and come constantly in contact with Sir Clifton Robinson, who knows as much about tramways as anybody. I see no reason for despondency. During the last year we had everything against us. We had a new mileage coming into operation, and a new mileage not properly developed, both of which meant a very considerable increase in working expenses, because you must recognise that if we are to develop our traffic we must give a good service, and a good service is necessarily expensive. Then we had against us also the high price of all materials. That, I think, will rectify itself in the future, and it looks as if this year most of these materials, if not all, will be purchasable by us at considerably reduced prices. And then lastly we had very bad weather—the abnormal weather of last year, which prevented the extension of our traffic which otherwise, I believe, we should have received. Now, I cannot think—it does not seem at all probable—that we are going to have two wet summers like last year, and with any return to normal weather I think we may look to a very large traffic on our Thames Valley lines, particularly now that we are able to bring all those people living in the South of London in close connection with the Thames Valley.

Then there is one other matter. As you are aware—I think it is on May 1st, at any rate, it is early in May—the Franco-British Exhibition will be opened. Now, we run up practically to the very doors of the exhibition, and I cannot but believe that the large concourse of people which will undoubtedly go there can go there without bringing us a very increased traffic. We are quite alive to that, and you may be quite sure that no steps will be wanting on our part to ensure that this company will get its full share of the traffic. I have now finished what I wish t-

say on the accounts. There are only two personal matters to which I will now allude. First, I have to express the great regret that one of our directors, Mr Brown, is not here to-day. He has not been at all well of late, and he has written expressing regret that he cannot be with us here to-day. Then I want to inform you that we have elected Mr Chapman a member of this board. Mr Chapman is an electrical expert, and his knowledge of the electrical working of street railways and tramways will, I am sure, be of very great advantage to the board. I move the adoption of the report.

Sir Clifton Robinson seconded the resolution, and it was carried unanimously.

Mr Cater Scott was re-elected a director, and the usual formal business was transacted.

JOSEPH TRAVERS AND SONS.

The ordinary general meeting of Joseph Travers and Sons, Limited, was held on Monday at Cannon Street Hotel, E.C., Mr. J. I. Rogers (chairman) presiding.

The Secretary (Mr. E. R. Wilkinson) having read the notice convening the meeting and the report of the auditors,

The Chairman said: I greatly regret to have to appear before you with such an unsatisfactory report, but when you have heard what I have to say as to the details of what has taken place, I think you will agree that the poor result of 1907-8 is due to exceptional causes, and that the structure of the business is as sound as ever. I would also ask you to remember that in the 19 years of the company ended on January 31 this year the ordinary shares have received an average dividend of 10 per cent., and we have general and special reserves of £36,000, and have written £31,000 out of profits off the cost of premises, plant, and fixtures. We, fortunately, have no item for goodwill upon our balance-sheet. Considering all the new forms of competition we have had to deal with and the virtual transformation of the whole trade during that period, this record is, I contend, excellent. The specific causes are bad sugar profits, the high rate of discount coming at a time when we require more money owing to the rise in prices, heavier bad debts than usual, and the unsatisfactory state of the trade in Singapore, more particularly in the latter part of the year. We have taken, or are taking, steps to prevent the recurrence of these events, so far as they are under our control, and your board have unabated confidence in the prospects of this grand old business. We cannot prophesy as to the future, but if the past be any guide, we have had only two poor years in the course of our 19 years' trading, and in both these cases the causes of want of success were clear. I now propose to review our departments in detail, beginning with wine. In wines and spirits the year has been a very satisfactory one. Our sales and profits have been considerably larger than in 1906-7, and the consumption, which had been falling for a prolonged period, is now increasing again. The appointment of a Royal Commission to report on the whisky question is very satisfactory, for it can only be properly solved by new legislation. Our sales of tea for 1907-8 were the largest on record, and our total trade again shows an increase, but the great rise in the price of common teas has rendered the year a difficult one for profits. In coffee we have had a better year than the last, and there is no room for special comment. In the future we look for an active development of the coffee trade of the country through special attempts about to be made. In sugar, although our sales have been large, our profits have been most unsatisfactory, and, in fact, the greater part of our decreased earnings are due to this cause. There are, of course, reasons for this bad result, and your directors have taken steps which will, they believe, effectually prevent their recurrence. On the average, sugar pays us very well, notwithstanding the inherent difficulty of the trade, and we see no reason why we should not do quite as well in the future as we have in the past. There has been till lately a general hope that in the coming Budget a considerable reduction in the duty, if not its entire removal, may be expected. The secrets of the Chancellor of the Exchequer are too closely kept for us to be able to prophesy what may take place, especially if there is to be a heavy call on the revenue for the purpose of giving old-age pensions, as well as an increase for war, for education and for the Post Office. In green fruits we have had an excellent year, by far the best since we started the trade, and the department has become an important one. The branch opened at Hull last year has already become a success, and we look for further growth there. We have had a good year for bananas, both from London and from Liverpool, although the summer was not particularly favourable for this particular fruit. In dried fruits our sales have been good, and the year has been a good average one, although the nett profits have rather disappointed us. The efforts of the Greek Government to promote the consumption of currants continue to be most successful, both here and in other countries. In canned goods we have had an excellent year, and the trade is going on well. The last salmon catch in America was small, and prices are now high, so that consumption may be affected to a certain degree, but otherwise the prospects of canned goods appear good. In spices, rice and miscellaneous goods the year has not been a good one for profit, though the sales are satisfactory. The result of our Singapore branch in the year 1907 was very unsatisfactory, and has occupied the mind of the board very seriously. The pine-carrying industry has been in an unsatisfactory state for years past, and last year was even worse. The import and export trades have both been unprosperous, partly owing, no doubt, to the very high rates of discount current at the end of 1907. All these causes have led to severe financial difficulties in the island, which have extended to other ports in the Far East. After a visit to Singapore by our colleague, Mr. Mackenzie, we made changes in our managers and in other ways to meet the position, and we hope for a considerable improvement in 1908. In our Liverpool branch we have had a fairly good year, and the various branches have done well. Apart from the direct profits obtained, this branch is very valuable indirectly to our London trade. Having dealt with our various departments in detail, it will be noticed that the bulk of them have done fairly well. The important exceptions have been in sugar and in Singapore—what we may call our oldest and our youngest branches. As regards other specific causes from which we have suffered, we may fairly expect that there will be no recurrence of the monetary crisis of last autumn, and that the rate of discount will not again rise to such a prohibitory figure. Bad debts are in some measure beyond our control, but as they were unusually heavy in 1907-8, we may hope that they will fall to their usual average next year. In conclusion, the board have considered it desirable to pay a further dividend of 2½ per cent. on the ordinary shares, bringing the total distribution upon them up to 5 per cent. for the twelve months ended January 31 last. To do this, after very careful consideration, and with a view to the best interests of the business, the board have, subject to your sanction, drawn £5,000 from the reserve and carried it to profit and loss.

Mr. Edward Bowron seconded the motion for the adoption of the report, which was carried unanimously.

VICKERS, SONS, AND MAXIM, LIMITED.

The 41st annual general meeting of the shareholders in Vickers, Sons, and Maxim, Limited, shipbuilders, engineers, &c., was held on the 20th inst. at the River Don Works, Sheffield. Mr. Albert Vickers presided, in the absence through illness of Col. T. Edward Vickers, the chairman of the company. The other directors present were Mr. Douglas Vickers (managing director), Mr. G. J. B. Chetwynd, Mr. J. Dunn, and Lieut. A. T. Dawson.

The directors' report, which was taken as read, was as follows:—

DIRECTORS' REPORT.

The directors are glad to report results from the working for the year 1907, which, although not as good as those for the previous year, may be regarded as satisfactory.

They enable them to recommend the payment of a dividend at the same rate as last year, after providing the usual liberal deductions for depreciation, &c., and writing the sum of £150,000 off "goodwill and patent rights," reducing this item in the balance-sheet to £100,000.

The balance-sheet shows a considerable increase in the item "Interests in subsidiary and connected companies." This has been partly due to further sums advanced to the Wolseley Tool and Motor Car Company, but more particularly to increases in the loans to and investments in William Beardmore and Co., Limited. It had been intended that the Beardmore Company should make a public issue of further capital, but last year was a time of such stringency in money matters that it was felt it would be impossible to do so on reasonable terms for a company a large proportion of whose works were hardly completed and had not reached the profit-bearing stage. The directors therefore decided to issue Vickers debentures to provide the necessary funds for these purposes, for the replacement of the money invested in the Whitehead Torpedo Company and to provide for the company's participation in the works in Japan and Italy, into which they have entered to preserve their connection with those countries. The issue was largely over-subscribed.

			£	s	d
After providing debenture interest and the usual depreciations, &c., the profits of the year were			768,525	9	0
Less the sum written off against "goodwill and patent rights"			150,000	0	0
			618,525	9	0
Which, with the sum brought forward from 1906			218,800	17	1
Amounts to			837,326	6	1
After deducting the interim dividends paid in August last of 2½ per cent. on the preferred 5 per cent. stock and 5 per cent. preference shares (less income-tax)	£35,625	0 0			
1s per share (free of income-tax) on the 3,700,000 ordinary shares	185,000	0 0			
			220,625	0	0
There remains a disposable balance of			616,701	6	1
Out of this sum the directors recommend, and subject to your sanction have declared, the following final dividends:—					
2½ per cent. on the preferred 5 per cent. stock and 5 per cent. preference shares (less income-tax)	£35,625	0 0			
2s per share (free of income-tax) on the 3,700,000 ordinary shares, making with the interim dividend named above 3s per share, or 15 per cent. for the year	370,000	0 0			
			405,625	0	0
Leaving a balance to carry forward of			211,076	6	1

Should you sanction the payment of the dividends recommended above, they will be posted to you on March 27th.

Sir Vincent Caillard and Mr William Beardmore are the two members of the board who retire by rotation, and, being eligible, offer themselves for re-election.

Signed on behalf of the Board of Directors,

T. Edward Vicars, Chairman.

CHAIRMAN'S SPEECH.

The Secretary (Mr. Jno. R. Heckley) having read the notice convening the meeting and the report of the auditors,

The Chairman said that, in moving approval of the report, he would wish to make very few remarks. The directors thought the shareholders should be congratulated upon having the same dividend as they had in the previous year. Certain things had been against the company; the materials had been expensive, especially coal, of which they consumed a large quantity, and the price of which had been very high. They were afraid that if the Government passed the proposed Eight Hours Bill for miners it would still further increase the cost of coal to the company, and that was always a very serious matter. Generally speaking, the works were pretty well employed, and they had every reason to be satisfied with things as they had been, and trusted that the future would be all right. He did not know

that any further remarks were necessary, and he therefore moved that the report and balance-sheet to December 31 be read and approved, and that, in accordance with the recommendations of the directors, the following further dividends for the year be sanctioned, namely:—A dividend of £2 10s. per cent., less income-tax, on the preference stock, and on the 5 per cent. preference shares, and a dividend of 2s. per share, free of income-tax, on the 3,700,000 ordinary shares, making, with the interim dividend already paid, 3s. per share, or 15 per cent. for the year. The Chairman concluded by saying that he would be very pleased to answer questions.

Mr. Douglas Vickers seconded the motion, which was carried unanimously, without discussion.

The Chairman next moved that Sir Vincent Caillard and Mr. Wm. Beardmore be re-elected directors of the company.

Mr. Douglas Vickers seconded the motion, which was carried unanimously.

Mr. Michael J. Bentley moved that Messrs. Alfred Tongue and Co. and Messrs. W. B. Peat and Co. be reappointed joint auditors of the company.

Mr. J. K. Baker seconded the motion, which was adopted.

A cordial vote of thanks to the chairman and directors terminated the proceedings.

KING LINE.

The nineteenth annual general meeting of the King Line, Limited, was held on Thursday at Winchester House, Old Broad-street, E.C., Mr. Owen Philipps, M.P. (chairman of the company), presiding.

The Assistant Secretary (Mr. Vernon Thomson) having read the notice convening the meeting and the auditors' report,

The Chairman said: Gentlemen, this is the nineteenth time that I have presided at this company's annual meeting, and during that somewhat long period we have been able to pay you an annual dividend at an average rate of £5 15s. 9d. per cent., excluding bonuses amounting to 20 per cent., which, although a moderate return, is, I think, one which may be considered fairly satisfactory, as it amounts to £6 16s. 10d. per cent. per annum over the whole period. The year 1907 was for shipowners neither a good year nor a very bad year, but I think most shipping men will agree with me that it was, for various reasons, a very difficult year for shipowners. As you all know, prices of all kinds of coals were very high during 1907, which, as mentioned in your directors' report, added very largely to the expenses of working your steamers. It was not dear coals alone that shipowners had to contend with, but the fact that the price of nearly all stores, provisions, and other working expenses are at a very high level. Port and dock facilities at so many places, both at home and abroad, have not increased in equal proportion to the increase in the size of modern steamers. The building of new cargo steamers has received adistinct check, and the production of this class of vessel, in which this company is so largely interested, has, I am pleased to say, practically stopped. The production of cargo steamers had for the time being possibly somewhat outstripped the rate of increase of the general trade of the world. The trade of the world seems to go on steadily expanding, as, although there may be violent fluctuations in the Board of Trade figures as to the values of our imports and exports, it is well to keep in mind that it is not the "values" of the cargoes that interest the owners of large cargo steamers, but the "bulk" and weight of the cargoes of coals, grain, cotton, rice, and other similar cargoes that require to be carried in large quantities. Many of the large shipbuilding yards devoted to building large cargo steamers are becoming practically empty, and this decrease in the production of cargo steamers should, before long, have a very good effect on the freight market. The average life of steamers is comparatively short, so that any decided check in the production of new steamers soon has the effect of making the ever-increasing demand overtake the supply, and this causes a sharp rise in freights. I never attempt to prophesy about the future, as the unexpected often happens in the shipping trade. Your company only owns the latest and most up-to-date type of modern cargo boats, which are able to carry large bulk cargoes at the minimum of cost, all your cargo boats having been built since 1905, which, for a company now in its twentieth year, is, I think, a creditable record. You are, therefore, in a position to take full advantage of any improvement, whenever it comes, and can, therefore, look forward to the future with confidence. At the termination of this meeting an extra-ordinary general meeting will be held to consider the question of the creation of preference shares to provide additional working capital in view of the recent expansion of the company's business. I now beg to move:—"That the report and accounts be approved and adopted, and that a final dividend be declared at the rate of 7 per cent. (less income-tax), making, with the interim dividend, 5 per cent. for the year."

Lieutenant-Colonel Ivor Philipps, D.S.O., M.P., seconded the motion, which was carried unanimously.

The Chairman next moved the re-election of Mr. J. W. Philipps, M.P., the retiring director, which was seconded by Lieutenant-Colonel Philipps and unanimously agreed to.

On the motion of Mr. Cross, seconded by Mr. Godsal, Messrs. James Brown and Sandeman were reappointed auditors.

An extraordinary general meeting was then held for the purpose of considering, and, if thought fit, passing the following resolution—"That the directors be authorised to issue as preference shares 10,000 shares of the 30,000 shares of the company remaining unissued. That such shares shall be numbered 20,001 to 30,000 inclusive, and shall confer on the holders thereof the right to a fixed cumulative preferential dividend at the rate of 5½ per cent. per annum on the capital for the time being paid up on such shares, and such shares shall rank, both as regards dividend and return of capital, *pari passu* with any further preference shares created as hereinafter mentioned, and in priority to all other shares of the company, but shall not confer any further right to participate in profit or surplus assets. That the company shall be at liberty from time to time to create and issue further preference shares ranking in all respects *pari passu* with the said 10,000 preference shares, but so that the aggregate amount in nominal value of all preference shares aforesaid for the time being issued (including such 10,000 preference shares) shall never exceed the aggregate amount in nominal value of the ordinary shares for the time being issued and paid up."

The Chairman, in moving the resolution, said: The history of this company's business has been one of gradual, but steady, expansion. It is still a business of very moderate size, but it began in a small way, and the capital has been increased from time to time. At the present time our authorised capital is £500,000, divided into shares of £10 each, of which 20,000 shares are issued and fully subscribed, and practically the whole amount of £200,000 has been paid up. The board have carefully considered the best and most satisfactory way of raising the additional capital required by the extension of the company's business, and have come to the conclusion to recommend the shareholders to pass the resolution which has just been read to you converting £100,000 of the unissued share capital into 5½ per cent. preference shares. It is our intention to offer these shares to the shareholders, as we consider they should have the first opportunity of securing allotment.

Lieutenant-Colonel Philipps seconded the resolution, which was carried unanimously.

The proceedings then terminated.

LONDON ROAD CAR.

The ordinary half-yearly meeting of the London Road Car Company, Limited, was held on Tuesday at Cannon Street Hotel, E.C., Mr. J. H. Moore, J.P., presiding.

The Chairman referred to the competition which the omnibus companies had to meet from the "tube" railways and the London County Council tramways. Although the number of passengers carried in 1904 by the London General Omnibus Company, this company, the Metropolitan and the Metropolitan District Railway companies increased from 374,869,000 to 389,962,000, the earnings fell from £2,512,000 to £2,353,000. While all four companies carried more passengers, this company and the District Railway Company were the only two which were successful in taking more money, the increase in their own case being 12,173,000 passengers and £57,373 in receipts. By the common consent of all engaged in the travelling trade, the past twelve months were the most disastrous from the weather point of view which had been experienced for many years, and consequently the "tube" railways had had "the pull," but the balance-sheets of those undertakings nevertheless revealed a poor showing, most of the companies being "manifestly waterlogged." Notwithstanding all the competition, had the weather in 1907 been normal, a substantial profit would have been earned by the company. An encouraging circumstance was the enormous development which was yearly taking place in the number of persons requiring to be carried, the trouble at present being that the supply of vehicles was greater than the demand. The dislocation of traffic on roads, consequent on the electrification of tramways, &c., had also been very detrimental to the company's business. For instance, the Mile End Road from end to end had been up for the past four or five months, and had been practically impassable for fast vehicular traffic for most of that time. A similar state of things had existed in other directions. Referring to the strike of drivers and conductors of the company's motor omnibuses, which affected the traffic of three weeks, he said that the alteration in the working conditions had enabled capable men to earn more money than before, although it had resulted in the expenses per car mile run being less by ½d. a mile. Notwithstanding all the drawbacks which he had mentioned, they had increased their number of passengers to 40,499,532, the largest number they had ever carried in any half-year, while the receipts had amounted to the record sum of £223,688. This increase was due to the additional number of motor-cars put on the road, although fewer horse-cars had been worked. Unfortunately it was impossible to run more vehicles without extra running expenses, hence the increase on the expenditure side of the account. He asked any candid person whether it was reasonable to judge any business by one year's results? Although the loss for 1907 was £23,825, for the two preceding years the profits respectively were £52,234 and £25,020, so that for the three years the profit worked out at £53,429. Regarding the immediate future, he said that London this year was to be the scene of the Franco-British Exhibition, which was expected to attract "the world and his wife." There seemed every likelihood, provided weather conditions were reasonably favourable, that the traffic of all the carrying companies would be largely benefited. The directors had no doubt that the Road Car Company would have a large share of the increase, and they were making their arrangements accordingly. He then called attention to the provisional arrrangement which had been made with the Great Eastern London Motor Omnibus Company, and said that the full details of the scheme would be laid before the shareholders at an early date. It was proposed that two directors of the Great Eastern Company should join the Road Car board, one filling the vacancy caused by the death of Mr. Paul Henwood. There was every reason to anticipate that the fusion would be advantageous to both com-

panies, the Great Eastern Company, which owned about eighty motor-omnibuses largely of the same type as those of this company, having been most successfully managed.

Lieutenant-Colonel C. F. Colvile seconded the adoption of the report, and after some discussion the motion was carried.

PAQUIN.

The eleventh annual general meeting of the shareholders of Paquin, Limited, was held on Monday at Cannon Street Hotel, E.C., Mr. John Barker, M.P. (chairman of the company), presiding.

The secretary (Mr. T. Nevell) having read the notice convening the meeting and the report of the auditors,

The Chairman expressed the deep regret of the board at the loss which they and the company generally had sustained by the death of M. Paquin. To Mme. Paquin they offered their sincere sympathy, and they extended to her a hearty welcome to their meeting that day. The directors had again the pleasure of reporting that the company had had a year of unprecedented prosperity. For the third year in succession they had been able to write £50,000 off goodwill. A sum of £8,661 had been added to the reserve, which now amounted to £105,160. The balance carried forward was no less than £32,611, after leaving £11,973 standing to the credit of the ordinary shareholders' undivided profits account. A liberal sum had been written off for bad and doubtful debts, upon which a profit had this year been made of over £4,000, which went to the credit of the account under that head. As to the book debts, there was no necessity for the least nervousness, and every possible contingency had been well provided for. After liberally writing down every item and providing for every possible contingency, besides placing a substantial sum to reserve, the directors were able to recommend a dividend of 20 per cent. for the year. Immense additional strength had been imparted to the company's financial position by the investments which had been made. When it was remembered that they had had an unusually wet summer and a winter shortened by unwonted mildness, the success of the company's trading in the past year had been very remarkable, and in all the circumstances he thought they had reason to congratulate themselves. He concluded by moving the adoption of the report and the payment of the dividend recommended. Sir Alfred Newton seconded the motion. In reply to Mr. Brereton, the chairman repeated that the item of book debts might be regarded as quite safe, and at their next meeting he hoped to see it standing higher. Since December 31st last 33 per cent. of the amount had been collected in London and Paris. After further discussion, the motion was put, and declared carried unanimously. The meeting was afterwards addressed by Mme. Paquin, who met with a cordial reception. She thanked the shareholders warmly for the support they had always given to her late husband and herself in the conduct of the business, and also expressed her deep appreciation of the sympathy shown to her in her bereavement. She would continue to devote all her efforts and energy to sustaining the reputation of the house; and with her experienced and zealous staff, combined with the judgment and assistance of the directors, she did not think it would be too much to predict that the business would be as prosperous in the future as it had been in the past.

An extraordinary general meeting was held subsequently to consider a resolution for altering the directors' remuneration. The chairman, in moving the resolution, stated that the 3 per cent. on the profits which the resolution proposed they should have meant this year about £700 extra to be divided among the five directors. Sir A. Newton seconded the motion. A discussion followed, in the course of which the resolution was opposed by some of the shareholders and supported by others. The chairman declared it carried on a show of hands by 30 to 28. Mr. B. H. Evans (a shareholder) pointed out that there must be a three-fourths majority, as it was an extraordinary resolution. The chairman thereupon demanded a poll, at the close of which he mentioned the voting as it then stood—showing an overwhelming majority in favour of the resolution—but stated that the exact result of the poll would be forwarded later to the newspapers.

NUNDYDROOG.

The fifteenth ordinary general meeting of the Nundydroog Company, Limited, was held on Wednesday at the Cannon Street Hotel, E.C., Captain W. B. McTaggart, chairman, presiding.

The secretary (Mr. W. L. Bayley) having read the notice convening the meeting and the report of the auditors,

The Chairman, after dealing with the accounts, went on to say: The directors considered it expedient when declaring the balance dividend to make provision for capital outlay, and therefore transferred from the profits the amount of £18,000. It seems to them that the time has come when the Nundydroog is now sufficiently old and sufficiently vigorous to pay the whole of its way as it goes, and that the policy which lasted for so many years of from time to time making fresh issues of capital should now come to an end, and the capital account be permanently closed. It is most satisfactory for us to be able to pay all the capital charges for last year and to reduce your dividends only by so small an amount as 2d. per share, enabling us to pay you the very handsome dividends of 35 per cent. The mine is looking exceedingly well; it is opening up in every respect splendidly, and we feel confident that in the future not only shall we be able to pay all our capital charges out of revenue, but that we shall also be able to put aside a nest egg in the shape of a reserve fund against unforeseen contingencies, and after that we hope that, in the not too far distant future, we may be again able to increase your dividends from time to time by paying such bonuses as the state of the mine will allow. The next matter to which I would call your attention is the adoption of a new set of articles of association for the company. Our old articles have now been in use for a great many years, and so many Acts of Parliament have been passed from time to time that they are to all intents and purposes out of date. The wording of the articles is precisely similar in all respects to the articles of the Mysore Company, excepting so far as regards the amount of commission to be allowed to the managers and directors. As regards the amount that we shall receive under this new arrangement, I want to explain to you that on the basis of this year the directors would receive a little less than they did last year, including your bonus. The managers' remuneration in the same way is based upon profits, and they would receive a very trifling sum more, but the two combined come to exactly the same amount as it was last year. I wish to put on record our appreciation of the kindly and magnificent way in which his Majesty the Maharajah of Mysore and his Government have supported us in every direction. They have in the most enlightened way given us extra police laws to deal with thefts of gold; they have also given us every facility for dealing with the plague, and they have spent large sums of money in anticipation of that magnificent scheme for the bringing of electrical power from the Cauvery, and have erected an enormous tank, some ten square miles in extent, so that to all intents and purposes we may never again be short of water. With regard to the mine, the directors and managers are of opinion that the condition of the Nundydroog mine has considerably improved, and they agree with the concluding remark in Mr. Thomas Richards' report that "there is every probability that the development work of the new year will still further strengthen the company's position." We endorse that sentiment to the highest possible extent, and for my own part I look forward with great confidence and even with more hope to the future of the company. It gives me great pleasure to move the adoption of the report and accounts. (Applause.)

Mr. H. D. H. Fergusson seconded the motion.

The secretary read a telegram from the superintendent giving particulars of the latest developments, and stating that he estimated the return for this month at about 6,400 ounces. Mr. Edgar Taylor dealt with the position at the mine, and gave details of the good discoveries made at various points. The increase in the ore reserves had been 38,640 tons. After some discussion the report was adopted. An extraordinary general meeting followed, at which the new articles were approved with practical unanimity.

ROBURITE EXPLOSIVES.

The ordinary general meeting of the Roburite Explosives Company, Limited, was held on Thursday at the offices of the company, 103, Cannon Street, E.C., Mr. H. A. Krohn presiding.

The Secretary having read the notice convening the meeting and the auditors' report,

The Chairman, in moving the adoption of the report and accounts, regretted that the nett profit stood at such a very low figure. It was the smallest amount that had ever been announced in any report of the company since the payment of dividends was resumed in 1899. It might therefore be supposed that the directors came before the shareholders in a corresponding state of depression, in fact, there might be some among them who thought that the directors ought to stand in a white sheet of repentance, but, on the contrary, though they were as sorry for the shareholders as the shareholders themselves could be, yet they felt neither depressed nor inclined to be apologetic. They saw before them a lower profit, but at the same time, under all the circumstances under which they had been working, the directors considered themselves fortunate in closing the year with the balance to the good which they had. As was explained in the report, the decreased earnings were not in any way due to a diminution in trade, but were solely to be attributed to the reckless cutting of prices which had been forced upon them by the action of their competitors in the trade. This price cutting extended to every department. The balance-sheet, taking it as a whole, did not call for special comment. The capital account showed a small increase which was due to the addition of new machinery and electrical plant. On the other side they had written off for depreciation £216, which left a balance of £431 as a nett increase to the capital account. Stock-in-trade stood at £2,300 higher than last year; this was because towards the end of the year they thought it advisable to make some large purchases of material in anticipation of the rise in prices which had since occurred. As a natural consequence it followed that on the other side sundry creditors had increased by about £2,500. With regard to the trading profit, he was sorry to say that this showed a decrease of £1,300 or £1,400. Their policy during the last two and a-half years had been what he thought he might call a conservative one; they had thought it better to endeavour to get business by making reasonable concessions in prices, though at the same time preserving something like a margin of profit. As regarded establishment expenses, they had done what they could to economise, but under one or two heads there had been a small increase. They must maintain their reputation for quality and efficiency, and by encouraging their staff to make extra exertions they had added to the comparatively successful record of the year. With regard to the future, he was glad to be able to say that the prospects to-day were far more favourable than they had been for the past two or three years. They had been down at the bottom of the trough of

the waves, but they had now reached the lowest point, and what they had to look forward to was to rise to the crest. The position was changed since he made the dismal prognostications of last year and the year before, prices had materially improved, the era of selling at cost price, and under, was at an end, and the competition they had now to meet was based not upon mere cheapness but upon quality, and that was a competition they need never fear. With regard to the new development, they had begun at Gathurst the manufacture of ammonal on behalf of the company of that name. So far ammonal had been a competitor of theirs, and it might be thought a dangerous step to undertake its manufacture, but he had no apprehension on this head, as there was no possibility of a clashing of interests. It would bring in a small income, and at any rate they would not lose money by it. Finally, as regards the prospects for the year, they might safely conclude that unless there was some unforeseen calamity or some great disturbance in the trade, they might look for better results when they next met.

Mr. Spark seconded the resolution, which was carried unanimously, and the meeting terminated with a vote of thanks to the chairman.

NEXT WEEK'S MEETINGS.

Monday, March 30.

Antwerp Waterworks.—Cannon Street Hotel, noon.
Clitters United Mines.—Salisbury House, 2.30 p.m.
Dimbula Valley (Ceylon) Tea.—4, Lloyd's Avenue, E.C., noon.
Evans and Co. (D. H.).—318, Oxford Street, W., noon.
London and Western Australian Exploration.—Salisbury House, noon.
New Inverted Incandescent Gas Lamp.—Winchester House, 2 p.m.
P. and W. Maclellan.—108A, Cannon Street, E.C., noon.
San Paulo Gas.—Winchester House, 3 p.m.
Southern Land.—19, St. Swithin's Lane, E.C., 12.30 p.m.

Tuesday, March 31.

Alliance and Dublin Consumers Gas.—Dublin. 1 p.m.
Anglo-Spanish Copper.—Salisbury House, noon.
Benskin's Watford Brewery.—Salisbury House, 2 p.m.
Brandon's Putney Brewery.—Putney, noon.
Burma Railways.—Winchester House, noon.
Canadian Oilfields.—Winchester House, 2.30 p.m.
Cordoba Central Railway.—Winchester House, noon.
Fairbairn, Lawson, Combe, Barbour.—Cannon Street Hotel, 2.30 p.m.
Gateshead and District Trams.—Norfolk Street, W.C., 11 a.m.
General Industrials Development.—27, Walbrook, E.C., 1 p.m.
Hill and Son (W.).—River Plate House, 12.30 p.m.
J. R. Roberts' Stores.—Institute of Chartered Accountants, 3 p.m.
Jones and Higgins.—19, Rye Lane, S.E., noon.
Leeds Copper Works.—Cannon Street Hotel, 11 a.m.
Ocean Accident and Guarantee.—Institute of Chartered Accountants, 11 a.m.
Ottoman Railway (Smyrna and Aidin).—Winchester House, noon.
Sir W. S. Armstrong, Whitworth, and Co.—Newcastle, 1 p.m.
South American Mines and Minerals.—Winchester House, noon.
South Wales Electrical Power Distribution.—Cardiff, noon.
Standard Life Assurance.—Edinburgh, 2.30 p.m.
T. R. Roberts.—Winchester House, noon.

Wednesday, April 1.

Morenilla Linare's.—Winchester House, noon.

Thursday, April 2.

Brompton and Kensington Electricity.—Winchester House, 3 p.m.
Edwards Air Pump.—3, Crown Court, E.C., noon.
General Investors and Trustees.—Winchester House, noon.
Martin, Earle, and Co.—139, Queen Victoria Street, E.C., 3 p.m.
Rhodesian Exploration and Development.—Salisbury House, noon.
Rio Tinto.—Cannon Street Hotel, 12.30 p.m.

Friday, April 3.

Bergvik.—Winchester House, 12.30 p.m.
Tricolor Nitrate.—Dashwood House, noon.

Achille Serre.—Including £2,571 brought forward the income for the year ended December 31 amounted to £14,283 and after providing a modest £52 for directors' fees, writing off £2,500 for depreciation and paying income-tax the balance remaining was £11,540. Preference dividend having been met, the ordinary shares receive dividends aggregating 8 per cent. and £1,000 is put to reserve leaving £2,040 to be carried to the new account. Goodwill stands at the original figure of £36,992, but £14,267 was spent on the property during the past year making it £73,197 after deducting the depreciation allowances, against which there is a reserve of £3,068. Trading balances are favourable, £8,393 being due to creditors against £13,003 to come in from debtors, stocks are valued at £3,042 and cash amounts to £1,892. In addition the company holds investments of £14,051, which would seem to have been carefully selected as the depreciation on them at the present time is only about £300.

The Publisher will be obliged if readers who are unable to obtain the "Investors' Review" at any bookstall or newsagent's will send him a post-card giving particulars to guide him in removing the cause of complaint.

PUBLIC INCOME AND EXPENDITURE.

The following are the receipts into and issues out of the Exchequer between April 1, 1907, and March 21, 1908:—

Revenue and other Receipts.

—	Estimate for the year 1907-1908.	Total Receipts into the Exchequer from April 1, 1907, to Mar. 21, 1908.	Total Receipts into the Exchequer from April 1, 1906, to Mar. 23, 1907.
Balances, April 1:	£	£	£
Bank of England	—	5,807,721	9,334,212
Bank of Ireland	—	1,124,702	1,117,275
		6,932,423	10,451,487
Revenue.			
Customs	31,923,000	31,769,000	32,701,703

The Investors' Review

EDITED BY A. J. WILSON AND SON.

Vol. XXI.—No. 535. New Series. SATURDAY, APRIL 4, 1908. (Registered as a Newspaper.) Price 6d.

Replies to Inquiries about Stocks and Shares.

These are given each week in the INVESTORS' REVIEW on the following terms:—

One Reply to **One** Question — **One Shilling.** Any number of questions may be put and will be answered at the rate of **One Shilling** each. The questions should be numbered and a copy kept, as securities cannot be named with comments in the printed replies.

For a fee, however, of **One Guinea** per annum paid in advance, a **Key** to the previous week's replies will be sent early in the following week to Subscribers.

Deposits of "Query Money" may be made in advance, and will be acknowledged in the "Answers" column. Notice of exhaustion will also be given there.

If tempted to speculate by circularising brokers Readers should pause and ask the INVESTORS' REVIEW first; its reply will probably save them from many a loss.

Telegrams advising about new securities cost **Half-a-Crown** each, plus cost of the telegram.

Private Letters in answer to inquiries can be had if desired. The minimum charge for such letters is **Ten Shillings,** but for this three questions will be answered if desired. For every question beyond three replied to in any one letter the charge is **Half-a-Crown per question.**

Correspondents can have their lists of investments overhauled and advised upon by letter on precisely the same terms.

Also models of grouped investments will be supplied according to directions given and on the following terms, each list being distinct and never a mere repetition:—For any number of stocks up to **Five, One Guinea;** for from **Six to Ten** securities **Two Guineas,** and so on at the rate of **One Guinea** for each **Five.**

Deposits may be made for letters just as for replies given in the Paper, but letters are never volunteered.

PUBLISHERS' NOTICES.

The Investors' Review is a Subscription Journal, and will be delivered to subscribers in London by the first post, or sent to the country and abroad by the first mail, on Saturday Mornings on the following terms:—

One Year - £1 1s. Six Months - 11s. Three Months - 5s. 9d.

Short of Three months the Price is **6d.** per Copy *Inland*, and **6½d.** *Abroad, Post Free.*

Subscribers can change their address as often as they please, but notice of change must reach the Publishing Office not later than the First Post on Friday Morning.

For a fortnight before the Subscription expires the **Investors' Review** will be forwarded in a different coloured wrapper.

Cloth cases for binding the Half-Yearly Volumes price **1s. 6d.** postage **4d.** extra. Bound Volumes **15s. 6d.,** or **16s. 3d.** post free.

Cheques and P.O. Drafts should be made payable to

CLEMENT WILSON,
"Investors' Review" Office,
Norfolk House, Norfolk Street,
London, W.C.

The Editors cannot undertake to return rejected communications.

Letters from correspondents must, in every case, be authenticated by the name and address of the writer.

The Editors desire it to be understood that a charge is made for the insertion of reports under the heading of Company Meetings, and they cannot accept responsibility for statements made therein.

The Investors' Review.

Revenue Facts and Budget Prospects.

What the exact expenditure may be for the year closed last Tuesday we do not yet know, but the Government has commendably minimised the supplementary estimate nuisance, and the latest figures given indicate an outlay of little more than £153,000,000. It might be a little less or a little more, but take it at £153,000,000, and the realised surplus for the fiscal year now closed is about £3,500,000. This is considerably less than the figure guessed by us a week ago, but its comparative smallness is accounted for by the poor yield of most items of taxation during the final eight days of the year. The total gathered up in that time was only £4,085,000 from all sources, and had it not been for a splendid rush of income-tax money amounting to £1,733,000 in the eight days, the exhibit would have been poorer still. The week before the receipts for six days amounted to £7,120,000. Nevertheless, a surplus of about £3,500,000, although smaller by well on to £2,000,000 than the realised surplus of the preceding year, is a comfortable standby, and if we had a man of financial genius in control of the Exchequer, would be quite enough to permit him to make vital and durable reforms in our system and methods of taxation. Unfortunately, great though his ability is, Mr. Asquith has never indicated the possession of anything approaching financial genius. He handles his subject as he might an unfamiliar brief, and gropes in the dark over a territory strange to him and unexplored. Moreover, the days of savings on expenditure are once more at an end. Out of the surplus of about £5,400,000 realised a year ago, fully £3,000,000 came from reductions in the expenditure, but there will be no such reductions this year. The estimates so far issued point to an expenditure of nearly £153,000,000 in the year on which we have now entered. Even so, the margin upon an unaltered basis of taxation should be about £3,500,000, but the Socialists are already proclaiming their determination to force the Government to grant them some £2,000,000 of this for old age pensions, and we fear the cost of the army will mount from this time onward year by year, notwithstanding the more or less accidental reduction shown in the estimates for the current year. We have been warned, moreover, that the demands made by the navy will expand automatically, so that what with Socialist exactions and the increased cost of civil government, as well as the growing charges for our fighting forces, there is really not much room for great reforms in taxation. All a poor Chancellor of the Exchequer can do is to excite his staff to the invention of expedients whereby the yield of taxation can be made more prolific.

The actual revenue for the year just closed was £156,537,690, showing a nett increase of £1,501,204 upon the income for the preceding year, and of about £3,700,000 upon Mr. Asquith's estimate of last April. His officials indeed would seem to have misled him then by indulging in what now seems to have been an unwarranted pessimism; and yet we are not sure, because we cannot tell how much of the income-tax arrears usually left to be collected in the year succeeding that in which the tax is due has been gathered in during the legally appointed time. In other words, Mr. Asquith has not only been laudably endeavouring to systematise the collection of this tax, so that it

should nearly all come in within the year when it should be paid, but he has also been ferreting out sources of taxation and exercising a scrutiny over taxable incomes hitherto unknown. We therefore cannot say whether or not on the old basis of large arrears the estimate given a year ago would have been much or at all exceeded. Possibly enough the yield might have been less, for although the country enjoyed great prosperity for at least half the past fiscal year, it has not done so during the last six months, and the other branches of revenue have not shown an elasticity at all comparable with that exhibited by the income-tax. Much of the obscurity now holding off guessers will doubtless be cleared up on budget day, but in the meantime the condition of business the world over, and here as much as anywhere, may before long amply endorse the apparent pessimism of the Treasury, and we shall be more afraid of excessive estimates on budget day than of official indications of further contraction in the revenue. In the past quarter, however, the nett increase was £1,773,000, of which the death duties provided £832,000 and the income-tax £507,000. No small part of the increase in the death duties must have come from the estate of the late Mrs. Rylands, and much more than the exhibited increase in the income-tax is probably due to the influences already indicated, influences tending proportionately to lessen the receipts from the same sources in the current year.

But what can Mr. Asquith do with his prospective surplus? The one just realised he has done with. It is beyond his fingering, and goes to reduce debt, but the realised revenue of the past year and the estimates put forth form a basis upon which to build his scheme of finance for the current year. Will he be able on the known totals to reduce taxation to any material extent or to change and equalise its incidence, or must he content himself with leaving things pretty much as they are? We may not hazard a strong opinion, but it is obvious that were it not for the minatory demands of the Socialist wing of the Government's supporters, for schemes of all kinds tending to make drafts upon the public purse, he might very easily knock a penny off the income-tax, and, relying on the natural growth of revenue, still have a large amount over with which to reduce the tea duty by another penny in the lb., bringing it back to the pre-war figure; or he might make a substantial commencement towards effecting the abolition of the sugar duties. Whether, however, he will do all or any of these things it is quite useless at present to speculate, because his attention will be principally engaged in considering whether his revenue is going to fall off to a figure corresponding with the decline in trade, and whether the promised or demanded additional expenditure may not run away with most, if not all, of his prospective surplus. On the whole, we are disposed to think that there will be no dazzling financial legerdemain attempted by this Ministry, whatever the estimated budget surplus may turn out to be. It is a Ministry whose destiny it would seem to be to exhaust its popularity as well as the resources of the country in keeping its pledges; its forte is sectional law making of a kind that does not necessarily bear any appreciable relation to statesmanship.

Cammell, Laird and Co., Limited.

So remarkable has been the change of fortune that has overtaken this company in the past year that more than usual prominence must be given to its report. A year ago, in dealing with the report for 1906, we were imprudent enough to say that "there can be no doubt about the excellence of the business possessed by this rapidly expanding undertaking." Perhaps, however, that was true then, and in a sense, and assuredly it was borne out by the figures then published, which showed a nett profit of £273,780 or about £42,000 more than the profit for 1905 *after* deducting depreciation and interest on the debentures and debenture stock. With such a profit to handle the board was to all appearance triumphantly able to pay the usual 10 per cent. dividend on its ordinary shares. How great is the contrast exhibited by the past year, which shows a nett profit of only £139,358 *before* charging off interest on debentures and debenture stock. We are not quite sure what the interest on the debenture stock for 1906 was, but assuming it to be about the same as for the past year, this means that the profit on comparison with the previous year really dropped back more than £200,000. It follows that the directors are not only unable to pay any final dividend on the share capital, but that no interim dividend should have been paid in October last, because, after providing for the 2½ per cent. then distributed and writing off £63,948, being the ascertained loss on ore and coke contracts, the year 1907 ends with a deficiency of £14,987, and it must not be overlooked that a year ago commission on an issue of debenture stock amounting to £13,125 was met out of the profits, and that £75,000 was applied in reduction of expenditure on extensions and improvements. For the past year no writings off are possible, beyond part of the ascertained loss in one particular direction.

And the worst of it is that the balance-sheet indicates no small present distress for want of capital, for the creditors of the company on open accounts, including bank overdrafts and temporary loans, have gone up by £489,125 on the year to a total of £942,806. Even, therefore, if the company had been able to issue £310,000 of its debenture stocks, as it was trying to do before its difficulties with the Government came to light, it would now have been urgently in want of further capital; and at the date of the balance-sheet £500,000 of 5 per cent. mortgage debenture stock, ranking after three prior issues of such stock, was pledged for bank overdrafts, as well as £20,000 of the 4½ per cent. debenture stock and £40,000 of the issued 5 per cent. debenture stock, which comes third in the ranking. Leaving out these figures, the actual issued debenture debt of the company is £1,690,000, and it seems to want something like £750,000 more at least. Another weakness is found in the high capitalisation of the properties and the absence of reserves. No indication is given in the balance-sheet as to the amount allowed for depreciation or anything of that kind, but freehold and leasehold land, buildings, machinery, and plant are nearly £53,000 up on the year at £2,045,095. Stock-in-trade and work in progress, less instalments received, have also gone up nearly £58,000 to £1,037,122, a sum involving the employment of an unwieldy amount of credit when a company is not possessed of large cash reserves or balances. Sundry debtors have risen only £14,127 to £623,266, but investments in subsidiary and other companies have been increased by almost £307,000 to £1,302,148, a change which excites fear lest some of the dependent concerns in which the company is interested are proving the reverse of profitable investments. Twelve months ago cash and bills on hand stood at the comfortable-looking figure of £236,452, and now the item amounts to only £11,104 or a decrease of £225,438 on the year. In spite of this the total of the balance-sheet has risen by £277,796 to £5,033,722.

What is the cause of the disastrous reverse experienced last year by a concern of this magnitude? It is due to many causes, one prominent adverse influence having been the disturbance of former harmonious relations with the spending departments of the Government. What lay at the bottom of the quarrel it is useless now to inquire, because it has been made up, and the directors responsible for the interruption of business relations have disappeared. So the profit formerly drawn from Government contracts is now likely to flow in again, as an important order for armour was received from the Admiralty last month. But even the stoppage of all connection between Government and company could not have influenced profits to the disastrous extent the figures just recited indicate, so we must seek in other adverse influences the greater causes of the disaster and try to discover

whether they are of a permanent or temporary description. Unhappily very little information is given about any of them, but the present board states that very large losses were made at Grimesthorpe and Workington as compared with substantial profits in the preceding year, and at Workington especially the contracts for the purchase of ores and coke involved that loss which has been partly provided for by the £63,948 written off last year's revenue, together with an estimated further loss of about £77,000, which will be a charge against the current year's profits. It is some consolation, perhaps, to be told that the officials responsible for these contracts are no longer in the service of the company, but are the directors certain that the men who have replaced them are incapable of similar errors of judgment? Was it mere error of judgment, and what is really the position of the Laird shipbuilding business in Birkenhead which Cammells absorbed some time ago? The board says that it has experienced the general depression felt through the shipping industry, and as the report goes on to speak of the construction of two destroyers for the Government without mentioning other work or fresh contracts on hand, we fear some portion of the year's deficiency in revenue must have arisen in that branch of the business. Then has the Sierra Menera Company done as well as was expected? There is rather a hint to the contrary in the report, which speaks of the "fine mechanical condition" of the ore which reaches the furnaces as a hindrance to its full utility. Perhaps the chairman at the meeting due next Thursday will throw light upon this and other points, tell the shareholders, for instance, whether the Tranmere Bay Development Company is getting plenty of work over and above that powerful suction dredger ordered of it by the Mersey Docks and Harbour Board. Both the company's interest in the Fairfield Company of Glasgow and its new Coventry Ordnance Works are said to have yielded profitable results in the past year, and we hope they will continue to do so, for it is plain enough that more than one year will have to pass by before the disaster of 1907 can be obliterated either from the accounts of the company or the memory of its shareholders. And there must be no more 10 per cent. dividends, whatever happens, until the properties have been severely written down.

The North-Eastern Railway.

As the middle link of the East Coast route to Scotland this company occupies a commanding position, and is in other respects the greatest English railway possessing no terminus of its own in London. The length of line owned by it is 1,650 miles, and its total mileage of all descriptions is almost 1,700 miles. In earning power it stands fourth amongst our great lines, and last year gathered an income of £10,591,335. This was an increase of £613,273 upon the income of 1906, but, as usual, working expenses, which amounted to £6,653,038, took away £401,000 of this increase, that being the extent by which the total exceeded the expenditure of the previous year. Locomotive power alone cost the company nearly £179,000 more, and it spent £64,153 more on maintenance, £41,472 more on carriage and wagon repairs, and £90,658 more on traffic expenses. Even general charges rose by nearly £14,000, and compensation jumped by almost £29,000 to £75,737, a figure nearly as high as that of the Midland, but less than that of the North-Western for the same year. Altogether locomotive power cost the company £1,857,000 and traffic expenses came to almost as much at £1,826,000, while maintenance amounted to £1,198,837, and the cost of carriage and wagon repairs to £990,000, the ratio of expenses to receipts having been 62.81 per cent. for the year. The only item of outgo on which there was a sensible reduction was rates and taxes, down nearly £16,000 to £421,830, a figure still sufficiently formidable.

When we come to analyse the sources of income we discover some interesting facts. The total passenger, parcels and mails revenue was £2,468,000 or £63,241 more than that of 1906, but of this great income barely £191,000 came from first-class, surely a striking illustration of the unprofitableness of that section of the traffic. The company has no second-class, but from the third-class it drew a revenue of £2,218,579 or £54,879 more than from the same source in 1906, this comparing with a decrease of £1,121 in the income from first-class. Season tickets, however, made up more than the loss on first-class, showing as they did an increase of £8,362 at £249,234. Even so the passenger traffic of the company cannot be said to have displayed any marked expansion even in the third-class, and it is not surprising that the rolling-stock account shows a decrease of 12 first-class and composite coaches on the year's comparison. The third-class coaches, however, have been increased by 77, and the increase as a matter of course figures in the capital account.

Pre-eminently the North-Eastern Company is a goods and mineral line, and it is to these branches of its business that it owed the greater portion of its expanded revenue in the past year. From merchandise and cattle, for instance, the income was £3,227,584, and from minerals £3,624,723, merchandise receipts showing an increase of £153,892 and mineral receipts an increase of almost £339,000. No other company of them all, not even the Midland, which is also a great mineral line, showed such an increase in the income from the carriage of minerals, and this, it must once more be pointed out, is an ominous fact, in view of the decreases in traffic earnings now being displayed week by week, unless, as some railway critics allege, the mineral traffic is really unremunerative. This we doubt, although probably the profit therefrom is much smaller than that either from the merchandise traffic or the third-class passenger traffic. Smaller receipts from goods and minerals, however, may imply in greater proportionate degree a reduction in the working expenditure than a stagnant or dwindling passenger traffic, because it should be possible for the managers of our railways to reduce the number and size of their goods trains to an extent closely corresponding with the reduced business done, whereas in the case of the passenger traffic trains have to be kept running backwards and forwards at fixed hours day after day, whether filled or empty. It is, indeed, in the direction of the conduct of passenger business that there seems to be a wider scope than anywhere else for systematic economy and readjustment of competitive trains with a view to a reduction in the expenditure.

What becomes of the nett revenue? In the past year the interest on debenture stock took almost £706,000 of it or £4,133 more, but there was some reduction in rents, leases and general interest charges, which at £88,733 showed a reduction of £7,032. Then the preference and guaranteed stocks went away with £951,571 or £15,977 more, and the directors put aside £195,000 to that mysterious reserve wrapped up in "sundry outstanding accounts" due by the company, and the ordinary stock got £1,963,371 or £39,434 more, because the receipts of the June half-year permitted the directors to then bestow an extra half-crown on the holders of the ordinary stock, whose total is now £31,414,432. All this done, £121,038 was left to carry forward against £82,889 brought in. The entire nett revenue, it should be added, amounted to £3,938,297 from the company's own traffic receipts, with £5,041 added from other sources, and showed an increase, as the gross figures indicated, of £202,346, everything included. For the year the dividend paid on the ordinary stock was 6¼ per cent. annum or just that half-crown better than for 1906, but the board could have done more had its slowly acquired wisdom not prompted it to make a substantial addition to the reserve—all in the business.

A great income of this description naturally implies a heavy expenditure of capital, and the aggregate book cost of the North-Eastern system on December 31 last

was £80,904,000, of which £985,371 was laid out during the year 1907, £483,613 of it on lines open for traffic. New works took about £139,000, and the large sum of £284,736 was sunk in new working stock, bringing up the total capital cost of that perishable asset to £13,604,739. We fear the diminished business now being done will fail to justify this total or last year's addition to it. On docks and steamboats, a branch mostly of recent addition to the company's enterprises, the total expenditure has been £1,169,342, but the company has only subscribed £27,500 to other railways. Towards its entire capital expenditure £5,837,473 has been received as premiums on stock issues, but that will not do much to hinder a reduction in the dividends earned upon the ordinary stock when declining trade diminishes revenue, or when the gradual increase of preferential charges takes away what might otherwise have gone to the consolidated stock. So large and continuous is the capital outlay of this, as of nearly all our railways, that on December 31 last the capital account was overdrawn by £2,185,430, against which, however, £2,129,000 representing various trust funds was in the company's possession, and all used in its capital account. Its liability on savings bank deposits amounted to £896,618, and the accumulation of pension and superannuation funds was £848,799, while it had £382,769 at the credit of guarantee, insurance, pension and renewal funds, a curious mixture. What the reserve amounts to in all we have no means of knowing, but "sundry outstanding accounts" due by the company, in which it is wrapped up, stood in the December balance-sheet at £1,598,247 against £843,454 of traffic accounts due to the company. As the capital expenditure is going on, the estimated amount required for the current half-year being £670,000, it is to be inferred that a fresh issue of stock in some form cannot be long delayed, and as the balance of unexercised borrowing powers on December 31 was only £471,233 it follows that in all probability an issue of ordinary stock will seem to the directors the most likely to meet with success. What is the position actuarially of its superannuation fund?

The Licensing Bill—A Bill to Aggravate the Drink Curse.

A friend has drawn our attention to a remarkable experiment in law-making designed to reform the drinking habits of the people, and made as long ago as 1736. During the latter part of the reign of George I. and the earlier years of George II. gin drinking was so popular with the English people—William of Orange had brought it over, perhaps—as to threaten the gravest consequences to the health and morals of the nation. So bad did it become that the Ministry determined to try to bridle the vicious habit. Accordingly an Act was framed and passed by Parliament in the year named whereby it was provided that the duty on spirits should be raised to 20s. a gallon over and above the heavy licence duty imposed upon the drink seller. In addition great encouragement was given to informers who brought infringements of the new law to the notice of the authorities, and a fine of £100 was ordered to be rigorously imposed upon those who, even inadvertently, sold any—the smallest—quantity of spirit upon which the full duty had not been paid, the object being at that time, as now, to put such obstacles in the way of drink consumers as would, so the theorists in philanthropy averred, abate the curse. The preamble of the Act might indeed be utilised by temperance reformers of to-day as a summing up of the evils of drink after their own heart, and we freely present it to them as providing words and phrases which might perchance afford one or two valuable additions to their particular thesaurus: "Whereas the drinking of spirituous liquors, or strong water, is become very common, especially among people of lower or inferior rank, the constant and excessive use of which tends greatly to the destruction of their health, rendering them unfit for useful labour and business, debauching their morals, and inciting them to perpetrate all vices, and the ill consequences of the excessive use of such liquors are not confined to the present generation, but extend to future ages and lead to the destruction and ruin of the kingdom, be it enacted, &c., &c."

Most humanitarianly virtuous, it will thus be seen, were the motives of the Government of that day, and how were its efforts rewarded? "Within two years of the passing of the Act it had become odious and contemptible," history relates; so much so that "the Commissioners of Excise were forced to mitigate its penalties." During these two years no less than 12,000 persons were convicted of offences connected with the sale of spirits, "but no exertion on the part of the revenue authorities could stem the torrent of smuggling." Respectable dealers withdrew from a trade thus proscribed, and it fell into the hands of the lowest and most profligate characters who, having nothing to lose, could afford to defy the law, and the people sided with the smugglers and unlicensed traders, openly assaulting the revenue officers in London and other large towns. Informers were hunted down like wild beasts and "drunkenness, disorders, and crimes increased with a frightful rapidity." There was no help for it; the law had to be repealed, for its most marked consequence was a great increase in the consumption of spirits, which rose until the annual consumption in London alone was computed at 7,000,000 gallons. Most of the bishops of the day vehemently opposed the repeal of the Act, they and their supporters among the hereditary peers being carried away by their intemperate rhetoric then just as now, but the unwise enactment had to be removed from the statute-book all the same, and smuggling instantly ceased. People drank as before, but were not incited to breaches of the law by indulgence in a forbidden pleasure.

"There is no analogy between prohibitive duties on spirits and a diminution in the number of houses licensed to sell drink such as the Bill of the present Government would effect," the temperance reformer will no doubt insist, misled by his prepossessions. He must pardon us for differing; the analogy is of the closest. What the eighteenth century reformer sought to do by prohibitive taxation the present-day reformer would accomplish by penalising the licensed drink seller. The ordinary publican is to be branded as a public enemy and as far as possible bundled out of existence, and the very fact that he is to be in this way stigmatised by the law will cause respectable men gradually to forsake the business. Innkeeping will not only tend to fall into the hands of a lower class, but the drinking habit will be more unrestrainedly gratified elsewhere than in the public-house—in clubs of doubtful or low character and in private houses by help of the off-licensed grocer. Our last state will therefore soon be worse than the state the Government says it will reform, and drunkenness in all probability be greater than ever, at any rate in the towns. For never forget that no Government can afford to dispense with the drink revenue, and our present Government is equally helpless against the great Nonconformist interest represented by the off-licensed grocer, and against the colourably political working-man's club.

Thus the more one examines the subject the more the conviction deepens that legislation of the kind foreshadowed in Mr. Asquith's Bill is, at a high estimate, not more than half honest, and is likely to end in being altogether mischievous. "Pledges" had to be fulfilled, and in trying, now here now there, to fulfil indiscreet pledges the present Ministry is not only sacrificing its popularity without benefit to the nation, but wasting its splendid opportunities. Pity its leaders had not the courage of Lord Melbourne whose classic rejoinder: "Damn it, why can't you let it alone?" effectually checked the efforts of would-be reformers to legislate by fits of uncultivated and unrestrained enthusiasm. The Licensing Bill in its present form will hardly pass, but its discussion may consume the business days of half a session. And not only must the Bill

fail if it becomes an Act, falsify the anticipations of the temperance reform zealot, but the prolonged agitation and heated debates it is giving rise to are diverting the legislature and the public mind from the consideration of other and much more necessary reforms.

All our wrath is now day in and out excited against the brewer, and the brewer thus mud-bespattered is not slow to retort in kind, giving quite as good as he gets. The brewer nevertheless is not the originator of the drink habit or plague, nor is it wholly due to him and his tied houses that so many of the people habitually get drunk. He, in fact, must not allow them to get drunk on his premises, and is no more a criminal in this respect than the people of the three kingdoms are consumers of strong waters through inherent feeble-mindedness and the curse of original sin. There are no doubt bad brewers, bad public-houses, and confirmed drunkards, drunkards by heredity and drunkards through depravity, but the great majority of drink manufacturers, dispensers and consumers are not in any of these categories, and it is not the brewer primarily who drives or draws the working-man and woman to drink. "Who then is it?" demands in wrath the excited reformer. Nobody; no special class, but merely a combination of classes and circumstances under pressure from which the drink habit is fostered and spreads along certain well-defined routes. To illustrate, suffer the writer to give a short biography of a working-man whom he has known for many years. In the earlier of those years this man, a jobbing gardener, was always diligent, trustworthy, a good workman, and a man who never drank; but toil as he might he could not make 30s. a week all the year round. That was about his best figure in the summer, or say from March till October, and out of his wage he had to pay 9s. per week as rent for two small rooms and a small kitchen in a jerry-built two-storey cottage in a London suburb—or £23 8s. per annum, the rent of a fair-sized croft or small farm. So small were the rooms—the closets, rather—in this tenement that a full-sized bedstead when put up in one of them only left space for a man or woman to pass sideways between the foot of it and the fireplace. The man had a wife and several children. By and by sickness came—insufficient air, the absence of any playground except the dreary street, lack of nourishing food or leaky footwear made the children unable to resist disease and two of them died. Help had to be given to the father to bury them and to pay the doctor's bill. Then he lost heart and took to drink, and his wife soon followed, if she did not lead the way. And now all that is left of the family, father and mother and all, will soon be in the workhouse, if not sleeping the last sleep in a pauper's grave.

Is this authentic story of drink wreckage the work of the brewer? Not necessarily at all that we can see. To us it seems to be the product neither of the brewer's malignity nor of innate depravity, but of that hopelessness and complete absence of outlook in life which haunts the working poor the land over, fruits of the overshadowing blight caused by the all-grasping capitalist combination made up of the ground landlord, the various gradations of lessees, mortgagees, jerry-builders, and tenement-house rent sweaters, by whose domination the working-classes in all our towns and in most country villages as well are over-rented and ill-housed, and kept at bare existence level. Where can man or woman thus housed go for a little relaxation and freedom of movement except to the public-house, and if the human inhabitants of pigsties and rabbit burrows are to be denied the public-house what can they do but join clubs organised by others of their class in a like state of homelessness, and drink there to their own speedy damnation? Your vehement reformer never appears to give a thought to this side of the question, or to in the least suspect the mischief he is doing by his clamour and insistence. We do not complain of him; he doubtless acts honestly according to his lights, but we do complain of a Government which listens to this empiricist and in trying to pacify him or secure his party loyalty by law-making to his order turns its back upon the greater problems of town and working-class life which, if solved in a statesmanlike and far-seeing spirit, would probably render "Licensing Bills" and many other partial and patchy efforts at "remedial legislation" unnecessary. The curse of our day is over-legislation that brings no reform.

Economic and Financial Notes.

Mr. Burns's "Housing Bill."

A "Housing" Bill! It has a nice sound. How many shop assistants, office clerks, ill-paid teachers in schools, small tradesmen—say 90 per cent. of the population in all—would like to be better housed than they now are? Will the Bill introduced by Mr. Burns and popularly given this name effect changes for the better calculated to assist all the middle, lower-middle and labouring classes in towns in securing better and cheaper houses in which to live? Incidentally, perhaps, it may if it becomes law, but that does not seem to be primarily its object. Mr. Burns, like his colleagues, has a pledge to keep with the artizan or working classes, and in his downright, forceful, strenuous way, by this Bill he endeavours to keep faith with his supporters. This is good party politics and perfectly honest, but it is not necessarily statesmanship. We do not like sectional law making, and excellent though many of the provisions in the Bill dealing with supervision of building operations or inspection of houses and with the laying out of new town districts may be showing practical sense, it does not as a whole excite us to enthusiasm. Compulsory purchase of land is all very well, but it means the creation of more debt, and our municipalities are already deep enough in the books of the money-lender. What, however, we feel most about measures of this kind is their tendency to set class against class, and we cannot see why the mere working man should be endowed with privileges above his fellows. Class legislation, moreover, tends always to cumbersomeness; so many checks and counter-checks, bars and hedgings round have to be devised in order to keep interests outside the charmed circle from breaking in and breaking down that the law is not only overloaded with details, but costly and unwieldy to execute. Mr. Burns's new inspectors alone will add a tidy sum to the burdens of tax and rate payers, and the whole measure spells expense, more expense, all for the benefit of one class, whereas what the people most need is a reduction in the demands made upon them by public authorities, or a more equitable distribution of their load.

What, then, would you have done supposing the framing of a new law designed to curb the tyranny of the land-owning class had been committed to you? Heaven forfend any such possibility! But we venture to think that the nature and incidence of local taxation should first have been dealt with. Everybody admits that local rates are not now levied on an equitable basis; the poorer the householder is the greater is his share in proportion to his means, and often the richer a town property-owner is the more he escapes payment of his fair share. Our inequitable system of short building leases is the source of inexhaustible wealth to the owners of land or ground rents in a near town, and the possessors of these leases are exempt from sharing the weight of local rates. Would it not have been true statesmanship to endeavour to equalise the pressure in this direction? It might not be possible to attain to the excellence of Scotland in this respect, but a good step towards it should have been possible. And what about the owners of unoccupied property? Empty houses are watched over by the local police just as much as houses not empty; their owners have benefited by the costly drainage system provided by borrowed money, none of the charges imposed by which they help to bear when their houses are tenantless. The ability to let is secured by the street cleansing, lighting, and repairing that goes on all the same

whether the houses are empty or filled. The owners of unoccupied property ought, therefore, to bear a proportion of the borough rates at all times, and we should like to know whether Mr. Burns has ever discussed the effect which might be produced upon rents and the quality of house accommodation were owners of empty houses compelled to pay one-quarter, say, of the usual rate levy all the time their houses stood empty. If along with reforms like these rates were imposed upon unoccupied land in towns on a moderate capital valuation, we are disposed to think that many of the sources of rack renting and overcrowding, &c., which Mr. Burns proposes to remove by increases in the municipal debts, and in the already oppressive array of functionaries would disappear without costing the citizens a farthing. Law-making which makes provision for increasing the weight of taxation must in the long run aggravate rather than diminish the distress of the poor, who will soon begin to pray that they may be saved from the philanthropic zeal of the social reformer. It is the outside of the evil Mr. Burns attacks; its core he leaves alone.

Newcastle-on-Tyne Electric Supply Company.

A firm of stockbrokers in Newcastle-upon-Tyne have sent us a circular in which the figures of this important company are analysed for the past five years. They were induced to do so by the favourable view taken in this journal regarding the position of that company, and they certainly put forward a case, if not for alarm, at least for caution, so far at any rate as the ordinary shareholders' capital is concerned. With the addition recently made the amount of that capital is now £687,500, and the total capital of the company, including £437,500 of debenture debt is £1,375,000. Against this weight of capital there is little or no reserve, and the total amount placed to depreciation account has only been £23,100 in the past five years. Neither gross nor nett profit, moreover, has increased in proportion to the growth of capital, while the ratio of working expenses to revenue has risen from 44.4 per cent. in 1903 to 66 per cent. in 1907, and the profit per cent. on the total capital before providing depreciation has never amounted to 7 per cent., and was for the past year only 5.7 per cent. After providing for depreciation this profit fell last year to 3.69 per cent. on the gross capitalisation. There may be, and probably are, compensating influences at work not visible on the surface of the accounts, but it seems obvious that the company has neglected to write down to an extent which may cause it trouble in the near future and embarrass its working for some years to come. The writer of the circular says: "We are entirely opposed to the present financial policy of the company, and a close examination of the figures for the last five years results in serious misgivings as to how the present rate of dividend on the ordinary shares is to be maintained." He holds it quite impossible to keep the dividend up to 8 per cent., and at the same time provide a reasonable amount for depreciation. But has not the company suffered considerably of late from the higher price of fuel, and should that price be reduced would it not be in a position to enlarge its depreciation allowance, and at the same time to maintain the dividend? Obviously the average of £8,100 per annum placed to depreciation out of profits for the past five years is inadequate, and the directors ought to take this deficiency in hand at once. If the dividend is to be maintained at 8 per cent. the total profit required will be nearly £108,000 per annum, and if £45,000 per annum were to be written off for depreciation—not an excessive sum—a gross profit of £149,450 would be insufficient to cover all charges on the present scale, whereas the gross profit for the past year, including dividends received on investments, &c., taken before writing off anything at all for depreciation was only £85,252. We must admit, therefore, that the figures are calculated to excite a certain amount of anxiety amongst the ordinary shareholders lest the company should have gone ahead too fast and neglected to put up safeguards against future contingencies. It may, however, turn out that its connection with the County of Durham Electric Company, to which it is going to supply current, may bring a profit sufficient to make good past shortcomings. It is presumably in order to provide and equip the plant necessary to the furnishing of this current that the new capital has been mostly required, and doubtless the directors of the company hope to earn a large revenue from this extension of its business.

Gas, Water and General Investment Trust.

An unfortunate shareholder has obligingly sent us a copy of this company's report for the year ended January 28 last, together with a list of its investments, and they have proved instructive though sad reading. From the report we learn that the nett revenue came to £7,575, or not much more than half the balance of £13,230 brought forward from the previous year. Therefore the board is able only to pay a dividend of 4½ per cent. on the preferred stock for the year out of the total free balance of £20,804 and to transfer £381 to the reserve account for equalisation of dividends, leaving but £6,821 to be carried forward, a miserable result, however viewed, and one that leaves £224,000 in deferred stock without any payment at all. Not only so, but there was apparently no further provision whatever made for the depreciation upon the company's securities, and the list enclosed suggests urgency in that direction. Before coming to it, however, let us look at the balance-sheet, and the first thing we notice there is a debt of £192,112 due by the trust to bankers, brokers, &c., on security; that is to say the trust has pawned its assets to this extent so that its total indebtedness coming before the preferred and deferred stocks amounts to nearly £700,000, and there is no reserve, all the other items in the liabilities account that might bear any resemblance to this important entry being "securities suspense accounts"—for revenue £44,760 and for securities adjustment £36,319. After various shapings, the suspense account for adjusting the value of securities is brought down to £321,000, but the company has advanced to third parties £121,174, from which £9,983 has been reserved for contingencies, bringing the nett amount of this asset down to £111,191. It has participations in syndicates to the amount of £23,594, making altogether a confused enough exhibit, and on a balance-sheet total of £1,354,379 the gross revenue for the past year, after deducting interest on loans from bankers, brokers, &c., was only £33,741.

No one will be surprised that a result so poor should thus be exhibited when an examination of the list of investments has been made. We know that some of the less reputably originated of these financial trusts have been little better at the start than mere waste matter receptacles, useful for the relief of bankers and brokers, but usually there is a large substratum of more or less first-class stocks even in second-class trusts which ensures a substantial revenue if it does not permit the accumulation of solid reserves against losses and depreciations. The hard basis in the case of this trust is pitifully small, and it is impossible to avoid a feeling of surprise, to put it mildly, that an experienced stockbroker like Mr. Joseph Bevan Braithwaite, of Messrs. Foster and Braithwaite, who is chairman of the company, should ever have permitted an accumulation of the kind to be made. As the stockholder who sent us the documents remarks, "this gentleman and his colleagues used to get £5,175 per annum for transacting this curious business, and still get £2,800." They certainly have not earned the money, as a short enumeration of some of the entries in the list will prove. Amongst the securities, for instance, we find £12,458 nominal in the certificates, &c., of the British Central Africa Company, £33,800 in the various issues of the British Electric Traction Company, 2,000 shares of the "Chartered" Company, and 4,100 in shares of the Brush Company. Passing by the Cargo Fleet, of whose securities the trust has £7,100 nominal, and

suggestive entries relating to fancy goods we never heard of, such as the Casa Grande Valley Canal Company, we find choice investments like these:—550 shares Consolidated Gold Fields of South Africa, 850 shares Consolidated Supply Company, £15,000 nominal in the securities of the County of London Electric Supply Company, on one of which there is a liability of £1,578, 1,655 ordinary shares Day and Martin, Limited, 5,860 £1 shares De Keyser's Royal Hotel, Limited, over £10,000 nominal in the shares of the Electric and General Investment Company, 13,700 5s. Fanti Mines shares, 1,000 £4 Gold Mines Investment shares, 3,750 £1 shares in Hope Brothers, Limited, 1,000 £1 shares in the Lydenburg Estates, £14,000 nominal in Metropolitan Railway consolidated stock, 30,000 $1 shares in the Natalie Occidental Consolidated Mining and Milling Company, £23,855 nominal in the preference shares and debentures of the New General Traction Company, £5,000 nominal North British Railway ordinary stock, 2,000 10s. Ooregum Gold Mining shares, £5,845 in Otis Steel debentures and stock, nearly £39,000 nominal, including £20,310 of debenture stock in the Piccadilly Hotel Company, £3,000 Rhodesia Railways first mortgage debentures, 1,500 £1 South African Gold Trust shares, and £6,327 in 4 per cent. debenture stock of the South Metropolitan Electric Tramways and Lighting Company. The trust has also a considerable interest in the Redwater Land and Canal Company and in Raworth's Traction Patents, Limited, besides 3,200 £1 ordinary and preference shares of the Potteries Electric Traction Company, 400 Taquah Mining and Exploration shares, and 1,476 £1 shares in the Wassau Gold Coast Mining Company. But the crowning entry of all relates to the United Railway and Trading Co., Limited, a concern in which the trust appears to have sunk something like £152,000 of its stockholders' cash. This railway and trading company was formed some years ago to take over 95 per cent. of the shares and bonds of the Louisiana Southern Railway, together with all the bonds of the Kenilworth Sugar Estates, and Mr. J. B. Braithwaite, jun., is its chairman. How much of the trust's money has actually been invested in this adventure we cannot say, because the list of securities affords no light whatever upon what they have cost, nor is there any indication either in that list or in the balance-sheet of the actual amount lost or of the extent to which market depreciation has gone, beyond the £321,000 called "suspense account for adjustment of securities representing loss realised and amount written off cost of securities to date." It was a considerable feat, however, to have provided even this amount of money, and we fear it will be impossible in present circumstances to go on doing more in that way. That being so, we question very much whether there was any revenue really available last year for the purpose of paying the preferred stock dividend. Upon the entire capitalisation the gross revenue was less than 2½ per cent. It seems, therefore, opportune to suggest that some independent investigation should be made into the affairs of this so obviously mismanaged business.

American Business Notes.

Not much change is shown in the averages of the New York banks for the past week, but, such as they are, they indicate expanding speculation. The loan averages are up £577,200 and the deposits up £1,451,000, the specie average having risen £644,000 and the greenback average £191,200. Thus the surplus reserve average is larger by £473,000 at £7,958,000 against £2,626,200 a year back. How misleading these averages can be we may measure in a rough way by the actual figures of the day before the calculations are made and published. Thus in the week preceding the average surplus was shown at £6,133,000, but the actual surplus on the day the balance was struck was £6,670,000. Loans had increased by £413,320 according to the actual last day's figures, but were down £726,000 according to the average. Deposits, owing to the actual gain in cash, were actually up £915,240, although the average showed a decrease of £774,240.

Much more eloquent to the revived activity of the stock manipulators are the figures of the outside trusts and banks, whose averages are now published every week, for they show an increase of £7,528,400 in the loan and the investment average, bringing the total confusedly grouped under this head up to £162,596,400. There is an increase of £607,600 in their specie average, raising the total to £9,290,200, and their greenbacks have risen by £142,400 almost to £2,178,000, so that deposits are £5,625,400 up at an average of £130,719,000, and on the basis of the figures published the proportion of their reserves in cash and legal tender to their deposit liabilities is under 8.8 per cent.

A great strike or lockout of miners over a wages dispute is said to be impending, has already begun in the bituminous mines, and will altogether throw 250,000 men out of work it is asserted. This host will be added to the tens of thousands already workless in conection with the economies of the railways and the general industrial pause.

It cannot be said that the Wall Street market is any more satisfactory because of the increased activity there. No small part of the manipulation resembles efforts of lunatics to construct a palace of delight upon an undrained marsh. Bankrupt trusts are resuming business by dint of fresh capital subscriptions, and banks have begun again to play for the rise in order to find a means of shooting out inconvenient masses of their possessions or pledges upon the investor. It is said, for instance, that the banks of the Standard Oil people have been unloading steadily on every opportunity, and have done their best by demonstrative buying in other directions to create the opportunity wanted. We can hardly expect any other conduct to be adopted by the people behind all these gamble-fomenting agencies, and in order to prevent anything like alarm arising through a too sudden increase under the heading of "advances" the financial trusts are being used as the intermediate agent. Furthermore the sales and readjustments of waterlogged and more or less completely bankrupt undertakings are proceeding apace, and yet no financial reporter ventures to assert that the mere public with money to lose or property to pledge is doing anything to help the professional gamblers, cornerers, combiners and riggers. It is doubtful even if the sensational Yukon Mine subscription engineered by the lavish advertisements of the notorious Thomas W. Lawson, of Boston, has been the result of a general rush on the part of investors to get in on the "ground floor," at the fancy figures Lawson set up, and the serious minded speculator cannot really be attracted by firework demonstrations of that kind.

A report is current that Mr. Harriman has bought Mr. Henry Huntington's holdings in the electric traction companies of Southern California. That was denied at first, but it is admitted that the sale is pending, and that the transfer of securities valued at £10,000,000 is involved in it. Everywhere also more money, more money, is required, and if possible it will be raised in Europe on one pretext or another, simply because although paper is abundant enough in the United States fresh capital is exceedingly scarce.

The reduction in the Atchison dividend from 6 per cent. per annum to 5 did not quite satisfy the bears, and their repurchases on the news caused the shares to harden, but were they believed to be really a 5 per cent. security they would not stand nearly so low as they do even now.

A healthier foreign trade position though is beginning to prevail, and should it continue will do much to bring about some recovery in the economic diseases now corroding the wealth of the Republic. That is to say, exports are stimulated while imports are restrained. In February, for instance, the value of

the shipments of merchandise exported from United States ports was nearly £1,700,000 larger than for February, 1907, the total being £33,574,000, while imports fell off to a much more remarkable extent, their whole value being only £15,825,000 as compared with £24,600,000 in February last year. For the month of February what is called the "favourable" trade balance, that is to say the balance in favour of the foreign creditor of the Republic, amounted to no less than £17,748,672, or nearly £18,000,000, whereas in the first two months of 1907 it was only £7,506,740. This brings the total excess of export values over import for January and February taken together up to £41,982,920. At this rate the United States should soon get command of European capital without the necessity of having to negotiate loans with underwriters on this side, for the excess of export values for the year would probably leave a margin of at least £6,000,000 after meeting all current charges in Europe upon the wealth of the Republic.

Domestically the lowest depth of reaction has not yet been reached and the failures alone in the first quarter of this year are computed by Dun's Agency at 4,909 in number with liabilities reaching £15,141,200, the largest ever recorded within the same period of time.

Not much further light is thrown upon the affairs of the United States Steel Trust by the fuller report advertised in the American financial and other newspapers. We could not mention last week the amount of the capital expenditure over and above all the allowances and provisions made out of revenue. This seems to have amounted for the year to £13,400,000 exclusive of the price paid for the Tennessee Coal and Iron Company, a concern sold to the Carnegie Steel Trust in the middle of the autumn panic in order to obtain a vendable security with which to tide over some of the involved trusts. Even this, however, is a fairly important amount, especially when we remember the heavy sums drawn from revenue to write down properties and to pay for new construction. How much has been added to the debt of the corporation through the absorption of the Tennessee Company we do not know. It, of course, gave £6,000,000 in its 60-year 5 per cent. sinking fund gold bonds in exchange for the share capital of the Tennessee Company, but it also took over various issues of its bonds and oddments of shares, such as the preferred stock of the Alabama Steel and Shipbuilding Company, and purchase money and obligations secured by deposit on Birmingham and Southern Railroad Company's stock as collateral.

For the first three months of this year the profits of the Steel Trust are estimated at £3,400,000 as against £7,824,400 in the corresponding quarter of last year, a decrease of over 56½ per cent. But as recently as the first quarter of 1905 the nett revenue was only £4,605,200.

At the time of writing nothing seems to be settled as yet with regard to the fate of the Erie Company. The story goes that Mr. Harriman opposes and Mr. Morgan favours the bankruptcy of the company, that is to say that one is against the other for a receivership. Arrangements for the renewal of the £1,100,000 in notes of the company due next week are now said to be progressing favourably, now declared "off." There must, however, be much more than this comparatively small sum involved, and we fear it is the old story over again, neglected upkeep, wasteful outlay in unprofitable directions, dilapidation everywhere, and an embarrassing floating debt. If the company is tided over now its troubles will only come up again in a more acute form a few months later. And it seems to have no security to offer against the notes now due, hence the difficulty of renewal.

Economic Life Assurance Society.—Nett new premium income was £12,928 and the total premium income £236,031. Income earned on the investments amounted to £158,209 and £66,288 was received for annuities sold, but that is entered in a separate annuity fund account. Expenses of management and commission took 13.4 per cent. of the premium income, and the interest realised on the funds averaged £4 4s. 6d. per cent. At the end of the year the life fund was £74,855 up at £3,861,282.

Passing Events.

The Agent-General for Victoria (Australia) invites attention to the fact that in paying off the loan of £2,000,000, which matured on the 1st inst., the Victorian Government has reduced its liabilities to the London market by £7,000,000 during a period of less than two years. The Victorian Government loans now outstanding in this country amount to £37,500,000, whilst the capital value of the State railways alone (apart from many other valuable assets) is estimated at £60,000,000. It may be added that these railways not only paid working expenses and interest on the capital expenditure, but yielded over a quarter of a million pounds to the revenue of the State on the past financial year's working.

A preliminary report has been issued by the Departmental Committee appointed to inquire into Irish land purchase finance, and some of the statements contained therein are alarming enough. Up to date the amount of 2¾ per cent. guaranteed Irish stock issued has been £26,201,444, but of this £2,451,444 was assigned to the land purchase aid fund, the remaining £23,750,000 being placed to provide advances in order that the farmers might buy out the landlords, and the discount on this amount was £2,837,388. In other words, the Irish people will have to pay that amount back more than they received, in addition to meeting the interest charge, but there is worse to follow, for the Committee estimates that the total amount required to carry land purchase in Ireland through to completion on the present terms will be £160,000,000, so there is still £130,000,000 to be found in some fashion, and how that feat is to be accomplished the Committee does not seem quite to know. It recognises the impossibility of continuing to issue 2¾ per cent. stock, because such an amount as £140,000,000 nominal would swamp the market, however slowly issued, and various expedients are suggested which do not seem to be altogether practicable. How are the National Debt Commissioners to be in a position to find so much money without coming to the public? Will the Government issue the Consols and lend the proceeds to the Irish Land Commission? If it does Consols will again begin to sink. Would it not be possible to utilise a portion or the whole of the handsome Budget surpluses in this direction, following the Indian fashion of avoiding debt instead of adding to it with one hand while paying it off with the other? That is always a costly process. The Committee also suggests that power should be given to the Government to issue a 3 per cent. guaranteed stock, but even that could not be placed in large amounts at par, and might not even be saleable at the suggested minimum of 92 per cent. So this redemption of Irish land appears likely to break down.

Australia continues to flourish judged by the revenue test, our modern ideas of government being that prosperity is only assured by the magnitude of the amount of money withdrawn from the pockets of the people to be spent by the authorities of the State. Some day, perhaps, a higher ideal will possess men's minds and success in government be indicated by the smallness of the revenue required to carry it on. As matters stand, however, it is satisfactory to see an increase of £1,757,402 in the Customs revenue of the Commonwealth for the last nine months. The total is put at £9,072,213. Individual Colonies are also bearing witness to the same prosperity, South Australia having gathered in £470,000 more in the nine months of the fiscal year expired with March 31. Some portion of this, however, may be its share in the revenue collected by the Commonwealth officials. The total, anyway, is £2,700,000, and in the same period Western Australia has gathered in £2,485,397, or fully £87,000 more than it has spent.

It was expected that the spring harvest work would have had some effect in reducing the numbers in receipt of relief in India, but that hope has not been fulfilled. The Viceroy's telegram dated March 28 states that the

numbers for the whole country are only 80,000 less than the week before, and still total 1,511,000. In the United Provinces where the agony is deepest the number on relief works was 956,936 and 378,191 were in receipt of gratuitous relief. Lord Kitchener, however, indicates that no abatement can be looked for in the military charges borne by the people of India, and what can we do but allow them to die when crops are not abundant?

No country whose figures are embraced in the abstract of foreign trade and commerce periodically issued by our Board of Trade failed to make progress in 1907. In Mr. Wilson Fox's introduction we have a group covering seven different foreign countries and Egypt, together with British India, Canada, and British South Africa, whose figures are put alongside those for the United Kingdom, and amongst these countries Germany comes next to us in the value of imports, but a long way behind. Her import figures, however, are much larger than those for 1906, and development is shown, although not to the same extent by Belgium, France, Austro-Hungary, British India, Canada, and British South Africa. The exhibit of export values is remarkable, and there the United States comes next to the United Kingdom with a total of £294,859,000, the highest in the history of the Republic. All other countries also show increased exports, thus demonstrating that in reality foreign commerce when it improves does so everywhere. If a country buys much it will sell more, and if sales increase the sellers must add to their purchases. For the current year the January figures only are available in the case of three foreign countries, Belgium, France and the United States, and are put alongside British figures. France alone of the four shows an increase of imports for that month compared with 1907, but the decrease is not striking in the case of the United States, whose exports are higher than in either of the two previous Januarys, while those of Belgium and France, like our own, are down. What have the forgers of tariff shackles to say to all this?

In some quarters complaint has been made about the terms offered to the Millwall Dock Company, but really they do not seem well founded, remembering the origin and history of that concern. Briefly, the 5 per cent. debenture stock of this company is to get £133 6s. 8d. in the new 3 per cent. "A" Port stock, together with £25 in the 4 per cent. "B" stock, and its 4 per cent. perpetual debenture stock gets £100 in the "A" and £25 in the "B," while the 5 per cent. perpetual preference stock gets par in the "B" stock, the 4½ per cent. preference stock 45 per cent. in the "B" stock, the new 5 per cent. perpetual preference stock £35 in the "B" stock, and the ordinary stock £20. These terms seem to us reasonably liberal in the circumstances.

Last of all amongst the companies to surrender to Mr. Lloyd George was the Surrey Commercial Dock Company, and the terms in this instance also seem to be quite as good as reason demands. Its 4½ per cent. debenture stock receives 150 per cent. in the new "A" stock, its "A" 4 per cent. preference stock 112½ in the "B" stock to produce 4½ per cent., and its "B," "C," "D," "E" and "F" 5 per cent. preference stocks are all to get 125 per cent. in the new "B" stock, while the ordinary receives 95 per cent. in the same stock. In all instances these payments cover cash balances and investments, and on a brief summary calculation we make out that the total amount of new "A" and "B" Port stocks to be created in order to fulfil these various bargains, including that made with the London and India Company noticed last week, will be about £17,000,000, or some £7,000,000 less than the nominal par value of the total stocks of the three companies. The bargain would thus seem to be, while not a bad one for the companies, a very fair one for the citizens of London, and Mr. Lloyd George deserves no small praise for the skill and conciliatory business attitude he has displayed in carrying these negotiations through. It affords us genuine pleasure to make this statement when elsewhere there have been so many disappointments.

The memorandum issued by Mr. George last night, and published in full in this morning's *Times*, is one of the most lucid and straightforward one could wish to read, but space does not permit us now to discuss the composition of the new governing authority to be bestowed upon the Port of London. All we can now say is that Mr. Lloyd George appears to have done well to abolish sectional representation, and to make provision for the creation of a really representative body. It is to consist of a chairman, vice-chairman, and elected and appointed members, numbering 25 in all, or apparently 27 if the power given is exercised to appoint the chairman and vice-chairman from outside. There will be 14 elected members, representatives of payers of dues, owners of crafts and wharfingers, and 10 appointed members, one each by the Admiralty, the City Corporation, and Trinity House, two by the Board of Trade, and two outsiders by the London County Council, in addition to three of its own members, so that it will have five representatives in all upon the board. Ordinary members will not be paid, but power is given to pay the chairman, vice-chairman, and chairmen of committees, a very proper provision.

We have too long omitted to mention with the commendation it deserves Mr. Henry C. Devine's "People's Co-operative Banks," issued by Messrs. Cassell and Co. at the low price of 1s. nett. As most who interest themselves in the economic state of the poor or, as we prefer, of the working classes throughout the country know, Mr. Devine has long been a devoted advocate of co-operation in banking, and in this book he has contrived to set forth the advantages of mutual help of this kind in a variety of lights and with a wealth of illustration that makes it really attractive reading. Not the least valuable portion of the book should be the seventeenth chapter, which deals with counterfeit co-operative banks, but the whole of it is useful, and should be most instructive to those for whom it is intended.

A correspondent thinks it may be worth while to recall the fact that Mr. W. B. Peat, of Messrs. William B. Peat and Co., chartered accountants, of London and Middlesbrough, is the auditor of Sir Christopher Furness's associated companies; the Cargo Fleet, the Weardale Steel and Coal, and the South Durham Steel and Iron. His view would seem to be that Mr. Peat does not always remember his lofty ideals as exhibited in his criticisms on the London County Council Tramway accounts when he comes to deal with concrete examples of modern high and sometimes pure finance. But there is even a more comic instance of this forgetfulness of the great mind in the accounts of the London and Brighton Railway, where an item of £216,400 appears under capital expenditure against "lines abandoned." Why does Mr. Peat, who is one of the company's auditors, allow that entry to stand year after year without protest or without demanding that the board should write it off forthwith as lost?

By far the best circular we have seen issued in the interests of the brewing trade is one just to hand from Messrs. Tamplins, the well-known brewers of Brighton. In this the chairman, Mr. Gurdon Rebow, points out that a sinking fund of over £23,000 per annum would have to be established to redeem the debenture debt of the company alone within 14 years, a sum that would absorb the whole of the dividends on the company's preference and ordinary shares during that time, even assuming that the trade done did not diminish. That is suggestive enough, but not a calculation likely at present to impress the Government and its majority. And to us the most impressive portion of the circular is the tables it contains giving an analysis of the distribution of the company's securities. These show that over 19 per cent. of the debenture and share capital is held by the business classes, over 21 per cent. by the professional classes, including barristers, solicitors, doctors, clergymen,

&c., and more than 48 per cent. by trustees under wills, &c. Less than 10 per cent. of the total is in the hands of the licensed and allied trades. Here we get an insight into the extent to which innocent people, trustees or women, professional and business men of all classes, would be smitten were the Bill as drafted to become law, and the whole weight of its penalties to be thrown on the brewery share or debenture holder. Can the Government be surprised that the City begins to hate it with a perfect hatred?

Continental Memoranda.

Little of interest or importance has been happening on the Continent this week, and the supply of gossip is meagre. In Paris, however, the agitation produced by the arrest of M. Rochette has died down, and two of his businesses, the Syndicat Minier and the Franco-Spanish Bank, have opened their doors again preparatory to resuming business. It would seem that they possess a considerable amount of cash, and it does not follow because this financier was a man of bold and venturesome character that he was in any way dishonest.

Relieved as it is from the fear of an immediate issue of a Russian loan, the Bourse is disposed to look more cheerfully upon the financial future and business affairs in general, but anything like active speculation is checked by the doubt regarding the income-tax, and as the budget law is not likely to be passed before Easter, the probability is we shall have no development of market energies until after that date. Meantime there is a report that the Spanish Government is about to launch a 4 per cent. loan of 200,000,000 pesetas, in order to redeem the ultramarine promissory notes held by the Bank of Spain, together with 50,000,000 pesetas of Treasury obligations in circulation. Spanish finance is drifting the country towards a republic.

Better advices come from Egypt, where business affairs seem to be calming down. Banks in both Cairo and Alexandria are working more freely, and from the interior it is reported that the Fellaheen are well off, and renewing their leases at a 10 per cent. higher rent. This amelioration does not check the flow of abuse in the Franco-Egyptian Press against the English administration, and Sir Eldon Gorst continues to be subjected to much ill-treatment, not only by the Egyptian Press, but by French financial journalists. The ground for this campaign is found in the refusal of the Egyptian Government to come to the rescue of those over-committed speculators who brought about the crisis last summer, and the fact that this tone of menace persists and that £3,000,000 is demanded, at the muzzle of the revolver, so to say, rather militates against the assurances that all is well.

Apparently there is some hidden scandal in connection with the Rochette affair, and Senators and Deputies are said to be implicated therein. M. Georges Berry has brought forward a law forbidding Senators and Deputies to take any part in financial societies, and this action is said to have been taken on account of the suppressed scandals said to be connected with the Rochette company promotions.

French opinion continues adverse to Japanese Government finance, and Paris papers dwell upon the budget deficit, quote also the opinion of a Japanese nobleman to the effect that it will be several years before the crisis now raging is at an end, and draw attention to the failures occurring amongst banks, including several important savings bank and industrial undertakings. They go on to assert that the large banks have exhausted their resources, and that it rests with the Government to come to the assistance of overstrained credit. We believe there is exaggeration in this language, but at the same time the Government is overstraining the country's resources, and may have to reduce its expenditure upon army and navy, or at least to cut down severely the drafts made upon the Budget for the purpose of reducing debt. It denies that it has any intention to lease the railways to a foreign syndicate, but it may have to issue more than one railway loan.

German banking circles appear to be very angry about the statements made in English newspapers regarding the financial condition of the empire and the overtaxed state of its banking credit. They have some reason for their anger, but at the same time go too far in declaring that the worst is now over, and that progress and a renewal of the old activity is to be looked for at an early date. Some of their leading banks admit that the position is still delicate, and all seem to be in accord in regarding the abuse of credit which has characterised German banking developments in recent years as an evil demanding drastic remedy. Moreover, failures continue to disturb the equanimity of markets, and the last ten days have been prolific in stoppages, amongst the corn merchants principally, some of which have far-reaching effects. One firm, for instance, is said to have placed a heavy order for Argentine wheat with an Antwerp house, and if the grain is not taken up and paid for there may be trouble both in Belgium and South America. It must, however, be admitted that the trade of the empire, as far as indicated by the earnings of German railways, is not showing the set-back that was feared for the returns of January and February indicate increased earnings, and the increase has been progressive, allowing for the extra day in February. Thus the February totals show an increase of 12,730,000 marks or 7.60 per cent. upon February, 1907, as against an increase in January of only 2.69 per cent. over the corresponding month.

Particulars have been made public of the exodus of Europeans to the Argentine Republic during the past year. The total Europeans reaching that country during 1907 was 329,100 as against 205,700 in the preceding year, and this outflow is likely enough to be augmented in the current year as a consequence of the disturbed state of European industries. In Germany, for example, a life and death struggle is talked of as impending in the building trade, and manufacturing industries are slowing down in all directions. This is a healthy sign in some respects, but it will necessarily involve an outward rush of the unemployed.

An ingenious method of reducing debt has been suggested by the Portuguese Minister of Finance. Officially the debt of the country is put at about £150,000,000, including securities pledged to creditors of the State; but the Finance Minister does not accept this total, and first of all knocks off these privately pledged securities so as to bring the aggregate down from 732,002 contos to 532,255 contos. Even that does not satisfy him, for he then proceeds to reckon the obligations of the State according to the market price of the day, and in this fashion brings the debt down to 331,000 contos, equal to about 32s. per head of the population. We fear this method of wiping out debt will hardly commend itself to the creditors of the State, nor will it do anything to relieve the burdens upon the people; and the actual debt must be put at about 52s. per head, which is sufficiently high for any country and much too high for a wretchedly poor country like Portugal, two-fifths of whose revenue is absorbed by the services of the debt. Meanwhile, the exchange is fluctuating and tending downwards, and experience shows that bankruptcy has always followed the accumulation of debt to the extent indicated.

National Insurance Company of Great Britain, Limited.—This company's head office is in Glasgow, and its income from premiums last year was £48,906, investments yielding a further £3,108. This income in all shows an increase of almost £11,000 on the year. Claims took £15,507 or 31.71 per cent. against 33.87 per cent. in the previous year and expenses and commission took £18,569 or 37.97 per cent. of the premium income against 38.50 per cent. A balance of £18,121 is brought out to the credit of profit and loss, out of which the board declares an 8 per cent. dividend and a 2 per cent. bonus, both tax free, adds £7,500 to the general reserve, raising it to £30,000, and £2,000 to the investment reserve, leaving £4,121 to be carried forward, the total of the balance-sheet being £123,043. More capital is required, and the directors announce an issue of 5,000 new shares at 30s. per share premium. The shares are £5 shares with £1 called up.

The Week in Mines.

Kaffir Shares.

Only those who make daily attendance at the offices of dealers in the Kaffir Circus can form any proper conception of the state of demoralisation into which the market has fallen. To say that business is quiet or non-existent or that the public is doing nothing is not an adequate summing-up of the situation. We have got so accustomed to phrases of that sort that now they are almost meaningless to the great majority. But it is not too much to say that the entire market is in a condition of absolute despair, and some of the biggest people do not disguise the fact that unless an improvement soon sets in their organisations must come to an end. And this occurs when the Rand gold mining industry, as distinguished from Rand finance, is more flourishing than at any time in its history. But even the most superficial observer will not be surprised by the complete collapse of this once great market, because deception, however skilfully disguised, must reveal itself at some time. Few people believe that Kaffir shares will ever again become the centre of attraction, and the market in all probability will remain in a state of semi-paralysis to the end of the chapter. The trifling spurt referred to in this column last week and the week before has again given place to utter stagnation and falling prices. Paris was a small buyer in the early part of the week, and this encouraged professionals to keep prices up, but they soon discovered that the game was useless, and attempts to take the small profits remaining from the previous week's rally quickly led to an all-round shrinkage. It is a pitiful state of affairs, but the troubles are of the magnates' own seeking, and if the retribution has not been swift it has been terribly sure. There is nothing more to be said about the market, and operators were feeling too sick of everything even to denounce the new Transvaal gold law, although its many excellent causes gave ample opportunity for those who can never see straight.

Rhodesians, Land and Diamonds.

Another brilliant performance has been achieved in the Chartered market, and, though it is hard to believe, the shares were actually raised to 14s. 9d. in the beginning of the week. Part of the rise was due to hasty bear closing when it became obvious that the debenture issue would go through, but the market was worked for all it was worth while the debenture lists were open, and a nice penny the business must have cost. In one quarter alone it is said that 40,000 or 50,000 shares were bought, and those who sold them between 14s. and 15s. are chuckling loudly. You could get as many as you like now round 13s. 3d., and we have not the slightest doubt that a good many shillings will come off the price before we are much older. The official announcement had it that "applications exceeding £750,000 having been received from shareholders for the 5½ per cent. second mortgage debenture stock the directors have proceeded to allotment." The market pondered over the announcement a little, and then significantly observed that "of course the Rhodes and Beit trustees were shareholders." How much, it is asked, did the independent shareholders—the general public—put up? Did the amount much, if at all, exceed £200,000? Those are one or two questions to go on with, and we shall have some more to put presently. What is the use of continuing the farce? Far better face the situation at once instead of spending a lot more money first which can only aggravate matters. The rest of the Rhodesian market has had the miseries, and a few speculators having picked up a little rubbish felt their action so foolish that they promptly sold again. Has the Broken Hill ore problem been solved yet? Not likely, and we should much like to know the cost of every ton of copper produced at Kansanshi. There is going to be no end of fun presently in connection with some of these things, so do not lose all interest in the market. Most of the well-known counters in the Land and Finance section lost a few pence, and Diamond shares were with difficulty rallied from a sharp fall. The Jagersfontein Co. has kept in the fashion by suspending dividends on the deferred shares, and reports of the Antwerp diamond cutting industry are very bad. De Beers fell to 11½, Premiers to 5¾ and Jagers to 3¼, but the close was above the worst. New Vaals were about 10s. and Roberts Vickers about £1.

Australasians and West Africans.

There was so little doing among Broken Hill shares that the tendency became easy, although nothing gave way appreciably. The metals were pretty steady. Zincs jumped to over 6s., apparently on the news that all plant will be in full swing by the beginning of April, and "there is no sign of trouble in the way of complete success." The shipment of concentrates has been started. West Australians were harder for a time, with exceptional strength in Kalgurlis and Great Fingalls, but the rise was not maintained. Mount Boppys were also in some request, but here also the close was not at the best. West Africans picked up in a few cases, and here and there the gains were retained, but Abbontiakoons and Ashanti Gold Fields showed dulness.

Copper, Tin and Miscellaneous.

Copper metal was a falling market throughout the week, and the share list has mostly moved down. The best of Rio Tintos was 66¼, and by the middle of the week they had dropped a couple of pounds, from which there was some little recovery. Anacondas were not assisted by the maintenance of the dividend at 50 cents per share, and the American things generally showed weakness, Bostons being prominently flat on a cable that owing to temporary difficulty a delay is anticipated of about three months in the treatment of the porphyry ore. There is said to be no cause for anxiety. The board has cabled for further particulars, which will be published in due course. Great Cobars fell rather heavily, and nothing closed better on the week. The monthly metal statistics showed an increase of 2,492 tons in the visible supplies. A sharp drop in tin followed an opening spurt, and the share market showed dulness. Among Miscellaneous the American group developed a hardening tendency at first, but there was not enough business to support the rise. Mysore and Ooregum preference added a few pence, but the issue of the Balaghat report, which was decidedly disappointing, caused the shares of that company to weaken to 5s. Waihi Grand Junctions came back considerably after the big rise which occurred on the discovery of a new reef.

MINING NEWS.

*** *Frank and unbiassed answers are given to all questions relating to Mines. Address Editor Mining Section and enclose* One Shilling *for each question asked. No bucket shop circular or advertisement should ever be responded to without first consulting the* Investors' Review.

Rhodesia Exploration and Development.—This company has been responsible for some wonderful performances and equally wonderful dividends in the past, and although few of us could be sure how it was all managed, there was a certain excitement in holding shares in the undertaking. A good run for the money was more or less assured—provided you came in at the right moment. Wide fluctuations within a comparatively brief period were quite common, and we often wondered how long it would all last. It looks as though the end has been reached now and the only thing to be said is that the illusion was kept up much longer than might have been expected. In 1904 the highest price touched was 6¾ and the lowest 2¾, in 1905 the extremes were 4¾ and 2⅞, in the following year 3¾ and 1⅞, and last year 48s. and 10s. The steady declension is a little instructive and a week or two ago the price was in the neighbourhood of three half-crowns. Shareholders have not had much cash out of the company, but they put plenty in—what use were they otherwise?—and at various times shares have been taken up at premiums ranging from £3 10s. to £4 5s. Sundry packets of paper in the shape of scrip dividends have come their way, but it will be charitable not to make further reference to the matter, except to say that the principal distributions consisted of shares in the Bulawayo market and offices, the capital of which has lately been cut down to the imposing amount of £33,673. We are not going to fill valuable

space by saying anything about the various enterprises in which the Rhodesia Exploration and Development is interested, because all of any consequence have been dealt with in our columns during the last few months. After all, it is the losses of the past which are shareholders' chief concern. The company's holding in shares quoted on the Stock Exchange had a market value at June 30 last, the date of the accounts, of £85,666, or about £1,000 in excess of the book value, a remarkable state of affairs. But there is a heap of unquoted stuff, valued at £218,865, on which the depreciation appears to be £147,000 or thereabouts. A further £3,000 must be applied against first-class investments held, so that altogether the depreciation is about £151,000. To meet it the directors take £150,000 from what they call reserve, but which is really share premiums, leaving the account at £200,000. Income for the twelve months is returned at £31,688, and after meeting all expenses, including £3,000 for the directors and managing directors, there is a balance of £11,610. Credit brought in was £3,996, and the £150,000 from reserve brings up the total to £165,606. Sum written off amounts to £150,959 and £14,647 remains to be carried forward. The company has free assets to the amount of £69,129 and owes little to sundry creditors, but it would be a little difficult to appraise the value of loans to subsidiary companies £52,492. Various shares and debentures, at or under cost, now appear at £303,401, and various claims and farms are valued at £31,362. It is a melancholy exhibit, but shareholders may think themselves lucky that they have been told anything about the losses on investments. We can remember a time when a huge deficiency was indicated by a single entry in the balance-sheet without a word of comment.

Globe and Phœnix Gold Mining.—It would be so ungenerous to adversely criticise a Rhodesian mine earning profits and paying dividends that we will content ourselves with a bare recital of this company's operations for the year to December 31 last. Tonnage crushed was rather less than in the previous year at 77,950, but the value was lower, and the presence of an increasing proportion of antimony in the ore reduced the extraction. Bullion recovered was 32,066 ozs. against 37,201 ozs., and although an increased amount of tailings was cyanided the recovery was some 1,200 ozs. less. Slimes to the amount of 13,360 tons were treated as compared with nothing in 1906 and gave 2,308 ozs., but even so the total value of the bullion sold was £23,752 less at £151,345. The extraction per ton was 8.22 dwts. against 9.48 dwts., but the tailings averaged 3.86 dwts. or rather more. Working costs, increased by the slimes treatment, were £1 8s. 0.83d. per ton as compared with £1 7s. 3.73d. in the previous year. Revenue under all heads was £155,194 and mine expenditure £111,367. Administration in London cost £3,954 and depreciation amounted to £9,655, the balance of profit being only £27,959. A sum of £55,333 was brought in and after providing dividends aggregating 3s. 6d. per share £48,292 will remain to be carried forward. Payable ore reserves show an increase of 8,576 tons at 107,309 tons, but the average value per ton is 11.1 dwts. or 0.6 dwts. lower. No tonnage is included below the 13th level, but the mine is said to be looking very much better than for the past three years, and No. 16 level ore shows heavy visible gold. The Globe mine has been written down to the nominal amount of £1,017 by a transfer of £25,805 from share premiums account.

Witwatersrand Deep.—During the year 1907 the number of stamps operated was gradually increased from 209 in January to 245 in December, and the monthly tonnage from 29,710 to 34,200. In the same way the monthly working profit has advanced from £19,302 to £29,832, highly satisfactory progress. Total tons crushed were 386,110, of an average value of 8.836 dwts., the yield over the plates being 105,371 ozs. In addition, 385,209 tons of concentrates, sands, and slimes gave 53,897 ozs., making a total of 159,268 ozs. Value of the bullion was £667,972, and costs came to £370,332. Administration and other charges came to £8,176 and £289,464 remains as nett profit. With the balance brought forward and other items, the sum for disposal is £312,065, and after providing £44,555 for capital expenditure and £18,439 tax on profits for 1906, two dividends aggregating 42½ per cent. are paid, leaving £29,332 to be carried forward. Ore reserves have been increased from 737,072 tons to 1,134,600 tons, and while the average value of 9.06 dwts. is slightly lower this is fully accounted for by the inclusion of poorer grade ore, owing to reduced costs. Average yield per ton for 1906 was 33s. 5d. and for the past year 34s. 7d., while expenditure was reduced from 20s. 9.67d. to 19s. 7.27d., with the result that the profit per ton has improved from 12s. 7.75d. to 14s. 11.93d. The company's prospects seem pretty good.

Driefontein Deep.—A portion of this company's property is embraced in the East Rand amalgamation scheme, and the remainder has been disposed of to the Witwatersrand Deep, so that its independent existence may be considered at an end. The report for the past year is of the smallest possible interest, and work upon the property has been confined to baling the water from the shaft and distributing it to neighbouring consumers, the revenue accruing being £8,430. Other items brought the income up to £14,971, against which the general expenditure was £6,643, the company's cash assets at the end of the year being £137,990. Satisfactory progress was made by the Witwatersrand Deep in the sinking of their east incline shaft towards this company's boundary. According to the agreement entered into, the cost of the sinking up to December 31, amounting to £7,305, has been advanced by this company, but will be redeemed by the Witwatersrand Deep as each level is taken over by the company for development and mining up to its boundary.

Knight Central.—Work on this property during the past year was concentrated upon the sinking of the east shaft and upon development of the various levels down to the 10th. On December 31 the shaft had reached a depth of 3,180 ft., and in the opinion of the consulting engineer the development has reached a point which justifies the immediate erection of a reduction plant. Ore reserves are estimated at 282,100 tons, valued at 7.75 dwts., and while the value of the eastern section cannot be considered high at 7.6 dwts., this value is over an assumed stoping width of 53 in., which will permit of machine stoping to advantage, thus assuring low working costs. Ore reserves in both East and West sections can be easily increased by extending the drives at present in payable ground. Total capital expenditure for the 12 months was £53,337, and the general outlay £6,064, against which £5,404 was received for interest, rents, &c. Total cash balances in hand come to £55,591. At the general meeting held on February 19 a shareholder entered an emphatic protest against the acquisition of the South Knight's property, but, as we have before observed, the small independent shareholder does not count in connection with these amalgamation plans.

Henderson's Transvaal.—If the directors of this company could have had the remotest idea of the thorny paths into which their reconstruction scheme would lead them we have no doubt at all that every other expedient would have been tried before they would have embarked upon the usually simple, but this time exceedingly troublesome, method of raising money. The judgment of the Court of Appeal has given a nasty shock to many besides the Henderson people, and the fact that any shareholder unable or disinclined to put up money under a reconstruction must in future be justly dealt with instead of being bundled out of the company is a decided gain. There is talk of an appeal to the House of Lords on the question, and we suppose a final decision must be secured sooner or later. Another meeting of the Henderson Company was held this week, and shareholders again endorsed the policy of reconstruction, so that when freed from the objection which upset the former scheme we suppose the proposal will go through.

Oroya-Brownhill Company.—Shareholders in this well-known West Australian mine must have looked forward to the annual report with very great anxiety. It has been obvious for some time, and the fact has never been concealed, that the rich ore in the mine was nearing exhaustion, and a few months back it was announced that an intrusion of country had cut out a large section of the rich chute on the Oroya North Block rendering imperative a reduction in output unless the lode could be picked up again. There is evidently no possibility of this, and the general managers are obliged to confess that the results obtained underground have been in the main disappointing both as regards stoping operations and development. It must not, however be supposed that the company is necessarily nearing an end. There are considerable fringes around the ore bodies which can still be secured, and will afford profitable work during the present year. The company, moreover, has clearly been prepared for the exhaustion of the rich ore, and it is said that the results obtained from the Central Boulder lease under option to the company afford hopes of large supplies of low-grade ore. Also the Oroya Black Range mine, in which a large interest is possessed, has shown very encouraging results, and, summing up, the general managers say that the "continuation of this policy of expansion by seeking interests in other properties should on the present sound engineering and financial lines, keep the company in permanent profitable work." No attempt has been made to give an estimate of ore reserves, and no one can say how long even the present reduced production of £16,000 per month can be kept up. Although anticipated, the end has come with rather distressing suddenness, and the company's career is one more illustration of the great uncertainties surrounding gold mining, even when it has been "struck rich," as in this case. Original shareholders have, of course, done splendidly, and the total dividends paid since distribution commenced in 1897 have been £7 9s. per £1 share. This includes the 11s. 6d. paid for 1907, but leaves out of account the 6d. to be paid on the 24th inst. The present rate of profit is only £3,500 per month. During the year to December 31 last 133,395 tons of ore were treated, producing 102,303 ozs., the average yield being 15.34 dwts. Value of the gold was £434,083, and the mine outlay £131,486 or 19s. 8.56d. per ton, which is far less than in the case of many Rand mines. And the Oroya-Brownhill is, of course, entirely manned with white labour. Compared with 1906, these costs show a decline of 2s. 3.36d. per ton, and a further reduction has been made during the current year. Including sundry items, the revenue for the year is £444,691, and the outlay £137,314, leaving £307,377. Out of that £22,838 must be provided for depreciation and £24,764 against mine development and main shaft accounts, so that the actual nett profit is £259,775. Balance of exploration account, £11,826, is added to this, as also the sum brought forward, £36,975, raising the available credit to £308,577. Income and colonial taxes reach £32,301, the dividends of 11s. 6d. require £258,750, directors' commission amounts to £8,437 and £9,088 is carried forward. The company's finances are in perfect order, and the cash balance represents fully 10s. per share.

Broken Hill Proprietary.—A cabled summary of this company's report was received towards the end of February, and now the full statement is to hand. The period covered is the

half-year to November 30 last, and the report refers to the general manager's attention to the question of the manufacture of spelter, works for which were in course of erection at Port Pirie. The whole matter has received very close attention, and the general manager, in indicating his satisfaction with the conduct of operations, expects the company to be in a position to start producing at the end of the current year. The refinery at Port Pirie treated 1,142 tons of bullion per week, giving a total production of 28,860 tons of lead, 1,996,825 ozs. of fine silver and 1,160 ozs. of gold. Lead sold during the half-year was 29,742 tons against 24,372 tons in the previous six months, and for the current half-year to date 3,215 tons have been disposed of as against 2,850 tons for the corresponding period. The increased quantity of 298,327 tons of sulphides was treated by the concentration plant, giving an output of 47,206 tons of lead concentrates. The recovery has been maintained, but costs, as in all other departments, show an increase. The zinc concentration plant treated a so-called record quantity of tailings, viz., 691,373 tons, producing 176,024 tons of zinc concentrates. The grade now produced runs about 42 per cent. zinc, and shows a slightly improved recovery. Total output of silver was 2,785,535 ozs., inclusive of the contents of the zinc concentrates sold, as against 2,695,000 ozs. for the preceding six months. The average nett price realised was 2s. 8 31-32d. per oz. Soft lead produced was a little larger at 29,612 tons, but the nett price obtained was only £16 4s. 9d. against £18 6s. 5d. or a drop of £2 1s. 8d. The fall in the price of lead represents, roughly, £67,000, spelter £27,000 and silver £6,500, or a drop of over £100,500 against the previous half-year's operations. Profits were only £137,642, a shrinkage of £170,596, the profit per ton of ore falling from £1 0s. 9d. to 8s. 9d. Nevertheless the dividends and bonuses for the year aggregate £288,000, being 6s. per share, so that the company has been compelled to draw heavily on its free balance, fortunately large at £722,285. Exploratory and development work cost £40,000, but no fresh ore bodies appear to have been encountered, while £45,607 has been expended on large and important additions to plants generally. The directors have joined with other companies on the Barrier in respect to the Umberumberka water trust. Surveys and reports as to costs, &c., have been obtained, and these will shortly receive the attention of the companies interested with a view to coming to some definite decision as to the feasibility of the scheme.

Mount Boppy Gold Mining Company.—This company's property is situate in the Cobar district of New South Wales, and is the largest and most regular gold producer in the State. During the twelve months to December 31 last 76,339 tons of ore were milled, producing by amalgamation 10,329 ozs. of fine gold, a curiously low recovery, but 46,143 tons of tailings were cyanided for 11,542 ozs., 29,925 tons of slimes gave 7,583 ozs. and 2,147 ozs. were recovered from 302 tons of concentrates, so that the total production was 31,602 ozs. or 8 dwts. 6.70 grs. of fine gold per ton of ore crushed. Realised value was £133,121, increased to £134,180 by interest and fees. Expenditure in New South Wales was £67,024, leaving the profit for the year at £67,156. Including £709 brought in, the disposable sum was £67,865, and fortunate shareholders get 9s. 6d. or 47½ per cent. in dividend, being 2½ per cent. more than in 1906. The necessary allowances having been made for depreciation, income-tax, &c., the credit to be carried forward is £341. Development operations have been attended with satisfactory results, and despite the extraction of 76,339 tons in the year the reserves at December 31 were 193,858 tons against 191,000 on the same day in 1906. The company has recently acquired further leases forming an extension of the northern area of the property, and at some future time it is hoped to vigorously explore that area, in which the prospects of opening up another successful mine the superintendent describes as distinctly encouraging. The financial position is excellent in every way. Eleven of the company's southern leases have been transferred to the South Mount Boppy Gold Mining Company incorporated on November 23, 1906, with a nominal capital of £150,000, the consideration being £55,000, payable in shares. Other leases have been acquired for £35,000, also in shares, and 50,000 shares were offered and allotted to provide working capital. Work is being actively prosecuted, and the future is looked to with no little confidence.

Balaghat Gold Mining.—The experiences of this Indian mining company during the year 1907 were distinctly disappointing, and it cannot be said that immediate promise is particularly hopeful; but there is always the chance of a good turn up to restore impaired fortunes, and taking the optimistic view, as always, the directors say that previous experience in this and other parts of the Kolar gold field justifies the expectation that new bodies of payable ore will soon be discovered in the company's property. It must be remembered that the company's interests have recently been increased by the purchase of the Nine Reefs mine and machinery and the Coromandel block, all secured on quite reasonable terms. It also holds 4,000 shares in the Anantapur Gold Field, another Indian property, and it is said that the exploratory work carried out has been entirely satisfactory. Last year the quartz crushed was about 2,000 more than in the preceding twelve months at a total of 55,850, and the tailings treated increased by 7,200 tons to 50,232, but the yield of gold fell heavily from 46,432 ozs. to 34,574 ozs. The falling off per ton was no less than 5 dwts. 0.44 grs., and the cyanide extraction dropped a trifle from 1 dwt. 22.26 grs. to 1 dwt. 20.3 grs. per ton. Value of the output was only £132,673, a decline of over £46,000, and after deducting royalty of £6,559, and adding small sums from other sources, the actual revenue is £127,044. Expenditure was actually higher at £100,755, an increase of fully £8,000, and the balance of profit is only £26,209 as against £78,174. Sum for disposal is £27,830, from which income-tax takes the very large sum of £3,071, depreciation accounts for £4,801, Coromandel purchase account is reduced by £2,000, and outlay on mines and general expenditure account by £5,000, while £3,259 is written off additions to buildings, machinery, plant, &c. All this leaves only £9,699 for dividend purposes, which provides 10 per cent. on the preference shares with a trifling balance over. For 1906 the preference shares got 25 per cent. and the ordinary 15 per cent. Ore reserves are estimated at 61,158 tons against 66,975 tons, and although the drop is not serious the superintendent points out that the quality of the ore will not admit of a greater production than 2,600 to 2,700 ozs. per month for some little time to come unless important discoveries are made in the near future. In the circumstances it is highly satisfactory to note that the future reduced cost of electric power will mean a saving of £7,770 per annum.

Dharwar Reefs.—Shareholders of this Indian gold mining company have to decide whether the prospects justify them in putting up a further 5s. per share. Of course, the directors have no hesitation in recommending this course, describing the present as an important stage in the company's affairs, and there is always the feeling that the success which has followed the reconstruction of other Indian mines may possibly attend this one. The question, however, which naturally arises is whether the directors could not make some temporary financial arrangements for keeping things going until it is seen whether the option granted to the Mysore company on Block No. 3 is to be exercised. There appears every probability that it will be, and in that case the company would come in to a further £60,000. Other blocks of promise are Nos. 1 and 4, but the directors are anxious to concentrate attention on the southern portion of the Kabagatti or No. 2 block. In order to thoroughly develop this it will be necessary to sink a new shaft, and the directors are desirous of commencing it without delay. It is to provide the money for this, and put the company in funds for the exploration of one or both of the other blocks when thought desirable that reconstruction with a 5s. assessment is proposed. Milling operations commenced in February, 1907, and to the end of the year 11,013 tons were crushed for a yield from the mill of 4,911 ozs. or 8 dwts. 22 grs. per ton. Assay value of the tailings is 4 dwts. 17 grs., and they remain for treatment as soon as the necessary additions to the cyanide plant can be brought into service. It appears that the tailings were not amenable to the ordinary cyanide treatment. Revenue under all heads was £24,626, and the outgo £38,123, including £3,297 for depreciation, leaving the nett outlay at £13,496. Cash assets at the end of last year were £7,923, while £9,405 was owing to sundry creditors.

Letters to the Editor.

M. B. FOSTER AND SONS.

Sir,—I have a considerable holding in M. B. Foster and Sons, Limited, and so I read with much interest what you said last week.

I am sorry you have not seen a copy of the last report, and you may not have seen a copy of the report of the strong committee appointed last year, so I send both. We now know without any help from Messrs. Harris and Co., to whom you refer, the causes of our decay in recent years; we also believe that our chairman (Mr. Glasson) and the directors working with him are doing their best. A turn for the better should come this year, so that when the assets are written down to their true value and the inflated capital has been dealt with, a certain amount of prosperity may yet return to the good old name of "M. B. Foster."

I am not surprised that the small shareholders should feel disappointed, but some of us who have invested largely have the right to call the tune, and we shall do so.

Yours, &c.,

London, March 31, 1908. X.

THE PERUVIAN CORPORATION, LIMITED.

Sir,—I am instructed by the board of this corporation to state that after the decision of Mr. Justice Warrington in the test action of Cox-Moore *v.* The Peruvian Corporation in regard to the right of the corporation to issue prior lien bonds in front of the existing debentures, the numerous documents relating to the assets of the corporation were carefully examined and considered by counsel on behalf of the various parties interested in the proposed issue, and in the result counsel expressed serious doubts whether the annual income received by the corporation from the several railway companies towards the service of the debenture debt (such interest amounting in the aggregate to £193,362) could be diverted from the service of the debentures. In that event it follows that prior lien bonds charged on the whole of the income of the corporation are out of the question.

The board, therefore, have decided that for the funds they require to redeem the outstanding notes of the corporation and for the railway construction now in progress in Peru they will issue debentures to rank *pari passu* with the existing debentures.

I am, Sir,

Your obedient servant,

Thomas E. Webb,
Secretary.

43-46, Threadneedle Street, London, E.C.,
April 2, 1908.

RAILWAY TRAFFIC RETURNS.

Foreign.

Alberta Railway and Irrigation.—Earnings for the 10 days ended March 31, $5,092, decrease $1,186; aggregate from July 1, $180,520, increase $40,559.

Argentine North Eastern. — Traffic receipts for week ended February 28, £3,396, increase £193; aggregate from July 1, £107,840, decrease £4,358.

Assam Bengal.—Traffic receipts for 7 days ended February 29. Rs. 93,500, increase Rs. 945; aggregate from Jan. 1, Rs. 7,44,290, decrease Rs. 1,14,401.

Bilbao River and Cantabrian.—Traffic returns for February, £8,522, decrease £1,085; aggregate from January 1, £16,228, decrease £4,563.

Buenos Ayres Central.—Gross receipts for February £9,865, decrease £3,555; aggregate from Jan. 1, £81,976, decrease £2,531.

Canadian Northern Railway.—Traffic receipts for 7 days ended March 21, $142,800, increase $33,400; total from July 1, $6,780,500, increase $1,840,100.

Egyptian Delta.—Traffic receipts for week ended March 14, £5,704, increase £680; aggregate from January 1, £263,113, increase £18,250.

Lucknow Bareilly Railway.—Traffic receipts for 7 days ended February 29, Rs. 39,860, increase Rs. 11,878; aggregate from January 1, Rs. 3,01,273, decrease Rs. 37,504.

Midland Uruguay.—Receipts for month of February, £3,000, decrease £3,573; aggregate from July 1, £45,157, decrease £3,335.

North Western of Uruguay.—Traffic receipts for Feb., $14,400, decrease $7,277; aggregate from July 1, $154,129, decrease $12,666.

Quebec Central Railway.—Traffic receipts for the 3rd week of March, $22,251, increase $7,241; aggregate from January 1, $201,877, increase $54,676.

Quebec and Lake St. John.—Traffic receipts for Feb. $31,941, decrease $2,037, aggregate receipts $68,216, decrease $1,606.

Rohilkund and Kumaon Railway.—Traffic receipts for 7 days ended February 29, Rs. 24,274, increase Rs. 5,099; aggregate from Jan. 1, Rs. 1,79,670, decrease Rs. 24,894.

Uruguay Northern.—Gross receipts for month of Dec., £1,712, increase £3; aggregate from July 1, £11,422, increase £970.

White Pass and Yukon Railway.—Traffic receipts for week ended March 14 amounted to $13,500.

English.

Cleator and Workington Junction.—Receipts for week ending March 28, £1,339, decrease £20; aggregate from January 1, £14,242, decrease £3,091.

Cockermouth and Keswick Railway.—Receipts for week ending March 28, £693, decrease £100; aggregate from January 1, £8,534, decrease £720.

East and West Yorkshire Union Railways.—Traffic receipts for week ended March 28, £474, increase £111; aggregate from January 1, £5,917, increase £142.

TRAMWAY AND OMNIBUS RECEIPTS.

Home.

Bath Electric.—Traffic receipts for week ending March 25 £577, decrease £68; aggregate from Jan. 1, £6,787, decrease £552.

Blessington and Poulaphouca.—Traffic receipts for week ending March 25, £7, decrease £2; aggregate from Jan. 1, £75, decrease £10.

Bristol Tramways and Carriage.—Traffic receipts for week ending March 27, £4,422, decrease £835; aggregate from Jan. 1, £58,622, decrease £1,217.

British Electric Traction.—Receipts of all the Associated Companies for the week ending March 27, £26,007; 428½ miles.

Burnley Corporation.— Traffic receipts for week ending March 28, £1,160, decrease £558; aggregate from January 1, £14,891, decrease £243.

Dublin and Blessington.—Traffic receipts for week ending March 25, £100, decrease £8; aggregate from January 1, £1,159 decrease £12.

Dublin and Lucan.—Traffic receipts for week ending March 27, £96, decrease £22; aggregate from Jan. 1, £1,170, increase £13.

Dublin United.—Traffic receipts for week ending March 27, £4,607, decrease £395; aggregate from Jan. 1, £58,561, increase, £1,755.

Hastings and District.—Traffic receipts for week ending March 26, £753; decrease £160.

Isle of Thanet.—Traffic receipts for week ending March 28, £258, decrease £249; aggregate from Oct. 1, £6,763, decrease £160.

London County Council.—Traffic receipts for week ending March 21, £30,045, increase £1,022; aggregate from April 1, £1,580,849, increase £241,834. Miles 116¾, against 113⅞.

London General Omnibus.—Traffic receipts for week ending March 28, £18,460, decrease £2,372; aggregate from Jan. 1, £225,574, decrease £15,511.

London Road Car.—Traffic receipts for week ending March 28, £7,550, decrease £390; aggregate from Jan. 1, £80,729, decrease £5,350.

London United.—Traffic receipts for week ending March 28, £5,386, decrease £1,562; aggregate from January 1, £64,831, decrease £2,000.

Provincial Trams.—Traffic receipts for week ending March 28, £1,380, decrease £567; aggregate from Oct. 1, £37,246, increase £578.

Rossendale Valley.—Traffic receipts for week ending March 27, £191, decrease £30.

Sunderland District.—Traffic receipts for week ending Mar. 25, £423, increase £16; aggregate for 21 weeks £9,276, increase £1,144.

Yorkshire (West Riding) Electric.— Traffic receipts for week ending March 29, £1,097, decrease £280; aggregate from January 1, £13,744.

Foreign.

Anglo-Argentine.—Traffic receipts for 7 days ending April 1, £18,841, increase £2,401; aggregate from January 1, £238,111, increase £30,742.

Auckland Electric.—Traffic receiptsfor 28 days ending February 28, £11,997, increase £1,909; aggregate from January 1, £25,888, increase £3,582.

Brisbane. — Traffic receipts for month of March, £14,490, increase £1,291.

British Columbia Electric.—Nett earnings for February $68,541, increase $18,251. Aggregate nett earnings, including income from investments from July 1 to Feb. 29, $662,619, increase $186,087.

Buenos Ayres Grand National and New Tramways.—Traffic receipts for 7 days ending March 31, £7,860, increase £1,155.

Calcutta. — Traffic receipts for week ending March 28, Rs. 45,486, increase Rs. 2,030; aggregate from January 1, Rs. 6,47,884, decrease Rs. 35,638.

Cape Electric.—Traffic revenue for month of February, Cape Town, £10,497; Port Elizabeth, £2,984.

Carthagena and Herreiras.—Traffic receipts for the month of March, £1,849, decrease £4,389; total from January 1, £6,621, decrease £10,508.

Geneva Trams.—Earnings for February, fr. 173,497; increase fr. 19,986.

Kalgoorlie Electric.—Gross receipts for February, £3,417; aggregate from January 1, £7,055.

Lisbon Electric.—Earnings for January, milreis 119,627.

Madras Electric.—Traffic receipts for fortnight ended March 31, Rs. 19,446, decrease Rs. 1,195; aggregate from January 1, Rs. 116,368, increase Rs. 12,619.

Melbourne Tramways and Omnibus. — Traffic receipts for March, £49,500.

Mexico.—Nett earnings for month of January, $194,398, increase $65,167; aggregate nett earnings from January 1, $194,398, increase $65,167.

Monte Video United.—Gross receipts for March, £22,513, increase £2,569.

Perth (W.A.) Electric. — Gross receipts for week ended March 27, £1,336, decrease £110; aggregate from January 1, £18,325, decrease £809.

Rio de Janeiro.—Gross earnings for 9th week 1908, $29,046; increase $6,791.

Sao Paulo.—Traffic returns for February: nett earnings, $121,794, increase $7,020; aggregate from Jan. 1, $378,420, increase $31,608.

Twin City Rapid.—Traffic receipts for the month of November, $497,428, increase $38,791; aggregate from January 1, $5,552,879, increase $402,984. Nett traffic receipts, $233,018, decrease $649; aggregate from January 1, $2,852,445, increase $105,004.

The Investors' Review.

The Week's Money Market.

Bank Rate 3 per cent. (Reduced from 3½ per cent. on Thursday, March 19.)

Norfolk House, Friday Evening.

It was Tuesday before disbursements by the Exchequer began to relieve the tension upon the Money market. Thanks to the relief thus given the market was then able to pay off a large amount of its debt at the Bank due that day, and over-night balances fell to 2 per cent. No real ease, however, came, and the Bank return shows that out of a reduction of £4,243,000 in the Government or public deposits, bringing the total down to £15,600,000, only about £2,810,000 was available for repaying debt at the Bank because the reserve in coin and notes was drawn upon at the end of the month to the extent of £1,684,000. The reserve, however, is still £29,267,000, or £5,407,000 more than a year ago, so that when the Government dividends are released in the beginning of the week the open Money market should become, for a few days at least, almost sloppy. It cannot remain in that condition for long because the total of other securities, although £2,246,000 less than a year ago, is yet high at £34,438,000, but still more because the French exchange is so low as to indicate withdrawals of gold for Paris. The Bank of England still owes the Bank of France about £1,600,000, and although we are not much afraid of any demand for gold from Germany as likely to arise from the issue of the German-Prussian loan, it would be folly to overlook the generally distressed and locked-up condition of German business finance because it is so great as to keep us in considerable danger of a sudden demand for gold to strengthen the Reichsbank. The issue of fresh capital for Argentine railways must also be kept in view as well as the effect of the other loans for foreign countries, such as the Copenhagen, Moscow, Peruvian Corporation and Chinese loans recently floated, or about to be floated, all such creations of capital giving other countries credit here and power to draw gold away. As a matter of fact gold has been slipping out, although some portions of the Bank's purchase of the bulk of Monday's large market supply, or say rather more than £500,000 altogether, at the comparatively high price of 77s. 9⅞d., which have already dribbled into its vaults gave it an excess of imports over exports for the week amounting to £151,000.

Yesterday the market only succeeded in paying off about four-fifths of the amount due at the Bank, but the re-borrowing could not have been very great because the total sum due did not much, if at all, exceed £1,000,000 and balances are undoubtedly getting more plentiful in the open market. At the beginning of the week bankers still obtained 2¾ and 3 per cent. for seven-day money and 2½ to 3 per cent. on call money, but the rate for notice money fell on Wednesday to 2½ per cent. and has not hardened since, while call money has ranged from 2 to 3 per cent. To-day all save a small fraction of the large amount due at the Bank was cleared off, and loans in the open market were consequently in good demand, but the rate was only 2½ per cent., whether for the day or for seven days.

Discount rates have also weakened until remitted paper of all dates dipped towards 2⅝ per cent. Most houses, indeed, quoted 2⅝-½ per cent. for two, three, four, and six months' bills yesterday, but there was not much of "the half per cent. in it" except for mixed parcels. As for inland paper, the quotation of 3 to 3¼ per cent., irrespective of usance, is a full one. This morning, however, rates were if anything rather firmer at 2 7/16-½ per cent. for all usances except sixty-day bank paper, which some houses quoted as high as 2⅝ and others at 2½. These are the official rates, as they may be called, but they vary slightly, and holders of bills still put forward 2 7/16 as a practicable rate for all dates, though they admit that the market is harder.

An idea seems to be about that the India Council is going to unear-mark gold, the view being based upon the smallness of the recent sales of Council drafts. Experienced dealers in Indian exchange, however, do not regard this step as imminent. It depends upon the sale of drafts in India, £500,000 as a first effort having been recently put up for tender there. Up to within a day or two ago less than £100,000 had been taken up. These sales would have to be materially increased before the Council here would be driven to let out any of its gold. It possesses large balances still, as its lendings in the open market indicate.

Monday's supply of gold in the open market will be about £450,000, and the price is quite hard at 77s. 10¼d. per oz. This portends foreign competition, and gold is leaving the Bank, £161,000 nett having been withdrawn to-day for various destinations.

Calls on new issues next week do not amount to much, but Tuesday will see £220,000 wanted from the underwriters of the Salvador loan, and on Friday £237,500 will be swept away by Dunedin, the total payings up for the week being £626,000.

Silver.

The market for bars has again been wonderfully steady on moderate orders from the bazaars, and some covering by the bears, coupled with small offerings from America, and the variations in price have been too minute to be worth recording. Towards the close of the week, however, the tendency was, if anything, downwards on a report that American shipments to

China were being diverted to India. Final quotations were ¼d. down, compared with last Friday at 25 7/16d. per oz. for cash and 25 9/16d. per oz. for delivery two months forward. Applications for the India Council drafts on Wednesday were larger than those of a week ago, but still reached a total of no more than Rs. 2,25,000, all in bills. The whole amount was allotted, tenders at 1s. 3 29-32d. per rupee receiving in full. Next week another Rs. 20,00,000 will be offered.

BANK OF ENGLAND.

The Stock Markets.

Business has been rather better this week on the Stock Exchange, and as the British and Indian Government dividends will be out in the beginning of the week it is probable that investment brokers will have a good deal more to do this month than they had in February and March. At bottom, however, there is no reliable improvement in the position of the market, and something approaching resentment begins to be felt regarding the speed with which new securities are being offered for subscription. That there is a market for good securities is proved by the unusual success of the Anglo-German Chinese railway loan, and the better subscription to the Moscow loan than was expected when we last wrote. Its underwriters have had to take up only about 30 per cent. For all that too many stocks are being brought out, not only for the appetite of the market, but for the spare means of the public, and if there is no slackening off we shall be confronted with embarrassments amongst underwriters before many months are over.

Yesterday the market had two causes for wrath, or, at any rate, grumbling. One was the inept speech of the Chancellor of the Exchequer, who, in his enthusiasm for that Licensing Bill he has fathered, tried to make a point in his favour by bragging that since the Bill was introduced Consols had risen. It is not worth while to be angry at gaucheries of this description, they merely show that Mr. Asquith knows nothing whatever about the forces governing the Money market or business of any kind. The other cause of dissatisfaction was the news that the combined German Imperial and Prussian loan is to be issued before Easter. The total amount is 650,000,000 marks or £32,500,000 in 4 per cent. bonds, irredeemable for ten years, and offered at the suggestive price of 99½. But that is not the whole of the wants of the empire and kingdom for the German banks are to be compelled, in addition, to take up £10,000,000 in five year 4 per cent. Treasury bonds to be held by them, and not sold to the public. Were this the end of the borrowing it might not matter so much, but demands of this kind will be repeated year after year as long as the empire continues to pursue its policy of rivalry with England in ships of war construction, and its waste upon a great conscription army maintained as a menace to the peace of Europe. Some people apparently imagine that a few millions of this loan will be subscribed here, and a few even go so far as to hint that the Bank of England is bidding for gold in the open marke against foreign buyers in order to be able to cope with a German demand for the metal rendered possible by the placement of part of this loan here. There can surely be no ground for that fear; not even our most unpatriotic cosmopolites would subscribe freely for a loan much of the proceeds of which will be devoted to building war vessels in rivalry with England. The general public certainly will have nothing to do with the issue. Had the money raised been used for industrial expansion, the improvement of German civilisation along pacific lines, there could have been no objection whatever to our participation, for we have no unfriendliness towards the German people. On the contrary, every enlightened Englishman is only too pleased to see friendly neighbours progressing in the arts and industries, for the more they prosper the more we prosper, but to subscribe for what is practically a war loan would be too unpatriotic an act to be thought of for a moment.

What such borrowing portends to Germany is not difficult to define. The end will be the insolvency of the Empire. It may take a few years longer or a few years shorter to reach this goal than any observer can guess, because nations do not founder through their finance as a bank or private firm might do; but bankruptcy is the goal towards which all European empires are rushing with Germany leading the way. They have entered upon a career of extravagance and indescribable prodigality that no ministry appears to be in the slightest degree able to check. We shall all go on until exhaustion forces us to stop, and to all appearance the German Empire will be the first to plunge into the abyss because it is the newest and the weakest, an empire whose prosperity has been created and developed by credit expedients, and on an insufficient foundation of stored wealth to a much greater extent than that of any of its rivals.

Trustee and Other Securities.

Yesterday's news had a dulling influence on Consols, which are, in fact, 2s. 6d. down on the week, for the market was as little disposed to relish the information noted elsewhere foreshadowing the proximate collapse of the Irish land purchase scheme as it was that about the German loan. All British Government securities were therefore down except Local Loans stock, which rose on the week. The time is approaching when this stock will be open for redemption or conversion. India stocks also betrayed some weakness, but the Transvaal loan was firm, and in the Domestic Municipal list changes were favourable, quite a number of them being 1 up on the week, although London County 3 and 3½ per cents. have been kept down by the expectation of the new loan. Colonial stocks have also been firm, and business has been rather fuller in that quarter.

Foreign Government Stocks.

Foreign markets are just as much under the sway of Wall Street humours, rumours, and jumpings as the Yankee section of our Stock Exchange is, and business does not seem to wake up either in Paris or Germany. Players talk things better or worse in response to the mood of the moment, but nothing particular happens. Paris, however, has been selling Japanese bonds during the week, and must have opened a fairish bear account in that quarter, so the 5, 4½, and 4 per cent. loans are all lower than they were last week. Russian bonds, on the other hand, are firm, in spite of a revived report yesterday that a loan after all is coming. This continual stream of legends at least serves to relieve the monotony. Argentine bonds have risen, and there has been no recoil in German 3 per cents. on the week, in spite of the news of the coming huge addition to the public debts of empire and kingdom; but everybody knew that Germany must, in the Yankee vulgarism, "borrow or bust."

Home Railway Stocks.

Prices have been rather well sustained in this market throughout the week, and the decrease of about £299,000 shown in last week's traffic earnings,

bringing the total decrease up to £729,000 for the first quarter of the year, did not help the bears much, because comparison is made with the bulk of the Easter receipts a year ago, and much of the loss last week is expected to be made good when Easter comes round again this month; so the changes on the week have been noticeably favourable in quite a number of instances, the "heavy" stocks alone failing to respond to the more hopeful feeling. Brighton, Central London, City and South London, South-Eastern and South-Western stocks have all risen in a notable way, Central London deferred being as much as 7 higher, and even Metropolitan has gained another 10s.; but these advances only emphasise the speculative character of the business done, and investors are not putting money into ordinary stocks to any important amount. Some buying, however, is noticeable in debenture, guaranteed and preference stocks, where the changes are for the most part favourable, Caledonian guaranteed annuities being as much as 1½ up on the week. Great Central preferences, however, continue to slide down.

Indian and Colonial Railway Stocks.

A fair number of favourable changes are noticeable amongst Indian Railways, although business in them has not shown any appreciable increase. The speculation in Can. Pac. shares has died away in a remarkable manner this week, but that is probably because the bears have paused in their selling, having had the worst of it so long. The market, as it were, had come to a kind of dead stop, and each side is holding on to its position with a grim determination to be victorious. No influence was exercised by the Grand Trunk report on the prices of that company's stocks, which, however, were maintained, and naturally Mashonaland and Rhodesia Railways debenture issues were hoisted merrily on the announcement made by the Chartered board that it had received subscriptions for more than the minimum £750,000 on which it would proceed to allotment. Who has found the money we do not know, nor do we care; but if the subscribers can pay up there should be enough in hand to provide the interest on these debenture issues for at least another year, in spite of the great cost of administrating the Chartered "empire."

United States and Foreign Railways.

Early in the week the Yankee market went sailing along as if there was enough gas in it to carry it as high as it was before the October panic, but selling was prompted by the rise and the complications created by the distressed position of the Erie, the Missouri and the Southern Railroad companies, not to mention others, caused renewed attacks by the bears, so that on the week most prices are down, though seldom to any important extent. The play being professional, we may leave this market to them and their rumour-mongers, for much of the business recorded on the Stock Exchange comes from the Continent or from New York, we in England being shy for the present of playing against those who use loaded dice. The largest declines of the week were in Milwaukee, Louisville, Union Pacific and Southern shares, all down about $3.

Argentine Railway stocks have also fallen back a little, particularly Buenos Ayres and Pacific stock, which has been depressed by the further issue made by that company. It is certainly spending very freely, but it is also gaining control of valuable territory and doing a rapidly expanding business. When its works at Buenos Ayres City alone are completed it will possess the finest and most extensive terminal facilities of any great railway in the world. Other Argentine Railway stocks felt the influence of the weakness in the Pacific Company's stock, but did not give way much They merely paused. In the Brazilian group, San Paulo rose 3, and Leopoldina has lost but a fraction of last week's advance. Antofagasta stocks, too, were all better and a rally occurred in United of the Havana stock; in fact, the whole Cuban list was steadier, and Mexican second preference stock finished 30s. better.

Banks, Breweries and Docks.

Many changes have occurred during the week in Bank shares, and the majority of them have been the wrong way, but the only prominent relapse has been 1½ in the shares of the National Bank of Egypt and 2 in those of the Bank of British North America. British Bank of South America shares have also been somewhat depressed, as well as those of the Anglo-South American Bank, otherwise the movements are mere fractions. We hear that the important Liverpool firm which had stopped payment a short time ago because of its involvement with insolvent connections in Brazil is likely to meet all its engagements, which is good news. Brewery securities have moved very little and nobody who can help it is doing any business in them whatever, so the Licensing Bill has not reanimated this market. London and India Docks stocks have not altered much throughout the week, but there has been a fair demand for the deferred. Millwall Dock securities have been shifted about a good deal owing to the announcement of the terms of purchase, but there has been no business in them and the changes merely adjustment. Surrey Dock stocks were inert until the publication of the terms of settlement.

Commercial and Industrial.

It is still unnecessary to devote space to the big commercial and industrial market, where there are even fewer of the minute movements to note than usual, as the whole market has been heavy with few exceptions, and where prices are marked up it is usually without any signs of dealings having taken place. Offerings of Humber shares, however, have occurred, and sent the price down a little. On the other hand, Nitrate shares have been steadier, and some of them have risen slightly. An improvement has also taken place in California Oilfields shares, and the debenture stock of the British Houston Company has again been hoisted, so that it closes 4 up on the week. Nobel share warrants are also higher, and there has been a noticeable rise in the price of Savoy Hotel ordinary shares. Even motor company shares have steadied, but business is lamentably thin everywhere.

In the Electric market there are a few ups and downs of from 2s. 6d. to 10s., the shares of the Charing Cross Company being fractionally lower on the new issue, as well as the shares of the Mexican Light and Power Company and Mexican Electric Light bonds, but some of the other Canadian electric enterprises are firm, and Crompton and Co.'s shares are a trifle up.

Financial Land, Trusts, Gas, and Insurance.

Naturally the alleged success of the Chartered issue was utilised to put that company's bonds to 94. This means an advance of 4, the most conspicuous change in the whole Financial Land and Investment group. Nobody is dealing in them, so it does not matter. Peruvian stocks were depressed on the imminence of the prior lien issue, Hudson's Bay shares have gained 10s. on the week, and Stock Exchange 4 per cent. debentures have been marked up 2 on the report which we have not yet managed to finger. Financial Trust issues, too, have been steady on the whole, the only conspicuous exception being Gas, Water, and General preferred and debenture stocks, and the deferred stock of the Government and General Investment Company.

In the Gas group also prices have been steady, with an improvement in Gas Light ordinary. Insurance shares, on the other hand, have again receded in a fair number of instances, with the solitary exception of Royal shares quoted ½ up. The declines are mostly of no importance, but Ocean Accident fully paid shares have fallen back 1.

Under Iron, Coal, and Steel we find nothing much to note beyond a sharp relapse in Cammell, Laird's shares and debenture stocks, a relapse certainly warranted by the report. In the other directions the movements have been favourable on the whole, and the decline even in Carnegie Steel Trust shares and bonds has only been $1 or $2. Dunderland things have

again been pushed up, and Ebbw Vale shares show strength, as well as Willans and Robinson's preference and some others.

Tea, Shipping, Telegraph, and Other Securities.

A few ups and downs not worth noting have occurred in the Tea, Coffee, and Rubber group, which has been firm on the whole for Indian tea company shares. In Shipping shares the business done has been very small and prices usually steady where they were tested, but Furness, Withy shares are rather better.

National Telephone stocks, too, have tended upwards, and so have the preference and debenture stocks of the Eastern Telegraph Company; in fact, the whole Telegraph list looks in better heart in spite of the smallness of the business going on. Tramway and Omnibus securities are also much neglected, but steady enough on the whole.

Friday Evening.

The shadow of the impending German loans has again kept our market dull, and most of the day Consols were weak, but the price hardened before the end. Everywhere business was insignificant whether in Home or American Railways or in Colonial and Foreign Railways. The traffic return of the Grand Trunk Company was rather a staggerer, showing as it did a decrease of £49,190 for the last ten days of March, and the new Grand Trunk Pacific stock has ruled at 1¼ discount. Other new issues, by the way, seem to be fairly steady, as these figures show:—Copenhagen, ⅛ to ⅜ premium; Moscow, ½ premium for cash, new Chinese ⅛ premium for cash and ¼ for the special settlement; Montreal Street bonds, 1½ to 2 premium; Trunk guaranteed new stock par, and the new Dominion loan ½ to ¾ premium. Apart from the Grand Trunk Pacific issue, the only new loan at a discount is that of New South Wales, quoted at ⅝ below the issue price. The market for Foreign Government bonds was less cheerful, and both Russian and Japanese issues moved the wrong way, the first Japanese 4½ per cent. loan, which commands most attention, closing to-night at 89¼-½. Chartered shares finished at 13s. 6d.

International Bank of London.

At last the shareholders of this unfortunate company are to get something back from the directors. It is announced by the liquidators, Messrs. W. P. Peat and F. S. Salaman, that a first return of £1 per share will be made next week, and report has it that there may be another £1 by-and-bye, or about £70,000 repaid in all. Along with this intimation an account has been circulated by the liquidators to the shareholders, and from this we learn that 19s. in the £ has been paid to the unsecured creditors, whose claims came to £140,099. This took away £133,094, and after meeting all current charges there is only £19,604 left, with 1s. in the £ on claims still unmet. At the time of the stoppage the cash in the bank and in hand amounted to £6,543, and £31,871 has been realised by the sale of the reserve fund investments, while book debts have brought in £17,146. The main source, however, whence the claims of outside creditors have been satisfied is the call of £5 per share made in August, 1905, which has yielded £94,760. From the figures put forth we may say we never saw a more empty shell, and the directors must really be commended for having come forward and done something to compensate the outside shareholders for their severe loss.

Union of London and Smiths Bank.—Deposit and current accounts on March 25, came to £33,798,948, acceptances and liabilities by endorsement to £3,339,825 and other liabilities to £633,135, while assets consisted of cash in hand and at Bank of England £5,447,324 money at call and short notice £5,508,150, investments including reserve fund £5,984,046, and discounts, loans and other advances £20,689,544.

Baku Russian Petroleum.—Production of crude oil for week ending March 28, 203,000 poods, equals 3,272 tons.

Russian Petroleum and Liquid Fuel.—Production of crude oil for week ending March 28, 217,000 poods, equals 3,499 tons.

THE WEEK'S PRICE MOVEMENTS.

Critical Index to New Investments.

Buenos Ayres and Pacific Co., Limited.

Although this company raised £1,000,000 in ordinary shares as recently as November last, it has a large amount of work in hand which will require a further considerable outlay. More money is needed now for the cost and equipment of branch lines, the purchase of additional locomotives and rolling stock and general purposes, and an issue of £1,000,000 4½ per cent. consolidated debenture stock is offered for subscription at 99. This new stock will rank *pari passu* with the existing £2,000,000 as from June 30 next, and is secured by a charge upon the undertaking, subject to the first, second, and 5 per cent. debenture stocks, amounting to £6,250,000. Past expenditure on the line has been fully justified by results, the gross receipts having risen from £584,267 in 1901-2 to £2,074,591 in 1906-7, and the nett revenue from £279,800 to £874,749. After including in the 1906-7 figures the estimated gross receipts of the Argentine Great Western and Transandine Railways, both of which have been worked by this company since July 1, the estimated gross revenue from July 1, 1907, to March 28, 1908, shows an increase of £372,395 over the corresponding period of last year, and it is expected that this will be greatly augmented by June 30. Traffic prospects are excellent, the wheat harvest has been the heaviest on record, and the maize crop will be more or less double that of last year. The annual sum required for interest on the debenture stocks, including this issue, is £407,875, and the new stock should be a substantial investment, with plenty of security.

Imperial Chinese Government Loan.

Out of the total loan of £5,000,000 authorised by the Imperial Chinese Government for the construction and equipment of the Tientsin-Pukow Railway, £3,000,000 was issued this week, £1,110,000 being offered here by the Hong Kong and Shanghai Banking Corporation, and the remainder in Germany by the Deutsch-Asiatische Bank. The railway is designed to traverse as a trunk line from north to south the provinces of Chihli, Shantung, and Kiangsu on the east side of the empire, and will have a length of about 680 miles. It will follow the route of the old Grand Canal, which for centuries was the great highway of commerce between the Yangtsze and the capital, but is now silted up and useless. In addition to being a direct obligation of the Government, the loan is secued by a first charge on the likin and internal revenues of the three Provinces to the amount of about £538,333 a year. It is redeemable within 30 years from April 1, 1908, by annual drawings commencing in 1918, but the Government may by giving six months' notice increase the amounts for redemption on or after April 1, 1919; any such repayment in advance on or before April 1, 1928, to be at 102½ per cent., and after that date at par. The price asked was fixed at 98¾ per cent., and so excellent is the security that, contrary to recent experiences with new issues, there was quite a rush for it on the part of investors, with the result that the amount was applied for four times over.

Greek 5 per Cent. National Loan.

Messrs. C. J. Hambro and Son, in conjunction with the National Bank of Greece, offer for subscription at 97 per cent. an issue of £200,000 of the the above loan, forming part of a total of £800,000. The capital and interest of the loan are exempt from all Greek duties and the service both as to interest and sinking fund is secured by revenues and taxes established under a law of June 17, 1904, relative to the creation of the National Defence Fund. Under this law the National Bank of Greece received £164,873 in 1905, £174,689 in 1906 and £195,744 in 1907, but additional security is provided by a charge on the surplus of the revenues assigned to the International Financial Commission which for the three years amounted to £660,069, £877,722 and £854,774 respectively. The loan will be paid off at par in 36 years from January 14, 1910 by half-yearly drawings and should be a good enough investment.

Alexandra (Newport and South Wales) Docks and Railway Company.

An issue of £349,494 4½ per cent. "B" consolidated preference stock, being the balance of £800,000 authorised, is offered through the National Provincial Bank of England, for subscription at the price of 88. The proceeds will be applied towards discharging the indebtedness already incurred in respect of the construction of a new dock of 75 acres, in extension of the existing south dock, and of a deep water entrance lock and extensions of the railways and sidings. Water was admitted into the constructed portion of the new dock in November last, and it is estimated that the additional nett revenue therefrom will amount to between £15,000 and £20,000 per annum, while the further works in hand when completed and fully equipped are expected to bring the eventual increase up to £50,000 per annum. Nett earnings during the past six years, after paying rent charges and royalties, but exclusive of interest on the debenture and "A" preference stock and the recent capital expenditure, show fairly steady improvement, except that in 1907 there was a reduction of about £5,500 compared with the previous year, owing to exceptional Parliamentary expenses. In that year, however, the amount available was £96,744, and as charges ranking prior to the "B" preference stock require £51,950, there should be sufficient margin without taking into account the improvement to be derived from the new dock.

British Westinghouse Electric and Manufacturing Company, Limited.

It was announced in January in connection with the investigation of the American parent undertaking that this company was to make an issue of £300,000 prior lien debentures. The issue seems to have been delayed a little longer than was expected, but £250,000 of it bearing interest at 6 per cent. is now offered at the price of 98. In order that the entire proceeds may be available for the uses of the company, including repayment of advances from bankers, payment of sundry outstanding trade liabilities and working capital, the American Westinghouse Companies have agree to accept at par certain shares in other companies in liquidation of £186,374 due to them for advances and on general account. The new bonds rank in priority to the £1,241,353 4 per cent. debentures outstanding, and are secured on assets having a book value of £3,592,291, of which £1,713,908 represents works, machinery, plant, tools, patterns, &c. We have not yet seen the accounts for 1907, but the auditors report that the trading profits

amounted to £92,383, or sufficient to meet the debenture and loan interest, with a surplus of £28,350 available as provision for depreciation in the value of certain consumable stocks and a reserve for contingencies.

New Great Wheal Fortune Syndicate, Limited.

This little concern has a capital of £30,000 divided into 5s. shares of which 20,000 are held in reserve, 50,000 were allotted to the promoter, and the remaining 50,000 were offered for subscription. For his 50,000 shares the vendor transfers a licence to prospect and option for mining lease which cost him £233 and sundry reports and documents, plant, stock, &c., of a value undisclosed. Tiny though the affair is it intends to do big things and the directors estimate that with an average of 28 lbs. of black tin per ton of ore and 60,000 tons treated per annum there should be a profit of £15,000 apart from anything which may be realised from a china clay property which is also to be leased. Reports by various experts are given in the prospectus, all highly favourable, but the venture nevertheless seems a speculation suitable only for local consumption and the directors have tacitly admitted this by paying underwriting commissions amounting to 12½ per cent.

Company Reports and Balance Sheets.

**** *The Editors will be much obliged to Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-sheets direct to the Office of the* Investors' Review, *Norfolk House, Norfolk Street, W.C., so as to ensure prompt notice in these columns*

GRAND TRUNK RAILWAY.

The essential figures have as usual been published some time ago, but there is always something to say about the full exhibit, and this company's report for the past half-year is quite up to the average in interest. It shows us that the charges coming ahead of the guaranteed and preference stocks rose by £34,559 in the December half of last year compared with the corresponding half of 1906, the total being £667,219. Rents were the same, but interest on debenture stocks and bonds amounted to £3,533 more at £492,279, and the surplus profit by the Detroit line was £9,824 less at £5,785. Worst of all, the Canada Atlantic Railway deficiency rose by £26,160 to £60,364. From these various causes it followed that the nett revenue of £1,194,394, which showed an increase of £28,269, left only £527,176, or about £3,700 more for the guaranteed and preference stocks than that of the second half of the preceding year. In other words, the increase of £178,400 in the gross income was fined away to this by the addition of £157,059 to the working expenses and by these other adverse items mentioned. The proportion of working expenses rose to 70.32 per cent. of the gross income compared with 69.45 per cent. in the corresponding half-year, and some of the branches of the system gave anything but prosperity results. The gross receipts of the Canada Atlantic Company did, indeed, rise by nearly £19,000, but its working expenses went up by almost £45,000, and the progress of the Grand Trunk Western branch, although satisfactory in gross, displayed the same devouring tendency in expenses, the gross increase in earnings having been £45,535 and the increase in expenses £41,690, and the Detroit Company's business did not show sufficient elasticity to make the gross income correspond to the expansion in expenses, for its receipts rose by only £10,578 against an increase of £19,046 in the expenses. No wonder that the directors announce their determination to put stringent measures in force to restrict all expenditure in the different departments as long as the present depression of business continues. They admit that since October last business has been poor "owing to the bad harvest in Canada and the severe financial crisis in the United States," but they give no indication how long this depression is likely in their opinion to continue. And they go on spending capital with a serene mind, having laid out last half-year £293,900 on this account, that sum, however, including discount and commission amounting to £6,209 paid on the 4 per cent. guaranteed stock issued during the half-year "less premium on 4 per cent. debenture stock sold and issued in exchange for Midland of Canada sectional bonds." All goes well with the Grand Trunk Pacific Railway, they say, and great progress is to be made with its building during the current year, the funds provided being ample. According to the balance-sheet the capital account appears to be in credit by £2,780,559, but there are so many confusing elements in this account in the shape of securities held and other items, such as reserve funds, guarantees, and so on, that we cannot infer from this apparent wealth any prolonged immunity from a further issue of stock. If the company goes on spending capital it must come again upon the London market, because the assets it possesses against the apparent surplus on capital account are mostly neither marketable nor pawnable. What is the meaning of "sundry outstanding accounts due to the company" of an amount of £2,054,832, or of the item £338,177 set down as "engine and car renewal suspense account"? The sundry outstanding accounts due by the company come to £1,257,991.

BANK OF SCOTLAND.

In its year ended February 29 this bank made a nett profit of £272,810, or £35,803 more than in the previous year, exclusive of £16,291, or £3,257 more brought forward. Adding this in the nett profits are up by £39,060 to £289,101, and out of this the directors place £60,000 to the reserve fund, or £20,000 more than a year ago, raising it to £1,100,000, and increase the dividend for the year by 1 per cent. to 16½ per cent., of which 8 per cent. was paid in October last, leaving 8½ per cent. to be paid now. This done £10,476 or £5,815 less will be left to carry forward, so that the total balance of undivided profits and reserve fund together will only be £54,185 up in spite of the addition of £60,000 to the reserve. The balance-sheet figures are as usual interesting, and on the liabilities side show an increase of £1,449,270 in the deposits and credit balances due by the bank. The note circulation has also risen by £44,400 to £1,143,613, and there is an expansion of no less than £251,387 in the drafts issued payable within 14 days, the total of which was at the date of the balance-sheet £525,256. Acceptances, on the other hand, are £1,958,759 lower by £12,871, and the total of the liabilities, that is to say of the balance-sheet, including paid up capital, reserve and undivided profits, is £1,873,996 up at £23,829,625. Changes in the assets are not in all respects so satisfactory as the recital just made might seem to indicate. The mixed item gold and silver coin, notes of other banks, cash balances with the Bank of England and cheques in course of transmission amounting in all to £1,607,747 show a decrease of £62,018 on the year and the bank's holding of British Government securities, money in London, lent at call or payable within 20 days aggregating £4,729,967 show a decrease of £228,642, but there is a striking, and in view of the bank's commitments in the various enterprises of the great and greatly adventuring Canadian firm of Mackenzie and Mann, a suggestive expansion of £663,839 in the item Indian and Colonial Government securities and other stocks and investments whose total, now £3,394,113, excites curiosity. Bills discounted, cash accounts and other advances also show an increase of £1,434,168 at £11,441,108, these two increases more than accounting for the expansion in the liability on deposits, &c. Increases have also occurred in the cost of properties belonging to the bank; for example, bank premises at Edinburgh and branches show an increase of £64,908 on the year and now stand at £305,843. No change has taken place in the London freehold property, which remains at £196,431, but other heritable property, or real estate, yielding rent is up £14,611 at £195,656, so that altogether the addition to the property account during the year has been £79,519, which is surely a remarkable fact, and it would really be a satisfaction to know what has been done with all this money. Gross profit, it may be added, at £463,841 shows an increase of £52,783, of which expenses at £191,032 swept away £16,981.

STANDARD BANK OF SOUTH AFRICA, LIMITED.

In the half-year ended December 31 last this, the most powerful of all African banks did better than the general conditions of the South African portions of the Empire led people to expect. Gross profits of £416,940 were down only £34,747. The balance brought forward was also £2,249 less, making the total shrinkage compared with the second half of 1906 £36,996. Expenses, however, were reduced by £7,380 to £225,429 and rebate on bills not due at £42,876 was £5,202 lower, so that the disposable balance was less by only £22,164 at £148,636, out of which the directors pay a dividend of 35s. per share or at the rate of 14 per cent. per annum as compared with a 16 per cent. rate in the corresponding half. A year ago £10,000 was also contributed to the pension fund, which this time gets nothing, but the balance of £40,239 left to carry forward is £3,321 up. Balance-sheet figures reflect and explain this diminished earning power. Note circulation is down £131,000 to £929,333, liabilities on deposits, &c., are £755,765 less at £18,377,856, and drafts outstanding and acceptances are down £364,557 to £750,704. There is also a decrease of £467,731 in bills receivable on account of customers, a cross entry the total of which is £2,473,629. Contraction in business is just as plainly revealed in the assets for increases of £406,748 in cash at £4,057,822, of £111,114 in loans on securities on short notice at £1,059,300, and of £41,785 in native gold on hand and in transit are more than offset by decreases of £101,957 in investments at £4,070,826, of £626,880 in purchased current bills of exchange whose total is £3,623,384 and of £1,177,925 in bills discounted and advances aggregating £9,913,437. Freehold premises in London stand at £60,000 and bank property in South Africa at £405,529 exclusive of fittings represented by another £20,267. Stamps, stationery, &c., £8,130 bring the balance-sheet total up to £26,171,558.

MERCANTILE BANK OF INDIA, LIMITED.

Gross profits for the year ended December 31, including £20,051 or £614 more brought forward, improved by £12,354 to £177,765 while working expenses were only £2,804 heavier at £77,414. Nett revenue was consequently £9,550 better, and of this the directors transfer an extra £5,000 at £40,000 to reserve, and put another £2,000 to pension fund. They then pay the usual dividends making 6 per cent. for the year on the "A" and "B" shares and raise the sum carried out by £4,550 to £24,601. With the present addition the reserve now totals £210,000 against a paid-up capital of £562,500. Liabilities on current accounts and fixed deposits are £117,832 smaller at £3,599,818, but bills payable have risen by £79,890 to £310,148, loans against securities are £134,000 up at £911,000, and sundry accounts come to £43,570 more at £247,520. Acceptances on account of customers are also higher by £43,570 at £247,520, and the total of the balance-sheet shows an increase of £253,631 at £6,156,773.

Cash comes to £667,359 or £144,207 less, but £68,750 is lent at call and bullion in hand is £39,760 up at £253,493. Investments have been reduced by £34,230 to £584,460, but bills receivable come to £82,547 more at £1,734,711, bills discounted are £42,547 higher at £101,331, and loans and advances £106,508 up at £2,323,678.

COLONIAL BANK.

Seasons throughout the West Indies were generally normal and the crops of sugar and cocoa now being gathered promise to be up to the average, while present prices for both products compare favourably with those of recent years. The cultivation of Sea Island cotton has also undergone further development, and altogether this West Indian institution appears to have found the past half-year a fairly satisfactory one. Gross profits were £2,178 better at £59,346, while expenses were a trifle lower and with £28,509 or £3,840 more brought forward the nett balance amounted to £54,666 compared with £48,614. No exceptional occurrence such as the Jamaica disaster a year ago had to be provided for on this occasion, but the directors put aside £5,000 for depreciation of investments and therefore have to repeat the dividend at the reduced rate of 6 per cent. per annum with an increase of £1,052 to £31,666 in the sum carried out. The balance-sheet gives some indication of an expansion in the business done as notes in circulation have risen by £76,855 to £482,098 and bills payable are £17,061 higher at £537,984. Deposits, however, have dropped by £23,950 to £1,897,083. On the other hand specie is £26,727 down at £397,420, cash at London bankers and at call and short notice has been reduced by £26,943 to £181,073, and bills discounted in the Colonies, &c., are £23,239 smaller at £792,955, but bills receivable have been increased by £189,642 to £1,103,553 and debtors on current account in the Colonies come to £842 more at £249,096.

ANGLO-ARGENTINE TRAMWAYS CO., LIMITED.

In July last this company absorbed the Buenos Ayres and Belgrano undertaking and the amalgamation would seem to be responsible for the large increase shown in the number of passengers carried. This amounted to 20,151,314 against an increase of 11,352,024 in the previous year, yet the general manager states that the improvement was not quite so great as that of 1906 over 1905. It was, however, still very marked and was still more satisfactory because practically all the lines were electrified before the middle of 1906, and very little of the increase therefore is due to an extended use of improved facilities. Gross receipts on the company's own lines rose by £85,267 to £904,486, an advance which indicates a considerable measure of progress, but expenses, owing partly to increased consumption of current caused by the employment of a large number of new and inexperienced men after the strike in January, were £53,622 heavier at £586,219, this total including £65,000 transferred to various renewal and other funds. Gross receipts on the Belgrano line for the six months ended December 31 amounted to £105,083, of which £37,225 was retained as nett income, and with £10,081 brought forward the available total was £365,573. Of this debenture interest and sinking fund took £16,601, annuity to "City" company £71,035, and interest on unpaid purchase money for the Belgrano line £30,250. After paying the dividend on the first preference shares £4,200 is put to the sinking fund for that class of capital and £4,000 is written off investments. The old ordinary shares, which were converted into 10 per cent. non-cumulative second preference shares at the time of the latest amalgamation, received a dividend at the rate of 8 per cent. per annum for the first six months and now receive a distribution at the new rate for the latter half of the year, after which the new ordinary shares get 8 per cent. per annum and £16,735 or £6,654 more is carried forward. Capital outlay for the year, including the £200,000 in ordinary shares issued on account of the purchase of the Belgrano line, amounted to £349,149, but £22,423 was deducted for sale of old track, &c., leaving a nett addition of £324,726 at £3,540,502, against which the various accumulations now aggregate £304,325 or £66,813 more. As regards the outlook for the company the general manager reports that the prospects of the present year continue bright. The wheat harvest having turned out far larger and better than any hitherto known in the country and the maize harvest being secured, all tramway lines should continue to prosper on the same scale as hitherto unless something surprising and unforeseen happens.

RIO DE JANEIRO CITY IMPROVEMENTS CO., LIMITED.

During the past year this company added 982 houses to the number drained and lost 167 through demolition making a nett gain of 815 at 51,408 connected, with the result that the gross income rose by £6,971 to £287,338. Unfortunately the cost of maintenance increased by £6,675 to £120,310 and the total charges, in spite of a reduction of £874 to £29,051 in engineering expenses, were £7,675 up at £159,942. Income-tax took £385 less at £5,412 and debenture interest was £850 smaller at £28,862, but £22,300 or £1,400 was appropriated for debenture redemption and written off capital expenditure leaving the nett balance at £70,821 compared with £71,691. Adding £5,562 or £2,052 more brought forward the disposable balance was £1,182 up at £76,383, out of which the directors pay the usual dividend of 5 per cent. and by reducing the sum carried out to £1,744 they are able to transfer an extra £5,000 at £15,000 to reserve. Outlay on new connections, apart from £3,225 on the Copacabana extension, was £18,723 and this it is proposed to write off out of reserve, the directors explaining that while it is in the nature of capital expenditure and for the most part remunerative it and all subsequent outlay of a like character in succeeding years must be redeemed by the end of the concession in 1947. On December 31 *i.e.*, before making this adjustment, the nett cost of the property including the extension was £1,734,618, and offices, workshops, &c., came to another £46,770 against which the reserve amounted to £85,000. Sundry creditors including a loan of £60,000 from the bankers were £21,516 up at £117,195, while sundry debtors had dropped by £7,430 to £147,999, but materials and plant, including works in progress, &c., amounted to £61,022. Cash was insignificant at £724, but the company has since made an issue of £250,000 debentures in connection with the Copacabana undertaking which will improve the position materially.

PHOENIX ASSURANCE CO., LIMITED.

Great changes have come over the fortunes of this company of late, and it has now by the absorption of the Pelican and British Empire Life Office added an important life insurance branch to its business. An accident insurance department has also been started and in operation for about six months. Primarily, however, the Phœnix, as its name implies, is still a fire company, and last year was the 126th year of its existence as such. In that period its fire department collected a nett premium income of £1,498,190, of which only £717,603, or 48 per cent., was required to pay losses accrued and outstanding. Expenses and commissions together took £513,000, or 34 per cent. of the premiums, leaving a profit of £267,556, exclusive of the interest income of £48,439, which added raised the total carried to profit and loss to £315,995. In the accident department the premium income was £16,061, quite a hopeful beginning, and the losses paid and outstanding came to only £1,592. To start a special expenses fund for this department, and to provide adequately for all unexpired risks, the directors have transferred £3,769 from profit and loss to the accident fund, raising it to £12,128. In the life department the business was also good, if not so large as it should soon become, and yielded a nett new premium income of £29,477, including £3,677 of single premiums. The department also granted eight leasehold policies and sold 15 immediate annuities, and the total income of this department for the year was £643,383, of which £412,429 came from premiums and £210,357 from interest, the average rate earned upon the life funds having been £3 18s. per cent. after deducting income-tax. Claims were within expectation, and took altogether, including endowment policies due, £375,342, the result of the year's business being an increase of £92,316 in the accumulated funds, raising the total to £5,445,415. From the profit and loss account which, including a balance of £238,791 brought forward, showed a credit of £554,786, the directors have set aside £200,000 to be added to the general reserve fund, increasing it to £500,000, and bring the dividend paid on the shares up to 30s. per annum by a final payment of 18s. per share. A summary of the position the company will assume when the amalgamation with the Pelican and British Empire Life Office has been completed is added to the report, and shows that its total resources will aggregate £7,098,858, exclusive of uncalled capital amounting to nearly £2,420,000 more. Its fire funds of all descriptions will stand at £1,285,821, and its life funds at the figure already mentioned.

ROYAL EXCHANGE ASSURANCE.

This old company which dates from 1720 now carries on seven different branches of business and seems to do well with them most years. In the ordinary life department the nett new premium income last year was £27,722 and the total premium income £270,658 or £8,809 more than in 1906. Interest, &c., on investments came to £112,986 more representing £4 0s. 8d. per cent. gross on the life funds and £3 16s. 7d. per cent. nett after paying income-tax. From all sources the life branch income showed an increase of £12,535 and after claims and expenses and commissions had been deducted, the latter representing 13.45 per cent. of the premium income, the life funds were increased at the end of the year by £146,941 to £2,932,113. In the annuity department £60,827 of capital was received against £60,005 of annuities sold. There was also a small revenue from the sinking fund policies account, but the next important branch is the fire department, where the nett premium income came to £745,955 or £72,375 more than in 1906. Losses took 52.65 per cent. of this and commission and expenses together 34.07 per cent., leaving with the £2,375 of interest and dividends received in this department, a balance of £95,486 to carry to profit and loss. In the marine department the outcome was much less pleasant, for after meeting all past losses and providing for unexpired risks, the debit balance at the year's end was £14,101, bringing down the marine fund to £157,804. A large revenue of £164,753 was received in the accident department, being an increase of £21,123. Claims took 59.53 per cent. of this income and expenses and commissions 34.96 per cent., but there was still £11,646 left to be added to the accident fund raising it to £57,201. Leaving out the trustee and executor department, where a promising beginning has been made, last year's business having yielded £556 of profit, we come to the profit and loss account for the whole business, which shows a credit balance of £198,468 at the end of the year, and the total amount of the company's assets is now £5,178,926.

LONDON AND THAMES HAVEN OIL WHARVES, LIMITED.

Last year was again a prosperous one for this company and its gross revenue shows an increase of £4,020 at £26,720. An additional £889 was also brought forward at £1,743 so that the entire income came to £4,909 more at £28,464. After meeting all charges and writing off £2,148 or £191 more for depreciation besides adding £1,998 more at £3,498 to the reserve fund, making it £10,000, and paying debenture interest the balance over was sufficient to enable the directors to repeat the 8 per cent. dividend for the year, 2½ per cent. of it having been paid six

months ago, leaving 5½ per cent. to be paid now. A year ago the company owed £10,000 on short advances, but within twelve months its paid-up capital has been increased by £17,718 to £114,118 with another £5,882 to come in, so that the position of the balance-sheet is now comfortable enough, although current liabilities represented by creditors and credit balances show an increase of £2,575 at £9,291, debtors and debtor balances being, on the other hand, £2,460 down at £7,711. Cash of all kinds, however, is £3,159 up at £7,382.

JOHN BARKER AND CO., LIMITED.

The acquisition of the business of Ponting Brothers in April last appears to have been a good move as the gross profits for the year ended February 19 amounted to £241,511 or an increase of no less than £33,584 compared with an advance of £11,117 in the preceding twelve months. Most of the improvement, however, was absorbed by working expenses, which rose by £32,321 to £156,730, and after writing off an extra £990 at £7,730 for depreciation the nett profits were only £273 better at £77,051. Adding £11,049 from the previous account the disposable balance was £88,100 compared with £83,166, so the directors are able to repeat the dividends of 12½ per cent. on the ordinary shares and £2 10s. 2½d. on the management shares, but as they transfer £5,000 to reserve the sum carried out is reduced to £8,103. Property account has been increased by £162,713 to £892,795 in consequence of the purchase of Ponting's business, and fixtures and fittings, probably from the same cause, have risen by £22,631 to £102,504, while horses, vans, &c., stand at £14,130 and departmental utensils and plant at £13,876. Against these the general reserve now amounts to £121,068, the reserve created by revaluations of properties is £34,929 higher at £91,639, and there are also sundry redemption funds aggregating £13,030. Trade debtors come to £132,593 and exceed creditors by £21,406, stocks have risen by £21,740 to £194,448, and cash comes to £29,942, but against the last item £45,000 has been borrowed from the bankers.

ROSS, LIMITED.

In 1907 this company's gross trading profit shows a falling off of £1,782 at £25,934, but the year seems to have been fairly prosperous in spite of the bad effects produced on the sale of photographic apparatus by the wet summer, particularly in the company's retail branches, and of the decrease in the number of Government contracts received during the year, losses in these directions having been nearly balanced by a substantial increase of business in one or two of the wholesale departments. The board therefore consider the year to have been in the circumstances "highly satisfactory" and the only difference in the distribution on the ordinary capital is a bonus of 2½ per cent. against one of 5 per cent. paid a year ago, the mere dividend being 10 per cent. for both years. In other words, the nett profit including £3,255 brought forward was £13,821 and after meeting all the dividends declared and the just mentioned bonus there is £3,572 left to carry forward. The company still has no reserve, but it is mentioned in the report that the expenditure on the new foundry and additional electric plant and machinery, &c., at the Clapham Works amounted to about £3,000 during the year, which was entirely met out of current funds. By and by, therefore, when the extensions of works are at an end the board will no doubt be able to write off the business purchase account £23,737 and to begin the formation of a substantial reserve.

WILLANS AND ROBINSON, LIMITED.

A rather better display is made by this company for the half-year ended December 31 last. It has been helped by the very severe writing down of capital which took place last year whereby £266,664 was written off the ordinary share capital as lost, leaving that capital at £66,666, upon which the directors feel themselves able to pay a dividend at the rate of 10 per cent. per annum, in spite of the fact that the Queen's Ferry branch of the business continues to yield a loss. As for the Rugby business it showed a profit of £22,946 after writing off £6,711 for depreciation, and as the loss on the Queen's Ferry business was only £3,128 after contributing to the debenture interest and to the directors' salaries, there was £19,818 left or including £2,708 brought forward £22,526 in all, out of which £1,750 was devoted half to meeting the interest on the funding certificates issued to the extent of 10s. in the pound in liquidation of the arrears of preference share dividend and half to redeem some of such certificates. After meeting the preference dividend and the funding certificates charge as well as paying the dividend on the ordinary shares £7,443 remains to be carried forward, and the position of the balance-sheet as far as one can judge seems to be by comparison comfortable, although the cash in hand amounts to only £13,795 and although investments and cash under debenture trust deed on account of the fire insurance fund amounting to £28,984 are entered "at cost." The directors state that there was an increased output at Queen's Ferry with better profits from the steel works, and that the exhibit would have been more favourable but for certain failures in the motor trade which necessitated a reservation of a proportion of the Queen's Ferry earnings to meet bad debts. The same cause also led to losses at Rugby, but there the proportion of the motor-car business to the whole is very much less than at Queen's Ferry. Various changes are taking place in the directorate, Sir Gilbert Clayton East having decided to retire. His place on the board is taken by Mr. G. F. L. Clayton East, the present manager at Queen's Ferry, but he gets no increased remuneration, and another director, Mr. Lazenby, means in any case to retire in a year's time, but will go now provided half a year's salary of £600 is paid to him. The directors intimate their readiness to accept this offer, which will save £600 for the coming twelve months, and £1,200 per annum afterwards, as they have no intention of filling up the vacancy. Gross profit from manufacturing, it may be said, came to £43,342 and the income from interest on investments, royalties and transfer fees, &c., gave another £1,731. Directors' fees took £3,438 for the half-year, but the board really constitutes the active management of the business.

BARRY, OSTLERE, AND SHEPHERD, LIMITED.

We do not seem to have received a copy of this important linoleum manufacturing company's report for the previous year and must therefore confine our notice to a summary of the figures for the year ended January 31 last. The report states that the volume of trade was satisfactory, but that the high prices of raw material affected the trading results which although considerably better than for the previous year yet were less than they might have been, because it was found impossible to make normal profits on the lower classes of goods. Moreover, the advance in the price of the company's products only took place towards the end of March last year and large quantities of goods then on order had to be delivered at the old prices. Nevertheless the gross proceeds of sales of floorcloth and linoleum for the year together with miscellaneous receipts and stock at January 31, 1908, are entered at £872,679. Deducting the stock in trade this would give a total sale of £277,376 against which working charges of all kinds took £204,443. Bad and doubtful debts cost only £845, but £20,622 was applied to depreciation including cost of upkeep and repairs. Interest on debentures absorbed another £10,629, so that the nett profit for the year was £40,830, or including £2,057 brought forward £42,887 in all. Out of this the 6 per cent. preference dividend was paid and £5,251 set aside to the special reserve fund for the preference shares. Out of the balance a dividend at the rate of 2½ per cent. tax free is declared on the ordinary shares, leaving £2,037 to be carried forward. The balance-sheet foots up at £1,448,461 and beyond the issued share capital of £350,000 the principal entries on the liabilities side are £252,860 due on two issues of debentures, £26,460 on bills payable and £153,754 to sundry creditors. The premium account for the preference shares stands at £25,000 and the special reserve for these shares at £39,750. Property and works in various parts of Scotland are entered among the assets at £210,819, and machinery, working plant, and stock of raw and finished materials at £736,475. The company has also £276,674 to receive from sundry debtors and has £60,075 invested in La Compagnie Rouennaise de Linoleum, that being the cost price, while the amount paid in shares to shareholders and cost of redemption of rights of managing directors in profits of the old companies has been written down by £23,000 in all to £163,214. Cash in hand stands at £102 11s. 7d., but then in Scotland nobody seems to want any cash.

CINCINNATI BREWERIES, LIMITED.

After a year or two of moderate prosperity this company's business has dropped back rather sharply and sales for the year ended December 31 showed a shrinkage of 1,240 barrels at 81,355. Gross profits were correspondingly reduced by £5,581 to £30,318 and although management expenses in America and London were £838 lower at £4,458 a little more at £9,624 was written off for depreciation and after providing £3,864 for repairs and meeting other charges the nett profits were £11,587 or £5,162 less. Interest on the prior lien bonds only required £51, but £9,300 is charged for debenture interest, so that the surplus available for the reduction of the debit balance brought forward was £2,236 against £7,055 and leaves £22,572 still to be wiped out. No attempt has yet been made to straighten out the company's position, and the balance-sheet continues to be disfigured by items representing assets which have long since vanished. Real estate, buildings, machinery, and cooperage at the Crescent Brewery, for instance, stand at £58,964, a sum which must be very far in excess of the real worth after so many years of idleness, and in addition £17,881 is carried in suspense for loss on realisation, &c., in connection with the closing of that property. Goodwill represents £157,689 or considerably more than the ordinary share capital and the valuation of the Jung Brewery has again risen on balance by £661 to £144,413. Investments in local companies are £642 up at £5,248 and saloon properties show an increase of £6,108 at £15,181, but stocks are only a trifle higher at £22,479. A decrease of £8,130 to £20,006 has taken place in sundry debtors and the directors have proportionately reduced the reserve for bad and doubtful debts by £5,393 to £7,575. Cash is £1,242 higher at £26,858 and on the other hand sundry creditors are surprisingly moderate at £4,943. Another £9,300, however, has been added to the liability on deferred interest warrants, bringing the total up to £79,050, and the longer matters are allowed to drift in this fashion the harder will be the directors' task when they make up their minds to the inevitable and set about reorganising the financial condition.

M. B. FOSTER AND SONS, LIMITED

We have at last got hold of the report of this company for 1907 and it certainly bears out the strictures of disappointed shareholders. Yet there is still a business here and could it be cleared of excrescences it might be made again to yield a fair profit, but there will obviously have to be a severe reduction in the capital of £240,000 for there is no business to be got nowadays sufficient to provide dividends on any such sum. Competition is too vicious. For the past year, after providing for bad and doubtful debts, depreciation of leases, plant, machinery, horses, &c., the profit is brought out at £974, but it was really only £540, because the larger sum included £430 brought forward and depreciation does not seem to have been allowed on a liberal scale for the amount added to the

cost of plant, horses, vans, barges, &c., £1,022, almost exactly balances the allowance for depreciation, and the nett depreciation provided against leasehold premises, &c., was only about £583 on a total of £19,684, that is to say this total is brought down to £19,099. The board, however, has been closing up the cigar department and £1,451 realised loss on that painful operation was deducted before bringing out the profit balance together with £1,003 written off against advances made to carry on Ray and Son, Limited. Making allowance for these deductions the year's working showed an improvement of £1,999. The company, by the way, has £23,297 in all invested in this Ray and Son, Limited, business and we should judge that the whole of this amount will have to be written off as loss. It also has £40,000 in the ordinary shares of Benskin's Watford Brewery and £1,000 in the Speyburn Glenlivet Distillery Co., the total of these investments being £64,312. Sundry debtors, trade loans and outstandings amount to £35,260 and the company owes £26,303 to sundry creditors. It, however, possesses a reserve fund of £2,000. Cash and bills receivable amount to £20,900, so that there is a considerable business if it could be trimmed and brought under proper control.

SCHWEPPES, LIMITED.

Unfavourable as last year was to the consumption of mineral waters this company seems to have done fairly well, its gross profits having amounted to £97,954 or £1,838 more than in the preceding year. General expenses, however, went up by £1,442 to £23,250, so that the real increase in the working profit was only £396. Transfer fees, however, gave £158 and altogether the amount available for distribution was £74,862 before deducting £900 for directors' fees, £525 for the fees of trustees for the debenture holders, and £200 for auditors' fees, together with £2,380 for income-tax over and above the amount so deducted on debenture stock interest and on dividends paid. The debenture stock interest itself took £16,214 and the final nett profit left was thus brought down to £54,642, a sum brought up to £63,183 by the balance of £8,541 brought forward. From this £8,000 is placed to reserve and dividends on the preference and ordinary shares paid, the ordinary getting 7 per cent. for the year while again 4 per cent. is distributed on the deferred shares, leaving £6,783 or £1,758 less to carry forward. The meagre report states that due allowances for depreciation of plant and premises have been made, but there is no trace of this in the accounts, and the company owes £8,000 to its bankers, while its debt to sundry creditors has risen by £13,136 to £51,244. Its reserve, moreover, is only entered at £64,000, which is but a minute amount to set against a balance-sheet total of £1,514,000. Moreover purchases of business, trade marks, plant, machinery, &c., horses, carts and harness, all entered in one sum of £1,273,248, shows an increase of £3,954 on the previous year and stocks have gone up by £10,368 to £107,036. Sundry debtors, too, owe the company £2,530 more at £116,331 and the increase in cash is only £796 at £7,218. The company has invested £10,239 in the debentures of the Air-Tight Sealing Development Syndicate, Limited, that sum including interest paid and advances as per balance-sheet of December 31, 1906. It possesses in the same syndicate 5,600 fully-paid £1 shares which are not entered in the balance-sheet. The total amount of 4½ per cent. debenture stock redeemed and cancelled to date is only £6,918, so that £93,082 is outstanding and the total debenture debt exclusive of £2,563 of accrued interest was on December 31 last, £393,082.

VAL DE TRAVERS ASPHALTE PAVING CO., LIMITED.

Profits on works executed, materials sold, &c., during 1907 showed a further shrinkage of £8,291 at £32,086, but the balance brought forward was £997 larger at £6,195 and the income from interest and transfer fees was again better at £3,967, making the total revenue £42,248 compared with £49,160. On the other hand general charges were cut down by £534 to £7,067 and by reducing the provision for depreciation, &c., by £3,289 to £7,204 and ignoring the ordinary reserve the nett profits were brought out at £27,977 or only £2,089 less. Of this £1,000 was transferred to maintenance reserve and after meeting debenture interest and paying £593 against £1,271 for income-tax £19,484 was left out of which dividends aggregating 7½ per cent. or the same as a year ago are paid and £4,784 or £1,411 less is carried forward. Outlay on the mining properties was only £78, making a total of £155,761, but there is a new item of £15,000 for a renewal of the concession from the Neuchatel Co., making a total of £170,761 against which the reserves of various kinds aggregate £46,841 or an increase of £1,174. Buildings have been reduced by £2,834 to £38,814 and plant and machinery by £1,530 to £17,837. Creditors are much about the same at £13,781, while debtors have risen by £2,928 to £48,955, works in progress come to £957 more at £3,775 and stocks are £1,662 higher at £41,163. Cash and bills, however, have dropped by £4,064 to £7,181, investments have been reduced by £8,132 to £77,260 and the Cie. Générale des Asphaltes liquidation account is again slightly lower at £9,621.

SOUTH LONDON ELECTRIC SUPPLY CO., LIMITED AND REDUCED.

Although this company now includes the words "and Reduced" in its title the change was only confirmed by the Court during the past month, and the readjustment of the capital accounts therefore does not appear in the balance-sheet under review. The termination of the contract with the L.C.C. Tramways continued to affect the figures for the year ended December 31, and the sales of current showed a decrease of 3,597,738 units at 2,661,454 units. This reduction, however, was due entirely to the above-mentioned cause, as ordinary consumers took 551,641 units more than in 1906 and the revenue from that source improved by £4,000, so that in reality the company made considerable headway. Gross income was £16,712 down at £33,992, but a substantial reduction was effected in expenses and the decrease in nett revenue was only £2,837 at £15,800. Balance brought forward was £5,236 smaller at £3,806 and interest receipts dropped to a trifle of £37, making a total of £19,643 against £27,978, but nothing is written off cost of provisional order compared with £4,400 a year ago, and the allowance of £930 for depreciation of plant on hire, &c., is not repeated. The directors, too, put £5,000 less at £1,000 to depreciation fund and in this and other ways bring out an available surplus of £15,479 or £1,923 more, which they promptly appropriate, together with £1,327 of the sum brought in to raise the dividend from 3 per cent. to 4, leaving £2,479 to be carried forward. In addition to the contribution from revenue the depreciation fund was credited with £2,699 for balance of value of building acquired over purchase price and sale of plant and after charging £1,828 for renewals of plant this fund stands at £25,475. Expenditure on the property was £13,559, but there is now a debit of £52,271 on capital account as the £50,000 debentures paid off on April 1, 1907, have not yet been reissued owing to the state of the money market. The postponement of this operation has necessitated borrowing £64,000 from the bankers, and an increase of £2,127 to £6,284 in the liabilities for plant, &c., but other creditors have been reduced by £1,037 to £1,120. Cost of the provisional order remains at £29,289.

MINOR NOTICES OF COMPANY REPORTS.

Augusta Tea Estates.—A decided change for the better took place in this company's fortunes last year, as not only was the crop of 137,862 lbs. larger by 18,108 lbs., but the average price improved from 5.71d. to 7.16d. Profits, therefore, rose by £703 to £1,024, and after wiping out the debit balance brought forward the directors are able not only to pay arrears of preference dividend for 1905-6, but to wipe out the expenditure of £111 on rubber and still have £56 in hand. Estates are still valued at £12,337, but the cost of factory, &c., has been reduced by £163 to £1,900. Creditors are down to £70, but the company has nothing in the shape of liquid assets beyond £130 of coast advances outstanding.

Bergvik.—Including £8,335 or £2,565 more brought forward, the nett profits of the Swedish undertaking for 1907 increased by £14,592 to £49,927, out of which £30,500 is handed over to this company as dividend and £19,427 is carried forward. The revenue from interest and commissions was £526 smaller at £23,810, making a total income of £54,310 compared with £51,336, and after meeting all charges the nett profits with £971 brought forward were £4,132 higher at £40,607. Out of this the preferred dividend takes £8,752 and the deferred shares receive 15 per cent. or 3 per cent. more for the year, leaving £603 to be carried forward. Nothing is added to reserve which remains at £8,631, but the debenture redemption fund is increased by £9,600 to £91,800, making the total accumulations £99,431 against a capital outlay of £461,400. Sundry creditors are £38,082 lower at £227,072, while debtors have been reduced by £16,053 to £536,067 and cash and bills come to £16,671.

City of Glasgow Life Assurance Company.—In 1907 the nett new premium income was £15,448 exclusive of £2,384 received as single premiums, and the entire premium income amounted to £230,005, while the revenue from interest, dividends, &c., amounted to £116,916. Expenses and commissions took about 16 per cent. of the nett premium income, claims having absorbed altogether, including endowment assurances, about £201,000. A compound reversionary bonus of £1 1s. has been declared for the year, and the proprietors get their dividend made up to 4s. 3d. per share. At the end of the year the funds were about £77,000 up at £2,959,710.

Constantinople Land and Building Co., Limited.—Gross receipts from rents for the year ended December 31 were £5,224 and the nett revenue amounted to £2,876, of which interest on loan took £2,748 leaving £128 to be deducted from the debit balance of £14,776 brought forward. With a paid-up capital of £25,000 the company has borrowed £70,413 and against this it owns lands and buildings valued at £81,713, on which, however, no depreciation would appear to have been allowed. Trading balances are decidedly adverse, £1,626 being due to creditors and for rents received in advance, while debtors owe no more than £216 and cash comes to £395.

Electric Lighting and Traction Company of Australia.—This company's undertaking in Melbourne continues to expand in a fairly satisfactory way, and during the year ended August 31 produced a gross profit of £14,200 or £3,688 more. The Geelong system also improved by £385 to £2,064, but the dividend on the Adelaide Electric Supply Company's shares held was the same at £3,028, and miscellaneous receipts dropped by £534 to £359, so that the total gain amounted to £3,539 at £19,741. London office expenses absorbed £1,971 and debenture and other interest was heavier at £13,862, leaving a balance of £4,409 against £1,185, out of which £4,000 is transferred to reserve, and the sum carried forward is increased to £1,594. Expenditure on the Melbourne property now amounts to £267,711, and on the Geelong property to £54,566, on which no depreciation has been allowed, while the reserve only comes to £14,627, and even this figure the auditors seem doubtful about, as they say it is subject to the 25,500 £5 ordinary shares in the Adelaide company being realisable at par. The company has borrowed another £17,500, making its indebtedness on loans £120,000, and

owes £11,171 to sundry creditors against £18,389 due from debtors and £2,041 in cash.

English and Scottish Law Life Assurance Association.—In 1907 the nett new premium income was £20,121 including £3,365 in single premiums and the total premium income was £1,688 up at £231,553. Claims came to £188,738 or £21,238 less than expectation, and policies were surrendered or otherwise determined and bonuses commuted to a further amount of £300,024. Since it was founded the association has paid £5,577,595 in claims, and at the end of the year its funds were increased by £73,430 to £2,435,328. Interest and other income amounted to £115,670 or an average of £3 19s. 6d. per cent. after deducting income-tax. Sales of annuities brought in £17,392 in capital and expenses of management came to about 17.57 per cent. of the premium income.

Greenock and Port Glasgow Tramways.—Receipts for 1907 at £34,358, including £941 sundries, show a decrease of £640, but a reduction of £817 in expenditure left nett profits £177 higher at £8,766. Sinking fund allocation is £1,780, making that item £11,391, of which £7,052 is invested or represented by premiums on policies. After providing preference dividend, 3 per cent. is paid on the ordinary shares and £173 carried forward as against £136 brought in. During the year £517 was spent on electrical reconstruction, making a total of £193,641, and the cost of undertaking is now £237,656 against capital £232,500. Creditors at £3,382 exceed debtors by £2,108, but cash amounts to £8,095. Renewals and depreciation account is down £453 on the year to £2,707. Passengers carried decreased by 131,198, but with a small reduction in average working expenditure per passenger the proportion of expenses came down from 61.11 to 59.4. The lower takings are accounted for by the decline in the shipbuilding trade.

J. R. Roberts' Stores.—None of the original directors of this Andre-Mendel promotion now remain to guide its destinies. They disappeared one by one as is the habit nowadays when matters take a bad turn. Happily the departure of most of them need not cause lamentation. Sir A. J. Newton hung on a bit longer than some of the others, but he went when things got desperate. We do not envy the task of the present board, who came into such a legacy of mismanagement, but they are fighting heroically and making the best of a bad business. They have added to the company's financial strength during the year to February 14 last, and while the recovery brought about under the present management has been retarded a little the causes are thought to be quite temporary. Moreover, extra expense was entailed in the improvement of some of the outlying premises, and this together with the regular allowance against leases, fixtures, fittings, &c., has been charged against profits. Gross trading profit was £33,212 and transfer fees, rents, &c., amounted to £585, a total of £33,797. General working outlay was £25,693 and other charges come to £3,043, so that £5,060 remains. It provides the debenture interest and leaves £60 to go in reduction of the debit brought forward bringing it down to £6,336. Property account stands in the balance-sheet at £253,981, and there is a lease sinking fund of £4,788 invested in Bank of England stock. Debtors and cash well exceed £10,000, and only £5,179 is owing to sundry creditors, while stock-in-trade is valued at £31,579. There is a suspense account of £782 which we suppose must be written off presently.

Kandapolla Tea Company.—This company has 1,343 acres planted of which 1,295 are in bearing and produced last year 649,935 lbs. or an increase of 52,171 lbs. over 1906. Cost of production was 0.75 cents heavier at 31.86 cents, but the average realised was 2.69 cents better at 48.61 cents, and nett profits, including interest, &c., amounted to £7,376. Deducting home charges, debenture interest and £250 written off machinery, the balance available, with £2,288 brought in, was £7,613, out of which 18 months' arrears of preference dividend to December 31, 1906, have been paid and £1,979 is carried forward. Block account stands at £90,350 or over £67 per planted acre, but this figure includes machinery as the items are not stated separately. Even so, however, it is heavy for the results obtained, and the company owing to misfortunes in the past does not seem to have been able to do much in the way of providing for depreciation, while its reserve is a tiny one of £227 only. Trading accounts are very much in the company's favour, £3,998 being due from sundry debtors against floating liabilities of £884, and cash comes to £840.

King's Lynn Docks and Railway.—Imports of grain, timber and seed and oil cake during the second half of 1907 fell off by 8,798 tons against an increase of 5,897 tons in miscellaneous goods, but exports, thanks mainly to a rise of 173,088 tons in coal, were 177,204 tons up and the revenue from rates improved by £4,126 to £15,620. Dock and railway dues were also better and the total income from all sources showed an improvement of £6,240 at £29,145, but outgoings took £17,096 or £2,929 more, chiefly owing to heavier traffic expenses. Nett income including £1,885 brought in and after providing for debenture interest was £5,046 better at £10,569 out of which the preference dividends are paid, together with 4½ per cent. for the year on the original and extension capital stocks and £177 is carried forward compared with £37 a year ago. Capital account shows a credit of £1,360 and against £3,185 due for interest and sundry creditors of £2,464 the company has £9,149 to come in from sundry debtors and £8,505 in cash.

Law Life Assurance Society.—Nett premium income for 1907 was £285,568 and £41,512 nett was received for annuities sold. Interest income amounted to £170,843, and £4,225 was netted as profit on reversions falling in. The interest yielded by the funds was at the rate of £4 4s. 2d. per cent., before deducting income-tax, and expenses of management and commission came to £11 19s. 9d. per cent. of the nett premium income. Claims came to £83,683 less than the expectation, and amounted to £270,110. At the end of the year the society's funds were increased by £6,737 to £5,334,322.

M. C. Thomson and Company.—This is a Glasgow business of sailcloth, linen and jute manufacturers which apparently has a large South African connection. Its nett profits for 1907 including an undisclosed amount brought forward were £14,859 of which income-tax and auditors' fees took £381 and preference dividend required £3,000 leaving £11,478 to be dealt with. Of this £9,000 is transferred to suspense bad debt account in respect of South African losses, £1,000 is written off shipping investments and £1,478 is carried forward subject to directors' and auditors' fees. With a paid-up capital of £120,000 the company has a reserve of £4,500 and a special reserve of £15,000. Its property account less bond and depreciation—a most unsatisfactory way of stating the item—is valued at no more than £5,615, but stocks and consignments are heavy at £124,261. Credit on a large scale seems to be necessary as sundry debtors owe £136,309 and liabilities to sundry creditors and on bills payable are correspondingly large at £154,522, but the company owns investments standing at £16,723 and has cash and bills in hand amounting to £23,807.

Metropolitan Railway of Constantinople.—An increase of 70,199 in the number of passengers carried during 1907 was accompanied by an improvement of £293 in revenue at £14,972. Miscellaneous receipts brought the total income up to £15,373 of which £6,120 was retained as nett profit, to which was added £1,023 balance of interest after transferring £1,837 to reserve. Including £163 from the previous account the disposable total, less the Turkish Government's percentage, was £7,214, out of which a dividend of 1⅛ per cent. is paid, £3,163 is put to reserve and £301 is carried forward. The agreement to sell the undertaking to the Société des Tramways de Constantinople for £95,000 in securities, when completed, will leave as this company's only asset the debt due by the Constantinople Land and Building Company in which the reserve of £69,000 is invested, and which will be realised when a convenient opportunity arises.

Owen Owen.—Gross profits for the year ended February 20 were slightly higher at £32,364. The almost equal amount of £10,765 is again written off premises, and after paying preference dividends the ordinary shares get 16 per cent., and the balance of 50 guineas is contributed to local poor boxes. The balance-sheet items show little alteration, and are satisfactory all round. Property amounts to £205,517, including goodwill £60,000. Stock is £52,621, cash £16,426 and investments £26,508. Book debts are a little up at £12,446 and creditors a little down at £10,241. Reserve is unchanged at £30,000 and leases renewal fund higher by the addition of £238 at £1,489.

Pearl Life Assurance Company.—This company does an ordinary and industrial business. The ordinary life branch gave a premium income of £243,755, and interest, dividends, &c., amounted to £43,946, and the industrial branch yielded a premium income of £1,391,249 and £76,530 in interest, dividends, &c. Taking the two branches together, in the general revenue account, we find the proportion of expenses and commissions to receipts about 41 per cent. and the total claims took £565,637 or 31.7 per cent. of the entire income. At the end of the year the accumulated funds were increased by £454,000 to £3,676,599.

Rothesay Tramways Company.—Total revenue for year amounted to £11,051, and nett profits are £1,086 after paying debenture and other interest and allowing £1,000 for depreciation and renewals reserve. Two per cent. is distributed on the ordinary shares, and £134 carried forward as against £325 brought in. There has been a decline of nearly 10 per cent. in the passengers carried, and expenses have risen from 53 to 55 per cent. of receipts. Capital account at £141,421 shows a debit of £74,546, of which £43,522 is provided for by bank overdraft secured on £47,000 debenture bonds, while £25,792 has been borrowed from the British Electric Traction Company. Floating liabilities are £3,409 against just £46 cash, £759 to come from debtors and £2,534 in stores and materials.

Southall Bros. and Barclay. Profits on trading for 1907 show an increase at £15,640, making with £3,657 brought in a total credit of £19,298. After providing for preference dividend and putting another £1,000 to reserve the ordinary shares get 11 per cent. as before and £4,297 goes forward. Balance-sheet items are land, buildings, &c., £56,391, plant, &c., £36,340, stock £33,228, goodwill, patents, &c., £56,449, temporary investments £5,773, cash £7,699, debtors £47,519 and creditors £34,259. Reserve with this year's allocation will total £12,174.

T. R. Roberts, Limited.—During 1906-7 the work of electrification of the Upper Street tramway track might have caused disturbance to this company's business, but the completion of the operations ought to have been followed by some recovery in the past twelve months. Unhappily this was not the case, and we begin to fear that Upper Street has lost some of its "tone" as a shopping thoroughfare. Profit balance for the year to February 22 was £10,986 of which £1,616 was laid out on repairs and renewals and £500 provided for depreciation leaving £8,870. Directors' and auditors' fees take the considerable amount of £1,205 and £400 each goes for redemption of leases and doubtful debts. Preference dividend comes to £4,500 and in order to pay 4 per cent. on the ordinary shares £566 is transferred from general reserve. A balance of £37 will then remain to the credit of the ordinary shareholders' fund. The company has acquired the freehold of one of its shops and capital account has been increased during the year to £130,669 after deducting the £500 written off fixtures and fittings. Total reserves are now £14,900 and there is a fair margin of liquid assets over liabilities. Stock is valued at £41,309.

DIVIDENDS ANNOUNCED.

RAILWAYS.

Bengal and North-Western.—For half-year of £3 10s. per cent. and a bonus of 10s. per cent., making £7 10s. per cent. for the year.

Rohilkund and Kumaon.—For last half-year of £3 per cent. and a bonus of 10s. per cent.

South Indian.—Out of surplus profits of £2 per cent., making with guaranteed interest £3 10s. for half-year.

Wellington and Manawatu.—4 per cent., payable 10th inst.

MINES.

Anaconda Copper.—50c. per share, payable 15th inst.

Champion Reef of India.—Interim of 2d. per share, payable May 1.

New Jagersfontein.—For half-year ending March 31 of 2s. 6d. per share on the preference shares.

Waihi.—A bonus of 3s. per share, payable June 1 at the same time as the usual quarterly, making 80 per cent. for the year, placing £10,000 to reserve, and carrying £22,000 forward.

Zeehan-Montana.—Interim of 1s. per share, payable April 2.

MISCELLANEOUS.

Alliance Assurance.—10s. per share out of the profits and accumulations at the close of 1907.

Benetfink and Co.—7½ per cent. per annum.

Bombay Gas.—Final of 3½ per cent., making a total of 6½ per cent. for the year.

Broomhill Collieries.—Interim at the rate of 10 per cent. per annum.

British and Australasian Trust and Loan.—1s. 3d. per share, making 5 per cent. for 1907, and a bonus of 1s. per share, payable May 1, placing £5,000 to reserve.

Consolidated Signal.—Interim for half-year ended Feb. 16 of 1s. per share on the ordinary shares.

Cuba Submarine Telegraph.—On the ordinary shares at the rate of 6 per cent. per annum for half-year ended Dec. 31.

Direct United States Cable.—Interim of 4s. per share for quarter ended March 31.

Hope Brothers.—Interim for half-year ended Feb. 29 on the ordinary shares at 4 per cent. per annum.

Imperial Continental Gas.—4 per cent. for half-year ended Dec. 31.

Mason and Barry.—For 12 months ended Dec. 31 of 6s. per share, carrying forward £26,601.

Maxim's.—Interim at the rate of 12 per cent. per annum for quarter ending March 31.

Oriental Telephone and Electric.—Final of 5 per cent. on the ordinary shares, making 8 per cent. for the year.

River Plate Gas.—Final for 1907 of 9s. per share, making 8 per cent. for the year, placing £20,000 to reserve and £2,052 to old age and pension fund.

Russian Bank for Foreign Trade.—For 1907 of 25 roubles per old share and of 12 roubles 50 cop. per new share.

Wilsons and Clyde Coal.—Interim dividend for half-year ended Feb. 29 of 6s. per share on the ordinary shares.

MINING RETURNS.

Broken Hill South Silver.—12,838 tons crude ore produced 2,091 tons concentrates, containg 1,526 tons lead and 41,820 ozs. silver.

Chinese Engineering.—Output of coal 28,000 tons; sales 28,500 tons; consumption, 1,375 tons.

Duff Development.—167 ozs.

Glynn's Lydenburg.—Crushed 2,555 tons, 625 ozs.; cyanide 1,728 tons, 658 ozs.; slimes 827 tons, 439 ozs.; total, 1,722 ozs.

Koffyfontein.—5,600 carats diamonds recovered: 293,000 loads blue ground on floors.

Komata Reefs.—Crushed 2,100 tons, bullion £3,027.

Lloyd Copper.—Treated 4,325 tons for 128 tons.

Mount Lyell.—Treated 32,232 tons. In addition 721 tons metal-bearing fluxes. Converters produced 675 tons blister copper containing:—Copper, 667 tons; silver, 51,541 ozs.; gold, 1,734 ozs.

Myalls and Peak Hill.—Treated 3,095 tons, 495 ozs.

New Vaal River Diamond.—Diamonds registered by diggers on Vaal River Estate £1,625.

North Broken Hill.—Treated 2,600 tons crude ore, assaying 15·8 per cent. lead and 6·5 ozs. silver per ton, producing 435 tons concentrates, containing 299 tons 1 cwt. lead and 8,700 ozs. silver.

"O.K." Copper.—Treated 646 tons crude ore, producing 43 tons fine copper.

Raub Australian Gold.—Bukit Koman: crushed 4,845 tons; 1,023 ozs. Bukit Malacca: crushed 2,398 tons, 200 ozs.; extra gold from clean-up of plates, 476 ozs.; from cyanide 209 ozs.; total, 1,908 ozs.

Roberts Victor Diamonds.—11,014 loads washed, producing 5,686½ carats, equal to 51.6 carats per 100 loads.

Scottish Gympie.—Crushed 3,200 tons, 1,050 ozs.

Sulphide Corporation.—15,946 tons ore milled, producing 2,967 tons lead concentrates, which assayed 33 ozs. silver and 62 per cent. lead per ton, with 5,122 tons zinc concentrates, assaying 17 ozs. silver, 13 per cent. lead, and 40 per cent. zinc per ton. In addition, 12,970 tons dump tailings treated, producing 4,768 tons zinc concentrates, assaying 15 ozs. silver, 11 per cent. lead, and 45 per cent. zinc per ton. 1,929 tons leady concentrates and 2,423 tons purchased ores were smelted, producing 1,569 tons lead bullion, containing 141,210 ozs. silver and 7,688 ozs. gold; also treated 304 tons zinc concentrates, producing 77 tons spelter.

Tasmania Gold.—Crushed 5,776 tons, 2,379 ozs.; 189 tons concentrates, 224 ozs.; 2,854 tons cyanide, 115 ozs.; total, 2,718 ozs.

Transvaal Gold Mining Estates.—Crushed 10,276 tons, 3,594 ozs.; central cyanide 4,479 tons, 1,475 ozs.; central slimes, 3,734 tons, 951 ozs.; Kameel's cyanide 1,360 tons, 315 ozs.; Kameel's slimes 703 tons, 192 ozs.; Elandsdrift 284 tons, 214 ozs.; total, 6,741 ozs.

Victoria Proprietary.—Crushed 1,434 tons, 393 ozs.

Voorspoed Diamond.—Washed 23,309 loads, producing 4,798 carats.

Waihi Grand Junction.—Treated 3,354 tons, yielding £4,357.

NEXT WEEK'S MEETINGS.

Monday, April 6.

Electric Lighting and Traction of Australia.—Finsbury Pavement House, noon.
General Accident, Fire and Life Assurance.—Perth, noon.
Pryce Jones.—Newtown, 11 a.m.
Schweppes.—Hotel Metropole, noon.
State Fire Insurance.—Liverpool, noon.

Tuesday, April 7.

Balaghât Gold Mining.—Cannon Street Hotel, 3 p.m.
Bank of Scotland.—Edinburgh, 12.30 p.m.
Bell Bros.—Middlesboro', noon.
British Electric Transformer.—Salisbury House, noon.
Cammell, Laird, and Co.—Sheffield, 2.30 p.m.
Cordova Central Railway.—Winchester House, noon.
Frederick Gorringe.—55, Buckingham Palace Road, S.W., 11 a.m.
Ionian Bank.—Palmerston House, 11 a.m.
Ooregum Gold Mining of India.—Cannon Street Hotel, 12.30 p.m.
Oroya-Brownhill.—Salisbury House, noon.
Paquin.—Cannon Street Hotel, noon.
South London Electric Supply.—Cannon Street Hotel, 3 p.m.
Uruguay Great Eastern Railway.—Salisbury House, noon.
Willans and Robinson.—Cannon Street Hotel, 2.30 p.m.

Wednesday, April 8.

British Borneo Exploration.—Cannon Street Hotel, noon.
Bucknall Steamship Lines.—Winchester House, 2.30 p.m.
Cincinnati Breweries.—Winchester House, 3 p.m.
Colonial Bank.—13, Bishopsgate Street Within, E.C., 2 p.m.
Delhi and London Bank.—123, Bishopsgate Street Within, E.C., noon.
Dharwar Reefs.—Cannon Street Hotel, 12.30 p.m.
Edinburgh Life Assurance.—Edinburgh, 2 p.m.
Globe and Phœnix Gold Mining.—Cannon Street Hotel, 12.30 p.m.
Golden Hope Rubber Estate.—London Chamber of Commerce, 12.15 p.m.
Groves and Whitnall.—Salford, 3 p.m.
Khedivial Mail Steamship and Graving Docks.—72, Bishopsgate Street Within, noon.
Mount Boppy Gold Mining.—Cannon Street Hotel, 12.30 p.m.
New England Breweries.—Winchester House, 3 p.m.
Pataling Rubber Estates.—London Chamber of Commerce, 11.30 a.m.
Royal Exchange Assurance.—Royal Exchange, noon.
South Mount Boppy Gold Mining.—Cannon Street Hotel, noon.
Val de Travers Asphalte Paving.—Great Eastern Hotel, 12.30 p.m.
Vryheid (Natal) Railway, Coal and Iron.—Winchester House, 12.30 p.m.

Thursday, April 9.

Anglo-Argentine Tramways.—Winchester House, noon.
Grand Trunk Railway of Canada.—Cannon Street Hotel, noon.
Rubber Estates of Johore.—London Chamber of Commerce, noon.
Stagg and Mantle.—Cannon Street Hotel, noon.
Thames Iron Works.—Cannon Street Hotel, 3 p.m.
Tilbury Contracting and Dredging (1906).—Cannon Street Hotel, noon.
Workington Brewery.—Workington, 12.30 p.m.

Friday, April 10.

Abbontiakoon (Wassau) Mines.—Cannon Street Hotel, noon.
Anantapur Gold Field.—6, Queen Street Place, E.C., 12.30 p.m.
Anglo-Siberian Company.—Winchester House, noon.
Bell's Asbestos.—Cannon Street Hotel, 2 p.m.
Ben Evans and Co.—Swansea, 11 a.m.
Demerara Railway.—Cannon Street Hotel, noon.
Effuenta (Wassau) Mines.—Cannon Street Hotel, 2.30 p.m.
John Barker and Company.—Kensington High Street, W., noon.
Nahalma Tea Estates.—39, Victoria Street, S.W., noon.
Rio de Janeiro City Improvement.—Winchester House, noon.
South Crofty.—Cannon Street Hotel, 2.30 p.m.

London and Westminster Bank.—Liabilities on Mar. 28, consisted of current accounts and deposits £26,132,719, acceptances and endorsements £1,165,772, and other liabilities, £1,145,761 against which there were cash in hand and at Bank of England £4,017,927, money at call and short notice £5,817,305, Imperial Government securities £3,885,000, bills discounted, loans, &c., £16,325,493, and other securities £1,432,756.

Parr's Bank.—Liabilities on current and deposit accounts, &c., on March 26 amounted to £26,850,967, and on drafts current, acceptances on behalf of customers, &c., to £2,993,675, against which cash in hand and at Bank of England stood at £4,314,910, money at call and short notice £6,124,718, Government and other first-class securities £3,464,720, bills of exchange £2,194,318, and loans and advances to customers £13,778,082.

TRADE AND PRODUCE.

Wheat.—Business during the week has been dull and uneventful, buyers for the most part having been indifferent, and only taking what they need for present use. Argentine shipments have been large, American cables depressing and Continental weather news chiefly of a bearish nature. English wheat also, which was in fair supply, dropped about 6d. per quarter in some instances, though the general tone for these wheats is steady. Supplies keep up to a fair average. Farmers' deliveries last week were 49,657 qrs. averaging 31s. 4d. against 49,202 qrs. averaging 26s. 8d. in the same week last year. Imports continue heavy, 640,873 qrs. being sent in last week against 381,030 in the same week of 1907, but the quantities of wheat and flour on passage are a little less, though still large at 4,225,000 qrs. to the United Kingdom and 2,805,000 to the Continent. American markets have been dull and bearish most days, with a moderate rise towards the end of the week on unfavourable crop news and predictions of light Argentine shipments. The visible supply shows a decrease of 1,036,000 bushels on last week.

Wool.—The second series of Colonial wool sales in London this year closed on Thursday, and Messrs. Jacomb, Son and Co. declare, in their notes on the sale, that "the series have been remarkably trying and harassing to every interest, and the market has been faced with one of the most sudden and severe reversals ever experienced. Heavy losses on the Continental and home importations from the colonial auctions, 'bear' raids on the futures markets for tops which set the ball rolling so fast that it could not be arrested, have combined to produce a collapse in all departments of the trade, engendering a want of confidence which has pervaded every department, and dealers are perplexed to know in what direction fashion is likely to follow whenever the long delayed orders are forthcoming." Superior merinos disclosed losses of from 7½ to 10 per cent., inferior descriptions from 15 to 20 per cent., fine crossbreds from 10 to 15 per cent., and some coarser grades fell as much as 20 to 25 per cent. under January levels. Out of the nett available total offered only 44,000 bales were taken by the Continent and 4,000 by America, while the quantity held over totals to 78,600 bales. The sales just at the close exhibited a slightly better feeling, and this improvement has had a beneficial effect upon Bradford and Leicester markets, where the worst is now regarded as over. Merinos are firmer, more business has been done, and crossbreds are generally 1d. up from their lowest point; but so far manufacturers' and spinners' businesses show little improvement, and orders are not coming in at all freely, neither is the export trade increasing.

Cotton (from our Manchester correspondent).—No change of any moment has transpired in our market since a week ago. The all-round demand for yarn and cloth has again been of a dragging character. Both spinners and manufacturers are being forced to sell at decidedly low rates, and orders secured have given very little satisfaction. There has been rather more doing in Liverpool in the raw material, and prices have been more firmly held. Interest in the raw cotton situation is almost entirely absent, but advices so far as they go point to healthy conditions for the new crop. In piece goods for export the all-round demand has again been disappointing. Our chief consuming markets have not been in the mood to purchase freely. A few more offers have come through for Bombay, but in many instances shippers have only been testing prices. Calcutta continues unsatisfactory, and exporters are waiting for more favourable advices from the other side. China is quieter than a few weeks ago, but it is understood that buyers are nursing orders. The Near Eastern markets have given a little support in goods of a miscellaneous character. Egypt, however, is very slow, and does not appear to have recovered from the financial trouble of some months ago. Not much is heard of the South American markets so far as actual business is concerned, but letters being received are of a rather more cheerful nature. In home trade cloths a miscellaneous business has been done, but buyers are not at all disposed to purchase large lines. Flannelette makers are rather pressing for fresh orders. Makers of fustians are nothing like so busy as some time back. Printing cloths as made in Burnley remain slow, and pressed for sale. Most kinds of heavy goods have dragged in demand. In home American yarns only a retail trade has transpired. Quotations have been a little more firmly held, but the position for spinners is gradually being undermined. Many firms have fair order lists, but particulars against old contracts cannot be obtained. There has not been much doing in export descriptions for any market. Bolton spinnings remain in slack demand, the turnover throughout the week being of quite unimportant dimensions. According to Sir Jacob Behrens and Sons' report American cotton has attracted more attention during the past few days; the tone is distinctly steadier, and with an improved demand both at home and abroad, prices show a slight advance on the week. Egyptian cotton is dull and irregular, and prices have lost $\frac{1}{16}$d. per lb. on the lower grades and ⅛d. per lb. on the better grades.

Coal.—The trade depression seems less generally felt in coals than in other industries, and reports are mostly of an optimistic character. In the North of England prices for steams and gas varieties have been put up, and seem likely to go higher. Welsh trade also is better, both in prices and quantity, an occasional upward movement in quotations having made buyers more eager to get their contracts put through before values go against them still further. Even house coals, which as a general rule become easier at the beginning of April, are likely to maintain their present prices throughout the month. Some concessions were made last week in regard to trawling companies' contracts in the Humber district, and consumers are holding out, thinking that they may get still better terms, but it is more than likely that the reverse will happen after Easter and once the Baltic season has commenced.

Copper.—Prices dropped steadily this week till Thursday, generally going in sympathy with the share market and New York quotations, influenced also by heavy selling orders. Thursday opening saw a sharp upward movement, but even so prices closed that day considerably below last week's at £59⅛ cash and £59¾ three months. This afternoon the market closed at 58¾-59 for cash and 59⅛-⅜ for three months.

Messrs. Henry R. Merton and Co., Limited, give the visible supply as 23,265 tons, against 23,505 tons on March 15. March supplies were 39,868 tons, and deliveries 37,376 tons, against 31,845 tons and 31,732 tons respectively for February. Stocks in England and France total 15,840 tons, against 14,473 tons on February 29. The Chili charters aggregate 4,400 tons.

Tin.—A sharp recovery in values occurred in the past two days, chiefly in sympathy with earlier cables, when prices were reported at £144¼ c.i.f. Here forward delivery rose to £144½ and cash to £145, but after that a reaction set in, bear sales were indulged in and values slipped back between £3 and £4. Yesterday's close showed an improvement again to £142½ cash and £141 three months, and to-night's closing prices were cash 145¼-¾ and three months 143½-144. Strauss and Co. give the visible supply as 15,755 tons against 15,247 tons a month ago. The quantities on the spot and landing amount to 5,427 tons against 5,189 tons at the end of February. Monthly deliveries in London were 1,231 tons and in Holland 1,114 tons, making an aggregate of 2,345 tons against 2,701 tons for February. The Straits shipments total 4,674 tons, of which 3,575 tons are for London, 469 tons for the United States, and 630 tons for the Continent.

Iron and Steel.—A less satisfactory feeling has prevailed this week. Cleveland pig-iron has only done a dull trade and prices are easier. Consumers will not buy heavily in such an uncertain market and are fairly well supplied for present requirements. Almost all the business done, says *The Engineer*, has been in the warrant market, and this owing to the disquieting reports from the United States and Germany, which speak of heavy increases in ironmasters' stocks of pig-iron, and warrant holders who were sticking firmly to prices last week are now anxious to sell as quickly as possible. East Coast hematites have been kept up chiefly by good exports, but West Coast trade has not even these to support it, and is more spiritless and inactive than ever. Steel transactions are also few and small and unimportant, and the outlook does not promise much improvement. Neither does it in the finished metals, and wages at works in North-East England have been reduced 2½ per cent., the first reduction since early in 1905.

Tea.—Rather less Indian was offered this week, 33,588 packages in all, and competition was again good, particularly for all useful descriptions. All teas above the commonest showed an advance of from ¼d. to ½d. per lb., and commonest also were slightly firmer. 32,158 packages were sold on garden account and averaged 7.96d.—the corresponding week last year being Easter. Ceylon importers brought forward 20,159 packages, and demand was good for all kinds, but more particularly, says Messrs. Gow, Wilson and Stanton, Limited, for good and fine qualities, which are in comparatively small supply. Common qualities also advanced about ½d. per lb., and the average for the week came to 7.78d. Java sales of 1,507 packages met with good competition at fully last week's rates.

Sugar.—Fluctuations in the market have been small this week except on Thursday, when May fell from 11s. 6¼d. to 11s. 3d., but recovered to 11s. 4½d. Mr. Czarnikow's circular announces that some further beet sales are reported to America at 11s. 9d. c. and f., equal to about 4.37½ cents for May-June shipment, whilst the quotation for April Cubans remains unchanged at 4.36 cents, and Javas for September arrival at 4.30 cents. Messrs. Willett and Gray believe that with a minimum crop of 1,000,000 tons in Cuba the quantity of beet required this summer is 200,000 tons, which, however, to us seems more than doubtful. Only part of it would be obtainable at a reasonable margin, and furthermore, a fortnight ago we showed that a Cuban crop of one million tons would not absolutely necessitate large beet imports if high prices attract outside sugar and meltings show a moderate reduction, provided, of course, that refiners are willing to work on low stocks. High prices will attract sugars even from the Philippines, where Eastern buyers seem inactive, but it is difficult to say anything about meltings, which, owing to the later Easter holidays, just now compare well and may not be so good in April. Cane sugar transactions over here have been somewhat checked by the frequent fluctuations in the speculative beet market, but offerings are on a small scale and holders are not disposed to reduce their limits. So far as can be seen the supplies of the higher refining grades during the next few months are not likely to be more than can be easily absorbed. Crystallised grocery descriptions are in a similar position owing to the more remunerative price paid for grey crystals. The New York market has been moderately active and values are fully maintained for near-at-hand sugars, but a hesitating disposition is perceptible so far as operations in more distant arrival are concerned. The continued unfavourable crop accounts from Cuba ought, later on, to induce further covering of future requirements, especially if consumption proceeds satisfactorily, which, judging from present meltings, is likely to be the case. The landings during the week in the three ports were 37,000 tons, while meltings amounted to 40,000 tons, leaving stocks at 207,000 tons.

COMPANY MEETINGS.

OCEAN ACCIDENT AND GUARANTEE

The thirty-seventh annual general meeting of the Ocean Accident and Guarantee Corporation, Limited, was held, on Tuesday, at the Institute of Chartered Accountants, E.C., Sir Thomas Hewitt, K.C., J.P. (Chairman of the Corporation), presiding.

The General Manager and Secretary (Mr. Richard J. Paull) having read the notice convening the meeting and the report of the auditors,

The Chairman said he was glad again to be able to congratulate the shareholders on the success of the corporation during the past year. The revenue account showed that the total income was £1,985,112, or an increase of £403,177, the premium income was £1,435,229, or an advance of £295,901, and the income from investments had grown from £38,989 to £45,400. On the other side the compensation paid, with additional expenses, had increased from £530,330 to £628,749, and the general provision for claims outstanding from £448,000 to £523,000. There was a general decrease on the expenses side of the revenue account from 90.15 per cent. to 86.77 per cent., or a nett decrease of 3.38 per cent., and the directors submitted that this indicated careful management. Passing to the balance-sheet, he stated that the general insurance fund was the life blood of the company, on which its stability stood, and this fund had increased from £931,000 to £1,105,646. The accumulated fund amounted to £1,651,412, and the trading profit worked out at nearly 10 per cent. on the premium income, including interest, or 6 1-3 per cent. without interest. The investments and other assets amounted to £1,894,494. All insurance companies, banking companies, and other institutions in the City had had for the last year or two to consider the value of their investments with grave anxiety, and he regretted that their own investments had also suffered a further depreciation since the last annual meeting. In lieu of writing down their investments, the company's practice had been to treat any depreciation as a temporary possibility, and the wisdom of this course was shown by the fact that, since the report and balance-sheet were drawn up, their investments and assets, though showing a great depreciation, had risen in value—he was informed—by over £10,000. Turning to the general result, he stated that their credit balance had risen from £554,814 to £739,689; on their old practice of setting aside 33 per cent. for liability on unexpired risks, £481,646 must be deducted, leaving an available revenue balance of £258,042, against £172,814 last year. The directors proposed to increase the interim dividend already paid of 7½ per cent. by a further dividend of 12½ per cent., making together 20 per cent., and also to declare a bonus of 5 per cent., making a total distribution for the year of 25 per cent. The balance remaining would amount to £217,119, out of which the directors had decided to add £44,000 to the investment reserve fund, this representing roughly the estimated decrease in value of the investments on the last day of the year 1907, though, as before stated, there was already sign of considerable improvement. It was proposed to add £5,000 to the staff provident fund. The amount required for the dividend and bonus would take £28,646, and the balance carried forward would be £168,119. In contemplating this last figure it might occur to individual shareholders unacquainted with the details of the business that undue provision was contemplated, but that was not the directros' opinion, and to intrench on the receipts to any great extent would, in the opinion of the board, be a false policy, and they could not meet the shareholders with satisfaction if, as a result, in some subsequent year, they had to intrench on the ordinary distribution for the purpose of putting back amounts for which insufficient provision had been made. He afterwards called attention to certain interesting features in connection with the various branches of the company's business, and stated that the magnitude of their operations was shown by the fact that they had to pay away daily no less than £2,000 in compensation. Sir Clarence Smith, in seconding the adoption of the report, observed that the chairman had referred to the large depreciation in the company's investments; and £40,000 was, of course, a large sum in itself, but he thought it was a very small amount compared with their investments of nearly £2,000,000. A short discussion followed, to which the Chairman replied, and the motion was then adopted.

DIMBULA VALLEY (CEYLON) TEA.

The twelfth annual general meeting of the Dimbula Valley (Ceylon) Tea Company, Limited, was held, on Monday, at 4, Lloyd's Avenue, Fenchurch Street, E.C., Mr. T. C. Owen (chairman and managing director) presiding.

The Secretary having read the notice convening the meeting and the auditors' report,

The Chairman said: The course of the tea market during the past season has been favourable to the industry as a whole. The statistical position has been very good, and it continues to be so, but the attention of the trade has been mostly directed to common teas, which have shown very satisfactory results during the last year. As a consequence, we have seen, as so often is the case, a somewhat smaller demand for fine teas and consequently rather lower prices. The result of this is shown by the fact that our prices for the past season were about ½d. lower than they were for 1906; on the other hand, we have got an increase of crop which is very satisfactory, whilst the cost of production for the year was slightly lower, the general result being that we have made a profit of about £1,000 less than that for 1906. The estates are in very good order indeed and the reports from the manager out there continue to be most satisfactory. Mr. Graham Sinclair, the manager, is coming home soon, and we hope to have the benefit of talking over matters with him and hearing what he has to say with regard to the estates. I was asked last year at the meeting whether there was any land on the up-country estates which could be opened in tea, and I remarked that I thought there was nothing of the kind. As a fact, however, we were able to make small extensions at Mousa Ella in some of the grass land which adjoins the estate, and these are coming on very well. We opened about 22 acres there. The Eladuwa estate continues to show the greatest promise, and reports which have come in to-day are most satisfactory as to the growth and prospects of this property. It is evident that we have an extremely valuable asset there and that our reserve fund, which has been invested in that property, has been placed to very great advantage. There has been a certain amount of disappointment in regard to the rubber market during the past few months, the market having fallen in price pretty considerably, but there have recently been signs of a reaction and we hope that when our rubber comes into bearing it will meet with a satisfactory market. There is one item in the accounts to which, perhaps, some shareholders may have directed their attention, and that is "Loss on rice," which we have for the first time charged in the profit and loss account. It is evident that we are likely in the future to have to face this item every year. There has been a considerable increase in the cost of rice, and it is impossible for us to charge the coolies more for it than we have hitherto been in the habit of doing. Therefore it is necessary for the estates to face this loss, which is, in our opinion, very much better than raising their wages, which is the alternative.

Mr. Keith F. Arbuthnot, in seconding the motion for the adoption of the report, said: I do not think there is very much for me to add except that we are paying our usual dividend of 8 per cent. which we have paid with great regularity, notwithstanding the fluctuations of the tea market. We are able to do so because we have always aimed, and I think I may say we can lay claim to having succeeded, at producing a really high-class tea which is always marketable at a fair profit, and although a rise of 1d. per lb. does not mean so much to us as it does to others who are working on a very small margin, still it is well to recollect that a fall of 1d. or even of 2d. would not in our case mean disaster. In fact, whether the price of common tea goes up or down the profit always remains steady in our case, and our dividends have never been less than 8 per cent.

Mr. Edward Edmund Eyre: When do you think the rubber will be ready to come into the market?

The Chairman: I hope we shall begin tapping in about a couple of years. The rubber is growing very well and is very promising indeed. There was a small acreage planted in 1904 which will be five years old next year, and it will be tappable the year after.

The resolution was then put to the meeting and carried unanimously.

LONDON AND THAMES HAVEN OIL WHARVES.

The tenth ordinary general meeting of the London and Thames Haven Oil Wharves, Limited, was held on Wednesday at The Baltic, St. Mary Axe, E.C., Mr. Owen Philipps, M.P. (the chairman), presiding.

The Secretary (Mr. T. Clarkson J. Burgess) having read the notice and the auditors' report,

The Chairman said: I think it may be of interest if I give you a few comparative figures which will enable you more readily to grasp the great developments that have taken place in your business since 1898. I shall refer more particularly to the Thames Haven property, because that, after all, is our principal asset and where the bulk of the business is done. This property in 1898 consisted of about twelve acres of freehold land. In 1907 your business had so grown that the wharf premises cover about 30 acres of ground. In addition to this, however, there is a large piece of freehold land—upwards of 45 acres—which we are hoping to make use of for a purpose which should be profitable to the company at no very distant date. To continue the comparison, in 1898 we had one deep-water pier, and the tonnage of vessels accommodated at that time was about 50,000 tons per year. In 1908 you have two deep-water piers, and the tonnage of vessels which these piers have to accommodate has risen to close on 250,000 tons per year. The growth of the company's tankage is perhaps more significant still, for whereas in 1898 we had tanks having a capacity of 13,000 tons, we now have tanks having a capacity of over 100,000 tons. In 1906 it was found necessary to undertake a rather larger expenditure than usual on tanks, &c., and the amount of expenditure under that scheme was practically completed at the end of the year under review. It was in view of the lengthy period of time over which these operations were spread that it was decided to deal with the matter of finance in 1906 by loan, and to postpone making an issue of shares until the conditions became more favourable. Of course, you will understand that it would not have done for us to have run the risk of an unsuccessful appeal, and we therefore made arrangements to issue the balance of our ordinary shares and got them underwritten. The expenses of the issue have been written off the amount standing to the credit of reserve. We have considered it wise to strengthen the company's

position by putting a somewhat larger amount out of the year's profits to reserve. In addition to this, we have, following our usual practice, written off depreciation with a liberal hand, and are able to recommend the payment of a dividend on the ordinary shares at the rate of 8 per cent. for the year, which is the same rate as we declared for the previous year. There is one other question which should be referred to, and that is the matter of debentures, which become payable on June 30 next. The directors are considering an offer which they have received relating to their surplus land at Thames Haven, which would have a particular and important bearing upon the question of debentures, but unfortunately time has not permitted of the matter progressing to that stage which will admit of my making a definite announcement to-day. Perhaps some of you may have noticed recently a renewal of the agitation to remove the restrictions now in force relating to the carriage of petroleum spirit in bulk on the River Thames. A lot has been said in many different ways which tends to show that the American interests claim to be hardly and unfairly used, and it is stated that, could they have their way, the price of petrol would be slightly reduced. I do not want to go into any of the argumentative points, but as chairman of your company it is only right that I should state to you, and I state it without fear of contradiction, that the American interests are under no disadvantage at all over and above any of our other clients. I can but hope that our good friends who represent the American interests will, in the interests of this port and of their own trade, not succeed in their campaign for enabling their huge vessels full of spirit to come through the tortuous ways of the River Thames and into the crowded business portions of the river, because it will only need very little for the authorities to step in and say, "We will not only revert to our old and safe regulations, but we will make others which will be stricter than before." At any rate, should these matters come to be dealt with by the authorities, it will be a consolation to you to know that, by virtue of the very large interests we represent, we shall continue to endeavour to make for safety, efficiency and economy. I am glad to be able to congratulate you on another successful year's trading, and to be able to say that the year 1908 has commenced well, and your business is in a thoroughly satisfactory condition.

Mr. Allan McCall seconded the motion.

GENERAL INVESTORS AND TRUSTEES.

The first ordinary general meeting of the shareholders of the General Investors and Trustees, Limited, was held on Thursday, at Winchester House, Old Broad Street, E.C., Mr. John Smith, C.B., chairman of the company, presiding.

The secretary (Mr James Davenport) having read the notice convening the meeting and the auditors' report,

The Chairman, in moving the adoption of the report, said that the whole of the £500,000 due on the first issue of the company's shares had been duly paid up, and the money had been invested or lent upon securities. The company took over stocks valued at £150,000 from Messrs B. Newgass and Co. under the original contract, as set out in the prospectus, and a great part of the securities which they had since acquired had been obtained through the same channel. Their connection with this firm had been of great advantage to them in several respects. As he announced at the statutory meeting, the company did not intend to seek their fortune in gilt-edged securities; they had aimed rather at the acquisition of undertakings, or an interest in undertakings, whose history and working they could trace, and which were essentially sound and progressive in character. They had acquired several valuable investments of this nature. They had been in the habit of lending a part of their surplus funds from time to time upon securities deposited by their financial agents, and then, after more detailed investigation and experience, acquiring such of these securities as they thought it desirable for the company to hold as investments. In that way they had not only got a good rate of interest on their funds from the moment the money came into their hands, but they had had time to consider the various properties in which they should hold a more or less permanent interest. They had a certain amount of securities which were not yielding any immediate return in the shape of interest or dividend. Some of these consisted of participations in syndicates and schemes which were not fully developed. This was a class of business which they thought it desirable to cultivate to a moderate extent, but they only engaged in syndicates of a high-class character and where they could get in at bed-rock prices. Such investments, if carefully selected, often proved more remunerative in the long run than investments in shares of companies which were paying large dividends. After a careful review of all the securities, the directors were satisfied that the capital of the company remained substantially intact. This result was due mainly to the able manner in which the company's affairs had been conducted by the managing director. In view of the fact that a large part of the capital had only been available for a portion of the year, the calls on the shares extending from January to July last he thought the shareholders would agree with him that a gross income of £27,299 and a net income of £22,978, after paying all expenses, was not a bad return upon the year's working. Out of this nett income they had paid £9,330 as a dividend at the rate of 4½ per cent. per annum on the preference shares up to December 31 last, and the directors now recommended the declaration of a dividend on the ordinary shares at the rate of 5 per cent. per annum, from the dates of payment of the amount called up to January 31 last. They might look forward to the future with confidence. Mr. J. S. Harmood-Banner, M.P., seconded the motion, which was adopted. At a subsequent extraordinary general meeting resolutions were passed to alter the articles in certain particulars. The Chairman stated that the first of the suggested alterations was the repeal of the provision which limited the investments in any one undertaking to 5 per cent. of the capital. He explained that the company had acquired two tramways or light railways in the North of Italy, which were worked in connection with each other, but as separate undertakings. It had been considered that it would greatly conduce to the efficiency and economy of their working if they could be combined, but the directors were advised that if the arrangement were carried out they would probably be violating the article. The second resolution would enable the directors to use any surplus profits which they might have in hand in the payment of dividends instead of being compelled to limit the latter to the profits earned in a particular year. Some of the shareholders expressed the opinion that a limit of some kind should be enforced in regard to the amount of money which could be placed in any single security, but accepted the chairman's assurance that the directors would consider the matter before the next annual meeting.

RHODESIA EXPLORATION AND DEVELOPMENT.

The ordinary general meeting of the Rhodesia Exploration and Development Co., Limited, was held on Thursday at Salisbury House, E.C., Dr. Hans Sauer presiding, in the absence of Mr. John Seear, who was engaged in a very heavy law case.

The Secretary (Mr. J. W. Clark) read the notice and the auditors' report.

The Chairman stated that the shares and debentures appeared in the balance-sheet at June 30 last at £303,401, against £400,837 a year previously, the reduction being accounted for, after adding the cost of different share interests acquired, calls paid, and transfers and adjustments from other accounts, by their writing off £147,176 for depreciation. No company similar to their own—or few, in fact, of any description—had escaped trouble in this direction. No particular item was responsible, the depreciation extending throughout the whole list. Referring to the profit and loss account, he remarked that the balance was on the right side to the extent of £11,609, which, added to the amount brought forward, gave a total of £15,606. On the other hand, the directors had had to deal with the depreciation, to meet which they had transferred £150,000 from reserve account to appropriation account, leaving £14,647 to be carried forward. The more cheerful outlook and the steady appreciation in the value of land, owing to the increasing demand for farming purposes, must ultimately have its effect upon the company's assets of that description. The agricultural outlook was decidedly brighter than it had been for many years, and a larger area was brought under cultivation every year. The influx of population into Rhodesia had resulted in an increase of about 2,000 people in 1907, who were not staying to any extent in the towns, but were settling on the land or engaging in mining. The maize crop had been particularly good throughout South Africa. Tobacco was being grown in increasing quantities in the Salisbury, Umtali, Gwelo, and Buluwayo districts with marked success; and cotton in certain districts was also meeting with success. Apart from the Antelope property and their several tributing operations, no mining work had been done by the company during the past year. The Chairman then referred to the operations of some of the subsidiary companies in which the company were interested, and expressed satisfaction at the position and prospects particularly of the Ayrshire, the Gaika, the Etna, the Jumbo, and the Eldorado mines. The company's principal and most interesting share interest was that in the Banket Company, in which they now held 36,687 shares. The Banket Company held 18-25th of the total issued capital in the Eldorado Company. Continuing, he observed that in the past year Rhodesia had shone out by comparison with other parts of South Africa as a spot where cheerfulness and confidence had prevailed. The royalty scale agreed to by the Chartered Company in 1904 had stimulated crushing on the smaller properties, mostly by tributors, so that the output had steadily increased. With regard to the present position of the Rhodesia Exploration Company, the liquid assets consisted of cash and shares sold, £21,500; gilt-edged stocks, £25,600; other realisable investments at present prices, £76,000; loans to subsidiary companies, £8,100; and loans on security and debtors, £17,000—making a total of £148,200. He had also picked out a number of their other securities which were not quoted on the market, and their minimum value he estimated at £183,200. In addition to these assets, they had their other shareholdings, their claims, farms, stands, buildings, and other interests. In spite of anything which had been said to the contrary, he was convinced that Rhodesia would prove to be one of the most valuable, successful, and richest of the colonies belonging to the British Empire. The gold-mining companies in Rhodesia actually working were in a very much sounder position to-day than they had ever been before, and, almost without exception, they were working at a profit instead of at a loss. The difficulties which had overshadowed mining affairs in South Africa seemed to be gradually disappearing, and in Rhodesia itself they could find opportunities for remunerative investment of capital under the improved conditions which were obtaining. He concluded by moving the adoption of the report, which was seconded by Mr. T. M. Thackthwaite, and carried unanimously.

LONDON AND WESTERN AUSTRALIAN EXPLORATION.

The annual general meeting of the shareholders of the London and Western Australian Exploration Company, Limited, was held on Monday, at Salisbury House, London Wall, E.C., Mr. C. Algernon Moreing (the managing director) presiding.

The Secretary (Mr. E. Pears) having read the notice convening the meeting and the auditors' report,

The Chairman said that during the past year the company, in common with all other financial concerns of its class in all parts of the world, had been suffering from acute depression. All securities had shrunk in value and speculative investments had become absolutely unsaleable. The company had also been under the disadvantage that, when undertakings in which they were heavily interested required further funds to reach a successful issue, the task of finding those funds had to a great extent fallen upon this company. At the present moment he did not see any very bright spots in their line of business. Comparing the lists of investments with those of a year ago, it would be found that they were practically unchanged, except that some very valuable interests had been added. Nevertheless, it had been thought necessary to make provision for depreciation to the extent of £100,000. In the balance-sheet the shares and debentures at book values, less provision for depreciation, stood at £168,956. A year before they were greater by nearly £100,000. It could not be said that that amount represented real depreciation, but the only sound course that could be followed was to show them at the price they would fetch under forced sale. The directors considered those interests of considerably greater value than at the beginning of the year under review. The new investments consisted of those in the Blythe River Iron Mines, the Great Fitzroy Copper Mines, the Broken Hill Proprietary Block 10, the Mount Cannindah Copper Mines and the Permar Investment (debenture stock) and an increase in the holding of the Zinc Corporation's preference shares. As far as the Zinc Corporation was concerned, they were large holders, and were satisfied as to the future. In common with other large holders, they had found it necessary to support the corporation in finding further moneys for the erection of the present mill. A large part of the depreciation referred to in the balance-sheet was due to this holding. There was every reason to believe, however, that the position of the corporation would improve. The following cablegram had been received that morning:—"Our assay of concentrates shipped, first 296 tons zinc 45.2 per cent., lead 7½ per cent., silver 13 ozs. 18 dwts. per ton." The plant had been erected to treat 500 tons per diem, and the 8 units were working at this rate. That being so, there was no reason why they should not work 100 units since all were independent. Having dealt with the position of the other investments of the company the Chairman went on to say: They had been extremely active during the year in looking for new business. Engineers in Queensland, Western Australia and Victoria had been examining properties, but none had been considered good enough to proceed with, especially in view of the present condition of affairs. The loss on investments of £13,904, shown in the accounts, represented shares in the Australian Commonwealth Trust. When that company was reconstructed some short time ago the directors decided not to go further, but as those shares cost nothing, there was no actual loss. The balance-sheet showed creditors amounting to £19,000, consisting of loans which they had been obliged to raise in order to support enterprises in which they were interested. He was sorry that the state of affairs was not more rosy than appeared from the balance-sheet, but he thought shareholders would give the board credit for having done the best they could in a disastrous year with a very troublous and speculative business. He trusted that during the coming year they would have brighter times, but he did not see any golden lining to the cloud showing at present, certainly so far as the financial position of the Stock Exchange and the markets went, but where he did see great hope was in the fact that the enterprises in which they were interested, after encountering extreme difficulties, were on the high road to prosperity. He moved the adoption of the report and accounts.

Mr. R. C. Ogilvie seconded the motion, which was carried unanimously.

The allotment list in respect of the recent issue of shares made by the General Accident Fire and Life Assurance Corporation, Limited, has been closed and allotment letters posted.

The directors of the Life Association of Scotland have appointed Mr. W. Robinson, who has for a number of years held the appointment of agency superintendent at the London Office, to be assistant secretary there in room of the late Mr. W. J. Price.

The sales of farm lands by the Hudson's Bay Company for the quarter ended March 31 amounted approximately to 1,100 acres for £2,500, as compared with 12,700 acres for £32,600, and sales of town lots to £15,800, as compared with £51,100 for the corresponding period of 1907. The receipts are £60,300, as against £86,800 in 1907. The sales of farm lands for the twelve months to March 31, 1908, are 21,100 acres for £54,900, and town lots were sold for £25,600, as compared with sales of farm lands 140,000 acres for £281,600 and town lots for £52,600 in the coresponding period ended March 31, 1907. The total receipts for the twelve months ended March 31, 1908, amount to £236,100, as compared with £328,700 for the twelve months ended March 31, 1907.

Deposits against future queries may be lodged with the Publisher.

Reekie.—No; you should let these bonds alone for the present. Events will probably make them cheaper by and by.

W. A.—(1) The company is in a weak position financially, and the shares are therefore speculative and not unlikely to go lower. (2) We think this is a better venture, although it may be some time yet before any turn for the better takes place.

Khe-el-Car.—We think the risk is only moderate. Although the company has not yet made sufficient provision for depreciation, the shares should be fairly safe.

W. P.—It is doubtful whether in the time given there will be any quick substantial advance. Still, you should get your price for the stock and perhaps a little more when you have to sell.

Ocean.—(1) Good to hold, although the terms of purchase and date of transfer considered, there is no scope for much rise in the price. (2) A go-ahead concern, which often takes large risks and whose business is essentially speculative. Still it does a great business, and the shares may be good to keep, although the price is quite high enough. (3) This has been doing better lately, and the extension should improve profits. You might keep for the present, but sell on any sharp advance. (4) These have been redeemed to the extent of nearly one-half, and you should not try to sell just now as the company may be able to go on paying off. (5) Deferred high enough in present circumstances. We think you should sell both that and the ordinary, but the preferred might be kept. (6) The outlook here also is none too reasurring, and the company has never been a fat investment. We think you should sell. (7) This is a better concern, and has been paying well of late years. The shares might be kept as the management is capable.

H. K.—Receipts are better, and the stock is now so low that it might be well to wait. A rise will come some day; sell when it does.

Schill, Seebohm and Co.—No revenue account is published, but the profit for 1907 is declared at £25,024, with a statement that increases are shown in turnover and profits gross and nett. A dividend of 3 per cent. is again distributed and £4,000 put to reserve, while the carry forward is increased from £165 to £3,614. This policy is pursued in view of the trade reaction that has set in all over the world. Items in the balance-sheet are lumped, and not very informative. Debtors, stock and goods abroad figure at the large sum of £484,252 against creditors and liability on bills negotiated £181,954. Bills and cash £28,304, building, machinery and fixtures abroad £5,072, shares in Schill, Pearson and Co. at par £49,900 and goodwill, trade marks, &c., £100,739. Against all this there is a reserve of £27,000 uninvested, of which only £7,000 has been appropriated from profits. Notice is given of doubling of an undefined figure in the articles of association.

William Owen, Limited.—This business faces Whiteleys, and is therefore in good company. Trading profit for the year to February 20 was £18,306 inclusive of £7 for transfer fees, and total charges, including debenture interest and depreciation of furniture, fittings, &c., came to £9,637, leaving £8,668 nett. That provides the preference dividend and gives 5 per cent. on the ordinary shares carrying forward £1,829 as against £1,660 brought in. The present is the fifth annual report, and the directors have not yet succeeded in commencing a reserve fund. Otherwise the position gives little cause for complaint. Stocks do not look excessive at £58,705, trading accounts are favourable and there is £9,378 in cash. Depreciation is on a fair scale.

A sub-branch of Mount Barker has been open at Cranbrook, Western Australia, by the Western Australian Bank

Branches of the Bank of Montreal have been opened at Grimsby, Ontario, and Gretna, Manitoba.

We are officially informed that Messrs. E. T. Hargraves, J. Barrington-White and H. Pullman retired from the board of Messrs. Ind, Coope & Co., Limited of Romford and Burton-on-Trent, on January 16, 1908.

Kuhn, Loeb, and Co. offer to purchase the April 1, 1908 coupons of 4 per cent. refunding gold mortgage bonds of the Metropolitan Street Railway Company of New York. The offer of the bankers is purely gratuitous, and is made in order that the bondholders may have full opportunity to investigate the present financial position of the railway company. In 1902 Kuhn, Loeb, and Co. brought out 11 millions of these bonds; at that time the bonds were considered of the very highest grade, and the issue was heavily over-subscribed and regarded highly by some of the most scrutinising investors and investing institutions. At that time the president of the company advised Kuhn, Loeb and Co. that the Metropolitan Railway was earning over all fixed charges nearly £700,000 per annum, whereas the interest on the new bonds called for a disbursement of but £90,000 per annum on conditions which seemed to make the interest safe beyond peradventure. The action of Kuhn Loeb and Co. in this matter is similar to the settlement in the matter of the default on January 1, 1908, coupons of the first consolidated mortgage bonds of the Third Avenue Railway Company.

THE REVENUE RETURNS.

I.—AN ACCOUNT OF THE TOTAL REVENUE OF THE UNITED KINGDOM, in the undermentioned periods of the Year ending March 31, 1908, as compared with the corresponding Periods of the preceding Year.

		£	68,432,691

TREASURY, 31st March, 1908.

EAGLE INSURANCE COMPANY.—In 1907 this company earned £20,386 nett in new premiums and received £41,286 for annuities sold, its total receipts including £101,648 from interest having been about £325,400. The interest income after deducting income-tax averaged £3 17s. 3d. per cent. on the total assets. Expenses of management were 17.4 per cent. of the premium income, and the total amount of funds at the end of the year, notwithstanding the large amount of capital received for annuities sold showed a decrease of £11,070 at £2,533,762, claims altogether having absorbed £193,782. The quinquennial valuation, made on the usual basis, undisclosed, brings out a surplus of £93,091, of which the directors distribute £88,431, £12,910 of it going to the shareholders and £75,521 to the policyholders, who receive bonuses according to a scale set forth in a table accompanying the report. The proprietors' portion is distributed over the next five years, and will provide together with the usual 5 per cent. dividend, £6 13s. 4d. per annum for that period.

ROYAL SARDINIAN RAILWAY.—Traffic receipts from the lines of the first and second period in 1907 amounted to lire 2,797,190, the Government allowance and kilometrical guarantee amounted to lire 6,500,534 and the total revenue, including the Iglesias-Monteponi line, was lire 138,237 up at lire 9,517,994. Expenses took lire 174,697 more at lire 2,432,780, partly owing to the cost of coal and materials, but chiefly to the new regulations of the staff, which came into force on January 1. Another lire 300,000 was charged for renewals, and after meeting the bond service and providing for taxes and other charges the nett profits were lire 1,928,621 against lire 2,005,850. The usual dividend of 5 per cent. and repayment of 250 drawn bonds absorbed lire 1,284,063, and a further dividend of 1½ per cent. is again paid on both drawn and undrawn bonds leaving lire 269,558 or lire 81,917 less to be added to the extraordinary reserve. With this addition the fund will amount to lire 2,001,186, while the ordinary reserve remains at lire 2,000,000, but the renewals fund has been reduced by lire 147,280 to lire 548,523.

This Prospectus has been filed with the Registrar of Joint Stock Companies.
The LIST OPENED on FRIDAY, the 3rd APRIL, 1908, and will CLOSE on or before TUESDAY, the 7th APRIL, 1908.

THE BUENOS AYRES AND PACIFIC RAILWAY COMPANY, LIMITED.

(Incorporated under the Companies Acts, 1862 to 1900.)

SHARE CAPITAL.

5 per cent. First Preference Stock, issued	£1,200,000
5 per cent. Second Preference Stock, issued	1,000,000
Ordinary Stock, issued	6,000,000
100,000 Ordinary Shares of £10 each, on which £7 per Share has been paid	1,000,000
	£9,200,000

DEBENTURE CAPITAL.

4 per cent. First Debenture Stock, issued	£2,925,000
4½ per cent. Second Debenture Stock, issued	2,075,000
5 per cent. Debenture Stock, issued	1,250,000
4½ per cent. Consolidated Debenture Stock, issued	2,000,000
	£8,250,000

ISSUE OF £1,000,000 FOUR-AND-A-HALF PER CENT. CONSOLIDATED DEBENTURE STOCK.

Secured by a Trust Deed reserving to the Company the right to create further Debenture Stock for £3,000,000, of which the present issue forms part, carrying interest at 4½ per cent. per annum and ranking *pari passu* with the £2,000,000 Consolidated Debenture Stock already issued, and a further amount at the rate of £4,000 per mile of additional line hereafter acquired by the Company or of new line for the time being constructed or in course of construction, or about to be constructed (including the extra track taken at £4,000 a mile where existing lines are doubled) in excess of the mileage belonging to the Company in operation on 28th May, 1907, and also for such a further amount as shall be sufficient to redeem prior issues at not exceeding the par value of the Stock for the time being redeemed, and any premium payable on redemption under the terms of the issue thereof.

At £99 per cent. payable as follows:—

£5	0	0 on Application.
30	0	0 on Allotment.
30	0	0 on 7th May, 1908.
34	0	0 on 9th June, 1908.
Total £99	0	0 per £100 Stock.

Bearer Scrip will be issued to be exchanged for Debenture Stock Certificates on and after 1st July, 1908, the Stock being transferable in amounts not involving a fraction of £1.

The interest is payable by warrant to the Registered Holders of the Stock on 1st January and 1st July in each year.

The first payment of Interest calculated upon the instalments as due will be made on 1st July, 1908, on presentation of Coupon attached to the Bearer Scrip.

Payment in full on Allotment and on the 7th May, 1908, can be made under discount at the rate of 4 per cent. per annum.

THE DIRECTORS OF THE BUENOS AYRES AND PACIFIC RAILWAY COMPANY, LIMITED, have authorised the London Joint Stock Bank, Limited, and Martin's Bank, Limited, as Bankers of the Company, to receive applications for £1,000,000 4½ per cent. Consolidated Debenture Stock of the Company, ranking *pari passu* with the existing issue of £2,000,000 as from 30th June, 1908.

The whole or any part of the Consolidated Debenture Stock is redeemable at any time at the Company's option after 30th June, 1920, at 110 per cent., on six calendar months' notice to the Stockholders. This Stock is secured by a charge upon the undertaking of the Company (subject to the First, Second, and Five per Cent. Debenture Stock), under Trust Deeds, dated 28th May, 1907, 11th October, 1907, and 1st April, 1908, made between the Company and the Trustees.

The Company owns and has in operation 945 miles of broad gauge (5 ft. 6 in.) railway in the Argentine Republic, extending westward from the City of Buenos Ayres to Villa Mercedes, the main line forming part of the system which is to connect the Atlantic and Pacific Seaboards of the South American Continent. Beyond the branch lines already opened to public traffic the Company has under construction or is about to construct additional branches of a length of about 418 miles, and has been authorised by Congress to construct a further branch about 180 miles in length from Alberdi to Sampacho, on the Andine Railway.

The Company also works the Bahia Blanca and North-Western Railway (618 miles now open) and the Villa Maria and Rufino Railway (141 miles). On the 1st July last the working of the Argentine Great Western and Argentine Transandine Railways (637 miles now open) was also taken over, and, by this means, the control of the whole trans-continental line from Buenos Ayres to Valparaiso, in so far as it is situated in Argentine territory, has been secured by this Company; and with the Bahia Blanca and North-Western Railway and its recently constructed extensions, this Company is in possession of through communication with the rapidly developing Port of Bahia Blanca.

The total length of the entire system now in operation is 2,341 miles.

The following table shows the continuous and substantial increase of the traffic results of the system controlled and worked by the Company since 1901:—

	1901–1902	1902–1903	1903–1904	1904–1905	1905–1906	1906–1907
	£	£	£	£	£	£
Gross receipts	584,267	718,001	959,306	1,263,636	1,618,365	2,074,591
Working expenses ..	304,467	347,407	533,083	719,111	882,404	1,199,842
Net receipts	279,800	370,594	426,223	544,525	735,961	874,749

After including the estimated gross receipts of the Argentine Great Western and Transandine Railways for the purpose of comparison in the 1906-7 figures, the estimated gross receipts from 1st July, 1907, to 28th March, 1908, show over the corresponding period of last year an increase of £372,895, which should be greatly augmented by the 30th June, 1908, as the General Manager reports that the traffic prospects are excellent this year. The wheat harvest has been the heaviest on record, and the maize crop will be more or less double that of last year. A large quantity of wheat has already been deposited in the stations, but thrashing is not yet concluded. The grape crop is also abundant, probably 20 per cent. over last year. The recent rains will permit of the ploughing of more virgin soil for wheat and linseed.

The Company has obtained exemption under the Mitre Law from National, Provincial, and Municipal Taxes until 1st January, 1947, and is entitled up to that date to import materials for railway construction and working free of duty. In return the Company has to pay the Government a percentage of its net receipts.

The large increase in the passenger traffic has rendered it necessary to purchase more coaching stock, whilst the opening up of new districts served by the Railway and the increased area of land under cultivation have necessitated the construction of additional stations and sidings and the purchase of further engines and rolling stock.

Past expenditure of Capital has been fully justified by results, as will be seen by the statement tabulated above. Dividends at the rate of 7 per cent. per annum have been paid on the ordinary Stock and Shares of the Company since the year 1902-1903. The annual Interest on the Company's Debenture Capital is £362,875, which will now be increased by £45,000.

The proceeds of the present issue will be applied towards the cost and equipment of branch lines, to the purchase of additional locomotives and rolling stock, and the general requirements of the Railway.

Applications on the form accompanying this Prospectus, together with the deposit of £5 per cent., should be forwarded to the London Joint Stock Bank, Limited, 5, Princes Street, London, E.C., or to Martin's Bank, Limited, 68, Lombard Street, London, E.C.

If no allotment is made the deposit will be returned without deduction. Should a smaller amount be allotted than applied for, the surplus paid on application will be appropriated towards the balance due on allotment. Non-payment of any instalment upon the due date will render the amount previously paid liable to forfeiture.

Application will in due course be made to obtain a Stock Exchange quotation for this Issue

Apart from the contracts made by the Company in the ordinary course of business, the following have been entered into within the two years immediately preceding the date hereof:—

Contracts dated 24th April, 1906, and made between the Company and the Villa Maria and Rufino Railway Company, Limited.

Contract dated 16th May, 1906, and made between the Company and the Bahia Blanca and North-Western Railway Company, Limited, and the South American Light and Power Company, Limited.

Contract entered into on the 29th May, 1906, between the Argentine Government and the Company for the construction of lines from Bunge to Buchardo; from Chacabuco to the Alberdi branch; and from Rawson to a point near O'Higgins.

Contract dated 4th December, 1906, and made between the Company and the Bahia Blanca and North-Western Railway Company, Limited.

Supplemental Trust Deed dated 12th December, 1906, and made between the Company and the Trustees for the 5 Per Cent. Debenture Stock securing £350,000 of such Stock.

Contracts dated 23rd April, 1907, and made between the Company and the Argentine Great Western Railway Company, Limited.

Trust Deeds dated 28th May, 1907, 11th October, 1907, and 1st April, 1908, and made between the Company and the Trustees for securing the 4½ per Cent. Consolidated Debenture Stock.

Contract dated 16th July, 1907, and made between the Company, the Argentine Great Western Railway Company, Limited, and the Argentine Transandine Railway Company, Limited.

Contracts made between the Company and Messrs. Sheppards, Pelly, Price and Pott, and dated respectively 30th May, 1907, 11th October, 1907, 28th November, 1907, and 1st April, 1908, for the underwriting of this and previous issues.

The above Contracts may be inspected at the Offices of the Solicitors on any day while the List remains open, between the hours of 11 and 4.

15,000 Deferred Shares of £20 each and 5,000 Second Preferred Shares of £20 each were allotted as fully paid in 1888, as part of the consideration for the construction of the Railway (subsequently converted into Second Preference and Ordinary Stock).

A Brokerage at the rate of quarter per cent. will be paid by the Company on allotments made to the public in respect of applications bearing a Broker's stamp.

Prospectuses and Forms of Application may be obtained at the Offices of the Company, Dashwood House, 9, New Broad Street, London, E.C.; of the Bankers; and of Messrs. Sheppards, Pelly, Price and Pott, the Brokers of the Company.

Registered Offices: Dashwood House, 9, New Broad Street, London, E.C.

FORM OF APPLICATION.

THE BUENOS AYRES AND PACIFIC RAILWAY CO., LTD.

ISSUE OF

£1,000,000 4½ PER CENT. CONSOLIDATED DEBENTURE STOCK,

To the Directors of the BUENOS AYRES AND PACIFIC RAILWAY COMPANY, LIMITED.

Gentlemen,—Having paid to your Bankers the sum of £..... as a deposit of Five per cent. on application for £..... 4½ per cent. Consolidated Debenture Stock of the Buenos Ayres and Pacific Railway Company, Limited, I request that this amount may be allotted to me, and I agree to accept the same, or any smaller amount that may be allotted to me, upon the terms of the Prospectus dated 2nd April, 1908.

Ordinary Signature .....
Name (in full)* .....
Address .....
.....
Holder of £..... Stock.
Date ..... April, 1908.

* Please say whether "Mrs.," "Miss," "Reverend," or give other distinctive description.

This Form is to be **filled up** and forwarded to the London Joint Stock Bank, Limited, 5, Princes Street, London, E.C., or Martin's Bank, Limited, 68, Lombard Street, London, E.C.

Printed for the Proprietors by St. Clements Press, Limited, Newspaper Buildings, Portugal Street, Kingsway, London, W.C., and Published by Clement Wilson, at Norfolk House, Norfolk Street, Strand, W.C.—April 4, 1908.

The Investors' Review

EDITED BY A. J. WILSON AND SON.

Vol. XXI.—No. 536. New Series. SATURDAY, APRIL 11, 1908. (Registered as a Newspaper.) Price 6d.

Replies to Inquiries about Stocks and Shares.

These are given each week in the INVESTORS' REVIEW on the following terms:—

One Reply to **One** Question — **One Shilling.** Any number of questions may be put and will be answered at the rate of **One Shilling** each. The questions should be numbered and a copy kept, as securities cannot be named with comments in the printed replies.

For a fee, however, of **One Guinea** per annum paid in advance, a **Key** to the previous week's replies will be sent early in the following week to Subscribers.

Deposits of "Query Money" may be made in advance, and will be acknowledged in the "Answers" column. Notice of exhaustion will also be given there.

If tempted to speculate by circularising brokers Readers should pause and ask the INVESTORS' REVIEW first; its reply will probably save them from many a loss.

Telegrams advising about new securities cost **Half-a-Crown** each, plus cost of the telegram.

Private Letters in answer to inquiries can be had i desired. The minimum charge for such letters is **Ten Shillings,** but for this three questions will be answered if desired. For every question beyond three replied to in any one letter the charge is **Half-a-Crown per question.**

Correspondents can have their lists of investments overhauled and advised upon by letter on precisely the same terms.

Also models of grouped investments will be supplied according to directions given and on the following terms, each list being distinct and never a mere repetition:—For any number of stocks up to **Five, One Guinea;** for from **Six to Ten** securities **Two Guineas,** and so on at the rate of **One Guinea** for each **Five.**

Deposits may be made for letters just as for replies given in the Paper, but letters are never volunteered.

PUBLISHERS' NOTICES.

The Investors' Review is a Subscription Journal, and will be delivered to subscribers in London by the first post, or sent to the country and abroad by the first mail, on Saturday Mornings on the following terms:—

One Year - £1 1s. Six Months - 11s. Three Months - 5s. 9d.

Short of Three months the Price is **6d.** per Copy *Inland*, and **6½d.** *Abroad, Post Free.*

Subscribers can change their address as often as they please, but notice of change must reach the Publishing Office not later than the First Post on Friday Morning.

For a fortnight before the Subscription expires the **Investors' Review** will be forwarded in a different coloured wrapper.

Cloth cases for binding the Half-Yearly Volumes price **1s. 6d.** postage **4d.** extra. Bound Volumes **15s. 6d.,** or **16s. 3d.** po free.

Cheques and P.O. Drafts should be made payable to

CLEMENT WILSON,
"Investors' Review" Office,
Norfolk House, Norfolk Street,
London, W.C.

The Editors cannot undertake to return rejected communications.

Letters from correspondents must, in every case, be authenticated by the name and address of the writer.

The Editors desire it to be understood that a charge is made for the insertion of reports under the heading of Company Meetings, and they cannot accept responsibility for statements made therein.

The Investors' Review.

Sir Henry Campbell-Bannerman, and After.

Bitter are the ironies of success. As the years of man's life now count the political leader who in the end of last week felt compelled to resign the Premiership should have been but little past his prime. Many days of useful life seemed to lie before him when in the end of 1905 he succeeded Mr. Arthur James Balfour as Prime Minister, and gathered round him what was considered to be the most democratic Cabinet in our history. Nobody thought him a great man, but all knew him to be an honest one. He came from the people—Bailie Nicol Jarvie might have been his great-grandfather—and through years of difficulty, since the fateful year 1899 in fact, he had led the Liberal Opposition in the Commons, and had stood his ground against the jingo element therein, the hectic imperialist Roseberyites and the factionists of all kinds. Betrayed at times, caballed against always, at times deserted, he patiently held on his way, won respect and acquired authority with the rank and file among his following by his shrewd Scotch tenacity, kindliness and humour, and above all his unwavering party loyalty and good-natured tact. Never a great debater or orator, he yet had a way of going straight to the point that gave his words weight, and when at last he attained to the goal of the politician's ambition, a goal he, we fully believe, never strove or intrigued for, his leadership was acknowledged with heartiness if not with enthusiasm. When he assumed power he had only just entered his seventieth year. Mr. Gladstone formed his fourth and last administration after he had passed his eighty-third. But Sir Henry did not possess that giant's staying power. A man of heavy build and lethargic habits, he was already in a manner spent when he reached the winning post, and ever since he broke down at Bristol in the middle of November last it was feared that he could not long remain at the head of the over-burdened administrative machine. But he brightened up at Biarritz, and came back with serene and cheerful courage to resume his *corvée*, and all the House of Commons without distinction of party gave him cordial welcome. He came back, but his strength was not equal to the labour involved. He soon caught cold, and the latent or allayed disease asserted itself again with aggravations. For weeks it has been sympathetically recognised that his day's work was over. Never again could he enjoy the health required to make official existence tolerable in the House of Commons, still less to guide its debates, moderate the ebullitions of its factions and arrange the order of its business. For the daily drudgery of an office such as he held, the most arduous and exacting of its kind in the world, Sir Henry could not hope again to possess the energy and power of endurance, no matter how loyally his colleagues might help him, no matter what the ability and devotion of his indefatigable secretaries and subordinates might be. So he has had to resign, and the sympathy felt for him in the circumstances is sincere and universal. Time was when he had political enemies and critics and depreciators without number, but party rancour could never develop into personal dislike, and since he became Prime Minister he has made progress in the goodwill, if not in the confidence, of all classes to a degree that bears emphatic testimony to the striking qualities of head and heart with

which he is endowed. The country will miss him, his party will miss him, and to all who knew him, whether in social life or officially, his subsidence into private life will be felt like a personal loss. We can only hope that the relief from care and daily worries he secures by resigning will bring him the compensation of recovered health and lengthened days. Long has he borne the assaults of party warfare, and manfully has he played his part; he deserves the evening calm, the long, peaceful twilight of his native land, ere the darkness comes.

And who shall say that he may not be happier in his lot, sad though it now appears to be, than those his colleagues whom he leaves in the arena? Nay, it is not disloyal to hint that had he remained at the head of the Government for another two years the attitude of the country towards him, through no fault of his own, might have been much less appreciative and kindly than it is to-day. The fault need not have been his, for no man in the Cabinet has been more earnest in his desire for true progress, more sympathetically consistent in efforts to ameliorate the lot of his fellow-men than Sir Henry, who always leaned to the popular, the democratic, side in Cabinet discussions; but already there were cracks and bucklings visible in the structure of his Ministry, and it is beginning to reap the usual reward of indiscreet and ill-regulated zeal in law making, the zeal too often of the amateur reformer. As time went on and the nation realised that its hopes of relief from excessive taxation were practically mocked at or ignored; when instead of economy and retrenchment in the administration of the army and navy it found a doctrinaire Scotch lawyer, saturated with German philosophy, Kaiserising our land forces and adding to the bill of costs the while, or beheld a simple-minded and amiable Scotch peer of modest abilities together with his equally good-natured Scotch subordinate in the Commons cheerfully continuing to order the game of "beggar my neighbour and ruin myself" at the Admiralty, growling would soon have given place to snarling, snarling to cursing. It had already begun to seem by no means unlikely that before the decade had been completed the Government heaved into power upon the greatest popular majority ever seen would be driven into the wilderness again amid general execration. For not only has the control exercised by it over the public purse been weak to a distressing degree, but the efforts of some of Sir Henry's colleagues at constructive legislation have been lamentably wide of requirements. Good work has been done, much diligence shown, in refreshing contrast to the "dawdle and dine" faineantism of the previous Government, but the successes are forgotten and the failures alone remembered when reckoning day comes at the polls. Moreover, the successes have been isolated, or in the byways of Government, while the failures—in finance, in the sham Home Rule measure for Ireland, in cotter coddling, in education and now in this Licensing Bill and we fear in the "Housing" Bill—not only diminish the prestige of the Government, but give rise to a feeling that it is deficient both in courage and discretion. Every Minister almost appears to the onlooker to be filled with a burning desire to outshine his colleagues by passing a law about something. And the effect of this bustling, hustling energy is to confuse and delay real reforms rather than to make good progress therewith. Parliament is overcharged with measures it cannot size up or discuss with calmness and intelligence, and amid the fevered confusion the great reforms in taxation and rating, in devolution and land emancipation which have been clamouring to be taken seriously in hand ever since the burden of empire grew to be greater than the population of the three kingdoms can endure, are coolly put out of sight. Had this Government and its majority spent its strength in slaying the dragon of departmental waste, in liberating the people from the tyranny of feudalism, in readjusting the incidence of taxation and rates, in cleaning out the Augean stable of that hoary anachronism the City Corporation and its sham or obsolete livery companies, and in giving the provinces of the three kingdoms wider scope in guiding their local concerns so as to elevate and emancipate the Imperial Parliament, it might have left the brewer and publican alone for a season and serenely allowed the sects to wrangle over the souls of the rising generation as their manner is until the day came when the public mind was made up on the line the State had to adopt towards class interests and religious sectaries alike.

But Sir Henry's Cabinet was not built up with men of statesmanlike capacity or far-seeing political courage and high-minded patriotism. Therefore it has preferred to waste its hours of popularity in what may be called the top dressing or side shows of reform. A broken down fence has been removed here, or its removal attempted; there a new barrier has been put up; chips have been knocked off some particular angle or cornice that obstructed the view, and elsewhere an inch or two has been added to an embankment—sure protection, we have always been assured by the builders, against the inflow of anarchism or some other 'ism—and that has been nearly all. Along with this we have had a biggish manufacture and distribution of "sops." The majority cry has been "What d'ye lack, what d'ye lack?" and no London apprentice of the days of the British Solomon, most grotesque of monarchs, ever displayed greater assiduity in seeking to make laws to gratify the faddist supporter than the Ministry now to be reshuffled and recruited. For these reasons, because the failures have already been so many and conspicuous, because the empire, and still more the nation, has been almost lost sight of in the emulative race of members of the Cabinet each to make his own goal, we are disposed to think Sir Henry Campbell-Bannerman likely to be happier in his going than in staying. His team had got out of hand, had come to behave more like racers each striving to win for himself than like members of a boat's crew rhythmically and loyally obeying the "stroke." But just because the discipline has looked slack, the loyalty indifferent, we are little disposed to become enthusiastic about the fortunes of the Ministry as reconstructed. Mr. Asquith may, indeed, prove to be a better Prime Minister than his career as Chancellor of the Exchequer would lead us to infer, but he has not yet given much indication of capacity to become a great constructive statesman. Rather has he betrayed a pliancy not merely towards the demands of the great spending departments and their all-powerful contractors, but towards the Socialists, the hobby riders and untutored or narrow-visioned idealists which bodes ill for his success as head of the Cabinet. And yet does not any man who undertakes a work so arduous deserve the sympathy if not the commiseration of his fellow citizens? There is no business in the world so wearing as that of the political leader.

Three Months' Foreign Trade.

Although the figures of our foreign trade for the month of March look, and are, rather poor, there is nothing really disquieting in them in spite of the fact that there was one working day more last month than in March, 1907. Imports are down by £5,626,000, or nearly 10 per cent., and exports are £1,830,000, or 5·2 per cent. less, while the re-exports of foreign and Colonial merchandise have fallen off by £2,145,000, or 26·4 per cent. These declines, in may be noted, are worse than for the three months, which contained two additional working days this year. In other words, the import values for the three months, as noted in our tables below, have declined by only £10,320,000, or 6 per cent., while the re-exports of foreign and colonial merchandise have fallen off by over £6,267,000, or nearly 24 per cent., and exports only declined 2·6 per cent., or £2,616,000. The value of our imports for the three months, however, still exceeds £160,880,000, of our exports the total is almost £99,251,000, and the re-export trade aggregates £20,062,000. There is consequently nothing at all to be depressed about in these figures, especially when the fact is remembered that i

was in the beginning of last year that the height of inflation was reached, and also when the first stage in the decline in prices is taken into account. It is only the first stage, because credit interests are everywhere engaged on the side of high prices, and we therefore look as the months pass to see a much more considerable diminution in values than has yet taken place.

The values of the imports represent the cost, insurance, and freight, or, when goods are consigned for sale, the latest sale value of such goods.

The values of the exports represent the cost and charges of delivering the goods on board the ship, and are known as the "free on board values."

In some respects the wonder is that our trade keeps up so well, but our gloomy Protectionists will surely be comforted by the knowledge that in the first quarter of this year the import of articles described as "wholly or mainly manufactured" has fallen off by £3,277,000, and that the total is more than £3,000,000 less than that for the first quarter of 1906. We have imported much less manufactured iron and steel, and the decline in other metals and manufactures thereof has been £2,201,000 in the past quarter compared with the same section of 1907. We have also imported much less yarn and tissues, although the import of cotton yarn is up, and altogether this branch of our import trade must be comforting to those who believe that while the consumption of foreign commodities by us subsidises foreign labour, the export of home commodities to foreign countries does nothing at all to benefit the British labourer. These confused ideas reveal a curious state of mind, are symptomatic of a strange disease, and we signalise the facts just given not from any hope of being able to comfort the souls in this way afflicted, but to reassure those who may be disposed, through lack of study or knowledge, to believe the false prophets of doom. Perhaps the worst point about our imports for the quarter is the serious increase they display in our dependence upon foreign food supplies. We have altogether imported £18,557,000 worth of cereals and meal and flour this year up to the end of March, and a year ago we bought little more than £14,638,000 worth. It is small consolation to know that the increase is much more a matter of price than of quantity, because if we have to pay more on any ground the worker has to produce and sell more in order to get enough to eat. We did, however, import a quantity of wheat upwards of 27 per cent. larger in the past quarter, against an increase of 50½ per cent. in the price paid, and the United States has been hurrying forward its supplies with great energy, although last month's total fell short of that for March, 1907. Canada also has emptied its granaries, and a large additional supply has come from the Argentine Republic. This is just as well because Russia and Roumania have both sent us much less in the past quarter, and the supply from British India, which was 2,030,000 cwt. in the March quarter of 1907, has this year been barely 828,000 cwts. From the United States, however, we have this year received 9,584,000 cwt., as compared with 5,814,000 cwts. a year ago. This year we have received no oats at all from either the United States or Canada. Our demand for foreign dead meat is also as great as ever, and the quantity received this year to the end of March has been larger than in the first quarters of either of the two preceding years, but in this case prices have been rather more favourable. That is not so, however, with articles like butter and cheese or sugar.

In fibres used for weaving there is a noticeable shrinkage in our purchases comparing this year with last, but the total of our imports of raw cotton is still 1,000,000 cwt. higher than in the first quarter of 1906, although we have received more than 1,000,000 cwt. less from the United States than a year ago. Our imports of wool have also fallen off decidedly compared with last year, but are larger than for the first quarter of 1906. The decline here is due principally to smaller imports from the Argentine Republic, British South Africa and Australia, but in all these instances the figures are larger than for 1906, so that we are merely shearing off the excess of last year, and not really going back to any sensible extent. Nor is there any notable indication of really declining business in our imports of manufactures, although that, perhaps, would please many people who do not understand the laws governing the exchange of commodities. The decline in the value of metals, for instance, is much more a matter of price than of quantity, we have, in fact, bought more bar, angle, and wrought iron for use in our own manufactures than we did a year ago, although not nearly so much as in 1906. And the total quantity of iron and steel and the manufactures thereof imported although less than in 1906 is over 41,000 tons larger than a year ago. We have also imported almost as much copper, that is to say, 17,726 tons compared with 18,153 tons in the first quarter of last year, but the decline in the price paid has been over £400,000, thanks to the present cheapness of this metal. That is surely something to the good. So also, in some respects, is the diminution shown in the imports of

telegraph and telephone apparatus, not because it is unprofitable to import this or any other class of article when we want it, but because it indicates the cessation of forced business in this country. In the same sense it is interesting to note the apparent diminution in the importation of finished motor cars, the value of which would seem to have fallen from £618,000 in the first quarter of 1906 to little more than £399,000 for the past quarter. This last total, however, does not include £215,000 paid for chassis, so that in reality the decline is insignificant on two years ago, and the total larger than last year. May we accept this as an indication that the reaction has not as yet done much to impoverish the wealthy classes in this country?

Amongst our exports the most puzzling article continues to be coal, or, as the commodities under this head are classed, "coal, coke, and manufactured fuel." We have actually sent out a few tons less of these commodities this year than last, but the money received has been £2,979,000 more, and it puzzles us much to account for the manner in which coal exports are maintained, still more why prices should keep up as they do. Our total exports of fuel have gone up by less than 4 per cent. in quantity on the three months, but the increase in the value is almost 18½ per cent., and Germany has bought more than in the first quarters of either of the two previous years. France is also fully maintaining its consumptive demand, and there has been a noticeable increase in the shipments to Italy as well as to the Argentine Republic. Nowhere are declines conspicuous except perhaps to Chile, which is only a moderately large consumer in the best of days, for even Brazil has taken more in the past quarter than in the same sections of either of the two previous years, and looking at the state of business on the Continent and in countries like Chile and Brazil, one is unable to account for this constancy of or growth in the demand except that in some instances the fuel is doubtless paid for with money raised in this country to a more or less important extent. Exports of pig-iron have diminished compared with a year ago by fully 180,000 tons, but the total is still quite 16,000 tons above that of two years ago, and the foreign demand for iron and steel of all descriptions, although less, keeps up with remarkable steadiness taking the longer average. We have also exported more wrought and manufactured copper although the price obtained has been materially less, and the falling off in the exports of cutlery is quite insignificant, while that of hardware keeps almost constant. Owing to a new sub-classification of machinery we are unable to compare many of the categories embraced under that general head, but the total quantity sent out is sensibly higher than it was in the first quarters of the two previous years, and the value is about £770,000 up, so there is no decay in that direction. We have also sent away larger quantities of cotton yarn, and Lancashire has not yet begun to feel the crisis in her textile manufactures to any serious extent. India, curiously enough, has bought fully 19,000,000 yards more of cotton piece goods this year than last, and the decline in the total length exported to all the world has only been 110,000,000 yards on a total of over 1,508,000,000 yards, while the money received is only about £414,000 down on a total of £20,047,000. Exports of worsted yarns keep up well, and the decline in woollen and worsted manufactures is not serious either in quantity or value—in fact, a slight decline in the yardage of woollen tissues exported is more than balanced by a small increase in the price. In worsted tissues the reduction is more sensible, thanks principally to reduced demands from Chile, and especially from China and Hong Kong, as also from Australia, New Zealand, and Canada; but the diminution in the value is only about £450,000, the total value for the past quarter being £8,709,000. A severe reduction has occurred in the exports of linen manufactures, due principally to the reduced demand from the United States, and also to a sensible reduction in the Canadian demand. Germany and France, too, have both been smaller customers, but British India has taken more, and there have been compensations elsewhere, as in the Spanish, Cuban, Brazilian, Argentine, and Australasian markets, although these have been quite inadequate to obliterate the effect of the crisis in the United States.

Thus looking over the principal divisions of our foreign business we find nothing in them to be much depressed about. A smaller trade was certain this year, and to us the wonder is that the reduction has not been much more severe. Compared with two years ago there is often no reduction at all, and even in the export of ships built in this country for foreign owners there is no sign as yet of that contraction of orders now so painfully evident in the return compiled by Lloyds Register of Shipping, for value of the ships exported this year, including machinery and armaments, has been, at £2,282,000, about £131,000 higher than it was in the first quarter of last year. It is none the less true that, apart from ships of war, the number of vessels under construction in British shipyards is now 101,000 tons less than it was at the end of the year, and 459,000 tons less than it was 12 months ago, and the authority quoted says that no such decrease in the British shipbuilding industry within a period of 12 months has occurred since September, 1884. From this fact we may infer that the worst has by no means yet been seen in the trade recoil, and we must make up our minds to witness continuous diminutions in most branches of our business throughout the whole of the present year. Even credit freely indulged in will not keep its stream full.

The Budget of the London County Council.

Mr. Hayes Fisher, chairman of the Council's finance committee, otherwise Chancellor of the Exchequer for the metropolis, acquitted himself well last Tuesday. His speech in introducing the accounts and estimates for the year ended 31st March last was clear, well arranged and sensible. Very little trace of election polemics is to be found in it and even when excuses are put forward for the policy outlined or expenditure suggested, they are never utilised to cast aspersions upon the Opposition. It is an interesting, and in some respects, rather discouraging story which he, like his predecessors in the chair, had to set forth. Expenditure grows year after year and although the general rate has been kept down to the 1s. 5d. in the £ at which it has stood for some years past, the education rate has had to be raised by a penny, put back that is to the figure of two years ago, last year's penny decrease, as Mr. Fisher explained, having been due not to any abatement in the outgoing but to the decision that the heavy balances brought forward should be reduced. Education now costs the inhabitants of London a rate of 1s. 7d. in the £, and unless something is done to check the steady expansion of charges under this head we shall not live much longer before a 2s. education rate is in sight. Here indeed is the most disquieting aspect of the municipal budget, for hitherto the obligation to feed starving children has not brought any charge upon the rates thanks to private liberality, but it is certain to do so in the near future, and meanwhile the requirements of secondary education are leading to heavy expenditure on capital account with the corollary of increased fixed and administrative charges, and the mere cost of educating 750,000 or so of children that attend the schools is mounting year by year. In 1904-5 the cost of elementary education was £4,286,000, an increase of £532,000 on the previous year. For the year just closed the revised estimate is for an outlay of £5,034,000, an increase of £798,000 on the previous year and for 1908-9, an increase of £996,000 estimated for bringing the total outgoings on this head up to £5,438,000 in 1908-9, or considerably more than the whole cost of administrating the metropolis outside the charmed area possessed by the effete corporation of the City.

We cannot help thinking that there is much waste in this outlay and that the grants from the Treasury, although, as Mr. Fisher says, unfairly small for London, have something

to do with fomenting the spirit of extravagance. If our educational policy had been restrained in its ambitions by narrow means and guided by men of far-seeing capacity, and if the legislature had taken in hand the liberation of the revenues of old corporations now going to waste, as was done many years ago in Edinburgh, so that from a source of this description all the money required to endow the metropolis with school accommodation could have been drawn, or if the megalomania of school boards had been restrained by the necessity of calling upon the ratepayer for every additional penny spent, it cannot be doubted that the burden of popular education would have been sensibly smaller—not only in London, but all over the country—than it is to-day. But there was an academic dream of perfection at the back of the policy followed; money appeared to be had for the picking up, and the result has been a multiplication of expenditure, much of which cannot fail to be pure waste. It is only necessary to look at the variety of subjects attempted to be taught in the elementary schools in order to see that this must be so. The nation is not called upon to teach every urchin half the subjects set down in the curriculum of the school committee, and the consequence of enforcing this wide range of subjects—not taught, but crammed—is the production of swarms of bewildered scholars whose minds are as ill furnished as their bodies are poorly nourished. There will have to be something like a revolution in the educational system in force before we can get back to reasonable economy; but the ratepayers are helpless, and can only find the money on demand with ever increasing reluctance.

We are glad to see the straightforward way in which Mr. Hayes Fisher dealt with the tramway accounts. He properly enough insisted upon the loss sustained by the remaining horse services, but used that fact as a support to his opinion that the sooner the lines thus served are converted to electric traction the better, and his recital of the results obtained from the electric tramways was perfectly satisfactory. These tramways yield a large profit. On the actual working for the nine months for December last, the gain was so decided that Mr. Fisher feels able to estimate the surplus for the year at £66,547 instead of £41,788 as originally forecast. Adding in the balance brought forward this will give £72,470 to be carried to the renewal reserve, and for the new year a surplus of nearly £111,000 is estimated for altogether, after reserving £10,000 for contingencies. The whole of this also is to be put to the renewal reserve fund, raising it to almost £317,000. These surpluses, it should be added, are arrived at after meeting all current charges, the interest on capital, and the redemption of debt on the plan originally laid down. For 1908-9 the sum to be provided for repayment of capital amounts to almost £255,000, and out of the total capital raised for tramway purposes up to 31st March last, nearly £8,500,000, no less than £1,082,000 has been already repaid, £819,000 of it out of the tramway revenue, and £263,000 out of the proceeds of sales of property, horses, etc., no longer required. This is so satisfactory that we cannot help wondering whether some modification in the financial system of the Council might not be advisable with a view to reducing the demands upon the loan market. Would it not be just as satisfactory to utilise these surpluses on capital account, instead of devoting the money to the redemption of debt, until the whole tramway system has been completed and the capital account closed? For some time back the Council has had considerable difficulty in getting good prices for its loans, and, although Mr. Hayes Fisher was able to tell the committee, that on the advice of the Bank of England, the £2,750,000 of 3½ per cent. consolidated stock now issued is to be offered at par as against £97, the price obtained for an issue of similar stock a year ago, it by no means follows that borrowing is going to be easier in the future. In all probability the Council must always stand to lose in its dealings with the Money market, lose both ways by the redemption of stock at a high price and the sale of new stock at a low. The object in view when a sinking-fund scheme was instituted would be just as satisfactorily fulfilled were the surpluses to be carried to capital account instead of being utilised to buy in stock at a time when the works in hand force the Council to be a large and continuous borrower.

A word in the same sense must be said about the debt of London. We are not sure whether Mr. Hayes Fisher's totals include the debt of the old corporation, but that would not make very much difference in a gross total of £108,563,194, which is the amount of burden laid upon the London ratepayer, including the greater portion of the debt of the Metropolitan Water Board. Why "the greater portion," by the way? Is not much of the unredeemed separate debenture debts of the old water companies still a burden upon the ratepayer, and should not the whole of that be added in? As it stands the debt of London involved a charge of 1/9½d. on the rates in 1906-7, but this no doubt includes the provision for debt repayment, which seems to have amounted to £2,068,000 at the end of the year. By various deductions the nett debt is brought down to £49,798,000 at December 31 last, of which £9,365,000 was ascribed to the Council's revenue-producing undertakings, but there is little consolation to the ratepayer in this method of accounting any more than in the fact that £1,484,000 was added to the debt during the nine months between 31st March and 31st December, 1907, for £18,401,000 advanced to local bodies has been taken off in order to help to bring the total down to this low figure. Then the surplus lands valuation, as approved by the Treasury, of £7,092,491 is also deducted, although the land represents debt and is not yet revenue producing. Anyway, the amount of the stock, bills, and other liabilities of the Council outstanding is £80,693,531, without regarding these various offsets, which do not mean much, if any, relief to the ratepayer. And here also a certain amount of the rates goes to redeem debt through sinking-fund purchases. Thus, in the course of three years £700,000 has been in this way applied, and in the course of the past twelve months during Mr. Buxton's chairmanship of the finance committee another £750,000 of sinking-fund money was devoted to the purchase and extinction of stock. This also we think a doubtful policy as long as the Council is laying out capital whether for schools or for tramways, or on the housing of the poor. Save the money by all means, keep the accounts with the utmost care and accuracy, but avoid creating fresh debt as far as possible by utilising the available sinking-funds in the capital account. There can be no harm at all but much benefit in putting the reserves of the County Council "into the business" in this way.

Altogether the London County Council rates now amount to 3s. in the £ for general purposes and education together, and the revenue-yielding undertakings, apart from the electric tramways, do not seem to be providing much money as a help to the relief of the ratepayer. Mr. Hayes Fisher expressed doubts indeed whether the policy of building houses for the working classes has not been carried far enough. Re-housing is compulsory where persons have been displaced by improvements, but the "voluntary" construction, as he puts it, of dwellings on estates bought for the purpose would seem to have gone far enough, since too many of the apartments in some groups of buildings are unlet, and in others rents have had to be reduced to a point which does not give a revenue sufficient to cover all outgoings. We have always been doubtful about this housing policy because of its socialistic aspect, and because it served to obscure the real sources of dear and bad house accommodation in London. Therefore we agree with Mr. Fisher in the view that a halt should be called.

To sum up, the expenditure of the current year out of rates is estimated at £307,000 more than last year, in spite of the "saving" effected through the withdrawal of the river steamboat service, and of this increase about £282,000 arises in the Education Department, as compared with only £25,000 or so added to the general

charges. The total expenditure out of rates is thus put at £10,558,000, as compared with £10,251,000—or little more. Beyond this the gross revenue from the "remunerative works" of the Council is "close on" £2,000,000 a year, and £615,000 of the nett profit will be required within the year to meet interest and redemption charges upon the debt of about £9,500,000 the execution of these works has called into being. We wish there were more of these paying possessions, and that they might lighten the citizens' load. When is Mr. Burns going to do away with these wasteful borough councils?

Economic and Financial Notes.

The Stock Exchange.

The indefatigable managers of the London Stock Exchange were only able to distribute a dividend of 83⅓ per cent. to the poor shareholders for the year ended March 25 last because the income has fallen off, and even this was not accomplished except by reducing the balance carried forward to £176,879, a decline of £29,364. Nevertheless £10 on a £12 paid share is not absolute destitution, and by and by, a few years hence perhaps, the managers may be able to once more increase the dividend, though if they are wise they will do nothing of the kind however rich they may be. Last year's revenue amounted to £170,636 or £13,125 less than that of the previous year, which in its turn was about £12,000 below 1905-6, and as the two £5 dividends took £200,000 it is plain how the balance forward came to be reduced and the dividend as well, for £11 per share was paid in the previous year. Of this revenue £37,033 came from entrance fees or £5,061 less than in the previous year, and £55,737 less than the average receipts from this source during the past five years. That average, however, we must never forget, was swollen by the last effort at "reformation" in the direction of exclusiveness whereby members were henceforth to be limited in number, forced to buy their admission, obliged also to be shareholders and subjected to an increased annual subscription. Therefore it would be unfair to lay stress upon the disastrous-looking shortage in entrance fees. Members, however, have also fallen off in number, the total of 7,158 members and clerks being 388 fewer than at March 25, 1907. Last year 273 members resigned or were "declared," &c., compared with 128 only the year before, and while the number of authorised clerks has increased by seven that of unauthorised has fallen off by 128.

While the revenue is thus coming down expenses have gone up, and amounted to £135,571 last year or £6,411 more than in the previous year. Every care appears to be taken of the company's finances, and we have only the complaint to repeat that a portion of the fine income has not in past years been systematically put aside in order to consolidate the position of members and protect them not only against outside irresponsible competition, but against the misdeeds of weak or wicked individuals amongst their number. The Stock Exchange could easily defeat outside brokers if it liked to try, but it stands on its dignity and distributes its revenue with an open hand to the shareholders; so there is no fund to draw upon except what belongs to the proprietors, and they have accumulated a reserve of only £200,000 for themselves, exclusive of £57,225 of a leasehold redemption fund, while the debt upon the property amounts, after the £25,100 written off the debentures has also been allowed for, to £474,900. It is not an onerous debt for such a strong community, but it might have been done without.

Amongst items of information in the report we are told that the receipts from letting offices have improved to the extent of nearly £4,000, but there are several important offices still unlet. Also it is mentioned that the expense of the pneumatic tubes in the American market is covered by the letting of the necessary room to the cable companies at £1,000 per annum, and that the cost of isolating the residents is compensated by a greater saving in the inhabited house duty. The trustees and managers add that the expense of strengthening and improving the strong room is, in the opinion of the board, justified by modern requirements. These expenses amounted last year to £3,585, and are met entirely out of revenue. Altogether £8,407 of alterations and improvements have been thus provided for, and this more than accounts for the increase in working expenses. The rental income of the company is now £27,778 and the income from subscriptions is £223,409, while £1,420 came from official lists. Whether the Official Intelligence, annual and weekly, yield any profit or not the accounts do not enable us to state, but the nett cost of producing the annual volume seems to have risen from less than £11 in the previous year to £503 in the past year, and surely there must be waste in that direction. The trustees and managers might inquire whether they could not get the book produced much more cheaply by, say an Edinburgh printer. The rent paid came to £20,628, and rates and taxes, including income-tax, swept up £29,432. It may be added that out of the total present membership of 5,351 no less than 2,047 pay an annual subscription of 42 guineas, and there are only 706 members now remaining who get off by paying half this fee, the other 2,598 being charged 30 guineas apiece.

Is the "All-Red Ruin Route" a Canadian Pacific Project?

It is often disastrous for a man to be possessed by a fixed idea. He suffers in reputation and not infrequently ceases to get the credit for sound judgment in matters unconnected with his hobby. Is the venerable Lord Strathcona to be overtaken by this obscuration of his fame as a projector and financial magician? We have our fears, for the hard-driving old Scotchman has been holding forth this week at the Colonial Institute—the Royal Colonial Institute—upon that all-red ruin route project which every person of sense knows to be dead and buried, which every existing steamship company to whose interests its establishment must prove inimical and injurious loathes and despises, and whose execution would impose an unjustifiable and entirely uncompensated-for burden upon the taxpayers of the United Kingdom and the colonies. In support of this really mad and altogether mean project Lord Strathcona brought forward only stale and exploded arguments, which would have had no appearance of weight to a decadent, if he had balanced them by stating the objections: the double breaking of bulk, the absence of actual or possible through traffic, the long, dreary Pacific voyage and the enormity of the initial cost and subsequent upkeep. But he did vaguely admit that his scheme would involve a "burden," protesting only that "the colonies did not ask the Mother Country to bear the whole" of this "burden." No, the colonies for a consideration, or their politicians, would promise to bear a share, and would probably leave us lamenting when the affair came to a disastrous end, as it soon would. The colonies, too, might be glad rather than sorry if meanwhile the land and ocean services constituting the "All-Red route" already in existence were deprived of their revenue and obliged to quit the field. For there is an "All-Red route" now, and has been for years, as Lord Strathcona very well knows, though he took good care not to allude to the fact in his address. He preferred to discourse on the military and strategic aspects of this "imperial" question. Ah, poor Empire!

Is it because the Canadian Pacific Railroad, in which Lord Strathcona is a large shareholder—for he got his slice of the first issue of shares at 25 cents to the dollar—is losing heavily by its express overland railroad service and, above all, by its Atlantic and Pacific mailboat services, that he persists so in the endeavour to persuade the people of this country to find the £6,000,000 or £7,000,000 necessary for his scheme? Would the Canadian Pacific profit by this outlay through selling its steamers at a good price to the new

corporation or State-controlled through service and through obtaining a large subsidy to help it in running its palatial trains across Canada—trains that must now fail to earn enough nett to pay the wages of the engine-drivers and conductors for at least nine months out of the twelve? If this design lies behind Lord Strathcona's assiduity we may acquit him of any tendency to monomania, but only at the expense of his character as a plain-dealing man of business; and it will be about time to take the gloves off in dealing with the whole discreditable agitation. Thanks to his wealth and power over the politicians in the Canadian Dominion this restless financial busybody has been able to get political leaders there, and Ministers even, to support his schemes, and he should be rich enough to pay a whole Press either to lend its assistance or keep silence. But he knows as well as we do that no self-respecting or sane-minded man either in this country or in Canada or in Australia and New Zealand has one word to say in favour of his pet plot. In Canada it is regarded as dead, and we fear he persists in his advocacy only because he is "on the make" for the Canadian Pacific Railroad. But if that be the true motive hid behind all the nauseating snivel and cant about the Empire and its unity and defence, what are we to infer as to the real position of this great railway? Its capital demands are incessant, enormous and increasing. When it wants a few more millions it gets them without question asked, even though it is well enough known that much of the money goes to make good deficiencies, the cost of which should have been met out of current revenue. Is it hard up, notwithstanding, and hungry for more, in spite of its never-failing drafts upon the European investor's purse; so hard up that its controllers must needs invent still other expedients whereby more and more money may be procured with which to keep "prosperity" to the fore at no cost to its budget? Perhaps when next Lord Strathcona deals in public with his, for us, "All-Red ruin route" imposture he will provide answers to questions like these. If not, he had better keep silent henceforth; for even his Scotch dourness and avidity for the main chance will not reconcile us to the outlay or the "burden" contemplated.

The Plan and Agreement for the Union of the Mexican Central and Mexican National Railroads.

A full explanation of this important step, whereby the Government of Mexico seeks through the help of eminent financiers in the United States, London and Amsterdam to take possession, as it were, of its two principal foreign-owned railways and make them national property, has now been made public. We have only space here for the briefest outline of the proposed change. As has more than once been noticed, the scheme has been under consideration for some time and a new organisation or company has been formed, to be called the National Railways of Mexico, or Ferrocarriles Nacionales de México, which is to issue $225,000,000 United States gold prior lien 4½ per cent. sinking-fund redeemable bonds, $160,000,000 guaranteed general mortgage 4 per cent. sinking-fund redeemable gold bonds, $30,000,000 gold non-cumulative 4 per cent. first preferred shares, $125,000,000 gold non-cumulative 5 per cent. second preferred shares and $75,000,000 gold in common shares with which to buy up these two railways and furnish a little ready cash in order to deal with the floating debt of the Mexican Central Company, and to make a cash payment of 10 per cent. on the deposited preferred stock of the National Company, with a balance over of about $6,500,000 gold for working capital. Altogether $10,000,000 gold of prior lien 4½ per cent. bonds will be reserved for this purpose, together with $6,750,000 guaranteed general mortgage 4 per cent. bonds, and the new company is to sell these bonds of the nominal aggregate value of $16,750,000 for $14,870,000 to the representative bankers who have the work in hand. The rest of the new paper is to be subdivided most carefully, and we should judge quite equitably, amongst the bond and shareholders of the two properties to be amalgamated.

Under the scheme holders of the various issues of the Mexican Central Company will receive for each $1,000 par value deposited securities of the new company in the following proportions: The priority 5 per cent. bonds will be exchanged for $700 prior lien 4½ per cent. bonds and $475 guaranteed general mortgage bonds, the first mortgage 7 per cent. bonds and assented scrip for $1,000 prior lien bonds, the consolidated mortgage 4 per cent. bonds for $600 prior lien bonds, $325 general mortgage bonds and $75 second preferred shares, the first consolidated and registered income bonds for $11,000 second preferred shares each, and the second consolidated income bonds and the common stock for $1,000 second preferred shares each. In the case of the National Railroad Company the preferred stock will get $1,000 first preferred shares and $100 cash, the second preferred stock $1,100 second preferred shares, the common stock (old) $733⅓ second preferred and $333⅓ common shares, and the deferred stock $1,000 common shares. The Mexican Government will guarantee by endorsement both as to principal and interest the payment of the general mortgage bonds, and will receive $6,000,000 prior lien bonds, $2,450,000 guaranteed general mortgage bonds and $63,730,000 common shares. These dispositions will absorb $86,294,962 prior lien and $47,765,075 general mortgage bonds, and of the remainder $43,205,038 and $37,734,925 respectively will be used in the proportions detailed in the plan for the retirement of National prior lien 4½ per cent. gold bonds, and 5 per cent. (extended) gold notes due April 1, 1909, and possibly Central equipment notes, and for betterments, improvements and equipment presently required. The surplus will be available for the construction or acquisition of other lines, and, after January 1, 1910, for betterments and improvements made subsequent to that date.

American Business Notes.

Last week saw part of the contents of the speculators' rubbish-cart transferred from the trusts and non-clearing banks to the Associated Banks in New York, whose loans and advances rose by £3,168,000. As at the same time the specie average rose by £1,343,200 and the greenback reserve by £68,200, it followed that the liability on deposits was greater by £4,924,000. None the less was the surplus reserve £180,200 larger at £8,138,200 as compared with £3,888,200 a year back. As for the other banks and the trusts making returns, their loans and investments show a falling off of £453,400 at £162,143,000. Their specie is less by £8,200 at £9,282,000 and their greenbacks less by £89,400 at £2,088,400, so that here we have a decrease of £315,000 in the deposit liabilities now down to £130,404,000. Officially the reserve of these outside institutions is stated to be 29.7 per cent. against their liabilities compared with 28.4 per cent. the week before, but working it out on the same lines as for the Associated Banks we can only find a reserve of 8.7 per cent. or thereby. Meanwhile money is plentiful enough in all conscience and knocking about on call loan at 1½ to 1¾ per cent. on Wall Street, but that does not seem to make the raising of fresh advances by the railroads and other hungry corporations any the easier. Last week the decrease in the clearings of the New York Banks was 25.4 per cent., and of the banks all over the country outside New York 20.8 per cent. compared with the same date a year ago.

And a good deal of the "money" must be of the Knickerbocker Trust sort. People here appear to think that this trust has really opened its doors and resumed business in the regular way by paying all demands in cash, whereas it appears to have merely given "certificates" representing 70 per cent. of its liabilities to depositors, 10 per cent. of which only will at once be paid in cash and the other 60 per cent. at intervals over the next two years and four months. The remaining 30 per cent. is to be represented by "surplus" certificates payable as and when profits allow. This is solvency as understood on Wall Street.

Little of particular interest on this side is to be gathered from the full report of the New York Central and Hudson River Railroad Company which has now reached this country. As everybody interested in American railroads now knows business was not particularly satisfactory for the company in the end of last year and one or two figures may be recapitulated and emphasised. The gross revenue of the New York Central proper was £19,674,000 in the calendar year, and in appreciating this figure it must be remembered that the main line and branches actually owned by this company are only 806 miles in length, its total mileage being made up principally of lines leased or lines operated under contract, said mileage added in bringing the total up to 3,782, still a very small length of road on which to earn such an income. But then the New York Central's own system is throughout pretty much "the neck of the bottle."

Gross receipts, such as they were, showed an increase of £1,256,000, but that was not enough to satisfy the increased working charges which at £15,161,000 showed an expansion of £2,170,000 without taking into account taxes, in the weight of which there was a slight decline, and the income from dividends and interest was larger, so that the distributable earnings were actually £101,245 higher at £6,808,355. The company was accordingly able to keep up its dividends, in fact, it paid £577,000 more last year than the year before on its stock, and at the end of the year showed a credit on profit and loss of £2,940,000. For all that it has to spend capital with notable vigour, and at the end of the year its floating debt was £5,000,000 over and above its share in a new equipment trust for £6,000,000, formed in order to provide the New York Central itself and various of its dependents with further rolling stock. The total of taxes paid, by the way, showed a decrease of £143,400 at £693,000. The year's capital expenditure was £3,560,000, and exclusive of the floating debt the capitalisation of this company comes to £81,311,400, of which £46,085,000 is represented by bonded debt and £35,226,400 by share capital.

One of the principal subsidiaries of the New York Central is the Lake Shore and Michigan Southern, and its accounts are also now forthcoming for the year 1907. They show an income of £8,991,000, or £482,000 more than in 1906. Of this increase, however, £458,454 disappeared in augmented expenses, whose total was £5,909,000. The board also spent about £817,000 on betterments and £182,225 on equipment out of revenue, the one outlay showing a decrease of nearly £28,000 and the other of over £58,000 on 1906. Thus the total expenses, including these improvements charged to revenue, were only £372,534 up at £6,908,000, and the final increase in the nett revenue was £372,332 at £2,083,000. Interest, &c., gave the company £312,600 more at £1,143,284, and taxes took nearly £28,000 less at £260,175, but interest charges and taxes together were £242,000 higher at £1,749,000 and the surplus dropped back by £216,000 to £92,000 after the 14 per cent. dividend had been paid. This does not alter the fact that the total credit at profit and loss is brought out at £3,561,000, nor yet the fact that £1,000,000 was laid out last year by the company on capital account, that is on lines the total length of which is only 1,520 miles, of which 418 miles are leased.

What the current year will show for these and all other railroads it is quite useless as yet to guess, although the New York *Commercial Chronicle* is most weeks wailing as no Cassandra ever did over the declines thus far shown. Taking the gross and nett earnings for January and partly guessing the totals from data furnished, it estimates that the falling off in gross income for the entire railroads of the country that month was £5,000,000, and that the decline in nett could not be much less than £3,200,000 to £3,400,000. "This means," it sadly proclaims, "a gross shrinkage of £60,000,000 for the year and a nett of £40,000,000." Were that realised, how many railroads would keep out of the hands of a receiver next year? We hardly think it will be realised, although up to now the collapse of business has been startling in its magnitude, but, any way, railroads have already gone into the hands of receivers with some precipitancy, and there are more to follow.

It may be worth while recalling a scandal in connection with the unification of New York traction companies. It should be remembered that about £200,000 was paid by the fusing company for lines that did not exist, for a "paper railroad," and many inquiries have been made as to where the money went. Half of it, it was understood, was paid back to five directors engaged in the deal bearing the well-known names of Ryan, Dolan, Widener, Whitney and Elkins. In equal portions, it is said, £100,000 was pocketed by these gentlemen. Now it comes out, according to the testimony of Mr. Ryan, that the money was thus returned in order to reimburse these gentlemen for a subscription of like amount to the Republican fund, collected with a view to secure the election of Mr. McKinley in the campaign of 1900. The money, however, cannot be traced, it is said, and now it remains for Mr. Whitney to explain how it was distributed, the matter having been left in his hands. An assertion of this description, even if false, throws a curious light upon American political methods and the interdependence of politics and finance.

All week, nay for two weeks back, Wall Street has been worried by Erie. The problem was—will the Erie railroad be able to raise the money with which to pay off that £1,100,000 of notes maturing on April 8? It had no security to offer for fresh money, and nobody seemed disposed to advance $5,500,000 on nothing. Mr. J. Pierpont Morgan tried his hand, and in his fine regal way suggested that the best way to help a bankrupt was to provide for raising a bigger loan. "You owe £1,100,000; borrow £3,000,000, and offer a 'bond' secured on nothing in exchange for a 'note' just as ill-protected." The suggestion though at once adopted did not catch on with the market, and hope died and fear rose supreme, or *vice versa*, day by day, almost hour by hour. At last the omnipotent Harriman came to the rescue and bought £1,000,000 of the proposed new £3,000,000 loan in 6 per cent. bonds which he took at 95, borrowing the money doubtless from the Standard Oil banks on his own great credit. This allowed Messrs. Morgan to announce late on Wednesday night that the situation had been saved and that Erie would not default next morning; instead its board was ready to pay off the due unsecured 5 per cent. notes at par in cash or would give holders 5 per cent. of the amount in cash and the rest in the new three-year 6 per cent. unsecured notes. All's well therefore, and credit triumphant—until the next pinch comes; but what an exciting time the market has had, and what a lot of money those fellows stand to make who having bought the expiring notes away down in the eighties can now get par in gold credit for them! Was Harriman a large buyer on every slump? The old notes were offered down to 87½ on Wednesday morning. Would mortal financier miss such a chance?

For the first three months of this year the new capital demanded by industrial and railroad corporations in the United States has amounted to £63,190,000 as compared with rather more than £80,000,000 in the same quarter of last year. It is not the appetite which is less but the absorbing capacity of money markets, but as it stands the aggregate is formidable enough, and we doubt much whether the new securities are finding lodgment to any large extent in the strong boxes of investors. Their issue is mainly an expression of corporate necessities, of the pernicious habit which bases all progress on credit and credit and credit until the product may be said to dwell in the upper air, not on solid mother earth.

The Chicago slaughtering and meat packing firm of Armour and Co. is said to be trying to raise £5,000,000 or £10,000,000 in London on short-term notes.

Passing Events.

Something of the evil done by our subservience to German or study and laboratory warriors' ideas or ideals in naval construction is revealed in the Italian naval estimates for 1908-9. The figure of £6,092,000 to which these estimates amount looks insignificant beside our own, but is a very heavy one for a country so poor and ill-knit as Italy, and it is upwards of £500,000 in excess of the consolidated estimates sanctioned by the law of 1905. Of this excess £400,000 goes to increase the fund for naval construction and £132,000 will be used to maintain an additional force of a thousand trained men in the Royal Naval Corps. And naturally *Dreadnoughts* must be built; all the world is mad on these monster vessels at present. About £2,631,000 of the estimates goes to naval construction and maintenance of existing ships, and among the new vessels two new battleships of the *Dreadnought* type will be started and about £500,000 assigned to the preliminaries of their construction. The day may come when Governments and nations will become sane, but it is not in sight yet.

An increase of 11,000 occurred in the numbers of the Indian population relieved by the State during the week ended April 6 last, in spite of the harvest operations and of the fact that rain fell during the week in every province. In some places it was moderately heavy, but for the most part light and scattered in the United Provinces and North-West India, where it is urgently wanted. Altogether the numbers now being relieved amount to 1,522,000, and an increase of 17,000 occurred in the United Provinces, where 965,700 are now on the works, besides 386,425 who are in receipt of gratuitous relief. In Central India, however, there has been a fall of 86,000 in the numbers on the works, but those gratuitously helped have risen in number slightly to 37,000, and in Bengal, where test relief works have been opened in seven districts, the total numbers in receipt of relief have now risen to 25,000. For all that, the famine is not so widespread as at one time feared, though bad enough in all conscience. And the worst is not seen—never comes within the ken of the compiler of statistics. But then tens of millions of the people of India do not get enough to eat the year through in the best of times, and prices are rising as the debasement of the currency eats its way into the vitals of the country, ensuring a sensible amount of famine always.

A magistrate of Glasgow writes to us as follows:—"I have read with great interest the article in The Investors' Review of 4th inst. on 'The Licensing Bill—A Bill to Aggravate the Drink Curse.' I may say about three years ago I was in favour, along with the other Glasgow magistrates, of closing the public-houses at ten o'clock at night, as I thought it was a step in the right direction. I believe now this was a mistake, as it led to an alarming increase in bogus clubs. There was one case particularly that was tried before me in the police-court, where prior to the ten o'clock movement a certain club had never more than from 35 to 40 members, but immediately after the ten o'clock movement was inaugurated the membership increased to 385, in a small three room and kitchen house. They open at eight o'clock at night and close at four o'clock in the morning. This is nothing else but a bogus club or a drinking den. The charge brought up before me was shebeening, and although the new law states that one respectable witness is quite enough to convict on, the authorities failed to prove their case. I am of opinion that we should go back to the eleven o'clock movement, and rather take two hours off in the morning than one off in the evening. There is no doubt about what you say, that it is the surroundings and dwellings, uninhabitable, insanitary, and otherwise, that cause the damage."

The German Press is busy pointing out that although the big loan of £32,500,000 to be floated for Prussia and the Empire together is rather a lump to swallow, still the Prussian portion will be devoted to remunerative State enterprises likely to substantially benefit German industry, and they appear to think that this fact will induce people in other countries to subscribe more or less liberally. It may, but the other fact remains that the Imperial portion of the loan is to be used to bolster up an institution which has been a source of intolerable expense to the peace-loving and orderly German people since ever it was set up, and we do not think that it was a wise step to join the two loans. Here we might have subscribed for the Prussian loan, but the result of joining it with the Imperial one will probably be that both portions will be given the go-by except among cosmopolites. Somebody has been suggesting that our insurance companies would be large subscribers, but that also is quite unlikely.

The mere outsider is disposed to agree with Mr. Justice Vaughan Williams in his judgment upon the appeal from the decision of Mr. Lawrence in the case of the Bank of England *v.* Cutler. The point in dispute is a most important one, and the fact that the majority of the Court of Appeal, consisting of Lords Justice Farwell and Kennedy, upheld the judgment of Mr. Justice Lawrence is from some points of view to be regretted. The dispute arose over a mistaken identification by a broker of a transferor of India 3½ per cent. stock at the Bank of England. The Bank claimed damages against Mr. Cutler, a broker on the London Stock Exchange, for an alleged breach of warranty by making this mistake, and judgment was given in the Bank's favour. This decision is now upheld, and it may be quite right in law, in spite of the long and well-reasoned deliverance of Lord Justice Williams to the contrary. We can have no valuable opinion on a point of that kind, but what the public does feel is that the usages of the Bank of England in the matter of transfers of stock in its books are in some ways antiquated, and would be the better of revision. Why should it be necessary to go through the ceremony of identification or of certifying that the transferor or transferee is the person named in the deed when Government stocks are dealt with at the State Bank, any more than when railway or other securities are transferred in the books by a company? Could not the Bank of England do away with unnecessary routine?

Would those gentlemen who are continually expatiating to us about the happy lot of the farmer and artisan in the Australian Colonies kindly explain why there should be such a rush by Victorian farmers into the new lands opened up by the Queensland Government in that Colony in connection with the railway it is building to run south-westward from Dalby? Usually a farmer, if he is comfortable, is the last man in the world to rush away and begin life again in a new locality. Must we then infer that the Victorian farmer is the reverse of comfortable, that he finds his present troubles too many for him? Something of that kind must be at the bottom of the rush from that State into the neighbouring one, a rush which has already resulted in the selection for settlement of over 750,000 acres in the district to be opened up by the line.

A correspondent of the New York *Sun* has been writing from Cuba to give a most gloomy account of the state of affairs in Cuba. His information relates to the sugar crop. The normal yield of this article of consumption is said by him to be 1,400,000 tons, and it is well known that the crop of the past year was a bad one, but until recently it was estimated to fall short of the normal crop only by 200,000 tons or so. Later the diminution of yield was put at 400,000 to 500,000 tons, but this correspondent says the crop will be little more than half the average one—that is to say, only 750,000 tons—and he declares that this means disaster for Cuba. The letter is of a distinctly bearish complexion, and we do not believe that Cuba would founder as a State, or even as a solvent community, were the loss in money to be, as this writer alleges, £5,000,000 on last year's sugar crop, for Cuba has other sources of income as well as some stored wealth, and it is believed here that the estimate thus put forward is considerably worse than the facts warrant. At best, however, a trying

time is before the island, and its Government will have to walk warily in order to avert financial and other troubles.

On another page a letter will be found dealing with the scandalous imposition practised upon citizens of several of the Australian Colonies in the matter of the shares of the Marconi Wireless Telegraph Company of Canada. We think it better to print the letter as it stands, because it vividly expresses the feelings excited in the Colonies by the enterprise of Messrs. Munroe and Munroe, of New York, whose agent, it will be recollected, a man named Robinson, sold a large number of shares for cash in Australia, promising to send the scrip, and who failed to keep his promise except to a very limited extent. The wronged subscribers naturally bombarded the Canadian Marconi Company with complaints, and at least one correspondent extracted a letter from the manager of the company disclaiming all liability for the misdeeds of the New York firm and its agent. The company, he said, had nothing whatever to do with either, and he advises the sufferers to take the matter up energetically with the New York firm. Unhappily that is easier said than done, although the company is perfectly within its rights in refusing to intervene, since it had nothing whatever to do with the sales. All that is left is to advertise gratis the business enterprise of Munroe and Munroe, in order that it may be properly appreciated.

Continental Memoranda.

The Paris Bourse keeps remarkably steady, in spite of many disappointing incidents, such as the degradation of the war in Morocco into a struggle with guerillas, yielding neither honour nor profit to anybody, a strike in the French building trade, and those enormous German loans. But money, although dearer for the settlement at the end of the month, remains on the whole cheap, and credit, helped by bears, is therefore able to sustain quotations in the face of adversity. French journalists are even at liberty to exercise their ingenuity in dwelling upon the mistake England has made in remaining a Free Trade country, and in lecturing the Germans upon their distressed economic position and the extravagance of their Government. For the moment the Paris Bourse has only its past losses to digest, but there will be new issues coming along soon, among them £600,000 more for the General Transatlantic Company.

In Germany the new loans have filled the minds of speculators, investors, and publicists alike, and the publicists are very angry still with the English newspapers for what is described as their "hostility" towards everything German. Our withers are unwrung, and there is no ill-feeling here against Germany, only doubts about the consequences of Government extravagance on the future of the German people. We have no wish to help them to forge additional fetters, crippling to their energies and hurtful to their economic development, and certainly cannot advise anybody here to buy the Imperial portion of the loan, whatever he may do with the Prussian portion. Moreover, industrial Germany goes from bad to worse, partly because the methods adopted by the combinations of producers in all branches of business are calculated to hurt rather than help the industries afflicted. The struggle is maintained in imitation of the United States to keep up prices in spite of the shrunken demand, home and foreign, and at the same time to reduce the wages paid to labour. As foreign markets are just as reluctant to buy from Germany, even at the reduced prices with which its merchants tempt them, the position naturally becomes more and more aggravated, and finds expression in daily failures, some of them of importance. One large shipping firm in Hamburg has gone down since we wrote last, but that is not because its ordinary business has suffered, but because Russia has repudiated part of the bill incurred for vessels chartered from the firm during the war. Ten of these vessels were English, and Russia simply ignores the obligation, pays what she likes, and takes the balance as discount.

The total of the Prusso-German ten-year 4 per cent. loans is £32,500,000, but this amount is unequally divided between the empire and the kingdom, the empire contenting itself with £12,500,000, while the kingdom requires £20,000,000, or including the £10,000,000 of short term 4 per cent. Treasury bills to be held by the banks, £30,000,000. Put another way, £20,000,000 of new Prussian ten-year 4 per cent. stock and £12,500,000 of the similar Imperial 4 per cent. stock will be offered to the European investing public, the remaining £10,000,000 taking the form of five-year 4 per cent. non-negotiable Treasury notes. It is explained that the issue of these loans has been hurried forward because of the imminence of heavy issues of federal, municipal, and communal obligations hanging over the German markets. The Imperial and Royal Governments, in other words, wished to skim the cream of the market, and give the leavings only to the other borrowers, but the prospect of the issues is not particularly bright, and great anxiety is displayed about the Reichsbank. Will it reduce its rate before the loans come out, or will that rate remain at 5½ per cent.? Probably the Reichsbank will try and come down, although the drafts upon it at the end of the quarter were exceedingly severe, as its last return shows. Subscribers to the loans who undertake to hold their allotments until October 20 will get this scrip at 99.30 instead of 99.50, the price for all the world beside. Already this year State and local loans to the amount of £19,250,000 have been emitted on the German markets.

A new Turkish loan is said to be hatching. Payment of the salaries of civil and military officials, as well as of the soldiers, are three months in arrear. The Ottoman Bank and the Deutsche Orient Bank, as also the Bank of Athens, have been applied to for assistance, but the Sultan has got no satisfactory answer. Hence it is concluded that "another big loan" is the only possible means of raising the money. Yes, no doubt, but what security is the Sultan in a position to offer? Pretty well everything he possesses has been pawned in one direction or another, and his subjects are by no means so prosperous as to be in a position to bear additional taxation.

Gloomy accounts continue to appear in the French Press with regard to the financial situation in Japan, and if we could believe all that the writers say we might begin to be frightened. Unfortunately, financial journalism in France, as in other countries, is too often inspired by unacknowledged motives, and we may be quite sure that the attention now given in Paris to Japanese affairs is not due to any genuine desire to help Japan or to warn investors against the dangers surrounding Japanese finance. In all probability the real object of these continuous attacks is to be found in the books of the speculators, finance houses, and banks, which, having engaged some portion of their resources in a campaign for the fall in Japanese bonds, are desirous to make it a success. Taking off this large discount, however, it is none the less true that the people of Japan and many of their credit establishments are suffering from a dangerous reaction, and that the only adequate alleviation of the distress must come from a reduction in the national expenditure. We have all along said that Japanese statesmen were in too great a hurry to pay off debt, and experience is proving this forecast to be an accurate one. There must be a smaller provision made for debt redemption, and if possible the expenditure on both the army and navy will have to be cut down. We feel sure that it could be cut down if Japan would moderate her ambitions and adopt a less arrogant and aggressive attitude towards her neighbours. Just look at what is happening in China in consequence of the high-handed fashion in which Japan dealt with a really trivial dispute over one of her ships seized with "contraband of war" on board in a Chinese port. The Chinese are not the timid people Japan appears to imagine and they retaliated for the insult cast upon their country and Government by instituting a rigorous boycott of Japan-

ese commodities in the treaty ports. That cannot benefit Japan in any way, and her attitude has been equally intransigent towards Korea as well as towards the Chinese in Manchuria. Good will therefore come out of the present distress arising from the multitude of failures if Japan decides to reduce her programme and alter her attitude towards neighbouring nations. Should this be done, we feel sure that there need be no anxiety about maintaining a preponderating fleet in Far Eastern waters or a great army, because there is no European State, not even Russia, in any way desirous of interfering with any genuine Japanese interest just at present.

The diamond trade and the diamond-cutting industry are both in a bad way, and fears are expressed that the De Beers company will have to omit payment of the interim dividend on the preference shares. That the dividend has not been earned may be accepted as certain, and there is enough spent or rotten credit behind diamonds to keep Paris in misery for many months. Add to the diamond losses the loss upon copper and copper mine shares, and we can only marvel at the steadiness of markets.

German emigration to the United States has fallen in the first quarter of this year to 24,000 as compared with 103,400 in the same quarter of last year.

Critical Index to New Investments.

London County 3½ per Cent. Consolidated Stock.

This issue of £2,750,000 3½ per cent. Consolidated Stock at par met with a very hearty response from investors, and it was variously estimated that the amount was applied for from 10 to 15 times over on the day the lists were opened. The money is required to pay off London County Bills, for the electrification and extension of tramways, for street improvements, &c., and for capital expenditure on educational purposes. On December 31 the outstanding stock and loan indebtedness of the Council consisted of Consolidated Stock £71,391,956, London County Bills £1,923,000, and various other liabilities amounting to about £3,088,400. Against these, however, there were assets aggregating about £26,605,500, so that the nett liability was £49,797,856, of which about £9,365,000 relates to revenue producing undertakings.

Peruvian Corporation, Limited.

After much discussion as to the form in which the new capital required should be raised, the directors found themselves obliged to abandon the idea of prior lien bonds, and are now offering £1,700,000 first mortgage debentures at the price of 96. These will rank *pari passu* with the existing £3,700,000, and are redeemable at 105 on or after 1910 by means of a sinking fund and annual drawings. Nominally the rate of interest is 6 per cent., but this is only payable for any year in which a dividend of more than ¼ per cent. is paid on the preference stock, and will be cut down to 5 per cent. when the dividend does not exceed that fraction, and to 4 per cent. when no dividend is paid. The possibility, however, of any such reduction being necessary would seem to be remote, as the preference stock has received 1¼ per cent. per annum for the past three years, and the railway extensions now under construction are expected to add considerably to the earning power. For the year ended June 30, 1907, the nett revenue of the corporation from its interest in the railway companies and other sources, after deducting administration expenses, &c., amounted to £404,345. A new agreement was made with the Peruvian Government on June 20, under which the corporation undertook to construct about 300 kilometres of extensions of existing railway lines, receiving in return 30 annuities of £80,000 each in monthly instalments. Adding this to the nett revenue and deducting £12,000 for new taxation imposed, the available surplus would be £472,345, without taking into consideration any increase from the growth of traffic.

Vera Cruz Terminal Company, Limited.

This company is formed to carry into effect the provisions of a concession from the Mexican Government under which the Interoceanic Railway of Mexico, the Mexican Railway Co., the Vera Cruz and Pacific Railroad Co., and the Vera Cruz (Mexico) Railways have bound themselves to form an undertaking having for its principal object the provision of facilities for handling traffic at the Port of Vera Cruz. The capital is a purely nominal one of £90 in £5 shares, which are held by the Mexican Government and by the railways, and cannot be transferred except to other railways which may in the future have termini at the port. In order to provide funds for the construction of the necessary works, &c., 4½ per cent. debentures for £1,000,000 have been created, of which £28,000 are allotted to the Government in payment for land, and £214,600 go to the railway companies for the purchase of such portions of their properties as can be utilised advantageously. In addition, £51,200 is payable to the Mexican and Interoceanic companies as compensation for the loss of revenue through the new company taking over their pier and lighter businesses. Subscriptions are now invited for £700,000 of the debentures, including the £265,800 belonging to the railways, and share and debenture-holders of those companies will be entitled to preferential allotment to that extent. The debentures are secured by a first specific charge on the concession and the lands, &c., and by a first floating charge on the undertaking and other property, and will be redeemed on or before January 1, 1976, by annual drawings at par or purchase at or below par, commencing after January 1, 1913. They are offered at 96½, and as a further security is provided by the joint and several liability of the railways to make good any deficiency in nett revenue, they should be a good and fairly cheap investment.

City of Edmonton.

An issue of £187,400 sterling 5 per cent. debentures of this Canadian city was offered on behalf of the contractors for the loan by the Bank of Montreal at 101 per cent. Edmonton is the capital and seat of the legislature of the Province of Alberta, and is the terminus of an important branch of the Canadian Pacific Railway, while it is also on the main line of the Canadian Northern Railway and the Grand Trunk Pacific line will pass through it. The city has grown rapidly during the past few years, and now has a population estimated at 18,000. On the present assessable value its borrowing power is £879,428, but the total debt, including the present issue, is £584,314, on which a sinking fund of £7,726 has been accumulated. The proceeds of the loan are required to repay present indebtedness, and to carry out works already sanctioned, and as the debentures are secured on the general rates and revenues of the city, ranking equally with the previous issues, they appear to be a good investment.

North Brunner Coal Co., Limited.

This company acquires a coal mining property of 1,040 acres immediately adjoining the Brunner coal mine, about seven miles north-east of the Port of Greymouth, on the west coast of New Zealand. The Brunner mine has been working for over 40 years, and the whole of its output was obtained from one seam, an extension of which underlies at least 470 acres of this company's property. Prospecting and development have been carried on since 1906 by the Grey Valley Coal Syndicate, the principal work having been to prove the Brunner seam by opening up the outcrops, &c. An outcrop with 16 ft. of coal between good floor and roof has recently been located, and in view of this and further discoveries of coal the property is transferred to this company in order to obtain more working capital. The capital is £150,000 divided into 55,000 7 per cent. convertible cumulative preference and 95,000 ordinary shares of £1 each, of which the ordinary are taken by the vendors together with £5,000 in cash or preference shares, and the preference shares are offered for subscription, holders being given the right to convert into ordinary shares at par at any time on one month's notice. A ready and profitable sale of the output is expected owing to its suitability for gas making, and it is estimated that there is a certain and

increasing New Zealand demand for at least 200,000 tons per annum for this class of coal. The directors put the cost f.o.b. Greymouth at 7s. 6d. per ton, including royalty, and with a selling price of 13s. they look for a profit of £50,000 per annum on an output of the above amount, which would be sufficient to pay 20 per cent. and upwards even if all the preference shares were converted. As a speculation the shares seem attractive, especially as the vendor has sufficient faith in the proposition to take the whole of his price in ordinary shares.

Charles Lavy and Co., Limited.

This business of general export and commission merchants, founded in 1861, was transferred in July last to a company with a capital of £120,000, divided equally into 6 per cent. cumulative preference and ordinary shares. Monetary conditions at the time of the formation having been unfavourable to the issue of share capital, the directors raised a temporary loan on the security of debentures, which they now desire to pay off. They have therefore decided to offer the unissued 32,543 preference shares, and in order to obtain a settlement on the London and Manchester Stock Exchanges 22,400 preference shares are at the same time offered on behalf of the vendors. Profits during the four years ended December 31, 1907, have risen from £6,157 to £12,195, these figures being arrived at before providing for partners' drawings, directors' remuneration or interest, and it is certified by the accountants that the sales for the last twelve months showed an advance of 25 per cent. over those of 1906. Assets, including £26,124 for goodwill, are valued at £119,462 less trade liabilities £15,284 and debentures and acceptances £37,790, and with £32,543 from the present issue a surplus of £98,931 is shown. The preference shares should therefore be well enough secured, but the fact that the company has found it necessary to pay underwriting commissions amounting to £4,532 or nearly 14 per cent. seems rather ominous.

Cerro Muriano Mines, Limited.

An issue of 225,000 preference shares of 6s. each was offered by this copper mining company at par, to provide additional working capital for general purposes. The directors would prefer to have the issue taken up by existing shareholders, and in addition to giving them preference in allotment, will pay a commission of 6d. per share on all shares allotted, but the whole amount has been underwritten by Iron and Finance, Limited, at 1s. per share (less the shareholders' commission) and the call of the remaining 35,000 preference shares at par for two years. Since its formation in 1903 the company has carried on active development operations, and a first unit of plant for treating the ore on a scale of 100 tons per day is expected to commence operating this month. The assets on December 31 were valued at £77,153, made up of new treatment plant £18,000, buildings £12,106, and liquid assets (cash, dressed ore, and sundry debtors), stores, machinery, &c., £47,047. Mr. Alexander Hill estimates the ore reserves at 100,000 tons, averaging 2·75 per cent. of copper, but the directors point out that the 2,977 tons extracted during the first two months of the current year averaged 3·11 per cent. Mr. Hill further estimates that on an extraction of 150 tons per day a profit of £1,200 to £1,400 per month could be earned, even with the price of copper as low as £55 per ton. The preference shares would seem to be a fairly promising speculation, as they carry the right to all the profits distributed as dividend up to a sum of £150,000 in the aggregate in any year, and to one-half of the surplus so distributed in any year, while in the event of a winding up they are entitled to £150,000 out of the available assets before any payment is made on the ordinary shares.

Lloyds Bank.—The balance-sheet for March shows liabilities consisting of current and deposit accounts £68,832,227, and bills accepted or endorsed £2,035,960, and assets of cash in hand and at Bank of England £11,583,613, cash at call and short notice £4,695,946, bills of exchange £6,717,228, Consols and other investments £11,679,746, and advances to customers and other securities £39,476,692.

Letters to the Editor.

BANK OF SCOTLAND.

Dear Sir,—Referring to criticism of this in your present issue, and your remarks about the additions to the property account during the year, have you not overlooked that this includes 32 branches taken over last August with the business of the Caledonian Bank?

Yours faithfully,
W. Murray.

48, Craigmillar Park, Edinburgh, April 6, 1908.

[We did; but why was the fact not mentioned in the report?—Ed.]

THE MARCONI SHARE SCANDAL IN AUSTRALIA.

Dear Sir,—Having addressed you some half-dozen times previously concerning what is now justly considered in Australia a national affair, and your paper having made suitable comments thereon (so far back as June last), there will be little necessity for me to write at length to-day, and I therefore content myself by informing you that the position has undergone but slight alteration. You will have guessed I refer to the flotation of shares in Australia by an American firm, who sent a special representative authorised to hand buyers in exchange for cash provisional certificates. The name of the company in which the poor certificate-holders are supposed to have an interest is the Marconi Wireless Telegraph Company of Canada, Limited, and I enclose you copy of what the general manager of above company wrote to a gentleman here in Sydney, proving that the firm in question was merely speculating, evidently at the Australian public expense, for up to date the Union Bank admit having received scrip for only one-fifth of that required, which is in accordance with list handed said bank—8,040 shares. Thus, roughly, 1,608 scrip has been forwarded, and it is now just one year and five calendar months since last sale was verified. These remarks apply even more strongly when taking into consideration the Melbourne doings. It is understood no scrip has yet come to replace the indemnity given, and notwithstanding that hundreds, if not thousands of letters have been written requesting information, not any of a pertinent character can be obtained; in fact, the firm does not deign to answer my last note, which was to the point, and too risky for expert fabrication presumably.

The prevarications have been quite in accord with American smartness and the dilatoriness of the community in knowing and allowing such proceedings to go on unchecked likewise testifies to the public moral standing and extraordinary laws prevailing. If it may please you to publish this, or something to this effect, I can promise you the wholehearted thanks of many with whom I am acquainted, for these persons, like myself, perceive the moral aspect rather than the immediate loss which they have come to look upon as inevitable. The State Parliament is likely to meet on the 10th inst., and although only a short session is proposed, this matter may be discussed; hence my reference to "national affair." The general manager of the Marconi Wireless Telegraph Company of Canada, Limited, in his letter dated October 4, 1907, to myself, states: "Our shares are quoted and dealt in considerably on the curb market of the New York Stock Exchange." This gives the lie direct to the American firm that offered the shares to the public here, and when added to the various prevarications distributed over the period named, past and present, the future behaviour may be guessed at with accuracy, if only grace be given.

I am, yours most truly,
J. J. Kelson.

Sydney Safe Deposit, Sydney, N.S.W., March 3, 1908.

Notes on Books.

Stock Exchanges: Ten-year Records of Prices and Dividends. Compiled and published by Fredc. C. Mathieson and Sons. Price 10s.

We are glad to see that this enterprising firm has been encouraged by the reception given to last year's volume to bring out another and closely up-to-date issue for this year. It is by far the best and fullest book of reference in existence of this kind, and should, as the compilers say in their preface, "be kept for reference by all stockbrokers, bankers, solicitors, trustees, financiers, accountants, and large investors and speculators." Not only are all prominent securities embraced in the volume, but multitudes of less importance, and we hope the support given to the undertaking will encourage Messrs. Mathieson to make it an annual. It is uniform in size with "Mathieson's Highest and Lowest Prices," a group of publications which has been issued for many years past, and whose excellence and value have increased with their age.

Baku Russian Petroleum.—Production of crude oil for week ending April 4, 210,000 poods, equals 3,386 tons.

Russian Petroleum and Liquid Fuel.—Production of crude oil for week ending April 4, 194,000 poods, equals 3,128 tons.

The Week in Mines.

The Carry Over.

The arrangement of the fortnightly account which commenced on Tuesday proved to be a very simple affair, and went through with the accustomed smoothness. The speculative position open in either direction is evidently quite small, and bankers' money being cheap bull commitments were continued on comparatively easy terms. The general rate among South Africans was 5½-6¼ per cent., but Modders and Randfonteins were taken in at 4½-5½ per cent., Gold Fields and Rand Mines at 4-5 per cent., and East Rands at 4-5 per cent., the supply of the last-named evidently being better than at the last few settlements. In the Diamond list De Beers were carried over at 1-3 per cent., the Jagers rate was 3½-4½ per cent., and that on Premiers 2½-3½ per cent., although late business was arranged at 1 per cent. New Vaals were borrowed on at 5½-6½ per cent. On Rhodesians the usual charge was 6-7 per cent., Tanganyikas being done at 4-5 per cent., and Chartereds at ¼d. On West Africans the rate was 5-7 per cent., on West Australians 5½-6½ per cent., and on Siberians 6-8 per cent. Australian Copper and Broken Hill shares were carried over at 4-6 per cent., Rio Tintos were arranged at 3-4 per cent., and Anacondas at 2½-3½ per cent. The principal American shares were borrowed on at 6-7 per cent. The making-up list made a fairly good display, the rises ranging from 5 to 7½ in Chartered and Rhodesian Railway debentures, owing to the subscription of the new Chartered issue, being prominent. Central Minings were up 1¼, Ferreiras ¾, Rand Mines and Premier Deferred ½, Modders 7/16, Tanganyikas and the fully-paid debentures 3/8, Robinson 3/8, Heriots 5/16, and City and Suburban, Crown Deep, Crown Reefs, Premier Preference, Zambesias, and Rhodesian Explorations each ¼. There were no important losses. Among Australians, Mount Boppy were up 9/16, and Kalgurlis rose ¼, but Great Fingalls were 5-32 lower. Broken Hill Props. fell 5-32, while the New Zealand list showed gains of 11/16 in Waihi Grand Junctions and 3/16 in Consolidated Gold Fields. Copper shares gave rises of ⅝ in Rio Tintos and ⅝ in Tharsis, but Great Cobars showed a fall of 3/16 and Bostons and Utahs were down ½. Among Miscellaneous, Esperanzas spurted 7-32, while Alaska Mexicans were 3/16 down. Siberian Proprietary also fell 3/16. Mysores were 3-32 better in the Indian list, while Dharwar Reefs and Balaghats were 2s. 9d. and 2s. lower respectively.

Kaffir Shares.

Prices in the Kaffir Circus have been pushed up in striking fashion this week, and it was easy to imagine that the expansion in business for which House operators and the supporting groups have waited so long and earnestly had really commenced. But nothing could be further from the truth. The most careful inquiry fails to bring evidence of any increase in public interest, and while outsiders keep away the so-called activity is purely illusory. Rather more noise has been made in the market, and once or twice dealings were continued in the Street, but the whole thing amounted to very little. One or two fair-sized orders were apparently down for execution, and these were divided among so many brokers that just for a day the market did appear a little busier. Paris operators were in a more optimistic frame of mind, and Germany was not unfavourably disposed, so it was not a troublesome business to maintain values and in some cases to improve them. The individual returns for March provided still more evidence that profits can expand without the aid of coolie labour, and the good revenues shown by several of the companies were useful in helping the rise. All the leading shares such as Modders, Rand Mines, Gold Fields, East Rands, and a good many more besides finished something to the good, but the little burst of strength did not last until the end. A sustained rise is out of the question without public support, and that seems as far off as ever.

Land, Rhodesians, and Diamonds.

Central Minings were carried up at a nice pace to the accompaniment of rumours that the capital of the concern was to be reorganised. The proposal is said to take the form of a return of cash to the amount of £3, an issue of debentures for another £3 to represent the unproductive part of the assets, and a £10 share for each £20 share now held, thus reducing the capital by £4 per share—unless a boom comes along and wipes out the deficiency. Other Finance things to receive attention were Johnnies, Gold Trusts, and T.C.L. But it is Rhodesians which have really been the rage. One could almost believe that quite six Rhodesian companies were dividend payers, instead of only three, the market blazed so, and the fact that Chartered shares touched 15s. makes it clear that wonders will never cease. First of all there was a story that the Broken Hill ore problem had been solved, although we should doubt that, and then that arrangements had been made for the extension of the railway from Broken Hill through the copper belt at Katanga. Later in the week the arrangement was only under consideration, and had not been completed, while it was rumoured that the Chartered debentures had been subscribed by a certain Belgian syndicate through the Tanganyika Company on condition that the money was spent on this railway extension. Also it was said that work on the Tanganyika Company's Lobito Bay Railway, for which those £8 debentures (now standing at £4) were issued, had been suspended. Can it be true that only one exploring party has been over the country and that the project was launched without any surveys being made? Oh! there is going to be no end of fun presently, and we are getting more curious than ever about the Chartered debenture subscription, the allotments for which are out. Tanks and Zambesias have sailed ahead with Chartereds, and the Banket things were given a lift on a forecast by Dr. Hans Sauer that the Eldorado would soon be a dividend payer. The cheerful spirits thought nothing of adding a shilling and sometimes two to several of the rubbish group, for all the world as though they possessed some value. Diamond shares came back steadily, and looked a miserable market.

Australasians and West Africans.

There was very little doing among West Australian shares, but on the whole the tendency was firm, with trifling rises in a few instances. Broken Hills, however, were mostly dull. The cables worked badly, restricting advices from the colony, but the orders that came through did not help prices, and values slipped off. Proprietarys were prominently weak on a rumour, likely to be baseless, that dividend suspension was probable. Mount Morgans went ahead. Waihi Grand Junctions were dull at first, but picked up strongly on news from the mine that driving on the new lode had produced ore assaying £6 10s. per ton over 7 feet. Several West Africans slipped off, but there was a boom in Akrokerris, which were rushed up from 6d. to 1s. 9d. on a cable reporting a strike of reef.

Copper, Tin, and Miscellaneous.

The market for copper metal has shown irregularity, with small movements, and the share market has gone much the same way. Prices started in good style, and after a spell of dulness came up again, Paris supporting Tintos. Cobars, Elliotts, and Tharsis did best among the others. Tin shares were flat, particularly Pusing Lamas. In the Miscellaneous groups the American shares were all in request at some time during the week, but Esperanzas lost a rise scored early. Indian shares were a good market, Mysores, Ooregum Preference, and Nundydroog all adding fractions.

The output of gold for March from the Transvaal mines, as advised by the Transvaal Chamber of Mines, shows an increase of 32,971 ozs. to 574,901 ozs., and of £140,051 to £2,442,022 in value over the February return. In native labour there was a nett gain of 11,230 "boys" during that month, raising the number employed on the 31st ult. to 129,434.

MINING NEWS.

**** Frank and unbiassed answers are given to all questions relating to Mines. Address Editor Mining Section and enclose* One Shilling *for each question asked. No bucket shop circular or advertisement should ever be responded to without first consulting the* Investors' Review.

Anglo-French Exploration.—There is much that is unsatisfactory about this company's report for the year to December 31, 1907, but shareholders' disappointment will be tempered a little by the frankness with which the whole position is set forth. The attitude almost universally adopted by these holding and finance companies is not to publish a list of securities possessed, and the Anglo-French Exploration has hitherto followed this course. There is the less necessity, perhaps, to give a maximum of information when things are flourishing, or at any rate, shareholders are less critical in the matter; but when matters take a bad turn the question assumes a different aspect. Recognising this the directors have decided to publish a complete list of the shareholdings with the amount held in each, so that proprietors may judge for themselves what are the position and prospects. Taking all points into consideration, it may be said that reasonable care seems to have been exercised in the selection of securities in which to put the company's resources, and if there is a certain amount of indifferent stuff much that is good, judged by present standards, is also possessed. But the course of events during the past year renders it inevitable that any holder of South African securities must face heavy depreciation, and in the case of this concern the losses are exceptionally severe. Dividends and interest for the twelve months came to the respectable sum of £55,232 and £4,463 was realised as profit on sale of shares. Administration, including managing directors' and other salaries, requires the considerable sum of £12,443, the engineers' departments absorb £3,219, and directors' fees £1,250. Other items took £1,069, and then realised losses and amounts written off, £23,153, must be provided, leaving £18,561. Balance brought over from 1906 was £52,068 and the last £200,000 is transferred from the reserve fund, making a disposable sum of £270,629. Preference dividend amounts to £30,000, and the depreciation on holdings during the year gets rid of £177,492. A trifle is reserved for income-tax and £62,857 is carried forward. The investments are taken at average cost or under after providing for depreciation as mentioned, and showed a surplus at the end of the year of £63,000 against £252,000 at the corresponding period. The valuation included about £241,000 in cash or its equivalent (Stock Exchange account loans, &c.), £89,000 in loans and debentures, £378,000 in shares yielding a dividend, and £353,000 in shares and properties, which are at present unproductive. Preference shareholders may usefully note that no dividend can be paid to them unless there is a surplus of assets over the capital and other liabilities. The company possesses holdings in some of the companies embraced in the East Rand amalgamation, and in exchange will receive 70,543 shares ranking for dividend from July 1, 1908, and 34,104 from January 1, 1910, together with 1,524 shares in the Witwatersrand Deep. The directors make a somewhat lengthy reference to the position and prospects of the Rand mining industry, winding up with the prediction that if the producing mines continue to show regular results and increasing profits the present feeling of distrust and disappointment will prove to be a passing phase, and capital will again be attracted to what is undoubtedly the most reliable gold field that has yet been discovered.

General Mining and Finance.—This is the controlling company of what is known as the Albu group, and a brief summary of the past year's results has been sent along in advance of the complete report and accounts. It is a most unsatisfactory and disheartening exhibit, and shows the company to have passed through a troublesome period. Balance of nett profit is only £27,786, and in order to make good depreciation and other losses, actual or possible, the balance of special reserve account £189,117 has to be utilised. These things accomplished and £8,064 is left to be carried forward. Even after providing the enormous sum of £195,170 against depreciation, two stocks, showing a loss of £83,469, were left untouched, but fortunately this is more than covered by the considerable unrealised profit on certain other holdings. No account has been taken of this unrealised profit and in no case has an asset been written up. At the end of the year the stocks and shares in companies under the management of the Corporation were valued in the books at £1,106,235 and those in other companies at £93,135. Then debentures in public companies, &c., were £125,002, mining properties, claim holdings, real estate, and house property in Johannesburg, &c., £273,386, advances against security (including stocks and shares taken in), sundry debtors, advances to mining companies, £845,971, and cash £168,666. Deposits stood at £472,251, a drop of £158,359, and sundry creditors were rather lower at £158,359. Another special reserve against possible loss which stood at £140,000 on December 31, 1906, was increased to £183,773 by transfers of interest, and from appropriation account, £62,934 was used to write down the two items advances against security and sundry debtors, leaving the reserve at £120,839.

Bantjes Consolidated Mines.—No work was done on this company's mining property during the year to December 31, 1907, but the progress made by the Florida township provides a little entertaining reading. A few trees have been planted to replace some that had died, and the trout placed in the lake appear to be doing well. There are repeated reports of the fish having been seen. The lake has now been thrown open for trout fishing, and any shareholder who happens to be in the neighbourhood can get some sport even if he lacks dividends. Roads are in fair condition, and the enlightened municipal council have decided to allow each ward the benefit of the revenue received from it instead of spending all the money in one direction. We should like to live in the Florida township as the municipal rate is only ¾d. in the £, with prospects of reduction. Company's expenditure for the year was £9,950 against a revenue of £3,823. Amount due on loan and to sundry creditors is £57,298, the cash balance is £187, and the directors are waiting for better times in order to submit a scheme for placing the company in a satisfactory financial position.

Rietkuil Gold Mines.—There is nothing useful to be said about the affairs of this concern. Operations are suspended, and cannot be resumed until further funds have been raised. At present the directors have no scheme to put before the shareholders for the provision of the needful, and meanwhile the largest shareholders are advancing funds to meet the necessary expenses, chiefly consisting of claim licences and interest on loan. The total indebtedness under this head is £34,425, and the sundry expenditure to date is £39,069, including £3,144 for the past year. Rather more than £20,000 has been spent on shaft sinking and mine development, and the cash balance is £23.

Sons of Gwalia.—The report for the year ended December 31 gives evidence of a pretty comfortable state of affairs. Tonnage milled during the twelve months was 156,034, an increase of 19,752 tons, and the directors say that this advance in quantity permitted a further reduction in the average value per ton, while maintaining the same rate of output. At first sight it appeared that the quality of the ore had fallen off, but the directors' explanation seems satisfactory enough. Total recovery was 55,974 ozs. of fine gold, which realised £237,957, and sundry small items raised the revenue to £239,937. Expenditure in Western Australia was £156,672 and general expenses in London were £2,714, a further amount of £590 being absorbed in advertising and bonus to employees. Working costs, which include the entire amount expended on development, were 20s. 0.98d. as compared with 21s. 4.68d., notwithstanding the additional outlay entailed in the treatment of slimes and accumulated sands, amounting to 10.90d. per ton. Balance on working account was £79,961 and the actual nett revenue £61,968, income and colonial taxes and depreciation absorbing £17,993. Four quarterly dividends of 1s. each absorb £65,000, so that the sum carried forward is reduced from £7,150 to £4,118. The directors say the general results of the development work done during the year have been of a satisfactory character both as regards opening up further reserves, and proving the continuity of the ore bodies previously worked upon. Ore reserves have been well maintained, and the general managers are confident that above the No. 14 level there is at present available for stoping over two years' supply of ore for the mill. In addition the work done below the No. 14 level has proved the downward trend of the main ore body. A large amount of good grade ore also remains to be exposed on the Gwalia South chute, which the development done to date does not warrant taking into the present calculations. Owing to the recent developments in the south end of the workings and the southerly strike of all the known ore chutes, it has been decided to take up further ground to the south, but eight leases on the northern side of the mine will be abandoned. We are sorry to note that the directors propose a change in regard to their extra remuneration. For the last four years the shareholders have voted them an additional £1,000 per annum, but now they want 2 per cent. on the dividends, commencing with the past year. On the basis of the dividends paid, this will mean £1,300 or £2,300 in all for what, after all, are more or less nominal duties. Shareholders should reject the proposal, and not return a proxy to the directors.

Broken Hill South Silver Mining.—A circular issued to the shareholders in March gave details of production, profits, dividends, &c., for the half-year to December 31, and these need not be repeated, but the full report just to hand contains a few interesting additions. The directors were fortunate in selling a considerable quantity of the 1908 production of concentrates, but further amounts have not yet been disposed of. Negotiations, however, are proceeding, and it is hoped that sales will be effected which will enable the mill to be set going again to its full capacity. Reference is made to the non-completion of the arrangements with the Zinc Corporation, but, as we know, the fresh process has been started, and the outlook appears more hopeful. The Broken Hill new mill was due for completion last month, and a large amount of development work has been carried out, mainly in view of the extra tonnage required. The mine is said to be in a position to readily provide the increased output. The company is participating in the Umberumberka Water Trust. The directors devote a lengthy paragraph to the position and prospects of the mine and the metal markets, and set forth the facts with a frankness one is forced to admire. The drop in metals is serious, as are the difficulty of disposing of the company's products and the higher returning charges. Not only so, but the cost of supplies and stores has increased and is increasing, "and the additional burdens placed on our back by the new tariff are hard to bear." On the other hand, the company is said to possess a splendid mine, with large and increasing ore reserves of good grade, well opened up and equipped in every way.

Peak Hill Goldfield.—We fear that the operations during the year to June 30, 1907, have not materially improved the position of this unfortunate venture. Tonnage crushed was substantial at 56,329, but the recovery was no more than 7,520 ozs., and the loss on the twelve months' working is £8,133, to be added to the amount brought forward, increasing the aggregate deficiency to £18,606. The manager's report indicates the desirability of expeditious development, but, as usual, the cry is for more money, and "the directors therefore trust that the shareholders will agree to subscribe for a further proportion of the unissued shares created for this purpose." We doubt if the prospects justify their doing so. The legal proceedings connected with the Margarething No. 1 North Lease having been decided in the company's favour, the transfer of the lease to the company has now been forwarded to Australia for registration.

Colonial Consolidated Finance.—This company's assets include investments in Japanese and other Government securities, debenture stocks and shares in various railway and other companies, mostly good class, freehold land and buildings in Western Australia, and shares in the Kurunegala Rubber Company. It formerly held interests in mining ventures, but these have produced losses, keeping the shareholders out of a dividend for the past year, and it has been wisely decided to in future leave mining shares severely alone. Those previously held have been completely written off. Last year to December 31 the ordinary revenue was £7,963 and the expenditure £4,054, but depreciation in value of investments was £1,698 and in mining shares £9,382, so that a deficiency is shown of £7,172. Australian dividend duty was £126, and after crediting £86 brought in there is an adverse balance to be carried forward of £7,214.

British Borneo Exploration Company.—Nothing could well exceed the disappointing character of this company's report and accounts for two years to February 29 last, the second year's statement containing details of expenditure in Borneo up to December 31, 1907, only. It is a continuous record of non-success that the directors have to relate, and it would be waste of time and space to refer in detail to the company's operations. They are summed up in some general remarks to the effect that the company "has made every endeavour to locate and investigate any indications of valuable minerals that have been brought to their notice hitherto, much to the directors' regret, without success." In order to promote more interest among the inhabitants of Borneo to prospect for minerals, the board has recently increased the reward for such mineral discoveries from $5,000 to $10,000. The manganese deposits have proved lamentably disappointing, and the company was unable to fulfil the manganese contracts referred to in the last report. Legal proceedings were the result, and damages of £50,000 were claimed against the company. The matter was compromised on the following terms:—A payment of £5,000 in cash, the transfer to the plaintiffs of 25,000 fully-paid ordinary £1 shares, the appointment of them as sole commercial agents of the company for 20 years for the sale of all minerals at a scheduled scale of commission, and the appointment of Mr. Karl Ettlinger to a seat on the board. A call of 6d. will be necessary to provide the money payment, and the British North Borneo Company has agreed to the conversion into ordinary of 25,000 of their 100,000 founders' shares in order to provide that portion of the settlement, the remaining 75,000 to carry the same rights as the original amount. The company is very short of cash, and the debit to sundry expenditure account is £16,404. Purchase of concessions and works in progress appears at £399,441, and various small sums have been spent in other directions.

Anglo-Siberian Company.—This company was registered on December 6, 1906, and in February, 1907, the managing director, Mr. Leslie Urquhart, after considering several propositions which were brought to his notice in Russia, laid before the board a proposal to enter into negotiations for the acquisition of an option on the whole of the share capital of a Russian private company called the Kyshtim Mining Works. The business entered into is described as of great importance and magnitude, and has occupied the undivided attention of the board during the year. The directors have decided to devote the greater part of the resources of the company to the promotion of the undertaking, and are of opinion that the prospects are favourable to the realisation of a substantial profit on the outlay. The company's interest in the original option, subsequently extended, which was acquired jointly with the East Russian Mines, Limited, was transferred to the Perm Corporation, as the obligations were heavier than the resources of the company justified the directors in undertaking. Capital of the Perm Corporation is £300,000 in £1 shares of which 250,000 are issued and 50,000 held in reserve. This company and the East Russian Mines were allotted 125,000 fully-paid shares, and an equal number were subscribed at par by the two concerns. The interest in the Perm Corporation consists of 73,036 vendors' shares and 51,510 cash shares standing in the books at a cost of £76,827. Outlay in connection with the business was well over £60,000, and it was necessary to arrange a temporary loan of £35,000. It is now proposed to repay this debt partly by sale of Perm shares and partly by calling up 3s. per share, which will produce £15,000. No further calls are anticipated this year.

Alaska Mexican Mine.—During the year ended December 15 last 214,263 tons of ore yielded $351,813, and 3,885 tons of sulphurets produced $296,165, while the balance of ore on hand raised the actual yield for the year to $633,377 or $2.9561 per ton. Revenue brought into the profit and loss account was $650,063, and the operating and construction costs came to $361,152, leaving a nett operating profit of $288,911. To this is added $127,123 brought forward, raising the disposable sum to $416,034, and from it dividends aggregating 26 per cent. have been paid, absorbing $234,000. A sum of $82,847 is payable to the Alaska United Gold Mining Company in connection with profits for the past two years on operations in the 700 ft. claim and $2,693 to the Alaska Treadwell for expenses incurred up to December 15, 1906. Depreciation on plant is allowed to the amount of $50,000 and $46,494 remains to be carried forward. Since the company was formed the dividends paid have aggregated $1,716,381. Ore reserves are estimated at 794,924 tons.

Answers to Correspondents.

Deposits against future queries may be lodged with the Publisher.

Timothy.—(1) It is doubtful whether this stock will rally much this spring or summer. The muddle round it is too great. (2) We do not see an assured continuance of cheap money, and hardly think there is great chance of a material rise in this stock. The Government will want more money before long.

T. C.—We certainly think you should sell the shares you hold in view of contingencies, but the time has not yet come to exchange into the other which you name, although it cannot always remain on the down grade, and will probably experience a sharp recovery by and by. Stocks cannot be named in this column, but you should be able to find what you want by studying the "Critical Index."

Mithra.—(1) These are promising, as the town is growing. We cannot say when they will be added to the list. (2) Nor these. They are one pound shares and are not very marketable. Its friends say its prospects are good, but you understand the risks of that corner of the earth. If left alone it ought to do well. (3) and (4) Not yet; wait until you see some improvement in the returns and then consider a purchase. It looks as if the wave of depression will continue for some time. (5) These are not attractive; the financial position is very weak, and prospects of dividends vague. These leave 5s. to your credit.

L. K. J.—We think you should keep this for the present.

G. H. P. B.—The cutting you enclose is evidently a bear statement, and although competition is coming we do not think it is likely to be anything like so serious as the paragraph makes out. For all that, we fear the price may not for many a day reach your figure again, but this is hardly the time to sell.

Edinburgh.—(1) No. It is much more likely to go down than up during the next few months. (2) It is quite a speculation. Cheap money might push it up, otherwise the prospects are not very good. Thanks for the remittance, of which we have put 18s. to your credit on deposit.

Cardigan.—Why should you accept the loss just now if you do not need the money? The price will go up again some day, and we think you should hold.

B. W. J.—The market is completely in the hands of manipulators, and it is a question of holding out. The facts are adverse, as you were told, but when the bear account is so enormous they can be set at defiance for a time. Perhaps better wait a little unless you can afford to stand the pressure of additional commitments.

British Law Fire Insurance Company.—Nett premium income for 1907 £92,423, an increase of £4,119. Nett fire losses £22,659 or 24.5 per cent. of the premium income, the lowest since the company was formed. There was also a small business in accident and burglary insurance yielding £6,828 in premiums and costing £1,051 in claims. The accounts show a balance of £47,345 on these two together of which £10,000 is carried to employers' liability account, and out of the balance a dividend at the rate of 16 per cent. declared for the year, tax free, the new shares ranking from July 1 last. A balance of £17,345 is then left to carry forward. Reserves amount to £231,406, including £137,406 received as premium on the new shares issued. Investments in Stock Exchange securities stand at £297,509 after £11,406 has been written off for depreciation, and this is still £12,079 above their market value on December 31 last. After writing off the just mentioned sum the reserve will stand at £220,000 pledged to unexpired risks.

Societe Francaise des Cycles Clement et Gladiator, Limited.—Nett trading profit, including fees, amounted to £16,861 for the year ended August 31, 1907. With £86,353 brought forward, £103,214 is to be dealt with. Depreciation on plant, furniture, &c., is allowed £2,832, reserve is opened with £30,000, and £45,000 is written off plant, machinery, &c. With this reduction land, buildings, machinery, goodwill, &c., will stand at £282,256, and furniture and fittings at £5,950, Stock-in-trade at £108,370 is apparently above market price, as in addition to the £45,000 written off plant, &c., the reserve of £30,000 is to be applied to meet loss in realisation of motor cars and machinery, as the company is discontinuing to manufacture, and may be none too large for the purpose. Trade balances are very adverse, debtors at £13,638 failing to meet creditors and loans by £45,019, and cash is only £2,448. However, the directors feel that affairs have taken an important turn for the better.

RAILWAY TRAFFIC RETURNS.

Foreign.

Alberta Railway and Irrigation.—Earnings for the 10 days ended April 7, $3,899, decrease $266; aggregate from July 1, $184,419, increase $40,293.

Argentine North Eastern. — Traffic receipts for week ended March 6, £3,591, decrease £3; aggregate from July 1, £111,432, decrease £4,362.

Assam Bengal.—Traffic receipts for 7 days ended February 29, Rs. 93,500, increase Rs. 945; aggregate from Jan. 1, Rs. 7,44,290, decrease Rs. 1,14,401.

Bilbao River and Cantabrian. — Traffic returns for March £8,355, increase £544; aggregate from January 1, £24,583, decrease £4,019.

Buenos Ayres Central.—Gross receipts for February £9,865, decrease £3,555; aggregate from Jan. 1, £81,976, decrease £2,531.

Canadian Northern Railway.—Traffic receipts for 10 days ended March 31, $216,500, increase $67,400; total from July 1, $6,997,000, increase $1,907,500.

Egyptian Delta.—Traffic receipts for week ended March 21, £5,540, increase £400; aggregate from January 1, £268,653, increase £18,650.

Lucknow Bareilly Railway.—Traffic receipts for 7 days ended March 7, Rs. 35,052, increase Rs. 837; aggregate from January 1, Rs. 3,36,325, decrease Rs. 36,667.

Midland Uruguay.—Receipts for month of March, £4,957, decrease £1,597; aggregate from July 1, £50,386, decrease £4,660.

North Western of Uruguay.—Traffic receipts for Mch., $21,300, increase $736; aggregate from July 1, $175,429, decrease $11,930.

Quebec Central Railway.—Traffic receipts for the 4th week of March, $36,391, increase $6,446; aggregate from January 1, $238,268, increase $61,122.

Quebec and Lake St. John.—Traffic receipts for Feb. $31,941, decrease $2,037; aggregate receipts $68,216, decrease $1,606.

Rohilkund and Kumaon Railway.—Traffic receipts for 7 days ended March 7, Rs. 22,870, decrease Rs. 4,936; aggregate from Jan. 1, Rs. 2,02,540, decrease Rs. 29,830.

Uruguay Northern.—Gross receipts for month of Dec., £1,712, increase £3; aggregate from July 1, £11,422, increase £970.

White Pass and Yukon Railway.—Traffic receipts for week ended March 31 amounted to $14,686.

English.

Cleator and Workington Junction.—Receipts for week ending April 4, £1,366, decrease £46; aggregate from January 1, £15,608, decrease £3,137.

Cockermouth and Keswick Railway.—Receipts for week ending April 4, £714, decrease £148; aggregate from January 1, £9,247, decrease £868.

East and West Yorkshire Union Railways.—Traffic receipts for week ended April 4, £479, increase £163; aggregate from January 1, £6,396, increase £305.

TRAMWAY AND OMNIBUS RECEIPTS.

* Gross. † Loss

This notice is not issued for the purpose of inviting subscriptions for Debentures, and applications will only be entertained on the footing of, and by reference to, the full prospectus, which has been filed with the Registrar of Joint Stock Companies.

Under the full prospectus the LIST will CLOSE on or before SATURDAY, the 11th April, 1908.

THE PERUVIAN CORPORATION, LIMITED.

SHARE CAPITAL.

Ordinary Stock	£9,000,000
4 per Cent. Cumulative Preference Stock	7,500,000
	£16,500,000

DEBENTURE CAPITAL.

6 per Cent. Debenture Bonds	£3,700,000

ISSUE of £1,700,000 SIX PER CENT. FIRST MORTGAGE DEBENTURES to Bearer, in denominations of £50, £100, and £500 each.

Ranking pari passu when fully paid up with the existing Debentures for £3,700,000 (all forming part of a total authorised issue of £6,000,000), and subject to the resolutions of the meeting of the holders of such existing Debentures held on the 12th March, 1896.

Such resolutions provide that the Debentures are to be redeemed at £105 per cent. in and after 1910 by means of a sinking fund and annual drawings, and are to carry interest at 6 per cent. per annum for any year in which a dividend of more than ½ per cent. is paid on the Preference Stock, reducible to 5 per cent. per annum for any year in which the dividend does not exceed ½ per cent., and to 4 per cent. per annum for any year in which no such dividend is paid.

A Dividend of 1½ per cent. per annum has been paid on the Preference Stock for the last three years.

Under the full prospectus subscriptions are invited for the above-mentioned Debentures at the price of £96 per cent., payable as follows:—10% on Application, 15% on Allotment, 25% on 14th May, 1908, 25% on 18th June, 1908, 21% on 30th July, 1908=96%.

The full prospectus states (among other things) that applications from the Debenture and Stock holders of the Corporation will be preferentially considered.

Scrip Certificates to bearer will be issued in exchange for the Letters of Allotment as soon as possible after payment of the instalment due on allotment. Scrip Certificates will be exchanged, after payment of all the instalments, for definitive bonds carrying the coupon payable 1st October, 1908.

Interest, in accordance with the above-mentioned resolutions, is payable half-yearly on the 1st April and 1st October in each year.

Payment in full may be made under discount at the rate of 3 per cent. per annum on allotment, or on the due date of any instalment.

The Peruvian Corporation, Limited, was incorporated on the 20th March, 1890, under the provisions of the Contract for the settlement of the Peruvian External Debt made on the 11th January, 1890, between the Peruvian Government and the Peruvian Bondholders' Committee. The terms of this Contract were varied and extended by a Contract between the Peruvian Government and the Corporation dated 20th June, 1907.

Under the concessions from the Peruvian Government, which expire in 1973, railways in Peru, aggregating, with extensions now under construction, upwards of 800 miles, are operated by the Corporation or by subsidiary Companies which it controls. The Corporation also has four Steamers in service on Lake Titicaca, thus connecting its Southern Railway with railways in Bolivia.

It has further the right to work guano deposits up to the amount of 2,000,000 tons, of which about 935,000 tons have already been shipped. The shipments during the last five years have averaged about 80,000 tons per annum, and the revenue derived therefrom during those years has averaged £176,112 per annum.

The Revenue Account of the Corporation for the year ending 30th June, 1907, showed the following amounts accruing to the Corporation out of the net income of the Railway Companies, and from other sources:—

	£ s d	£ s d
The Southern Railway	91,784 3 0	
The Central Railway	101,829 13 9	
The Trujillo Railway	14,320 16 3	
The Payta Railway	6,600 0 0	
The Pisco to Yca Railway	4,262 15 2	
Lake Titicaca Steamers	14,061 16 9	
	232,859 4 11	
Less Debits—		
Chimbote Railway	£2,045 1 10	
River Desaguadero Navigation	3,597 4 0	
	5,642 5 10	
		227,216 19 1
Guano Account		186,279 15 3
Interest, Exchange, and Miscellaneous		20,735 15 2
Registration Fees		304 16 6
		434,537 6 0
Less Administration Expenses	£15,482 14 5	
Sundry Expenses	14,708 17 7	
		30,191 12 0
Net Revenue		£404,345 14 0

The Corporation, by the above-mentioned Agreement of the 20th June, 1907, with the Peruvian Government, undertook inter alia to construct about 300 kilometres of extensions of existing railway lines, the Government agreeing to pay to the Corporation thirty annuities of £80,000 each, beginning on the 1st July, 1907, and payable in equal monthly instalments, the sugar tax being declared to be specially chargeable therewith, and with priority over every other disbursement. The monthly instalments are being regularly paid.

It will thus be seen that last year's net revenue of	£404,345
together with the annuity payable by the Government of	80,000
gives	£484,345
From this must be deducted the new taxation imposed by the Government, which until 1917 is limited to an annual sum of	12,000
leaving, apart from any future increase of Revenue, a net sum of	£472,345

The Gross Receipts of the Railways for the eight months ending 29th February, 1908, according to cable advices, show an increase compared with the corresponding period of 1906-7 of 1,317,213 soles, equivalent to about £134,000, and the net receipts for the half-year ending 31st December, 1907, also according to cable advices, show a substantial increase over the corresponding period of the preceding year.

It is proposed to devote the proceeds of this issue (a) to the repayment of the Corporation's outstanding Short Term Notes (maturing on or before the 7th January, 1909), (b) to the cost of construction of the new Railway Extensions, and (c) to improvements of the Corporation's properties and rolling stock, to equipment for the existing lines, and to the general purposes of the Corporation.

It is expected that the New Railway extensions will not only be in themselves remunerative, but will also considerably increase the earning capacity of the existing lines.

Application for an official quotation on the London Stock Exchange will be made in due course.

The full prospectus contains particulars of contracts and further material information.

Applications, on the Form accompanying the full Prospectus (obtainable at the offices of the Corporation, its Bankers or Brokers) are to be forwarded, together with the deposit of £10 per cent., to Messrs Robarts, Lubbock, and Co., 15 Lombard street, London, E.C.

Registered Offices: 43-46 Threadneedle street, London, E.C., 7th April, 1908.

AUSTRALIAN PASTORAL CO., LIMITED (AND REDUCED).

The reduction was severe, no less than £46⅔,500 having been written off the ordinary share capital of £550,000 in obedience to a resolution passed on June 12 last. The ordinary capital is therefore now £82,500, and with all this water squeezed out the board is able to make a better show for the year ended June 30, 1907, a credit balance of £82,437 being brought out after paying management, working and other charges, as well as after writing down the value of the stud flock and providing for reorganisation expenses. The gross income, indeed, was £164,865, from which expenses of all kinds, including £17,259 paid as interest and £13,347 disbursed on account of rabbit prevention, took away £82,427. The balance originally brought forward was £57,144, but £56,500 of this was written off under the reorganisation plan, leaving only £644 to be added to the profit, and from the total of £82,437 £40,000 was transferred to reserve as a beginning, leaving £41,793, out of which the directors recommend a dividend of 6 per cent. on the consolidated ordinary stock, which means that the preference capital of £550,000 has been consolidated with the remainder of the ordinary shares into one stock, the aggregate amount of which is £632,500. After this dividend has been paid, £3,843 will remain to be carried forward. In addition to its capital stock the company now owes £250,000 on mortgages, the total liability having been reduced to this amount from £292,686. It has also borrowed £17,000 on short loan and owes £11,930 to various creditors, besides £8,000 on bills payable. The freehold and other estates have been brought up to £1,440,472 partly by additional improvements costing £105,483 made during the year and also by estates to the value of £284,988 purchased since the original property was acquired. This total, however, has been reduced to £1,300,705 by credits for improvements, sales of land, &c., and stock not yet replaced, to an aggregate of £139,767, and further brought down to £889,705 by the amount of £467,500 written off under the reorganisation scheme from the ordinary share capital, less £56,500 applied in reduction of the debit balance on revenue account at June 30, 1906. Stores stand at £9,030, and investments in Colonial Government securities, Railway and other debenture stocks, &c., at cost at £56,392, while wool unsold on June 30 but since realised stands in the balance-sheet at £80,974. Cash figures at £2,445 and debtors at £5,365, the total of the balance-sheet being thus brought down to £1,043,909. There is a long road to travel yet before the company is strong, but it has undoubtedly improved its appearance at the cost of the ordinary shareholder.

ALLIANCE AND DUBLIN CONSUMERS' GAS COMPANY.

The demand from private consumers during the six months ended December 31 showed some improvement and sales increased by 21,938,000 cubic feet to 716,845,000 cubic feet compared with a drop of 24,490,000 cubic feet in the corresponding half of 1906. Receipts from this source were consequently £7,260 up at £108,996, coin meter rents produced £2,601 more at £25,411, and residuals brought in an additional £4,006 at £20,651, but public lighting fell off by £508 to £8,040. The total income was £13,446 better at £167,248, but costs of manufacturing increased by £9,629 to £78,939, largely owing to the high cost of coal, and other outgoings were £4,592 heavier at £46,200 with the result that nett profits came to £775 less at £42,109. Six months ago the reserve was drawn upon to maintain the dividends at the old rates so that nothing was brought forward and the available balance was therefore £1,825 down at £42,109, while interest charges now require an extra £648 at £6,905. The directors consequently deem it prudent rather than continue to trench upon the reserve to reduce the distributions by ½ per cent. to 10 and 7 respectively, which will leave £196 to be carried forward. Capital outlay was £9,437, increasing the debit balance to £58,023, and although the reserves aggregate £75,374, £43,076 of this is invested and £12,474 has been utilised to pay for the Barrow Street gasholder, and the overdraft at the bankers has had to be increased by £22,142 to £50,556. Liabilities to sundry creditors and on bills payable have been reduced by £2,843 to £58,530 against which debtors for gas and meter rents owe £4,682 more at £74,027, but other debtors are £1,172 down at £13,845, and the company does not appear to have any cash in hand.

PHŒNIX

ASSURANCE COMPANY LIMITED

ESTABLISHED 1782.

NOTICE.—Owing to Good Friday the Investors' Review *will next week be published on Thursday morning, and the office will be closed from Thursday evening until the following Tuesday morning.*

The Investors' Review.

The Week's Money Market.

Bank Rate 3 per cent. (Reduced from 3½ per cent. on Thursday, March 19.)

Norfolk House, Friday Evening.

Not much has been done by the release of the dividends to ease the short loan market. At the end of last week seven-day loans commanded 2½ per cent., and they are now in good demand at 2¼ per cent. Call money has fluctuated between 2 and 3 per cent. or more, and yesterday most of the moderate amount due at the Bank had to be renewed at 3½ per cent. for a few days or up to a week. Much of this pressure, if not all of it, may be ascribed to the unwholesome scramble for the County Council loan, which if offered for to the extent of £100,000,000 would mean £5,000,000 locked up in the Bank of England. So extreme was the demand on the market for this purpose alone that the Bank was quite prepared for large fresh applications for advances, but the market escaped through with its own resources. The short supply of credits thus induced did, however, have some influence on discount quotations, which had displayed a tendency to slip below 2½ per cent. for three months' remitted bills, but hardened again to 2½ per cent. yesterday; one or two houses, indeed, quoted 2⅝ per cent., but foreign competition, though quite moderate, sufficed to prevent that rate from being effective, and strong holders of paper quoted 2 7/16 per cent. for threes, 2½ per cent. for fours and 2⅝ per cent. for sixes. These rates held this morning, and there is no disposition to give way much, except perhaps on June bills which the banks want. One discount house sold parcels of its short paper to the Continent to-day at 2 5/16 per cent., and our own joint-stock banks have been moderate buyers of May paper at 2¼ per cent. The supply, however, is under average.

Money remains, in market phrase, "usable," and 2¼ per cent. was sometimes paid to-day for all loans. The Bank renewed all the small amount due there, and lent a little fresh money until the day before Good Friday. It is said to have handed over the County Council application money to the London and Westminster Bank, which has lent it at 2 and 2¼ per cent. till the 22nd inst., and yet the open market has not felt relieved.

Perhaps whispers and hints of commercial failures have something to do with the prevailing unrest. There is said to be deep trouble in the grain trade, and neither the Egyptian nor the South American rottenness has been removed yet.

The Bank return is not suggestive of assured ease. Nearly all the £4,377,000 by which the Government balances have been diminished within the Bank week

was required to satisfy the demand caused by the repayments at the Bank, which took £3,658,000 of it, and as the increase in the active circulation was helped to the extent of only £75,000 by gold in from abroad, it took away another £1,050,000, leaving less than £279,000 to be added to the deposits, which are accordingly still £4,826,000 below the total of a year ago, and only £43,742,000 all told. The open market is therefore nearly at poverty boundary, and it still owes the Bank a considerable sum on bills, and the fact that other securities are £4,185,000 below the figure of a year back shows that little would be required to upset calculations and disturb the credit dealer's equanimity. Some of the decrease in other securities shown on the comparison of years may be due to the operations of the Bank of England itself, as the decrease of £1,659,000 revealed by the like comparison in its Government securities must be, but whether or not, nearly £6,000,000 of market reserves have in these two ways disappeared, and their disappearance must prevent the market from attaining to confidence about dead calm and a persistence of low rates this summer, notwithstanding the fact that the banking reserve of £28,217,000 is fully £3,000,000 larger than it was a year ago.

Abroad tendencies are equally uncertain. The figures of the Bank of France have not altered much, and such change as there is reveals a slight increase of strength, but the gold in stock still amounts to barely 57 per cent. of the active note circulation. It is therefore probable that we must continue to see gold go away, if not direct, from the open market, and, as a matter of fact, 217,000 sovereigns were withdrawn for Paris yesterday. We may likewise have to submit to gold withdrawals for Germany, while the open market discount rate is still above 4 per cent., in spite of the stronger exhibit of the Reichsbank, whose excess, or taxpaying, note circulation rose in the end of last month to £18,083,000 and is still £9,990,000. This uncomfortable position will probably be eased week by week, but it cannot give place to strength without additions to the Bank's stock of gold, and the comparatively straitened circumstances in which most German banks find themselves, as well as the almost intolerable demands made upon them by the borrowing of the States and the empire, must keep other markets on the watch for disturbing incidents.

Silver.

Except for a little bear covering the silver market has had practically no support, as the bazaar demand for the metal has ceased. Sellers, however, have been almost as hard to find as buyers, and the decline in quotations from day to day has, therefore, been confined to the shedding of $\frac{1}{16}$d. per oz. To-night's prices were 25$\frac{3}{16}$d. per oz. for cash and 25$\frac{5}{16}$d. per oz. for delivery two months forward, and represent a loss of $\frac{1}{4}$d. per oz. on the week in each case. Applications for the Rs. 20,00,000 of Council drafts on India were on the small scale to which we have become accustomed of late at Rs. 2,32,313, all in bills. Of these Rs. 2,00,000 were rejected as being at too low a figure, and only the Rs. 32,313 were sold at 1s. 3 29-32d., but later in the day a special sale of Rs. 1,87,000 was made at the same rate. The amount to be offered next Wednesday is reduced to Rs. 10,00,000. The India Council is offering £500,000 in demand bills on London at 1s. 3 29-32d. every Thursday. It sold yesterday £340,000, making £820,000 to date (*i.e.*, £70,000 first week, £410,000 lastweek, and £340,000 this), which suggests an early unearmarking of gold. The Straits Settlements Government is also offering exchange on London telegraphic transfers at 2s. 3$\frac{11}{16}$d. per dollar.

At the general court held at the Bank of England on Monday Mr. William Middleton Campbell, the late Governor, and Mr. Reginald Eden Johnston, the late Deputy-Governor, were re-elected Governor and Deputy-Governor, respectively, for the ensuing year. The proprietors on Wednesday elected the directors for the ensuing year, including a new candidate, Mr. Lionel Henry Hanbury, of Messrs. Wood, Field and Hanbury, of Mark Lane, hop merchants.

The Stock Markets.

A more cheerful feeling has pervaded markets this week, and yet complaints about want of business are as loud as ever. For all that there is more going on, and every market man is eager to find something to deal in. The prevailing temper has been well illustrated by the success of the new County Council issue, which is said to have been applied for nearly 40 times over, or as the *Times* put it, to the amount of nearly £1,000,000,000. Were this an indication that the investing classes are just bursting with money it would be most encouraging for the future, but that is not the reason why applications were so enormous. The *Times* City Editor hits the nail on the head when he observes that such a rush after allotments is due to the hunger of the market rather than to excess of cash or business. As a leading jobber explained to us the issue price was "just right." If the Council had been advised to ask 10s. more the probability is that the loan would have been coldly received. At par, however, it gave a small turn to applicants, the price of the old 3½ per cent. stock being about 101. "So-and-so has written for a hundred"—meaning £100,000—I will apply for two." "I for five," and so on. Hence the tremendous rush which caused the amounts applied for to swell out to a most extravagant total. Everybody saw his chance to make a little profit. The issue was popular with the investing classes as well, and we hope that, as far as they can be sifted out from the mass of applications, genuine investors will be liberally dealt with. But the great bulk of the applications represent mere "stagging," and by no means demonstrate that business is good in a general way. Such a distinct success, however, helped to lift the fog from markets, and to make them forget, if only for a moment, their multifarious troubles, the often dishonest competition of the outside broker and the struggle to dispense with the middleman everywhere.

Unfortunately the shadows will soon gather again were it for no other reason than that new issues will continue to be poured out at such a speed and in such magnitude as must choke the growth of general investment business. All sorts of demands are coming upon the market, and even if it has nothing whatever to say to the Prusso-German issue it will have chances

enough to "stag" and manipulate and get "bunged up" for months to come. The market has this week been asked to buy about £3,000,000 of Brazilian Treasury bills at a price to yield 5 per cent., and with an average of six months to run. A new issue of £2,000,000 in 4 per cent. debentures of the Canadian Northern Railway is about to be launched at 92, and a Paris bank is engaged in preparing for the emission of a large loan on behalf of the Rio de Janeiro Electric enterprises carried on by Canadian financiers. Home municipalities are also in need of money, and we shall have many demands made upon us by Canadian municipalities and industrial undertakings. There are also Australian and Indian loans waiting to be put upon the market. In short, it is borrow, borrow everywhere until one doubts whether the credit resources of markets can stand the strain.

Contangoes.

A very quiet settlement has been easily managed this week. Money has been cheap, bankers being content for the most part with 3 per cent. on their general account to account loans, and getting only 2¾ per cent. from the intermediary money broker. Such comfortable cheapness has brought back most contango rates to quite moderate figures, and even on Home Railways it has been quite the exception to pay 5 per cent., although on Brighton "A" the rate advanced from 8 to almost 10 per cent. owing to the enormous account open for the rise. On Yankee Railroad shares the rate has been about 4 per cent. and on Foreign Government bonds it has seldom been possible to get more, often the contango received did not pay the lender. The "bear" account in Canadian Pacific shares and Grand Trunk stocks has sometimes obviated the necessity of paying any contango whatever on them, and yet genuine holders of these securities are now delivering them, and a large quantity of Canadian Pacific shares have recently been shipped to New York, causing the market for them there to stagger a little in the middle of this week. At present, however, the "bulls" seem to be sure of a Pyrrhic victory, and the further they lift price the more hollow does the market become. There is nothing in the position of Canadian railways at the present time to warrant any person in putting money into a single one of the lower stocks of the Grand Trunk Company or into Canadian Pacific shares. Nevertheless Canadian Pacific shares are up 4 on the week, and the "bears" in despair.

There is still a considerable "bull" account in Argentine Railway stocks, and money was often 4½ per cent. to borrowers thereon. The speculators for the rise had also to pay rather heavy rates on Mexican Railway stocks; in fact they are quite 1 to 2 per cent. higher this account than at the end of last month, and the rate was likewise considerably heavier on Hudson's Bay shares, where selling is also persistent both by "bears" and real holders.

Trustee Securities.

Consols have maintained their price this week and most British Government issues have avoided relapse, in fact the Local Loans issue and 2½ per cent. annuities are alone down on the week. India stocks, however, show a drooping tendency, in spite of the fairly large business done in the 3½ per cents as a consequence of the release of the dividend money. Metropolitan Water Board "B" stock has also been heavy, but County Council issues have been braced up by the fine show made over the new loan, and all the other home municipal stocks have been quiet at or near previous quotations with, however, but little business going on. The colonial market has also been firm, and a dribble of investment money is finding its way into a fair number of stocks. Victorian loans in particular have been lifted by the encouraging statements about that colony's finances published a week ago. Dealings have also been noticeable in New Zealand stocks, but they have brought no change in prices. Colonial and foreign municipal issues, many of which are trustee stocks, have been just as much left alone, as usual, although a few of them have been put up in a way that indicates a minute demand.

Foreign Government Securities.

The market for Foreign Government bonds is as unsatisfactory as ever, and depends much upon the temper of the Paris Bourse, which has endeavoured to show a firm front to the world during the week, but has nevertheless sold some of its specialities without encouragement given. As explained elsewhere, the Bourse is against Japanese bonds, and they have been hammered at from Paris most days, but prices are not much lower on the week, in fact the largest relapse is ¾ in the second issue of 4½ per cents. Portuguese, Russian and Spanish bonds have also been heavy, and the financial position of all these countries is the reverse of encouraging. Portugal has escaped a republic for the moment, thanks to the measures taken to prevent a genuine expression of public opinion by the leading towns, elsewhere there being little or no public opinion to express, but the continuance of the present *régime* will not lift the country out of its quagmire of insolvency, and, as regards Russia, Count Witte has been delivering a gloomy speech, dwelling on the country's poverty, the necessity for retrenchment, and predicting that £100,000,000 will have to be borrowed if the Government really intends to rebuild its fleet and carry out large railway extensions. Spanish finance is also in a mixed condition, and subversive forces are active in that country likewise. So the Bourse is against the market for these securities, and had it not been for the extent of the account open for the fall prices would have gone lower. German and Prussian 3 per cents. have also been depressed, but our prices merely reflect those quoted on German markets, and traces of weakness are visible in both Argentine and Brazilian categories, but the business done is not worth dwelling upon.

Home Railways.

Home Railway stocks keep firm on the whole, in spite of the meagre amount of business going on, but yet some of those that were lately pushed up have relapsed, and the only exception to this downward tendency among the small stocks has been Metropolitan, which has been worked up to 44. Great Northern and North British preferred stocks are both 1½ down, but the deferred in both instances have risen, North British deferred as much as ¾. The greatest rise in this class of gambling counter, however, has been in South-Eastern deferred, which is being worked up for a good deal more than it is worth, because of all the talk about the visit of President Falliéres and the coming flow of French and other Continental visitors to our exhibition. Anything does to stir up gambling in rubbish of this description. The heavy stocks have justified their market nickname, and are either unaltered or rather lower, Midland deferred having dropped 1. Little sign of investment business is to be found amongst the debenture and other privileged stocks; in fact there have been fewer dealings this week than usual even in these slack times, and the few changes in prices are often adverse. District guaranteed stock, for instance, is 2 lower on the week, and the only rise worth mentioning is in the second preference stock of the Alexandra Docks and Railway Company, which has been marked higher to help the new emission. Great Central preferences continue to drop back, and the 1889 stock is 5 down. Traffic receipts are only £16,278 down on the week, and the returns may look more promising for some weeks yet, owing to the lateness of Easter.

Indian and Colonial Railway Stocks.

Some half-dozen changes have occurred amongst Indian Railways, four of them the wrong way. Colonial Railway securities have also been listless, and prices have tended downwards except for Canadian Pacific shares, already mentioned, the business in which continues to be larger than that done in all the other Colonial list put together. Grand Trunk earlier preferences have been heavy, and sensible brokers are advising their investment clients to clear out of the stocks before the recoil comes and the burden of that Pacific issue gets threatening. The speeches at yesterday's

meeting helped to strengthen this view. Mashonaland and Rhodesia debentures have fallen back again as nobody came to buy them, although the Chartered Company does proclaim the success of its new bond subscription. New Cape Central Railway debentures have also been depressed, with very little interest shown in them.

United States and Foreign Railroad Securities.

Although business is scattered, spasmodic and wholly manipulative in the Yankee market the Wall Street operators deserve credit for the skill and persistence they show in working prices up against adverse circumstances. Almost all the changes visible on the week are favourable to the extent of $1 or $2. Erie shares have naturally been lifted through the success of Mr. Harriman in finding the money to fend off a receivership, and up to last night there were no adverse movements worth noticing throughout the list. For all that Wall Street is in a top-heavy state, and people here ought not to think of touching any of these shares, although they may see them rise day after day. There are many receiverships yet to come, and the Erie road is not out of its trouble, while the business of the country cannot improve as long as rings and cliques do all the trading and play to fleece the community. The bond market is dead, or at the last gasp, for the time being, and prices go back as a rule when they move.

Changes in the Argentine Railway assortment are still the wrong way, and most of the leading common stocks have lost £1 on the week. The Great Western Company's stock is, in fact, 2 down, and Cordoba Central, Cordoba and Rosario and Entre Rios stocks have followed the lead of their betters. The small Uruguay group, however, keeps steady, perhaps because it does not attract the speculative player, and there has been no pronounced relapse in Brazilian Railways; in fact, San Paulo stock has gone up 1½, notwithstanding bear assaults upon the company's prospects, and that balances a like decline in Leopoldina stock. Mexican Railway stocks have also been diligently played with, especially the ordinary, and the bulls have had the best of it to a small extent on the week's transactions. The scheme noticed elsewhere for the unification of the Mexican Central and National Companies has not had any appreciable influence as yet on the prices of their securities, but the market is steady, and as far as we have been able to learn the plan will be accepted almost, if not quite, without demur. Cuban railways are still flat, and the ordinary stock of the United Railways Company has dropped back to 62.

Banks, Breweries and Docks.

The changes amongst Bank shares have been almost uniformly upward this week, National Bank of Egypt having rallied ¾ upon the encouraging review given by the chairman at the shareholders' meeting, and the same amount has been added to the price of the Anglo-South American Bank new shares. In fact, the only decline worth mentioning has been in Hong Kong and Shanghai shares, which are quoted 1 down. Standard Bank of South Africa shares are also heavy, but there has been no pronounced selling in any direction. In the Brewery market all is torpor, and not even the hope that a partial change of Ministry and consequent interruption of business in the House of Commons may kill the Licensing Bill, altogether has induced the most daring operator to come in and buy. For all that, we cannot help thinking that there will be bargains in this quarter one of these days, and, in fact, the first mortgage debentures of the Newcastle Breweries have been put up 30s. this week, while Peter Walker and Sons preference shares are fractionally higher on the report. Dock stocks have again shown weakness, especially the ordinary stock of the Surrey Commercial Company, which has dropped back to about 90, and grumbling goes on in the market that Mr. Lloyd George has not given enough in his new security for this stock. We are by no means disposed to believe that, but cannot now enter into the reasons for dissent, and it is worth noting, as compensation so to say, that the "A" stock of the company has been put up 7 and its debenture stock 5. Some of the stocks of the London Docks Company are also marked down a little, especially those against which no business is shown.

Commercial and Industrial.

We need hardly dwell much upon this great market which, in the vulgarism of Prince Bismarck, continues sullenly to stew in its own juice. Prices, in fact, dwindle for the most part, losses of 1s. to 2s. 6d. being more conspicuous than gains. Still there are improvements now and again, and they deserved to be noticed first. A slight rally has taken place in the "A" and 6 per cent. preference shares of the Assam Railways and Trading Company. Portland Cement debenture stock is also up, although the shares continue to recede, and slight gains are shown in Burma Oil shares, City of Santos Improvements shares, C. Arthur Pearson preference, United Alkali preference, and some others. On the other hand, Price's Patent Candle shares have fallen back ½, Artisans' Dwellings ordinary stock has lost 2½; the shares of Nitrate companies also continue to give ground on the whole, and some weakness is noticeable in the shares of the Gordon Hotels, English Sewing Cotton shares and debenture stock, the shares of H. Bucknall and Sons, and various Russian Petroleum companies. Thomas Tilling's debentures are 3½ lower, and Savoy Hotel shares as well as Short's, both issues, have receded, so there is nothing very exhilarating in this Sahara of a market.

Electric, Financial and other Minor Groups.

Prices have been fairly steady in the Electric group, with improvements in County of London debentures and in the shares of the Canadian General Electric Company, but for the most part the market is where it was a week back. In the Financial Land and Investment group, on the other hand, movements have been more numerous, although the signs of business are not more pronounced, and generally prices have kept steady. Hudson's Bay shares, the most actively dealt in of all the assortment, having gained ½ on the week, but Peruvian Corporation stocks still give way on the new issue, and Port Madryn shares have been decidedly flat, in fact, the whole Argentine group of Land companies is disposed to flinch a little, mainly because prices were driven up too fast and too far in anticipation of the fine results expected from the harvest. Among Financial Trusts the only striking changes we need mention are relapses of 8 in Gas, Water, and General preferred and 5 in the debenture stock. The other changes are also adverse as a rule and fairly numerous but Mexican Central Railway securities Trust "B" debenture stock is marked up 1 higher by way of acknowledging the fairness of the "merger" scheme.

Gas securities are firm with hardly any exception, but there has been no appreciable recovery in the Insurance group, although Equity and Law Life, Sun Fire, and Yorkshire Fire and Life shares are better, the first-named as much as 1 on the week. Most of the other changes, however, are downwards to the extent of ¼ to ½, although Thames and Mersey Marine is another exception, its shares having risen ½.

Beyond a relapse of ¼ in the two share issues of Pease and Partners and continued weakness in Cammell, Laird's ordinary shares and 5 per cent. debenture stock, there is very little of an exciting kind to be found in the iron, coal and steel group. Prices are stagnant almost throughout, and some faint weakness is visible in Vickers shares, but Head, Wrightson's ordinary have recovered and also South Hetton Coal and Stewarts and Lloyds ordinary.

Shipping securities give no indication as yet of any flow of investment money in their direction, and Cunard shares are fractionally down on the week as well as Pacific Steam shares. Bucknall shares are also lower, and the only improvement worth noting is a rise of 2 in the debentures of the Direct West India Mail Company. A few movements up and down are shown in the Tea, Coffee, and Rubber group, the largest being a rise of 2 each in Assam shares and the

debentures of the Lungla Sylhet Company. Eastern Assam shares, however, have given way, but on the whole Indian group is steady.

Telegraph and Telephone securities have also been firm with recoveries in Anglo-American preferred and deferred stocks, in Great Northern Telegraph shares and in the second preference shares of the West India Company. Among Tramway and Omnibus things, the heaviest movement has been a relapse of 1½ in the 5 per cent. debenture stock of the B.E.T. Company. Calcutta Tramways shares have also been flat, but Sao Paulo Light and Power shares are quoted 2 up.

Friday Evening.

County Council loan allotments were promptly issued by the Bank of England, and by appearances it seems to have given £1,000,000 to the small applicants and £1,750,000 to the "stags." On applications between £800 and £5,000 the allotment is £100, and beyond £5,000 and up to £10,000 £200. Applications for from £20,000 to £25,000 receive £400, and those for £50,000 get £900. Some say the demonstrators who asked for £1,000,000 or so get only 1.7 per cent. and 1.8 per cent. of the amount written for, and in their case at least the two days' interest lost on the application money will wipe up the market profit. Those who wrote for £100 or £200 are said to have been allotted £50.

At the start the scrip touched 1⅝ buyers for the special settlement, but the price soon weakened and closed at 1 premium for cash and 1⅛ premium for the special settlement. Other scrip quotations were:—New Chinese par to ¼ premium for money, ⅛-⅜ premium for the special settlement, Peruvian debentures 1¼ to 1 discount and Trunk Pacific ¼ discount to ¼ premium. London and North-Western Railway preference stock is said to have been applied for three times over, and the scrip was quoted to-night at 1 to 1½ premium.

General business on the Stock Exchange has been insignificant, and prices often unsatisfactory, but a fair show of strength was made at the end. Home Railways drooped, Grand Trunk things fell on the traffic figures and recovered, Yankees were demonstrative, Japanese bonds were firmer on the Tobacco monopoly figures and Kaffirs and Tintos lost ground. On the whole a holiday market.

Calls due up to and including Thursday next total £2,600,000 or thereby, including £600,000 required by Brazil on Monday, and £1,250,000 by India and £200,000 by the Grand Trunk Railway on its guaranteed stock on Wednesday.

THE WEEK'S PRICE MOVEMENTS.

BRITISH FUNDS, &c.—Rise: Irish Ld. Stk. ⅜, to 90⅜-½, do. Acct. ⅜, to 91-⅛, Local Loans Acct. ¼, to 98⅜-9½, Metrop. Police 1, to 96-8, Indian Rupee Paper 1854-5 ½, to 63½-4½. **Fall:** 2½ p.c. Ann. 1905 ¼, to 85½-6, do. Acct. ½, to 85½-6, Transvaal Govt. Acct. ¼, to 98-½xd., India 1931 Acct. ¼, to 100¾-1½, Indian R. Paper 3½ p.c. ¼, to 62-4.

CORPORATION AND COUNTY STOCKS.—Rise: L.C.C. 3 p.c. Acct. ½, to 92-3, do. 3½ p.c. Stk. and Acct. both ⅛, to 100⅜-½, Corp. of Lon. 3 p.c. 1923 1, to 95-7, Bristol 3 p.c. Red. 1, to 88-90, Edinboro' 1, to 92-4, Newcastle-under-Lyme 1, to 82-4, Newport (Mon.) 1, to 83-5, Oxford 1, to 86-8, Walsall 1, to 83-5, W. Ham 3½ p.c. 1, to 86-8, Weymth. and Melcombe 1, to 82-4. **Fall:** Metro. Water "B" Acct. ⅛, to 92⅛-3½, Metrop. 3½ p.c. Cons. ⅛, to 102⅜-¾, Liv'rool 3½ p.c. 1, to 103-5, Leeds 3½ p.c. ⅛, to 90-101.

COLONIAL AND PROVINCIAL GOVERNMENT SECURITIES.—Rise: Brit. Columbia 2, to 102-4, Canada (Dom.) 3 p.c. ⅛, to 96-7, Cape 4½ p.c. Dbs. 1, to 101-3, do. 1917-23 Bds. ⅛, to 103-4, do. 4 yr. Dbs. ⅛, to 100-1, do. 10 yr. Dbs. ⅛, to 100⅛-1⅛ xd., N.S.W. 1915 1⅛, to 102-4, Quebec (Prov.) 5 p.c. Stlg. 1, to 103-5, Queensland ⅛, to 102-3, Wstrn. Australia 4 p.c. 1, to 100-2, Cape 1882 ⅛, to 103-4, do. 3½ p.c. Cons. Ins. ⅛, to 94-5, Hong Kong 1, to 99 101, Natal 3½ p.c. Ins. ⅛, to 97⅛-8⅛, do. 3½ p.c. Company Reports and Balance Sheets.

**** *The Editors will be much obliged to Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-sheets direct to the Office of the* Investors' Review, *Norfolk House, Norfolk Street, W.C., so as to ensure prompt notice in these columns.*

CHARTERED BANK OF INDIA, AUSTRALIA AND CHINA.

The year 1907, the accounts for which have now appeared, did not bring much additional expansion in the business of this powerful bank, but probably enough its accounts, when made up at December 31 last, bore some trace of the contraction of business that has occurred the world over since last October. For all that the gross profit was £12,142 higher at £521,181, and after allowing for an increase of £8,217 in the working expenses, which came to £252,999, there still remained nearly £4,000 of additional nett revenue. As the balance brought in was also, at £93,369, £7,258 up it follows that the balance distributable was £11,183 higher at £361,552, out of which an interim dividend was paid in October last at the rate of 13 per cent. per annum on the old shares. This left £291,552 still to be dealt with and £17,068 of that has been appropriated to pay interest on the new capital up to the end of the year. Then a final dividend on the old shares at the rate of 15 per cent. per annum, making 14 per cent. for the whole year as against 13 per cent. for 1906, is to be distributed, while the reserve fund gets £50,000 as against £100,000 a year ago, an ample addition in the circumstances, seeing that the premiums on the new shares help powerfully to bring this fund up to its balance-sheet figure of £1,475,000, which is £275,000 more than the amount of capital paid up. With the £50,000 now to be added the reserve will be brought up to £1,525,000 which is £325,000 more than the paid-up capital. Furthermore, £10,000 is again added to the officers' superannuation fund and £25,000 devoted to writing down the cost of bank premises, leaving a balance of £129,484 to be carried forward or £35,915 more than was brought in. That surely is a most satisfactory record. Balance-sheet changes are here and there indicative of prudently contracted engagements, but the note circulation is £106,314 up at £659,916. Liabilities on current account, however, show a decrease of £555,608 at £5,587,830, but a year ago this item showed an increase of £1,069,000. Fixed deposits are also down £360,255 to £6,700,901 and bills payable at £1,743,119 show a decrease of £166,623, while acceptances are £62,536 up at £1,226,683. Loans payable against securities also show an increase of £112,508 at £1,495,675, and the item "sundry adjustments and other accounts, including provision on account of bad and doubtful debts and other contingencies," shows an increase of £43,812 at £508,035, while sundry liabilities are down £21,731 to £161,580. The first item on the assets side is cash in hand and at bankers, and it shows a decline of £301,393 at £2,761,781, but against this there is an increase of £283,454 in the bullion held, whose total at the end of the year was £622,343. Government securities are again reduced, this time by £77,313 to £1,168,088, the decline a year ago, however, having been nearly £410,000. Security lodged against note issues and Government deposits shows an increase of £110,000 at £489,056, and bills discounted and loans are up £462,677 to £8,631,781. Bills of exchange held, on the other hand, exhibit a decline of £499,499 at £5,663,800. The amount due by agents and correspondents is £230,623 and bank premises show an increase of £19,015 at £262,462, the total of the balance-sheet being £89,015 higher at £21,075,232.

YOKOHAMA SPECIE BANK, LIMITED.

In the second half of 1907 this well-known Japanese bank made a gross profit of 12,835,898 yen, which was 3,182,518 yen more than in the second half of 1906. As the balance brought forward was also about 261,000 yen up at 1,055,059 yen, it follows that the entire disposable balance of 13,890,956 yen was up about 3,444,000 yen. On the other hand, expenses, including interest paid, taxes repaid, provision for bad and doubtful debts, bonuses for officers and clerks, &c., took 3,373,263 yen more at 10,809,404 yen. Even so, the free balance was 3,081,552 yen, and out of this the directors place 550,000 to the reserve fund, pay the usual dividend at the rate of 12 per cent. per annum and have 1,091,552 yen left to carry forward. It is explained in the report that owing to the heavy depreciation of silver towards the end of the past half-year the directors have decided to write off 480,000 yen from the silver depreciation fund, in order to adjust the rate of the silver fund held in China, and in future the silver depreciation fund will appear as a separate item in the balance-sheet. It is so entered in the account before us, and amounts to 520,000 yen, while the other reserve funds stand at 14,050,000 yen, which is an apparent decrease of 510,000 yen on the figure of a year ago, no doubt because of the adjustments just mentioned. The balance-sheet further shows an increase of 3,000,000 yen in the paid-up capital, which is now 24,000,000 yen. Notes in circulation have fallen off by 1,214,326 yen to 6,070,898 yen. Fixed deposit and current account liabilities are higher by 2,542,000 yen at 125,505,337 yen, and bills payable are 18,676,107 yen up at 128,202,844 yen. Cash in hand and at bankers shows a decrease of 3,237,466 yen at 27,070,272 yen, but a year ago this item was 5,635,000 yen higher than the year before at the same date. Investments have shrunk by 4,092,666 yen to 16,531,016 yen, and bills discounted, loans, &c., show an increase of 4,437,620 yen at 106,633,266 yen. Bills receivable and other sums due to the bank show the largest increase of all, viz., 24,912,993 yen, making the total 146,757,791 yen. Bullion and foreign money held was brought down to a very small item a year ago, and it now shows an increase of 1,881,511 yen at 2,687,759 yen, while bank premises are valued at 170,446 yen less, the figure being now 1,777,582 yen, bringing the total of the balance-sheet up to 301,457,885 yen or about £31,000,000 and an increase of 23,731,304 yen. The bank must have profited largely by the high rates for money prevailing the world over, and not least in Japan, towards the close of last year.

BUENOS AYRES WESTERN RAILWAY.

In the December half-year this important Argentine traffic artery earned gross £912,539 or £22,296 less than in the corresponding half of 1906, and as working expenses increased by £5,449 to £560,156, the decrease in the nett profit was £27,745. The nett revenue was accordingly only £352,383, but it was brought up to £508,072 by the balance of £140,491 brought forward and by interest, exchange and transfer fee receipts, together with a small sum of £745 received on account of the Chacarita branch of the Buenos Ayres and Pacific Company. After meeting all fixed interest charges, dividends on the preference shares and income-tax, £370,103 remained, out of which the board has decided to pay an interim dividend at the rate of 6 per cent. per annum, tax free, on the ordinary stock, thereby reducing the balance carried forward to £114,868. Working expenses were 61.38 per cent. of the income compared with 59.34 per cent. in the December half of 1906, and the board explains that the ratio rose as a natural consequence of the partial failure of the maize crop, but it sees no reason to expect that the results for the whole year will be other than satisfactory to proprietors. Passenger receipts rose by £21,836 or nearly 10 per cent., but the goods traffic fell off by £68,421 or nearly 12 per cent., and this was not compensated for by the increase of £19,372 or 32.26 per cent. in the receipts from the carriage of animals. On the whole, however, the results are not so disappointing, because from wheat and maize alone the decline in income was £93,916. In other words, special sources of traffic fell off, but the general business of the company in passengers, live stock and general goods continued to increase.

IND, COOPE AND CO., LIMITED.

The balance-sheet suspense account of this large brewery company has been increased during the past year ended October 5, 1907, to £774,000 by the amounts written off for depreciation, provision against doubtful loans, book debts and cash debtors and sundry amounts reserved against the compensation fund levy, &c. This does not sound well, and such a deficiency loudly calls for the reorganisation of the capital account, but the directors say that the proposals to be made for this purpose are held back pending the fate of the Licensing Bill, "which is much more drastic and confiscatory than anyone could have anticipated." The result, should the Bill become law, will, in their opinion, be "ruinous to practically every brewery company in England," which is going beyond the probabilities, although the Bill is undoubtedly a bad one. So the company is meanwhile hung up, which is a pity, for it has a large business and seems capable of earning a considerable nett revenue if only the capital were readjusted to its capacity. Last year the profits came to £165,777, after charging £18,411 for repairs and maintenance, but without providing for depreciation, which has been carried to the suspense account. This figure is over £3,000 less than the income for the year ending October 5, 1906, but almost £10,000 better than the result for the year before that, so the board is able to pay £9,160 to the compensation fund and to meet interest on mortgages and deposits, as well as on the debenture stock, with £10,255 left to carry forward or £346 less than in the previous year. This will bring the total amount at credit of profit and loss up to £17,618, which is not much against a share capital paid up of £1,448,000, but then this company is swamped in debt. Its various mortgages alone come to £2,250,000, and it owes depositors £122,877, besides a debt of £157,142 due to bankers and others. Sundry creditors, too, can demand £311,268 from it, while sundry debtors do not seem to owe it anything. And the debts thus shown are not really all the liabilities borne by the concern, for the brewery property, plant, utensils, &c., of a book value of £3,426,387 has prior mortgages upon it, not brought into the balance-sheet, to an amount of £636,422. Stock of ale, casks, horses, &c., is entered at £300,699, cash at £41,178, exclusive of £13,187 in the hands of trustees for the debenture stockholders, and the company holds £75,974 nett in the form of investments made in connection with the irredeemable mortgage debenture stock, the gross amount of which is £102,594, brought down to the figure above named by £26,620 reserved against depreciation and

charged to the suspense account. Loans and interest, customers' balances, rents, &c., figure at £536,449 amongst the assets, but are brought into the balance-sheet at only £352,954 owing to deductions amounting to £183,495, consisting of £143,625 reserved against contingent losses and £39,870 kept back as provision for discounts, &c. Yet the business is a big one, for the gross profit on brewing in the past year was £386,123 and the nett profit on wines and spirits, distillery, bottling and sundries is entered at £27,324, the gross income from all sources, including £32,029 from rents, being £458,289.

PETER WALKER AND SON, WARRINGTON AND BURTON, LIMITED.

In 1907 this great Burton and North of England brewery and tied-house business made a nett trading profit of £266,500 and received £11,657 as dividends on investments, its entire nett income having been £293,800, of which £280,881 remained after paying directors', trustees' and auditors' fees, income-tax, &c., which took £12,919. Out of this balance the board meets the debenture interest and the preference share dividend, and is able to pay 20s. per share or 10 per cent. on the ordinary shares, to add £45,000 to the reserve funds, raising them to £495,000, and to put aside £24,500 to an investment depreciation account, leaving £21,381 or £5,766 more to be carried forward. The balance-sheet is extremely condensed, but shows sundry creditors for £104,554 and sundry debtors for £68,417. Stock-in-trade is entered at £244,172 and the value of plant, casks, stores, &c., is £46,165. During the year, undeterred by Licensing Bills or anything of that kind, no less than £203,323 has been sunk in fresh purchases and improvements, less depreciation not stated, bringing the total value of the freehold and leasehold properties and goodwill up to £3,190,556. The company's own debenture debt is only £1,000,000, but the total of the balance-sheet is now £3,785,435, including the undistributed portion of last year's profits. This company, however, has two dependent concerns, viz., Peter Walker and Son Property Corporation, Limited, and Peter Walker and Son Property Corporation No. 2, Limited, the debts of which are also a liability of the parent company. Property Corporation No. 1, for instance, has a 4 per cent. first mortgage debenture debt of £400,000, and No. 2 a similar debt of £250,000, interest and principal of which is guaranteed by the brewery and tied-house company. These two concerns have also share capitals, that of No. 1 being £225,500, of which £20,000 is ordinary shares and £202,500 4 per cent. guaranteed preference stock, while Corporation No. 2 has a share capital of £125,000, of which £100,000 is in 4 per cent. £10 preference shares and £25,000 in £10 ordinary shares, all fully paid. Presumably the income of these two corporations is provided by the rents paid; thus Corporation No. 1 shows an income from properties of £30,000 and Corporation No. 2 an income of £18,000, all of which comes out of the revenue of the parent company and would doubtless appear among its current charges if anything like an adequate profit and loss account was displayed. Unlike so many of the brewery concerns, not a syllable appears in the meagre report of Peter Walker and Son, Warrington and Burton, Limited, with reference to either past or contemplated brewery legislation, and yet this concern would obviously be more deeply affected by drastic reductions in the number of licensed houses than almost any other large brewery in the country.

WILLIAM WHITELEY, LIMITED.

We fear this business is not doing quite so well as in former years but an exact comparison is impossible because the directors have decided to make up their accounts on February 14 in each year instead of at the end of that month, so the report and balance-sheet just issued cover a period of 11½ months instead of a full year. For that time the trading profit was £97,429 which shows a decrease of £10,436 on the entire previous year. Other income, including rents and dividends and interest on investments, brought the revenue up to £112,323, and after meeting all outgoings, including £10,410 or £475 less assigned to depreciation, £2,961 paid as directors', auditors', and trustees' fees, and £1,500 charged for income-tax, the free balance is £97,452 which, with the £15,140 brought forward, enables the board to meet the debenture and preference interest, to place £10,000 to reserve, raising it to £70,000, to set aside £5,000 against depreciation of investments, a sum "considered ample," to pay the preference dividend and to give the ordinary shareholders 6 per cent., which is 1 per cent. less than the dividend of a year back and 3 per cent. below the distribution of two years ago. Then £2,105 is devoted to provide the proportion of profit due to the management shares, leaving £15,430 to be carried forward. As far as one can judge depreciation seems to be allowed for on a modest scale in various directions, but the cost of the plant, machinery, fixtures, fittings, &c., including glass houses at Hillingdon nurseries and growing fruit trees at Hanworth Farm, has been slightly raised last year to £166,191, the additions during the year having exceeded the allowance for depreciation in that direction by about £50. Against this entry there is a special reserve of £40,000, made up partly out of premiums on new share issues as explained last year, but there is no mention of any intention to let or sell this farm and nursery garden property. Freehold land and buildings have been increased in cost during the year by £1,584 to £958,570, and the depreciation on leasehold buildings has been only £1,542 against additions amounting to £1,939, so that the total here also is slightly higher at £280,121. Working plant and utensils is an item against which £39,294 figures; horses, harness, vehicles, &c., stand at £20,407, and the working capital and balance due from lessees on termination of the lease of the Hanworth and Hillingdon estates amount to £29,424, while advances on mortgage figure for £33,223, stock-in-trade for £244,573, or nearly £13,000 more than a year ago, and book debts and debit balances due to the company, including debts on deferred payments less reserve for discount and doubtful debts, form a mixed item showing an increase of £11,222 at £214,044. Investments figuring in the books at £141,779 have now been written down to £136,779, and the cash amounts to £50,224, the total of the balance-sheet being £2,172,850. The share capital and debenture debt about equal each other, shares being £100 more, thanks to the £100 of management shares, whose holders receive £2,105 for the year. The debenture debt is £900,000 and the banking department shows deposits and current account balances amounting to £93,960, while the company owes trade creditors £81,186 and another £18,136 on accrued charges and sundry credit balances. Financially therefore its position is still fairly strong and healthy looking.

FREDERICK GORRINGE, LIMITED.

Trading profits for the year ended February 20 amounted to £23,564, including transfer fees £23, being a further decline of £1,620, and adding to this £4,028 brought in a gross credit of £27,592 is shown. Directors' fees and manager's remuneration take the usual £3,400 and interest on loans £1,390. A transfer is made of £625 as before to leasehold sinking fund, but £500 more at £1,500 is added to furniture and fittings suspense account. So after paying the preference dividend the ordinary shares get 2 per cent. less at 5 per cent. for the year and there remains only a slightly decreased sum of £4,010 to go forward Stock-in-trade is £4,361 higher at £73,831 and sundry debtors are £4,225 up at £43,596 against an increase of £3,407 to £12,406 in sundry creditors, but cash has dropped from £14,103 to £8,818. Property stands at £152,190, showing further outlay of £37,510, and includes leaseholds as taken over at formation of the company £15,552, premiums on new leases and stamps £51,483 and expenditure on new buildings to date £85,155. Furniture, fixtures and plant are £9,144 higher at £34,872 and goodwill still remains at £100,854. There is a liability on loan account of £47,000, of which £32,000 is secured on leasehold property. Leasehold sinking fund with the year's accretion will total £3,319 and is invested as to £2,635 taken at cost, but no separate investments represent the tiny reserve of £5,000.

CALCUTTA TRAMWAYS CO., LIMITED.

Only four miles were added to the track in operation during 1907, making a total of 27 miles, but the train mileage run increased by 44,841 and the number of passengers carried rose by 1,375,338 to 27,488,431. With an advance of 0.38d. to 9.26d. in the earnings per train mile, the receipts from all sources were £7,973 better at £167,567, but the whole of this gain and considerably more was swallowed up by heavier outgoings. Power expenses took £2,024 more, owing to the plant having to be overhauled in consequence of the excessive pressure put upon it by the increased traffic. Maintenance and repairs cost an extra £7,164, principally because of the difficulties experienced in maintaining the cars without adequate space for repair shops, and in general expenses an increase of £6,418 was due to larger income-tax and to the settlement of claims of the Municipality for track rents in excess of the amount agreed for the original system. With these and an increase of £1,711 in traffic expenses, the total charges required £104,236 or £17,316 more and nett revenue was consequently £9,345 smaller at £63,333. Adding £823 brought forward and £2,908 from interest the disposable total was £67,064 compared with £75,475. Nothing was required for interest on new shares, which a year ago took £8,152, but on the other hand the interim dividend came to £5,707 more at £24,082 and preference interest rose by £4,503 to £8,253. The directors therefore have to reduce the dividend for the year by 2 per cent. to 6, but in view of the heavy charge for maintenance they add nothing to depreciation fund and can increase the sum carried out by £955 to £1,778. Capital expenditure was £145,408, making a total of £1,206,861, against which the depreciation fund, after adding £2,185 for interest on investments and deducting £5,817 for renewals, stands at £48,080. Investments are valued at £53,757 and stocks and stores at £60,755, and as the credit balance on capital account is only £41,439 liabilities to sundry creditors are naturally fairly heavy at £20,598, but the company has £3,735 due to it and £10,849 in cash or loans. The directors say that after their repeated disappointments they hesitate to name a time for the opening of those extensions which are practically completed, but that it is confidently expected by those in charge that the Howrah system and the Behala line will be ready for traffic by May 1.

CORPORATION OF WESTERN EGYPT, LIMITED.

This company has two big undertakings in hand in the building of the Western Oases Railway and the development of agricultural land in the Oases by means of wells. As the latter is dependent for its economical working on the railway, construction has been pushed on as rapidly as possible, and the directors now report that the line is now completed from Karga Junction on the Egyptian State Railways to the town of Khargeh, the centre of the Oasis, a distance of about 122 miles. As regards the oases the boring of wells has been systematically carried on by steam machines and the number is now about 40, some of which give a discharge of considerably more than 100 gallons of water per minute, while one reached upwards of 380 gallons a minute when finished and has since been measured at a higher figure. Upwards of 600 feddans of land have been experimentally cultivated, the crops grown successfully including cotton, wheat, barley, beans, bersem, lucerne, dhurra, rice and sugar cane, while fruit and kitchen vegetables of numerous varieties have also given satisfactory results. The soil is said to be rich in phosphates, requiring only a dressing of nitrate of soda to enable it to give a maximum yield and the structure is all that can be desired for agricultural purposes. Even on the

newly cultivated land the yield of cotton in the past year was but little short of the average yield in the Nile Delta, the Ashmouni variety, which has proved the most suitable, averaging no less than 1,391.4 lbs. per feddan on the largest of the experimental crops. Expenditure on the railway in the 12 months ended September 30 was £115,416 making a total of £215,156, while £19,166 was spent on the oases and altogether the outlay on the property now amounts to £440,372. General expenditure, less £1,495 from interest, &c., comes to another £12,366 and preliminary expenses stand at £33,546. Sundry creditors are consequently heavy at £25,470 and £22,000 has been borrowed from the bankers against which investments are valued at £38,606, the market price being £37,924, and the company has £9,684 in cash.

ASSOCIATED OMNIBUS CO., LIMITED.

This company followed the example of other 'bus companies and joined the rush for motors, but has found the experiment a very costly one, and in July last it was considered expedient in the interests of the shareholders to withdraw the motor 'buses owing to the unsatisfactory results obtained. The step, however, did not prevent the year ended December 31 from being an exceedingly disastrous one, and a variety of reasons are set forth to account for the miserable display made, amongst others being the inclement weather and the excessive competition. Traffic receipts from these causes dropped by no less than £16,820 to £58,305, and with a smaller miscellaneous revenue the total income showed a decrease of £17,497 at £64,584. On the other hand, the high price paid for provender was against any important reduction in expenses, and these were only £1,824 down at £77,098, leaving a loss of £12,154 compared with a profit of £3,159 for 1906. Deducting the balance of £2,329 brought in, the nett loss on working was £10,185, but after charging debenture interest and income-tax and writing off £369 for loss on investments and £100 for a lease relinquished, the deficit is brought up to £12,600. This, however, does not show the real state of affairs, as although the motors were withdrawn in July, their cost still figures as an asset, and the auditor points out that no depreciation was allowed on them, while he seems to be doubtful regarding the value of the item of "Times" or goodwill. Stock-in-trade, *i.e.*, horses, 'buses, machinery, &c., including £1,300 for motor spare parts, are £4,973 down at £139,852, but the details given are not sufficient to enable us to say wherein this reduction consists. Leases are £100 down at £12,634, while the various reserves have been increased by £192 to £6,494, and are represented in part by an investment of £3,735 in L.C.C. stock. Creditors come to £5,559 or £2,320 less, against which debtors owe £2,695, and cash stands at £3,735, the last two items with investments showing a decrease of £11,101.

CONSOLIDATED WATER WORKS COMPANY OF ROSARIO, LIMITED.

The number of services added during the year ended December 31 was not so large as in 1906, the increase being 918 against 1,354, but the revenue in currency advanced by $86,607 to $776,794 compared with a rise of $82,362 in the preceding twelve months. In sterling the gross income was £7,936 up at £70,260, of which working expenses took £16,265 or £2,946 more and management charges £12,486 or £1,063 more, leaving with £23 from transfer fees a gain in nett profits of £3,918 at £41,532. Reserve for capital redemption receives £3,290, making it £23,036, another £5,000 goes to contingency fund, and after repeating the dividend of 7 per cent. on the ordinary shares, £5,071 against £2,652 is carried to the ordinary share dividend account, raising it to £19,362. The consumption of water increased rapidly during the year, and it has been necessary to give constant attention to the enlargement of the works in order to keep pace with the requirements of the city. Considerable additions have been made, and the outlay for the twelve months amounted to £28,682, making a total expenditure of £524,309 or £44,309 in excess of the issued share and debenture capital. In addition to the reserve and contingency funds above mentioned there is a depreciation fund of £6,000, but the company is still hampered by lack of means. Sundry creditors are £4,584 higher at £13,543, while on the other hand debtors have dropped slightly to £10,329, bills receivable are £2,496 down at £3,527, and cash has dwindled from £16,291 to £6,169. The company therefore has rather urgent need of further funds, and the directors propose to offer at an early date the unissued 5,000 £10 ordinary shares to the preference and ordinary shareholders at par.

RIVER PLATE GAS CO., LIMITED.

A further increase of over 21 miles to the network of mains during the past year brought the total up to about 451¾ miles, and on balance 3,404 new house services were added to the system. In spite of this, however, the nett revenue, after charging £20,718 for upkeep of the works and mains, showed a decrease of £4,286 at £123,768, for which no explanation is offered. Receipts from interest, profit on exchange, &c., were also lower by £1,504 at £5,557, while on the other hand London office charges rose by £634 to £12,219. Debenture interest having been met with £12,506, the nett surplus was £6,424 smaller at £104,600, but £25,247 or £4,025 more was brought forward, giving an available total of £120,847 against £132,247. The directors therefore repeat the dividend at 8 per cent. and maintain the appropriation to reserve at £20,000, but they put nothing to plant renewal fund against £5,000 a year ago, and after transferring £2,052 or £52 more to old age and pension fund they raise the sum carried out by £2,557 to £27,794. Outlay on the property was again heavy at £54,037, owing to the new water gas plants at Corrales and Belgrano works, extensions of mains, &c., and the total now stands at £1,288,049, exclusive of £24,171 for freehold premises in Buenos Ayres. On the other hand, the reserve now amounts to £185,000, and the plant renewal fund to £5,000, of which £114,493 is represented by investments. Sundry creditors and bills payable stand at £31,366 against £34,148 due from sundry debtors, and stocks of coal, gas, residuals, &c., are valued at £115,767, but cash because of the capital expenditure has dropped by £49,147 to £39,823.

NATAL LAND AND COLONISATION CO., LIMITED.

During the year ended December 31 the company sold 12,928 acres of land at a profit of £8,471, of which £3,075 was received in cash and £5,396 is outstanding at interest. The unrealised profit on land sales brought forward, less £2,040 written back on account of sales cancelled, was 32,345, of which £3,561 was received in 1907, and the amount now outstanding is £34,180. Cash receipts for the twelve months were £5,844 down at £6,636, but the directors point out that the falling off in profits on sales effected was only £2,938, and ascribe the great difference between the available profits to the fact that only 10.4 per cent. of the unrealised profit came in as against 19.0 per cent. in 1906. Rents of land and town properties (besides arrears £5,966 and exclusive of accruing rents) produced £24,771 or £481 more, and interest (exclusive of arrears £1,230 and accruing interest) gave an additional £967 at £5,106, so that the revenue from all sources was only £1,490 down at £38,344. On the other hand, increases in various items of expenditure were insignificant, and were more than counterbalanced by reductions in income-tax and land department charges, leaving the nett balance £700 smaller at £24,996. With £30,587 brought in, the disposable total was £55,583, and after meeting preference dividend the ordinary shares get their usual distribution of 5 per cent., but have to forego their bonus, and £34,604 is carried forward, of which £34,180 is the unrealised profit noted above. Landed property, consisting of 236,847 acres, and house and town properties stands at £410,037 or £8,007 less, but the amount due from purchasers is £2,762 higher at £83,560, sundry debtors came to £3,100 or £1,493 more, bills receivable to £1,000 more at £2,000, and cash has risen by £926 to £5,434. The directors have deemed it advisable to write another £2,000 off the investment in British Settlement of South Africa, Limited, although the prospects of that company seem to be improving, and the item now stands in the balance-sheet at £500. On the debit side the only changes worth noting are an increase of £1,500 to £12,000 in loan from bankers, and the appearance of a new item of £2,610 for rent suspense account secured by cash on deposit and a reduction of £1,004 to £3,796 in sundry creditors.

SCOTTISH PROVIDENT INSTITUTION.

In 1907 this company's business yielded a nett premium income of £729,466 and a total income from all sources of £1,271,314. Claims, including those arising on endowment policies, with bonus additions, absorbed £666,442 or about 52.4 per cent. of the total income, but that income includes £56,709 of capital received from annuities sold. These payments, however, were well within expectation, and more than three-fourths of the claims were in respect of policies which had participated in the surplus, and the bonus additions to which averaged close on 50 per cent. of the original sum assured. Expenses and commissions took slightly less than 12 per cent. of the premium income, and the interest earned on the funds averaged £3 19s. 1d. per cent., nett we presume, *i.e.*, after deducting income-tax. At the end of this year the septennial investigation will take place, and in anticipation thereof the directors have set aside £300,000 towards an investment reserve fund against the depreciation in the securities, which is a prudent step, although the lower prices may only be temporary. At the end of the year the funds were increased by £374,710 to £14,139,867. During the stress of the October panic the directors dealt liberally with those of the institution's policyholders in want of money, and amongst the assets loans on policies within their surrender value figure for £1,196,966. The nett new premium income of the year, it might be added, was £82,981, of which £42,458 represented a single premium.

STATE FIRE INSURANCE COMPANY.

In 1907 this company's nett premium income was £165,326 and its total income £170,487. Nett losses came to £86,759 or about 52.70 per cent. of the premium income, and commission and expenses took £58,444 or about 35.41 per cent. of the premium income. These disbursements left a credit balance of £36,409, including £11,125 brought forward, from which £299 was written off, being 10 per cent. of the book value of the company's office furniture, leaving £36,110, out of which £15,116 has been set aside as reserve for unexpired risks, £10,000 placed to general reserve, and £2,952 to investment fluctuation account, £8,042 remaining to be carried down, out of which the directors pay a dividend of 10 per cent., tax free, leaving £4,542 to be carried forward or less than half the amount brought in. From the balance-sheet the board has set aside £47,282 as provision for the company's unexpired liability in respect of current policies at the close of the year, this sum being made up by adding the £15,116 as above mentioned transferred from profit and loss, but where the balance of it has come from we do not quite see. However, in addition to the above-mentioned reserve for unexpired risks, the company has £11,500 at the credit of the investment fluctuation account. The total of the balance-sheet, it may be added, is £195,262, so the provision for depreciation should be ample. It is mentioned in the report that the directors have extended the scope of the company's business so as to include personal, accident, workmen's compensation, fidelity guarantee, burglary, plate-glass and kindred classes of insurance.

MINOR NOTICES OF COMPANY REPORTS.

Bromley (Kent) Electric Light and Power Company.—During the past year 6,580 lamps were added to this company's system, making a total of 77,802, and sales of current produced £1,241 more at £15,238. Other receipts brought the total income up to £16,580, of which £11,049 was retained as nett revenue, and with £313 brought forward and £1,024 from miscellaneous sources the disposable total was £12,386. Debenture interest having been met, £250 is written off wiring stock, £4,500 is put to reserve, and after paying dividends aggregating 5½ per cent., £308 is carried forward. Expenditure on the works stands at £128,344 or an increase of £6,004, and in addition 24,996 has been invested in the Chislehurst Electric Supply Company or £153,340 in all, leaving a debit on capital account of £8,340, against which the renewal reserve now amounts to £14,756. The current position is comfortable enough as debtors at £10,738 exceed creditors by £6,344, and cash comes to £1,933. No provision, however, has been made for depreciation, and it is a question whether the appropriation to renewal reserve is sufficient under the circumstances.

Civil Service Bank.—This little institution is finding it a hard matter to build up a profitable business, and made little progress during 1907. Including £242 or £87 less brought in the gross profits were practically identical with those of the previous year at £3,065 and the nett surplus was actually £24 smaller at £1,271. The dividend, however, of 2½ per cent. is repeated, and another £100 is put to contingency fund, but the reserve gets £330 against £355 and £242 is again carried forward. With a paid-up capital of £24,104, the reserve will now amount to £3,400, of which £3,070 is invested in £3,119 of National War Loan stock. Deposit and current accounts come to £41,267 against cash £6,912, investments £14,683 and loans and overdrafts £44,718.

Futtickcherrie Tea Company.—An advance of 1.13d. to 7.18d. per lb. in the average price obtained last year did not help this company much, as the crop was 39,592 lbs. smaller at 273,834 lbs. Gross receipts improved by £303 to £8,279, but expenses, owing probably to the company having calculated on a considerably larger outturn, rose by £461 to £6,773, and after paying manager's commission the nett profits showed a decrease of £147 at £1,401. Balance brought in, however, was £1,008 against £654, making a total of £2,409 or £201 more, and the dividend of 7½ per cent. is repeated, leaving £1,201 to be carried forward. Block account is unaltered at £14,000 and reserves are nil. Creditors and unpaid wages have gone up by £283 to £737, while the company's agents owe £1,437 less at £1,190, and sundry debtors have dwindled from £172 to £10, but produce in hand is valued at £2,263 and cash and remittances in transit are £146 up at £765.

H. Holdron.—This Peckham drapery business made a profit for the twelve months ended February 29 of £8,742, and after meeting administration charges and debenture interest, and writing £500 off leaseholds, £6,865 was left. Adding £1,653 brought forward, the disposable total was £8,518, out of which dividends aggregating 9 per cent. are paid, £2,000 is put to reserve, and £2,018 is carried forward. Premises and goodwill are valued at £51,175 and fixtures, &c., at £9,042, against which there are reserves amounting to £14,561, partly represented by £7,926 separately invested. Floating liabilities amounting to £2,324 are just about balanced by £2,358 in cash, while stocks stand at £10,830 and debtors owe £321.

Hidden Streams Rubber Syndicate.—This is a tiny undertaking with a paid-up capital of £5,847, owning 701 acres, of which 460 acres have been planted, 46 were felled in 1907, but not planted, and 100 will be felled and planted during the current year. Expenditure for the twelve months to December 31 was £2,638, making, with the £1,500 paid for the property, a total outlay to date of £5,528, and it is estimated that a further £3,000 will be spent this year. Creditors come to £184 against £118 due from debtors and £340 in cash on remittances in transit, but a call of 2s. per share is payable on April 29, and another 3s. will be called up later, which will give the company ample funds to go on with.

J. and G. Wells.—Gross profits of this colliery business for the year ended December 31 amounted to £10,683, of which £4,560 was transferred to sinking fund, and after adding £2,389 brought in the available total was £17,512. Preference dividend took £3,000, and 5 per cent. is now paid on the ordinary shares against nil and 2 per cent. for the two preceding years, leaving £3,262 to be carried forward. Advances in wages to miners amounting to 15 per cent., of which 10 per cent. came into operation before gas and house coal contracts entered into in 1906 expired, adversely affected trading results. Land, buildings, &c., stand at £166,831 after deducting the sinking fund of £105,637, coal paid for but not worked represents £91,046, railway wagons, &c., £59,544, and land and minerals in connection with Holbrook Winning £9,494, but against these there is a reserve of £80,000. Creditors amount to £30,025 or £9,944 less than the sum due from sundry debtors, and in addition to £4,375 in cash the company has £20,000 invested in Sheffield Corporation loan.

Melbourne Real Estate Company.—As foreshadowed a year ago, the revenue for the past twelve months fell off by £1,823 to £7,104 owing to a large wool store having become vacant in the end of 1906 and remaining unlet for a considerable time. With regard to this, however, the directors are now able to report that a portion of the premises has been let at satisfactory rents, and they are now endeavouring to secure acceptable tenants for the remainder, so the current year should show some recovery. Expenses took £4,068, although nothing was written off leases compared with £250, and the nett balance was only just sufficient to pay 2⅛ per cent. on the income debenture stock. A year ago the distribution was at the rate of 3 per cent., and there was a surplus of £2,107 available for debenture redemption, but this time the directors have only £2 left, which they carry forward. During the year another £4,050 of the income debenture stock was paid off, reducing the amount outstanding to £111,840. Creditors are slightly higher at £552, while investments have been reduced by £435 to £7,767 and cash has dropped from £2,440 to £981.

Municipal Trust Company.—Gross income for year ended February 29 was only £22 less at £34,375, but with a reduction of £96 in expenses the balance of revenue was £74 higher at £31,755. After payment of debenture interest and preference dividend 2 per cent. is again paid on the deferred stock, and £253 more at £1,279 is carried out. Profits on securities realised were higher by £1,426 at £6,876, but losses were £11,479 greater at £17,087, leaving the balance of capital depreciation account £10,211 down at £46,468, and the whole of this sum when applied to writing down investments leaves the book value at £755,756; but even so the auditors question the sufficiency of the provision. This is not surprising when the list of stocks includes such as Lydenburg Estates and Northern Transvaal Lands. Cash amounts to £4,746.

New England Breweries Company.—Including $33,495 brought forward, the profits of the American company for 1907 amounted to $310,892 or £64,101, of which £7,208 is reserved for depreciation and £46,392 is paid to this company as dividend, leaving £10,502 to be carried forward. With interest and transfer fees, the income of the English undertaking was £48,418 and after providing for administration charges and interest on the first mortgage debentures the disposable balance was £33,891, increased to £38,785 by the balance from the previous account. Out of this dividends of 8 per cent. have been paid on both preference and ordinary shares and £5,985 is carried forward. Against an outlay of £610,000 on capital stock and debentures of the American company, there is a reserve of £39,000 represented by investments standing at £42,551, but on which there was a depreciation of about 7 per cent. in the approximate market value on December 31. Liabilities for interest and to sundry creditors come to £14,284, but on the other hand £20,867 is due from the other side, and cash amounts to £9,751.

Pettigrew and Stephens.—Nett profit for year ended February 19 amounted to £16,233, and £417 was brought in making £16,650 in all. Interest, depreciation and preference dividend provided for, £3,000 is added to reserve, making it £6,000, and the usual 6 per cent. paid on the ordinary shares, leaving £575 to go forward. Heritable property, &c., figures at £108,712, against which there is a bond of £16,000. Goodwill is valued at £28,500, and stock at £42,823. Debtors come to £27,325 against creditors and loans £28,274, and as cash is only £941 floating liabilities are likely to be increased in financing dividends and interest. The business is reported to have been continuously successful.

The Channel Tunnel Co., Limited.—It is still alive, and seems to have some funds, in spite of the expense it was put to in trying to get the House of Commons to discuss its latest Bill. Thanks to the cash still in hand, the interest income last year was £897, and there was also £18 from transfer fees, so that after paying £210 to the directors as their fees for 1906 and other expenses there was £464 left to carry forward. Shares on which £4,228 has been paid were forfeited last year.

The Pittsburg, Cincinnati, Chicago and St. Louis Railway, which is part of the Pennsylvania system, earned $37,646,589 in 1907 or an increase of $3,161,088, the only item showing a reduction being transportation of mails. Operating expenses rose by $2,902,824 to $28,853,173, and after deducting rentals paid to roads operated on basis of nett earnings, the income, including miscellaneous receipts, was only $542,016 better at $8,722,060. Fixed rents, interest, &c., reduced this to $4,794,886 or $277,299 more, out of which $444,390 is put to the sinking fund for consolidated mortgage bonds, and $596,133 was paid on account of principal of car trusts. Dividends of 5 per cent. on the preferred and 4 per cent. on the common stock took another $2,441,384 and $437,746 was added to the balance brought forward, making $3,819,520. The capital was increased to $56,102,175 by the issue of $3,858,900 for the purchase of the franchise and corporate property of the Chartiers Railway, and in addition $101,398 preferred and $455,918 common stocks are reserved to retire outstanding stocks of the constituent companies. At the same time $6,038,000 was added to the funded debt on balance, bringing the total up to $56,959,000.

United Cigarette Machine Company.—Apparently the directors of this concern are too busy to draw up even a bare statement of how they propose to distribute the profits earned, as the accounts only have reached us. Receipts from all sources amounted to £63,303, and after meeting trade, legal and management expenses, providing £1,144 for maintenance of patents, and writing off £2,724 for depreciation, £52,808 was left. To this was added £21,254 brought forward, making a total of £74,062, but what is to be done with this we have not the slightest idea. Patent rights, goodwill, &c., have cost £446,256, against which the reserve amounts to £40,000. A freehold estate and workshops in America are valued at £11,320, plant at £10,521, and stocks at £12,454, while £9,183 has been [illegible] in connection with the purchase of the Hedderheim [illegible]. Creditors are exceedingly light at £7,422 against £58,370 to come in from debtors, and cash reaches the very comfortable figure of £56,629.

TRADE AND PRODUCE.

Wheat.—Quiet and fairly steady has been the business of markets this week, except that speculative positions fluctuated unimportantly under American influences. Most spot parcels have remained about the same, and if sellers occasionally seemed inclined to make concessions, buyers were not eager to take them English wheat has been in fair supply and in moderate request at unchanged prices, farmers' deliveries last week coming to 48,661 qrs., averaging 31s. 3d., against 28,757 qrs., averaging 26s. 9d. in the same week of 1907. European shipments for last week amounted to about 1,050,000 qrs., of which it is calculated the United Kingdom will take about 580,000 qrs., and the imports for last week were nearly that at 572,530 qrs. American shipments continue heavy. The estimated quantities of wheat and flour on passage to this kingdom are said to be 4,160,000 qrs., against 4,225,000 a week ago, the Continent receiving 2,905,000 qrs. against 2,805,000, but it is considered that supplies for the next four or five months will not go beyond requirements even though present arrivals and from now up till Whitsuntide are more than the current consumption can absorb.

Wool.—Last week's spurt in the market was very short-lived, and things are as quiet as ever, with prices again at lowest points. Now the general opinion seems to be that bottom values have not yet been touched, and consumers evidently think so, for, in spite of the present cheapness, they are not buying more than they can help. Export merchants are placing some fair orders, chiefly on American account, the Continental depression being so great as to make business with it of no account, and home trade is not much better. Spinners are not getting much new business, though yarn kinds are reasonable enough now, and no change in this hesitation and dulness is expected before Easter.

Cotton (from our Manchester correspondent).—On the whole our market seems to be going from bad to worse. At any rate, there is no improvement in the general outlook, and the orders secured by both spinners and manufacturers this week have nothing like cleared the production of the spindles and looms. Cheerless reports are met with from practically all sections, and buyers all along the line seem to be in a waiting attitude. The changes in the price of American cotton are not at all important. The business passing on the spot has been of fair dimensions, rather more sales occurring at the beginning of the week. The prospects for the new crop are not unhealthy. It is thought by reliable authorities that efforts will be made to increase the acreage, owing to the high prices now ruling. The general demand for piece goods has been poor, no free buying occurring for any market. Manufacturers have had to be content with booking small lines. Considerable inconvenience has been caused to Indian shippers by the dislocation of the telegraph service in our dependency. China shippers have not been in the mood to place orders of any weight. Only a retail trade has transpired for the minor markets both of the Continent and South America. The Board of Trade returns have caused some comment, the falling off in the shipments of cloth being considerable. Merchants here, however, rather welcome the figures, as it is thought that our markets abroad will be more ready to digest future supplies. In home trade cloths fair distribution has taken place in light fancy materials. Manufacturers, however, have not received many new orders to make. Flannelettes have moved off slowly. Fustians remain dull. Printing cloths, as made in Burnley, have dragged in demand. T-cloths and Mexicans are generally unchanged on the week. In American yarns for home use prices have again eased off, the irregularity in quotations being considerable. No difficulty is experienced in getting hold of twists and wefts quickly. Both for home use and export buyers are declining to take deliveries, and agents are being much hampered, owing to numerous complaints with regard to quality. There has not been much fresh business in shipping descriptions, but a few more offers have come through for China. Bolton spinnings have been in slack demand throughout the week. Many mills find difficulty in clearing their production, and ruination rates are accepted.

Sir Jacob Behrens and Sons consider that prices of American cotton during the past few days have weakened considerably. "The continuance of dull trade reports, coupled with favourable weather in the cotton belt, is to some extent responsible for this weakness. From a statistical point of view, prices should advance, as stocks are gradually depleted, but as Messrs. Neill Brothers point out in their circular of the 6th inst., the whole position will now depend chiefly upon the prospects for the new crop, which so far show little ground for complaint. Messrs. Neill Brothers publish some interesting figures to show the improbability of their maximum estimate of 11,600,000 bales being exceeded. The question of consumption will play an important part this season. Egyptian cotton is quiet, but prices are fairly well maintained. As is usually the case with a weak cotton market, orders for yarns have not been very much in evidence this week. Prices continue to droop, in spite of spinners for the most part now working at a loss of something like ⅛d. per lb., if reports are to be relied upon. So far the exports have kept up very well, but the present month is expected to show a falling off. The question of stopping for a week at Easter will be decided by each individual spinner for himself, no doubt according to the state of his order book, as the trade as a whole has decided not to stop. The question of short time will again be discussed in another month. There is a growing opinion that present rates are fairly safe, and that any improvement in trade might easily bring about a decided reaction. Buyers are consequently watching the market very closely. So far it has paid to wait until the last moment, but this will not always be the case."

Coal.—The North of England trade seems to be the most brisk at present, exports from that part of the country keeping collieries busy, and owners are so well booked ahead that they have again raised their quotations. Welsh anthracites also seem in good condition, prices in them are rising, and demand for one or two kinds is strong. Steams, on the other hand, have not been so brisk, but prices are well enough maintained. Lancashire owners so far have declined to make concessions in small coals and slack, but will probably have to do so soon, for outside offerings are large enough to control the market. House coal demands continue good, and without word of their becoming cheaper.

Copper.—Dealings were more or less restricted during the earlier markets, operators not caring to enter into new engagements so long as there seemed a lull in consumptive demand, but more activity was displayed later. Prices have fluctuated a little under easier American advices, and some larger selling orders brought them lower, but Thursday's closing prices were not much below those of last week—£58⅝ cash and £58⅞ three months. To-day, however, a further drop took place, the market ended dull at £57¾ and £58¼ for spot and forward metal respectively.

Tin.—On the strength of Eastern advices showing that the metal there changed hands at £144 c.i.f. London, the market opened active and strong, with cash metal at £146. Then a sharp reaction set in, and though supported by speculative influence cash fluctuated as low as £140 15s. Later advices were again better, and after further narrow fluctuations cash metal closed to-day at £144½ for cash and £142¾ for three months.

Iron and Steel.—No improvement has taken place in West Coast hematites trade, orders continuing to be in small quantities only, and that for immediate consumption. Of forward trade there is none. Neither is East Coast business as good as it was for a time, and but for its exports it would have been much worse, the troubles in the shipbuilding industry having a serious effect on all trades that more or less rely on it. The warrant market in Cleveland pig-iron seems again to be controlled by speculators, and steady buying is therefore at a standstill. Business is depressed and disorganised, and the fact that three months' price of warrants is 2s. 4d. below prompt does not improve matters. The steel trade is no better off, and the *Engineer* makes the statement that the mills at Barrow will probably close down this week-end for two or three months, or even longer, whereby 1,700 men will be thrown out of work. Naturally manufactured goods are not doing much either, the rail branch alone getting a fair amount of business.

Tea.—But for the importation of a large quantity of inferior and low China tea, the statistical position, according to Messrs. Gow, Wilson and Stanton, Limited's, circular, would be exceptionally strong. As it is it continues good, though a disappointing feature of the trade is the falling off in exports, especially to Russia. It is probable, however, that if the rumoured removal of the surtax in that country takes effect later in the year, the position may improve again. Offerings of Indian were heavier this week, amounting to 36,628 packages, but demand for all kinds kept strong. Medium and fine qualities were again somewhat dearer, and common sorts firm. The average for 34,130 packages sold on garden account came to 8.03d., against 8.51d. in 1907. Apparently there is a good deal less of the remaining crop to be disposed of than was the case at the same date last year, closing invoices from estates being 121 against 93. Ceylon importers brought forward 24,477 packages, which were well competed for, much keenness being displayed to obtain good and fine qualities, which went occasionally dearer. The week averaged 7.8d., against 8.30d. in 1907. Prices for Javas, of which 1,345 packages were offered, showed here and there a hardening tendency.

Sugar.—Mr Czarnikow's circular states that fluctuations in the market this week were a little wider than last, and May beet moved from 11s. 4½d. to 11s. 1½d. to 11s. 6½d. to 11s. 5½d. to 11s. 6d., the lower quotations being caused by quieter news from America, where refiners showed more reluctance at one time to accept Cuban offers at 4.36 cents, and where some other sugars were sold down to 4.30 cents. A cargo of beet was then placed at 11s. 6d. c.&f., equal to 4.35 cents, which steadied the tone here, but when the Cuban centrals at work declined to 110, and the weekly receipts to 32,000 tons, whilst Guma cabled that the crop would be mostly over about the middle of this month, a stronger speculative tendency set in, causing also increased interest for beet in the States, though refiners there refuse to follow the rise. Guma now makes the total receipts in all ports during December-March equal to 663,000 tons. Willett now puts the crop at 925,000 tons, though on March 26, by adding the smallest April-June receipts to the receipts then printed as 680,000 tons (though his estimate was 620,000 tons), he arrived at a million tons, which was to put an end to all estimates below 900,000 tons. It seems, however, to be a question not of comparisons, but of cane, and the number of centrals at work gives no clue to the probable receipts; last year 110 centrals yielded 34,000 tons, in 1906 about 20,000, in 1905 about 18,000 tons, and receipts continued, even after all factories were off work, otherwise even 900,000 tons might be difficult to produce if centrals go on finishing at a rapid rate. All offers on the New York market of ready

and near-at-hand sugars have been absorbed at late values. Whether a further advance will take place depends on the supply of preferential sugars during the next few weeks. Landings in the three ports were 37,000 tons, meltings 41,000 tons, and stocks 203,000 tons.

DIVIDENDS ANNOUNCED.

RAILWAYS.

Central Uruguay Eastern Extension.—Interim of 4s. 6d. per share on the ordinary shares, carrying forward £1,419.

Central Uruguay Northern Extension.—Interim of 4s. per share on the share capital, carrying forward £209.

Central Uruguay of Monte Video.—Interim at the rate of 4 per cent. per annum on the ordinary stock for half-year ended Dec. 31, carrying forward £20,146.

Great Northern, U.S.A.—Quarterly of 1¾ per cent. on the preferred capital stock, payable May 1.

Great Western of Brazil.—Final of 3 per cent., making 6 per cent. for the year to Dec. 31 on the ordinary shares, carrying forward £22,683.

Indian Midland.—5s. 6d. per cent. out of surplus profit for year ended Dec. 31 on the 4 per cent. guaranteed stock, in addition to the guaranteed interest, making £2 5s. 6d. per cent. for half-year.

Nitrate.—On the ordinary (unconverted) shares and the preferred converted ordinary shares at the rate of 3 per cent., making 6 per cent. for the year.

Rio Claro Sao Paulo.—Final of 6⅞ per cent. for half-year, making 13¾ per cent. for the year.

MINES.

Camp Bird.—Interim of 1s. per share for quarter ending April 30.

Premier (Transvaal) Diamond.—125 per cent. on the preference shares for half-year ending April 30.

South Kalgurli.—6d. per share in respect of profits to the 31st ult., payable May 11.

MISCELLANEOUS.

British South African Explosives.—5 per cent. for year ended Oct. 31.

Calgary and Edmonton Land.—First interim for 1908 of 2s. 6d. per share, payable 28th inst.

Californian Oilfields.—Final of 25 per cent. for year ended Dec. 31, making 40 per cent. for the year, placing £10,000 to reserve.

Carlton Hotel—Interim at the rate of 5 per cent. per annum on the ordinary shares.

Indo-European Telegraph.—For six months ended Dec. 31 of 17s. 6d. per share, making 6 per cent. for the year and a bonus of 20s. per share, also a special distribution of 15s. per share, out of interest accrued during year upon investments.

London Nitrate.—Interim on account of the year ending June 30, 1908, of 5s. per share.

Pacific Steam Navigation.—Final for 1907 of 15s. per share, making 25s. per share for the year.

Scottish Union and National Insurance.—At the rate of 17½ per cent. per annum.

MINING RETURNS.

Abbontiakoon Block I.—Crushed 5,131 tons; fully treated 4,932 tons, yielding 1,645 ozs. bullion from plates, and 774 ozs. from sands and slimes; total, 2,419 ozs.

African Gold Dredging.—Dredgers produced 277 ozs.

Akrokerri (Ashanti).—Crushed 3,550 tons, 1,228 ozs.; tailings 1,280 tons, 1,411 ozs.

Angelo.—Milled 33,000 tons, 13,790 ozs.; profit, £30,072.

Ashanti.—Obuasi: crushed 5,443 tons. By amalgamation 1,253 ozs.; by cyanidation tailings, 56 ozs.; by cyanidation product from roasting plant 1,757 ozs.; total, 3,066 ozs.

Ashanti Rivers and Concessions.—477 ozs.; value, £1,908.

Associated.—Treated 10,395 tons; £21,991.

Balaghat.—Quartz, 4,650 tons, 2,248 ozs.; tailings, 4,368 tons, 325 ozs.; total, 2,573 ozs.

Barrett.—367 ozs., value £1,400, profit £300.

Bibiani.—Crushed 4,088 tons, £5,841; cyanide, 3,120 tons, £2,207.

Broken Hill South Blocks.—Treated 8,043 tons, assaying 15·2 per cent. lead, 2·7 ozs. silver, 9·2 per cent. zinc per ton; produced 1,340 tons concentrates, containing 837 tons lead, and 11,792 ozs. silver.

Broomassie.—Crushed 1,668 tons, 2,224 ozs.; tailings, 2,792 tons, 554 ozs.

Burbank's Birthday.—Crushed 739 tons, 279 ozs.

Burbank's Main Lode (1904).—Crushed 1,418 tons, 624 ozs.; by cyanide 1,131 tons, 146 ozs.

Burma Ruby.—Washed 64,000 loads, producing rubies valued at Rs.50,000; royalties, Rs.8,000.

Cape Copper.—O'okiep, 1,217 tons at 16 per cent. = 194 tons fine copper; Nababeep, 4,634 tons at 3·90 per cent. = 180 tons fine copper; total, 374 tons fine copper.

Cason.—Milled 36,000 tons, 13,984 ozs.; profit, £27,690.

Champion Reef.—14,150 tons, 7,888 ozs.; tailings 19,054 tons, 2,388 ozs.; total, 10,276 ozs.

Chillagoe.—Chillagoe, 970 tons copper ore; Mungana, 861 tons copper ore and 1,966 tons lead ore; purchased 39 tons copper ore and 644 tons lead ore; totals, 1,870 tons copper ore and 2,610 tons lead ore; producing 191 tons blister copper, 77 tons copper matte, and 450 tons lead bullion, containing 218 tons copper, 450 tons lead, and 53,348 ozs. silver; 558 tons of fluxing ore produced 50 tons lead and 2,579 ozs. silver.

Chinese Engineering.—Output of coal 27,500 tons; sales 26,000 tons; consumption, 1,400 tons.

Colbalt Central.—Milled 1,008 tons, produced 33,207 ozs. silver; profit, $8,324.97.

Consolidated Langlaagte.—7,972 ozs. from 23,963 tons; profit, £10,673.

Consolidated Main Reef.—Crushed 14,431 tons, 3,026 ozs.; sands and concentrates by cyanide 14,431 tons, 2,193 ozs.; total, 5,219 ozs.; profit, £5,673.

Crown Deep.—Crushed 37,400 tons, 10,900 ozs.; by cyanide 36,606 tons, 5,419 ozs.: total, 16,319 ozs.; profit, £38,000.

Crown Reef.—Crushed 25,044 tons, 6,707 ozs.; by secondary treatment 24,782 tons, 3,439 ozs.; total, 10,146 ozs.; profit, £21,060

Day Dawn Block and Wyndham.—Treated 930 tons quartz; value, including concentrates, tailings, &c., £2,500.

Dharwar Reefs.—Crushed 1,150 tons, 590 ozs.; tailings assay per ton 4 dwts.

Driefontein.—Milled 30,500 tons, 11,488 ozs.; profit £22,543.

Durban Roodepoort Deep.—Crushed 12,560 tons, 6,918 ozs.; cyanide 12,702 tons, 1,072 ozs.; total, 4,990 ozs.; profit, £4,600.

Eldorado Banket.—Crushed 2,850 tons, 1,326 ozs.; cyanided 2,850 tons, 339 ozs.; total, 1,665 ozs.; profit, £3,500.

Ferreira.—Crushed 23,230 tons, 8,819 ozs.; by secondary treatment 25,000 tons, 4,043 ozs.; total, 12,862 ozs.; profit, £31,030.

Ferreira Deep.—Crushed 33,200 tons, 12,164 ozs.; by cyanide 33,035 tons, 6,374 ozs.; total, 18,538 ozs.; profit, £49,150.

French Rand.—Results for March:—Crushed 18,100 tons, 3,186 ozs.; by secondary treatment 19,667 tons, 2,084 ozs.; total, 5,270 ozs.; profit, £3,010.

Gaika.—Crushed 3,185 tons, 1,036 ozs.; tailings 1,925 tons, 263 ozs.

Geldenhuis Deep.—Crushed 33,700 tons, 7,547 ozs.; cyanide 33,390 tons, 3,604 ozs.; total 11,151 ozs.; profit. £15,100.

Geldenhuis Estate.—Crushed 19,375 tons, 4,016 ozs.; tailings 1,826 ozs.; slimes 455 ozs.; total 6,297 ozs.; profit £12,627.

Giant of Rhodesia.—Treated 6,391 tons, 2,885 ozs.; profit £6,186.

Ginsberg.—10,677 tons, 4,091 ozs.; profit £4,884.

Glen Deep.—Crushed 19,815 tons, 4,458 ozs.; cyanide 19,990 tons, 2,841 ozs.; total 7,299 ozs.; profit £9,500.

Glencairn Main Reef.—4,810 ozs. from 21,375 tons; profit, £4,498.

Globe and Phœnix.—Crushed 6,736 tons, 3,082 ozs.; cyanide 4,448 tons, 425 ozs.; slimes 1,604 tons, 139 ozs.; total, 3,646 ozs.

Golden Horseshoe.—Ore treated 23,484 tons, 12,087 ozs.; profit, £24,489.

Golden Pole.—Crushed 1,021 tons, 386 ozs.; 810 tons sands and 8 tons concentrates 162 ozs.

Great Boulder Perseverance.—Treated 17,035 tons, 6,037 ozs. fine gold and 998 ozs. fine silver.

Great Boulder Proprietary.—Treated 12,364 tons, 11,873 ozs.; tailings (old) 9,952 tons, 1,053 ozs.; total, 12,926 ozs.

Great Cobar.—15,924 tons; output matte, 984 tons; contents, 385 tons copper, 937 ozs. gold, 5,807 ozs. silver; ingot copper, 455 tons; despatched, 470 tons.

Great Fingall,—22,023 tons, 4,267 ozs.; tailings 21,587 tons, 2,254 ozs.; concentrates 436 tons, 1,792 ozs.; total, 8,313 ozs.

Hainault.—Crushed 6,210 tons, 1,779 ozs.

Hutti (Nizam's).—Crushed 2,500 tons, 952 ozs.; tailings 2,100 tons, 198 ozs.

Ivanhoe.—Crushed 19,640 tons, 2,378 ozs.; sands 9,080 tons, 1,772 ozs.; slimes 8,990 tons, 3,333 ozs.; concentrates 1,570 tons, 2,429 ozs.; total, 9,912 ozs.; profit, £21,110.

Jubilee.—Milled 5,136 tons, 1,246 ozs.; cyanide 3,716 tons, 513 ozs.

Jumpers.—Crushed 9,140 tons, 2,866 ozs.; tailings, 1,226 ozs.; current slimes, 327 ozs.; accumulated slimes, 421 ozs.; total, 4,840 ozs.; profit, £4,520.

Jumpers Deep.—Crushed 20,200 tons, 4,884 ozs.; by cyanide 19,358 tons, 1,836 ozs.; total, 6,720 ozs.; profit, £4,050.

Kalgurli.—Treated 10,775 short tons, 6,981 ozs.

Kelly's Queen Block.—Treated 500 tons; value, £1,150.

Killarney Hibernia.—Crushed 347 tons, 539 ozs.

Knight's Deep.—42,750 tons, 13,901 ozs.; profit, £26,720.

Lake View Consols.—Treated 9,868 tons, 2,799 ozs.

Lancaster.—Crushed 12,800 tons, 1,564 ozs.; cyanide 10,190 tons, 1,093 ozs.; total, 2,657 ozs.

Lancaster West.—Crushed 6,619 tons, 1,347 ozs.; cyanide 5,624 tons, 1,043 ozs.; total, 2,390 ozs.; profit, £3,176.

Lancefield.—6,692 tons ore treated, 2,250 ozs.

Langlaagte Deep.—Crushed 37,181 tons, 8,263 ozs.; cyanide 36,681 tons, 3,519 ozs.; total, 11,782 ozs.; profit, £14,250.

Le Roi.—Shipped 6,700 tons, containing 2,680 ozs. gold, 4,600 ozs. silver, 170,000 lbs. copper.

Le Roi No. 2.—Josie—Shipped 2,446 tons; nett receipts £10,917, being payment for 3,275 tons shipped, and £473 being payment for 161 tons concentrates shipped. Vancouver—Shipped 50 tons; nett receipts £912, being payment for 60 tons shipped, and £211, being deferred payment for 121 tons concentrates.

Luipaard's Vlei.—Crushed 16,400 tons, 2,617 ozs.; tube mills, 1,093 ozs.; cyanide 1,188 ozs.; slimes 286 ozs.; profit, £7,615.

Main Reef West.—Crushed 4,810 tons, 1,320 ozs.; sands and concentrates by cyanide 4,810 tons, 625 ozs.; total, 1,945 ozs.; profit, £2,459.

May.—Crushed 15,020 tons. 3,508 ozs.; cyanide 9,310 tons, 1,264 ozs.; slimes 4,514 tons, 270 ozs.; total, 5,042 ozs.; profit, £8,590.

Meyer and Charlton.—Crushed 13,154 tons, 2,044 ozs.; cyanide 2,991 ozs.; total, 6,035 ozs.; profit, £8,702.

Mills' Day Dawn United.—Value, including residues, £7,200.

Mount Boppy.—Clean up from 7,280 tons gave 1,385 ozs.; cyanide 4,590 tons, 2,340 ozs.; slimes 2,639 tons, 1,171 ozs.; concentrates tonnage 24, 200 ozs.; total, 5,096 ozs.

Mount Morgan (Queensland).—Treated 21,220 tons ore and produced 5,141 ozs.; treated 17,512 tons ore and metalliferous flux and produced 597 tons blister copper, containing 591 tons of copper and 6,567 ozs. fine gold.

Mysore.—16,300 tons, 15,436 ozs.; 15,223 tons tailings, 2,224 ozs.; total, 17,660 ozs.

Mysore West and Mysore-Wynaad.—Cyanided 2,592 tons, 268 ozs.

New Comet.—Milled 25,000 tons, 8,681 ozs.; profit, £13,145.

New Goch.—Crushed 23,680 tons, 4,762 ozs.; cyanide, 2,428 ozs.; total, 7,190 ozs.; profit, £10,767.

New Heriot.—Crushed 9,600 tons, 4,460 ozs.; profit, £7,705.

New Hillgrove.—New Hillgrove: Crushed 187 tons, 440 ozs. Eleanora: 816 tons yielded £953.

New Kleinfontein.—Milled 36,347 tons, 9,045 ozs.; sands 24,880 tons, 3,208 ozs.; slimes 11,442 tons, 881 ozs.; total, 13,134 ozs.; profit, £21,009.

New Modderfontein.—Crushed 27,900 tons, 8,480 ozs.; secondary treatment 30,869 tons, 3,332 ozs.; total, 11,812 ozs.; profit, £20,062.

New Primrose.—7,746 ozs. from 20,079 tons; profit, £14,664.

New Rietfontein.—9,147 ozs. from 17,816 tons; profit, £16,193.

New Unified Main Reef.—3,476 ozs. from 9,880 tons; profit, £4,208.

New Zealand Crown.—Crushed 1,748 tons, yielding £2,511.

Nigel.—Crushed 10,500 tons, 4,420 ozs.; profit, £6,988.

Nigel Deep.—3,658 tons, 1,494 ozs.; profit, £156.

No. 2 South Great Eastern.—Crushed 660 tons, 258 ozs.

North Broken Hill.—Treated 2,550 tons crude ore, assaying 15·8 per cent. lead and 5·8 ozs. silver per ton, producing 430 tons concentrates, containing 296 tons 18 cwt. lead, and 8,041 ozs. silver.

North White Feather.—Crushed 2,075 tons, 958 ozs.

Nourse.—Crushed 33,070 tons, 9,051 ozs.; 32,327 tons by cyanide, 3,981 ozs., total, 13,302 ozs.; profit, £18,100.

Nundydroog.—7,060 tons, 5,938 ozs.; 5,404 tons tailings 487 ozs.; total, 6,425 ozs.

Ooregum.—10,164 tons, 5,591 ozs.; 8,743 tons tailings, 1,049 ozs.; total, 6,640 ozs.

Oroya Black Range.—Crushed 4,187 tons, 2,480 ozs.

Oroya-Brownhill.—Crushed 12,024 tons, 3,774 ozs.

Peña Copper.—Output of ore, 16,000 tons; shipments, 8,994 tons; fine copper in precipitate, 97 tons.

Pniel Diamond.—Value of diamonds registered by diggers, £3,633.

Princess Estate.—Crushed 8,563 tons, 2,793 ozs.; cyanide 5,762 tons, 1,182 ozs.; total, 3,975 ozs.; profit, £5,312.

Queensland Copper.—Ore treated, 1,331 tons; production, 239 tons matte, containing 131 tons fine copper; shipment, 239 tons matte.

Rhodesia Consolidated.—Crushed 1,720 tons, 928 ozs.; cyanided 788 tons, 326 ozs.

Robinson.—Crushed 42,000 tons, 17,015 ozs.; by secondary treatment 42,147 tons, 8,468 ozs.; total, 25,483 ozs.; profits, £80,062.

Robinson Central Deep.—Crushed 29,085 tons, 11,952 ozs.; by secondary treatment 28,781 tons, 4,278 ozs.; total, 16,230 ozs. profit, £46,056.

Robinson Deep.—51,680 tons, 20,949 ozs.; profit, £42,926.

Roodepoort Central.—Crushed 8,299 tons, 2,192 ozs.; cyanide 5,830 tons, 1,071 ozs.; total, 3,263 ozs.; profit, £2,993.

Roodepoort United.—Crushed 17,530 tons, 4,482 ozs.; cyanide 2,081 ozs.; total, 6,563 ozs.; profit, £10,011.

Rose Deep.—Crushed 36,709 tons, 7,723 ozs.; cyanide 35,893 tons, 3,380 ozs.; total 11,103 ozs.; profit £16,500.

St. John Del Rey.—Gold produce March £24,000; yield per ton, ·57 of an oz. troy.

Selukwe.—Crushed 5,912 tons, 1,534 ozs.; cyanide 3,566 tons, 427 ozs.; total, 1,961 ozs.

Sheba.—9,600 tons treated, 2,175 ozs.

Simmer and Jack.—68,280 tons, 26,429 ozs.; profit, £63,844.

Simmer and Jack East.—35,800 tons, 9,569 ozs.; profit, £11,147.

Sons of Gwalia.—Output, 4,948 ozs.; value, £20,968.

South Kalgurli.—Crushed 9,029 short tons, 2,949 ozs.

Talisman Consolidated.—4,015 tons; value, £17,675; profit, £10,818.

Taquah.—Crushed 5,300 tons, 4,001 ozs.; tailings, 4,861 tons, 881 ozs.; total, 4,882 ozs.

Tasmanian Consols.—Crushed 1,200 tons, 367 ozs.; concentrates, 62 ozs.; cyanide, £240.

Tasmanian Smelting.—Silver-lead bullion shipped contained 770 tons lead, 115,000 ozs. silver, 445 ozs. gold.

Tomboy.—Crushed 9,000 tons, value $51,000; concentrates shipped 720 tons, value $32,000.

Treasury.—Crushed 9,240 tons, 1,642 ozs.; sands and concentrates, by cyanide, 10,363 tons, 1,342 ozs.: total, 2,984 ozs.; profit, £2,006.

Van Ryn.—Crushed 23,630 tons, 7,484 ozs.; sands 15,527 tons, 1,831 ozs.; slimes 8,103 tons, 741 ozs.; total, 10,056 ozs.; profit, £19,335.

Vereeniging Estates.—Output of coal 29,840 tons.

Village Deep.—Crushed 28,000 tons, 5,438 ozs.; secondary treatment 27,284 tons, 3,681 ozs.; total, 9,119 ozs.; profit, £9,005.

Village Main Reef.—Crushed 41,200 tons, 9,707 ozs.; sands and concentrates 29,170 tons, 3,983 ozs.; slimes, 14,816 tons, 1,450 ozs.; total, 15,140 ozs.; profit, £28,028.

Vogelstruis Estates.—Quartz milled 9,050 tons, 2,221 ozs.; tailings 6,280 tons, 550 ozs.; total, 2,771 ozs.

Waihi.—Crushed 31,336 tons, and £71,850 gold and silver produced.

Wanderer (Selukwe).—Cyanide 17,112 tons, 2,021 ozs.

Wassau (Gold Coast).—Crushed 4,825 tons, 1,335 ozs.; cyanide 3,550 tons, 427 ozs.; total, 1,762 ozs.

Windsor.—Crushed 4,835 tons, 1,113 ozs.; cyanide 3,544 tons, 698 ozs.; total, 1,811 ozs.

Wolhuter.—Crushed 20,700 mill tons; sands and slimes treated 20,700 tons; from mill 3,423 ozs.; from sands 2,772 ozs.; total, 6,195 ozs.; profit, £6,409.

Witwatersrand.—33,700 tons, 10,112 ozs.; profit, £14,019.

Witwatersrand Deep.—Crushed 37,220 tons, 10,285 ozs.; sands and concentrates by cyanide 35,618 tons, 5,048 ozs.; total, 15,333 ozs.; profit, £28,969.

Worcester Exploration.—Crushed 4,600 tons, 1,162 ozs.

MARTIN, EARLE AND CO., LIMITED.

Gross profits for 1907 amounted to £49,806 and nett to £16,075 after meeting all charges, including £9,923 for repairs and upkeep and £11,446 for depreciation and renewals. Debenture interest provided for, £2,876 is transferred to debenture stocks redemption funds and £700 written off balance of discount on second mortgage issue. With £1,802 brought in the surplus just pays the preference dividend and leaves only £50, which is carried forward. The last distribution on the ordinary shares was one of 2½ per cent., making 6¼ for eighteen months to December, 1906. The diminution in profits is attributed to a variety of causes; depression in the building trade, falling off of export demand, over-production, competition, reduction of prices and dearer fuel. Building, plant, machinery, goodwill—£40,000—wharves, barges, &c., &c., total £390,963 or only £706 less, in spite of £11,446 having been allowed for depreciation. Investments in Consols at cost on account of debenture redemption funds amount to £15,021, stock-in-trade comes to £35,579, bills receivable £8,746 and cash £8,587. Trade balances are on the right side, £48,334 against £28,830, but there is an overdraft at bank of £6,490, while the item of £6,929, debtors for advances and interest to June 30, 1906, has again drawn comment from the auditors, but the directors state that a substantial sum will shortly be paid on this account. The reserve of £843, minute though it was, has been reduced to £665 by law costs in connection with the second debenture stocks issued as far back as 1903-4. The auditors also draw attention to the fact that no provision for depreciation is made in respect of buildings erected after the company's formation, wharves, &c., and goodwill, the directors being of opinion that the debenture stocks redemption funds are sufficient.

J. J. Allen, Limited.—Gross profit for year ended January 31, £10,396. After paying income-tax, mortgage interest and managing director's salary £2,327, and adding £734 brought in, less £375 directors' fees, £8,432 is available. Preference dividend paid, 6 per cent. is distributed on ordinary shares, and £1,000 put to reserve, leaving £734 to go forward. Premises, machinery, fixtures, &c., aggregate £75,206. Stock is quite large enough at £51,944. Debtors at £20,077 fail to meet creditors by £1,293. Cash amounts to £6,149, and goodwill is a considerable weight at £30,571. The mortgage debt is £21,900. Reserve with present addition totals £4,250, and there is a leaseholds sinking fund of £1,330, both sunk in the business. The issued capital amounts to £130,000.

London and South-Western Bank.—The statement for March 31 shows current accounts and deposits of £14,410,700, other liabilities £612,382, and acceptances and endorsements £48,826, against assets consisting of cash in hand and at Bank of England £2,330,520, money at call and short notice £1,201,080, British Government and other securities £4,001,990, and bills discounted, loans, &c., £9,489,492.

A branch of the London Joint Stock Bank, Ltd. has been opened at 35, High Street, Croydon (temporary premises) under the management of Mr. F. C. Grigg.

The registered office of the South Metropolitan Electric Light and Power Company is now at 183 and 185, High Street, Lewisham, S.E.

Capital and Counties Bank.—Liabilities on March 31 consisted of £33,978,412 on simple contracts and £518,736 on bills, and assets of £5,232,893 cash in hand and at Bank of England, £4,908,816 money at call and short notice, £4,901,607 Consols and other investments, and £20,426,049 bills of exchange, promissory notes and advances to customers.

Mr. E. W. Nicholls has, on medical advice, tendered his resignation as Underwriter of the Marine Department of the Alliance Assurance Company, Limited. In accepting the resignation, which is to take effect from the 1st May next, the directors have recorded on their minutes their deep regret that Mr. Nicholls has found it necessary to retire, and they have added an expression of their high appreciation of his faithful and successful services during his 30 years' connection with the company as underwriter. Mr. R. A. Ogilvie, the deputy underwriter of the company, will succeed Mr. Nicholls as underwriter.

The following private cable has just been received from Toronto, Canada:—"Business is apparently improving generally. Spring conditions very favourable for seeding. If present weather continues seeding should start in a few days and be general in ten days."

COMPANY MEETINGS.

OOREGUM GOLD MINING.

The ordinary general meeting of the Ooregum Gold Mining Company of India, Limited, was held on Tuesday, at the Cannon Street Hotel, E.C., Mr. Malcolm Low, Chairman, presiding.

The Secretary (Mr. F. H. Williams) having read the notice convening the meeting and the report of the auditors,

The Chairman said: Although the dividends proposed to be declared out of the profits of the past year are less by 5 per cent. all round than the dividends which we enjoyed in the year before, yet the company stands to-day in a stronger position, whether as regards its mining, or whether as regards its finance, than it held when we met this time last year. You will remember that twelve months ago we were able to regard our mining prospects in the immediate future with some degree of cheerfulness, and certainly the results achieved since have been such as not to belie the favourable forecast that we were then able to make. In the first place, we have been able to keep up our quartz output, and we find ourselves at the end of the year with no diminished reserves, for those stood on December 31 at no less than 143,988 tons, which is more by 8,000 tons than the figure at which they stood at the end of the year before. Then we got altogether 4,600 ozs. more gold than we got in the year before, the respective figures being 73,562 ozs. realising £265,070 in 1907, and 68,881 ozs. realising £259,250 in 1906. Coupled with these satisfactory figures it is pleasant to observe that the average of our ore milled has shown a great tendency to rise during the past three years. In 1905 it was 8 dwts. 21 grs. per ton, in 1906 it was 9 dwts. 11 grs., and in 1907 it was 10 dwts. 8 grs., and, of course, operating as we do upon such very large quantities, the rise of even a fraction of a pennyweight makes a considerable difference to us. We may then summarise the comparisons between the two years by saying that the results of this year are better than those of the year before—firstly, in the quantity and quality of the ore milled; secondly, in the amount of gold produced; thirdly, in the amount of profits made; and lastly, in the quantity of our ore standing in reserve at the year's close. Then as to the development work done during the year. I myself thought that 1906 was going to be a record year in this respect; but it seems that Mr. Bullen was not even yet content, for we find that the footage driven, sunk and risen during the past year comes to the very high total of 18,349 ft., beating the previous year by very nearly 3,000 ft. Now, it is of great interest to watch each year what each ton of ore costs us after it has passed the mills. Our total revenue expenditure both in India and England was £173,433. Of this we calculate that only about £8,335 was spent on cyaniding our 89,164 tons of slimes and tailings, the remaining £165,098 being spread over the 124,160 tons milled, which brings out the total cost of each ton to £1 6s. 7⅜d. This is slightly better than the average cost in the year before, when the figure was exactly £1 7s. After deducting working expenses we find that the profit on each ton of ore milled this year was 12s. 7d., a great advance on the profit made last year, when the figure stood at just over 8s. 7d. The whole revenue expenditure is less this year by about £1,000 than it was in the year before. In the immediate future, of course, we may expect some decrease of expenditure owing to the decreased expense we are put to for our electrical power; but on the whole as regards general expenditure I myself do not venture to prophesy any very great reduction. We must remember, after all, that our mine is getting deeper, and that the prices of labour, fuel, material, and so forth do not show much tendency to diminish. You will expect a word from me on the question of our general finance. You know that of the 137,000 10s. ordinary shares authorised last year to be issued only some 38,000 shares were taken up, the result being to bring into the coffers of the company only some £19,000, instead of the contemplated possible total of £68,000. Well, we had to face the facts as they were, and the necessity arose for providing a large portion of what is most unquestionably and most justly capital expenditure out of current revenue—(hear, hear)—thus, of course, curtailing our divisible profits. How we have done this is shown, firstly, by the drastic writing off of three items in the profit and loss account, aggregating some £43,500, and secondly, by our recommendation that we should declare dividends only of 17½ per cent. on the preference shares and 7½ per cent. on the ordinary shares in lieu of the 22½ per cent. and 12½ per cent. respectively that we were able to divide last year. Of course we cannot deny for a moment that this self-denying solution of our difficulties certainly tends to increase the financial stability of the company—(hear, hear)—and we earnestly hope that our free profits will in a very short time again become such as to enable us to resume the payment of higher dividends. In any case, as I have said, we have to look at things as they are, and things being as they are, and the present position being such as it is, we have no intention of offering any of the remaining unissued shares either to ourselves or to the public; in fact, we shall not issue these shares without consulting the shareholders beforehand. I will now ask the secretary to read the telegram which has just arrived from the mines.

The Secretary then read a telegram, dated April 6, giving the latest information from the mine.

Mr. A. S. B. Oakley, in seconding the adoption of the report, said that he had recently visited and inspected the mine, and in the lower levels, on the main lode, the average grade of ore was undoubtedly better than it had been for a considerable time. The meeting was afterwards addressed by Mr. Edgar Taylor with reference to the operations at the mine in the past year. He referred to the success which had attended the vigorous prosecution of work in the deeper exploratory points from Taylor's and Oakley's shafts, and spoke hopefully of the improved prospects. The report was unanimously adopted.

ANGLO-ARGENTINE TRAMWAYS.

The twenty-fourth ordinary general meeting of the Anglo-Argentine Tramways Co., Limited, was held on Thursday at Winchester House, Old Broad Street, E.C., Mr. J. B. Concanon (chairman of the company) presiding.

The Secretary (Mr. Louis Striém) having read the notice convening the meeting and the auditors' report,

The Chairman said: The accounts presented to you to-day include the receipts and expenditure for the half-year ended December 31 of the Buenos Ayres and Belgrano Company, and I think I may fairly say that the results all round are very satisfactory. The gross profits, after debiting revenue £65,000, and crediting depreciation renewals fund with that sum, amount to £365,573 4s. 1d., or, roughly speaking, £1,000 per day. Deducting from this figure the interest and sinking fund on debenture stock, the annuity payable to the City company, dividends on the first and second preference shares, interest payable to the Belgrano Company, sinking fund for the redemption of the preference shares, provision for depreciation on our investments, and a dividend at the rate of 8 per cent. per annum on £200,000 of ordinary shares, leaves a balance of £16,734 16s. 1d. to be carried forward. I may, however, here remind you that had we had to pay the increased dividends for the whole year on the first and second preference shares, instead of for six months, a further £15,090 1s. 7d. would have been required. But this fact need not cause you any uneasiness, as for the second half of this current year we shall have the whole of the profits of the Belgrano Company (the balance of the purchase money for that undertaking having to be paid on July 1 next), and, further, I think I may safely say that the profits for the year 1908 of the Anglo-City system are likely to show a considerable augmentation. Already up to the 1st instant the gross receipts show an increase of £30,742, and in view of the great prosperity of the Argentine Republic, which, of course, reflects upon Buenos Ayres, the capital of the country, I see no reason why our receipts and profits should not continue to expand. I will now say a few words with regard to the sums which have hitherto been debited to revenue and credited to the depreciation renewals funds. Including the £65,000 set aside out of last year's profits, and after deducting the expenditure on renewals in 1907, we now have a total balance standing to the credit of the paving depreciation fund and the general depreciation renewals fund of £215,979 12s. 1d. Well, the working of tramways by electricity being, comparatively speaking, a new industry, we naturally gain more experience of the probable life of the permanent way, rolling stock, &c., as time goes on. We propose, therefore, to submit the question generally to an exhaustive examination towards the end of this year, with the view of arriving at a closer approximation of the figure which should in future be annually charged to revenue under this head. You will probably like to hear that we propose very shortly to make an issue of £500,000 new debentures. We have not yet definitely fixed the terms upon which they will be offered, but I have no doubt that the issue will be regarded by the shareholders and the public as a very attractive and thoroughly sound investment. £200,000 of the proceeds of the proposed issue will be applied towards meeting additional capital expenditure for increased rolling stock, some small extensions, and for other outlays which we have made during the last year or two, and the remaining £300,000 will be applied to the purchase of £300,000 of La Capital Traction and Electric Company of Buenos Ayres 5 per cent. debentures. The Capital Traction Company owns a controlling interest in several kindred institutions in that city, and I may add that we are now in negotiation with the municipal authorities of Buenos Ayres with the view of fixing the terms upon which they will sanction the transfer of various undertakings to this company.

Mr. J. R. Corbett seconded the motion.

Mr. H. Brown pointed out that the ratio of expenses to receipts was 65 per cent., and that the working expenses included the extra amount which had to be paid to the power company. In the accounts an amount was set aside as a sinking fund for the first preference shares. When the arrangement was made with the Belgian Syndicate, it was decided that the second preference shares should not be cumulative. He thought it would have been much better if the directors had insisted on those shares being cumulative, but as that had not been done they must do the next best thing—that was to see that the depreciation fund was kept up to a proper amount. Last year nearly £100,000 of the nett earnings was put to the depreciation fund, whereas this year the amount was practically only £52,000, which, he contended, was not enough for a company owning about 150 miles of lines and 1,000 cars. It appeared that the German Power Company, who supplied them with current, had made a new contract with the Municipality of Buenos Ayres, under which at the end of 60 years all the power stations belonging to that undertaking would be turned over to the Municipality. If that were correct, he would like to know what means the directors intended to adopt to enforce their contract

with the Municipality for the full term of 99 years. He considered that the directors should, before the contract with the Municipality was entered into, have tried to get the price for the current reduced. The price paid now was, in his opinion, excessively high.

The Chairman, in reply, stated that it was intended to redeem the second preference as well as the first preference shares. The £4,200 which they put aside as a sinking fund would, on the basis calculated, redeem the whole of the first preference shares at £6 each and the whole of the second preference shares at £10 each. This would be done by applying that fund year by year to the purchase of the new debentures, which would give them a greater return than if they placed the money in Consols or other gilt-edged securities. With regard to the depreciation fund, he agreed with Mr. Brown that that should be carefully watched, and that they should provide each year such a sum as would enable them to meet any heavy renewal expenditure which might become necessary in the future. Mr. Brown had evidently forgotten, when referring to the renewals fund, what he (the speaker) said at the last meeting. On that occasion he said that in future they proposed to deduct the actual renewals from the sum annually set aside towards the depreciation renewals fund. That they estimated should be about £65,000, and, therefore, in future, instead of crediting to the renewals fund £65,000, they would credit that fund with the nett sum, after deducting the annual renewals. (Hear, hear.) With regard to the new contract made between the German Power Company and the Municipality, this board was not consulted before the contract was made absolute, and they most distinctly declined to accept the imposition that was intended to be made.

The resolution was carried unanimously.

VAL DE TRAVERS ASPHALTE PAVING.

The 38th ordinary general meeting was held on Wednesday at the Great Eastern Hotel, Bishopsgate Street Without, Mr. Horatio C. Scott (chairman of the board) presiding.

The Secretary (Mr. T. D. Cooper) read the notice convening the meeting, and also the report of the auditor.

The Chairman, in addressing the shareholders at the meeting, said that the report was, he considered, a very satisfactory one under the circumstances of the case. There had been a falling off in the gross profit, but this was due to the weather having been exceedingly unfavourable for all the operations of the company out of doors. Competition had also been keen. Nevertheless the volume of work which the company executed was considerable, and there was evidence that the keenness of competition had been to some extent reduced. Having regard to the fact that the gross profits were £8,000 below those of the previous year, it was satisfactory to find that the nett profits were almost equal to what they had been for the past two years. This was mainly attributable to the policy of the board in having in the past used the profits largely in wiping off adverse items in the balance-sheet. These, he was happy to say, were almost extinguished now—he might say extinguished—and it was in consequence of the free writing off in years gone by that they were now, with reduced profits, able to pay the same dividend as they had done for the last three years, and to carry forward £4,784. During 1905 and 1906 they wrote off £20,858. That disposed of many bad features in the balance-sheet which would never again appear. The New York property stood in their books at £15,200, but they had never obtained for it a lower valuation than £30,000, and it was well worth that sum. With regard to Venezuela, he said that from there they now had fortnightly shipments of such an amount as, if continued without interruption, would soon enable a profit to be made. The concession from the Neuchatel Company for the supply of rock had been renewed for £15,000 for 18 years. He regarded these as equitable terms, and the renewal of the concession was a proper thing to do. The Paris case was in the last stage, and he hoped it would not be long before they had the money in their till. After dealing with other questions, he moved the adoption of the report and the payment of a final dividend of 1s. per share, making 2s. 6d. per share, or 7½ per cent. for the past year, free of income-tax.

Mr. C. H. McEuen seconded the motion.

Mr. John Newton asked whether the motor traffic was prejudicing them much. He had heard, as an explanation of the low price of their shares, that the maintenance contract might involve the company in considerable expense in view of the heavy motor traffic.

The Chairman replied that the question was one which the board had had before them. They felt at first that injury was being done to their asphalte paving by the oil droppings from motor vehicles, but they had really no redress. The police authorities had suggested that under the cars there should be a pan or receptacle to receive the oil, and that had very much minimised the injury. It had not been found, however, that the oil droppings were of serious consequence. With motor omnibuses rushing about the City, the asphalte streets had a very much heavier traffic to withstand, and the company's maintenance was more severe than before. Still, these motor omnibuses had rubber tyre wheels, and when vehicles with rubber tyre wheels became more general, it was not improbable that their maintenance contract would become less costly.

Further discussion ensued, in which Mr. Binnie and Mr. Ward took part.

The Chairman, in answer to some remarks to the effect that certain of the assets stood in the balance-sheet at too low a figure, said that the writing off was now practically at an end. He considered that the company's position was stronger than it was a year ago. Their trade had improved, prices had also improved a little, and he saw more daylight as regarded the business of the current twelve months. They began the year favourably, they had done more business, and altogether the prospects were more hopeful.

The motion was unanimously agreed to.

The retiring directors—Mr. T. L. Henderson and Mr. John Varley, the latter representing the Neuchatel Company—were re-elected; and Mr. J. F. Clarke was reappointed auditor.

BALAGHAT GOLD.

The twelfth ordinary general meeting of the Balaghat Gold Mining Company, Limited, was held on Tuesday at the Cannon Street Hotel, E.C., the Right Hon. Lord Ribblesdale (Chairman) presiding.

The Secretary (Mr. W. L. Bayley) having read the notice convening the meeting and the auditors' report,

The Chairman said: The results for the year ended December 31 were not as satisfactory as those of the preceding year. The falling off in the gold sales from £178,898 to £132,672 was attributable to the ore treated during the year being of poorer quality to that which we treated in the preceding year. I make it out that the average extraction at the mills for 1907 was 10 dwts. 17 grs. of gold per ton, as against 15 dwts. 17 grs. per ton during 1906. In all 34,574 ozs. of gold were produced as against 46,432 ozs. for the previous twelve months, although 2,100 tons of quartz extra were crushed at the batteries in 1907. If you turn to the accounts they show a profit on the revenue account of £26,289, which, added to the balance brought forward of £1,142, together with the dividend of £108 received from the Kolar Power Station, Limited, and £290 interest on War Loan, makes the total credit £27,830. The total debits placed against this amounted to £18,130, leaving a balance of £9,699, which was sufficient to pay the 10 per cent. preference dividend for the year 1907. The policy adopted in 1906 of charging capital expenditure against profit has been continued. I would draw your attention to the reserve account, which now has a credit balance of £13,000. You will remember that in 1906 the Nine Reefs mine and machinery were purchased for £10,000, and your directors have deemed it advisable to pay for this out of reserve fund and thus leave the remaining capital of the company available for the development of your mines. In February, 1907, the Coromandel mine ceased working, and on the advice of the superintendent in India your directors decided to acquire this area, if it could be obtained at a reasonable figure. The result of negotiations with the Coromandel Company was that we were able to purchase the block for the nominal sum of £2,000, and we paid a further sum of £464 for some machinery which we required in connection with pumping. A point worthy of comment is that the company's property now consists of 832 acres, and has a length on the course of the lode of 6,100 ft., or three times as great as the original Balaghat mine. I need not say that it is a matter of great regret that the development work in 1907 has not resulted more favourably, but I think we are quite justified, in view of our experience of the fluctuating nature of the quartz in Balaghat and other mines on the Kolar goldfields, in anticipating—at all events in hoping—that a larger measure of success will attend the current year's operations than has been recorded in this present year. Lieutenant-Colonel Sir Donald Robertson, K.C.S.I., seconded the adoption of the report.

Mr. Henry Taylor having given a detailed statement of the work done at the mine, went on to say: Although the record of the past year's work is disappointing in many regards, the position of the mine to-day is by no means unsatisfactory. Valuable ground has been discovered in several sections in the process of stoping beyond the limits of the ore-bearing ground taken into reserve, and as a result the ore reserves of the mine, when estimated at the end of the year, showed only a small falling off, and stood at the pretty substantial figure of 61,000 tons. As to the future, I look, as our excellent superintendent in India evidently does, to better developments again before long. Poor zones are met with in all mines of this nature, and the Kolar Field has been no exception to the rule, but fortunately we have many instances to point to of rich ground being again met with beneath an impoverished section. A vigorous policy of exploration is proceeding, both on the Balaghat lode and the parallel lodes, and with the largely extended field for lateral explorations now secured, we consider there is justification for looking to the future with confidence.

DHARWAR REEFS.

The third ordinary general meeting of the Dharwar Reefs Co., Limited, was held, on Wednesday, at the Cannon Street Hotel, E.C., Captain W. Bell McTaggart, D.L., J.P., Chairman of the company, presiding.

The Secretary (Mr. John Ponsford) having read the notice convening the meeting and the auditors' report,

The Chairman said: He had no doubt that the question uppermost in the shareholders' minds was the proposed reconstruction of the company, and he proceeded to deal with the circumstances which had led to their requiring further capital. The difficulty in connection with the treatment of the tailings had now, he said, been overcome; the greater part of the new machinery was now on the road, and it was hoped that it would

be erected on the works in about three months. If the mine should improve in depth, as was hoped, and if the pay chutes widened out, it would not be very long before the erection of another ten head of stamps was justified. When 30 head of stamps was running, and the cyanide plant was working successfully, it was not too much to hope that the company might before long be able to pay their working expenses and enter the list of dividend-paying mines. After mature deliberation the directors came to the conclusion that the only way in which the further capital that was required could be obtained was by reconstructing the company, and from what they had heard from the shareholders they felt pretty certain that the money would be forthcoming. The company owned five blocks of land on the run of the reefs, and two of them were being worked. On the other three, one had been actively explored by the Mysore Company, which had the option up to the end of this year of purchasing it for a cash payment of £67,000. He might be asked if the Mysore Company, of which he was chairman, were likely to exercise this option, but he could not commit himself at the moment to any definite statement on the point. They had spent a good deal of money already on the block referred to, and if the indications continued to be favourable, the option mentioned would be exercised by them. In conclusion, he moved the adoption of the report. The motion was seconded by Mr. Henry C. Taylor, who stated that at the end of last year the ore reserves were computed at 18,000 tons, or 500 tons more than at the close of the previous year, although over 11,000 tons of ore were treated in the mill during the year. The main development points in the mine had lately shown progressive improvement, and they all hoped and believed that the difficulty in the treatment of the tailings had been overcome. After some discussion the resolution was carried, with one dissentient.

At a subsequent extraordinary general meeting the reconstruction scheme was considered, and resolutions approving it were proposed by the Chairman and seconded by Mr. John Taylor. A shareholder inquired what the position of those shareholders would be who, having regard to the recent legal decision in the case of Henderson's Transvaal Estates, would not join in the reconstruction of the company. The Chairman replied that the judgment in question had no bearing whatever on the company's proposals. The solicitor, in further reply, stated that the scheme of reconstruction and the agreement drafted by him based on that scheme were issued prior to the decision given in the Court of Appeal by Lord Justice Buckley in the action referred to. It had, therefore, been very gratifying to him to find after the judgment was in print that the whole scheme as proposed by the directors and submitted to the shareholders that day was absolutely in accordance with that judgment. In answer to a question, the Chairman stated that, having carefully considered the scheme of reconstruction, the directors had thought it advisable for the capital of the new company to be in shares of £1 each credited with 15s. per share paid up and carrying a liability of 5s. a share. The resolution was agreed to.

LONDON EDINBURGH AND GLASGOW ASSURANCE.

The ordinary general meeting of the members of the London Edinburgh and Glasgow Assurance Co., Limited, was held, on March 25, at the offices of the company, Euston Square, Mr. S. Barclay Howard (Chairman of the company) presiding.

The Secretary (Mr. T. V. Cowling) read the notice convening the meeting and the auditors' report,

The Chairman, in moving the adoption of the twenty-seventh annual report, accounts, and balance-sheet for the year ended December 31, 1907, congratulated all connected with the company on the fact that they had now entered into possession of their new building, which the directors considered was admirably adapted for the work. They were very proud of it, because of the fact that it was situated on the company's own freehold, and that they had sufficient land not built on to allow of any necessary extension in the future. Dealing with the report, he stated that the total revenue for the year amounted to £612,438, being a nett increase of £46,000 over the previous year. This was the largest increase over made in any year, even after allowing for the fact that the company had 53 weeks' returns in 1907. (Applause.) The premium income in the ordinary branch amounted to £87,659, and showed an increase of £6,575. In the industrial branch the premium income amounted to £466,012, being an increase of £34,356. In the accident branch the premium income amounted to £26,000, and showed an increase of £2,827; £94,470 was added to the assurance funds during the year, which amounted, on December 31 last, to £913,671. The company paid in claims and grants during the year £259,264, thus making the total claims paid by the company over £3,000,000. If anyone genuinely interested in the welfare of the working classes wishes to see either the value of the work which companies such as ours is doing, or the need for it, he has only to go amongst the homes of the people after some terrible colliery or railway disaster and see side by side the widow and children of the man who has made provision for them with the widow and children of the man who has not made any provision. Thrift, and consequently self-reliance, is increasing, and increasing, I am glad to say, amongst those who need it most, but much yet requires to be done in educating the mind of the workman to the possibilities which insurance possesses for him. Notwithstanding all the talk that one hears about what the Government is going to do, there is the great fundamental truth that out of nothing nothing comes; nothing can be given by the Government that is not extracted from the people, and no service can be employed for conducting business by the Government without payment, and unless the immoral principle is adopted of taxing the deserving to provide for the undeserving, we are going to solve the problems of the future by the development of the individual in the knowledge and power of production, and in the use that he makes of his earnings, and in this desirable and laudable work we hope to see the London Edinburgh and Glasgow take a conspicuous part.

Mr. C. Wedding Skinner said: The report, the adoption of which I am about to second, is, in the opinion of the directors, the best report that has ever been submitted. During the past ten years we have increased the premium income in the ordinary branch from £35,000 to £87,000, the industrial premium income from £259,000 to £466,000, the accident premium income from £12,000 to £26,000, and the assurance funds from £173,000 to £913,000. During the same period we have reduced the temporary capital by over £20,000; we have written £56,421 off the establishing of business account, and set up a reserve fund of over £15,000. That is ten years' work for a young company between its seventeenth and twenty-seventh years, which has made the London Edinburgh and Glasgow a name amongst the most progressive of kindred institutions in the country.

The resolution was then put to the meeting and carried unanimously.

An extraordinary general meeting was subsequently held, at which the members approved the Bill "to make provision with reference to claims by holders of policies of and other persons assured in the Alliance and other assurance and insurance companies against other companies or persons for compensation or payment in respect of injuries."

CORPORATION OF WESTERN EGYPT.

The third ordinary general meeting of the shareholders of the Corporation of Western Egypt, Limited, was held on Saturday at the Cannon Street Hotel, E.C., Mr. E. Manville, M.I.E.E. (Chairman of the company), presiding.

The Secretary (Mr. Alfred W. Deering, F.C.I.S.) having read the notice convening the meeting and the auditors' report,

The Chairman, in the course of his speech, said: The opening of the railway puts us in a position to irrigate and put land into a condition for sale at a reasonable cost. The wish of the Government that we should postpone sales of land for two years was at once complied with by the corporation; but this period has just expired, and the formal application for the first year's grants will now be made. The revenue-earning period is now within sight. A fair amount of passenger traffic and of goods traffic already exists on the railway, and when to this is added the heavy traffic which we have in early prospect, there is every reason to suppose that the line will be contributing a very satisfactory sum to the general revenue of the corporation. During the present month we have been approached by leading persons interested in the date trade—and large quantities of dates have hitherto been brought from the Oases to Cairo on pack camels—requesting us to enter into a working agreement with them. Nearly one quarter of a million sterling has gone in the construction of our railway. Apart from the sum unavoidably spent in securing the subscription of our remaining capital in January of last year, and other necessary expenditure, the balance has gone exclusively to development in the Oases. You have, however, to bear in mind that we have issued no debentures, and that we are possessed of an important and valuable railway. We have made financial arrangements to keep the work of land development going, and we trust that the general conditions will soon be more favourable for the completion of arrangements for carrying into effect on a large scale an important programme of land development, the results of which will be calculated to give you a return in dividends. That the lands can be readily disposed of when brought into cultivation there is no reasonable doubt. We have already entered into an agreement concerning the sale of upwards of 5,000 feddans at £15 a feddan, and have received as deposit money £5,000 until we are in a position to give delivery of the land. We also have numerous offers to purchase, all of which have, of course, been carefully registered. You will be glad to know that more intimate acquaintance with the possibilities of the Oases has not only justified every statement in our prospectus, but has shown that our concessions are of more intrinsic value than we had anticipated. The results of a visit of a representative of our chemist to the Oases has enabled us to fix an arrangement for the flotation of a company to manufacture cement and kindred products in Egypt. The materials for the purpose have been shown to exist in superabundance. They are of the highest quality, and the cost of manufacture is certified at so satisfactory a figure, even as regards those competitors who are most favourably situated, that there is no doubt whatever that a most successful industry can be established. What I wish to emphasise now is the important advantages that may be looked for on the part of the corporation from the subsidiary companies, of which this will be the first. The corporation will receive a sum in cash to reimburse them the capital expenditure to be incurred in the provision of rolling stock and sidings. They will, as vendors, receive 15,000 shares, to be issued to them as fully paid, and these the board regard as of great future value, while, besides being entitled to one-tenth of the total profits of the company and to a royalty on the material, the mineral traffic it will give the Western Oases Railway will be very great. Another company may be

promoted to manufacture in the country superphosphates, for which there is a growing demand, while the deep bore we are at present engaged in putting down may reveal interesting possibilities. The deposits of ochre are of considerable value, though at present lying some distance from the railway; but in course of time, in the aggregate, these several industries should each yield their contribution to the parent company. I beg to move the adoption of the report.

The Hon. W. Turlough O'Brien seconded the motion, which was adopted.

JOHN BARKER AND CO.

The fifteenth ordinary general meeting of the shareholders of John Barker and Co., Limited, was held yesterday, at Town Hall, Kensington, W., Mr. John Barker, M.P. (chairman of the company), presiding.

The Secretary (Mr. Henry W. Over, F.C.I.S.) having read the notice convening the meeting and the auditors' report,

The Chairman said: It is a great pleasure to come to these annual meetings as we come to-day for the fifteenth time, with another report of continued expansion of trade and largely increased business. To be able to meet under such circumstances is matter for satisfaction after the experiences we have had of more difficult markets as well as keener competition. Notwithstanding these perplexing conditions, the volume of trade during the year has been greater than ever, independently of the trade of Pontings'. There is a much larger number of customers, but in individual instances the amounts are smaller. The natural result is that there has been an increase in the cost of delivery of parcels, and the net profits are less than one could wish. Various causes have contributed to arrest the upward movement in the matter of profit, among which may be mentioned the general advance in the cost of all kinds of goods of almost all commodities at their place of origin. The markets have in consequence been perplexing to keen buyers, for experience proves that it is not always practicable when goods are first advanced to obtain a corresponding increase in price from the public; and, on the other hand, an increase in price generally reduces the demand, as not unfrequently happens. I do not think that during the whole of my experience (which extends over a good many years) I have experienced so many adverse circumstances as prevailed during last year. The long wet summer of last year adversely affected some of our costume and drapery departments, and the unusual mildness which prevailed during the greater part of the winter also curtailed the customary sale of seasonable goods. In spite, however, of these manifold conditions, your directorate have maintained such a high state of efficiency, that the profits amount to the large total of over £241,000, and for the tenth year in succession, even with largely increased capital, a dividend of 12½ per cent. on the ordinary shares is recommended. It is interesting to note that the dividends paid on the original issue of ordinary shares have repaid the nominal capital nearly twice over since the formation of the company, or, to be exact, more than one and three-quarter times. It will be observed that fixtures, fittings and utensils have been freely written down, under the head of depreciation, and repairs and renewals, by no less than £5,105, while £875 has been set aside for redemption of leasehold properties in compliance with the debenture stock deed. A sinking fund has been created by which on payment of a small yearly insurance premium the whole of the fixtures and fittings will eventually be liquidated; and this healthy method will also be adopted in connection with Pontings'. For the information of our shareholders it may be stated the purchase of Pontings' great business was effected because we anticipated the probability of serious competition, and which has, in consequence, been rendered nugatory. In connection with this purchase, an issue of £150,000 4½ per cent. debenture stock was made in September last, which was more than fully subscribed; and I may mention that the addition to the reserve against properties on the valuation of Pontings' amounts to no less than £34,890. The whole of this new undertaking is now in good working order, thanks to the incessant vigilance and activity of your directors and the loyal co-operation of the staff generally. In view of the heavy additional responsibilities cast upon the directors and the exceptional character of their services, you will be asked to approve an additional remuneration in future of £2,500 to your directors, provided not less than 10 per cent. be paid to the ordinary shareholders. It has not been a trifling task to have converted within a few months a large loss previously shown at Pontings' into a small working profit; and shareholders may rest assured nothing will be left undone to make this acquisition in course of time a valuable money-making investment. While I am willing—health permitting—to give full energies and the benefit of my long experience to the business for another year, it will, I fear, be impossible for me to continue longer. The time has now arrived when I must, on the advice of my medical adviser, take steps to lighten my labours.

On the motion of Mr. Foster, seconded by Sir James Bailey, the report was adopted. The resolution to increase the directors' remuneration was carried unanimously.

National Provincial Bank of England.—The statement for March 25 shows liabilities on notes or bills of £611,368, and on simple contracts of £54,832,879, against assets consisting of cash on hand and at Bank of England £8,301,601, money at call and short notice £3,353,727, British Government and other securities £14,399,517, and bills of exchange £34,739,402.

Continued from next page.

To the Holders of
NATIONAL RAILROAD COMPANY OF MEXICO PREFERRED SHARES and SECOND PREFERRED SHARES.

Referring to the Plan for the readjustment and union of the Mexican Central Railway Company, Limited, and National Railroad Company of Mexico, the undersigned beg to inform holders of the above Shares that the terms offered for same have been agreed on after prolonged negotiations, and recommend their acceptance and the deposit of Shares under the Plan without delay.

SPEYER BROTHERS,

Municipal Trust.—Winchester House, 12.30 p.m.
North British Canadian Investment.—Glasgow, noon.

Alexander Thom and Co., Limited.—This firm of Dublin printers made a profit in its year ended January 31 last, including interest on investments, of £13,378, which with £6,619 brought forward gave a total of £19,998 for distribution. From this directors' fees, interest on debentures and the preference dividend were met, £3,387 written off as cost of maintenance and £712, being one-third, off cost of electrical power producing plant, leaving £10,165, which the directors appropriate along with £5,125, the balance of the reserve, after paying the preference dividend for the July half-year, to reducing the book value of the investments to £1,650 and the goodwill by £8,500, leaving £3,243 to be carried forward. Last year's profits rose by £1,025. Stock stands at £10,715, sundry debtors owe the company £25,131, and it owes sundry creditors £11,167.

Baraoora (Sylhet) Tea Company.—During the year ended December 31 this company gathered a crop of 1,848,053 lbs., which sold at an average of 7.04d. per lb., and the gross income, including miscellaneous receipts, amounted to £54,474. Expenses took £33,446 of this and the nett profits with £7,712 brought in and £413 from interest, &c., amounted to £29,153, of which £5,000 was absorbed by debenture interest and preference dividend. Out of the balance £2,252 for commission on new issue of shares was written off, £5,000 was applied in reduction of block account, and the ordinary shares receive dividends aggregating 10 per cent., leaving £8,901 to be carried forward. Block account stands at £175,000 and £14,342 has been spent on the sisal garden at Sootapara, against which the reserve amounts to £10,000. Liabilities to sundry creditors are £16,190 and £3,263 has been borrowed from the bankers, but on the other hand debtors owe £11,922, stocks of tea are valued at £14,383, and the company has £2,428 invested in Calcutta 5 per cent. Municipal debts.

MEXICAN CENTRAL RAILWAY COMPANY, LIMITED, NATIONAL RAILROAD COMPANY OF MEXICO.

To the Holders of the following Securities:

MEXICAN CENTRAL RAILWAY COMPANY, LIMITED:
- Priority 5 per Cent. Bonds,
- First Mortgage 7 per Cent. Bonds and Scrip, Assented,
- Consolidated Mortgage 4 per Cent. Bonds,
- First Consolidated Income Bonds and Scrip,
- Second Consolidated Income Bonds,
- Registered Income Bonds and Scrip,
- Stock.

NATIONAL RAILROAD COMPANY OF MEXICO:
- Preferred Stock,
- Second Preferred Stock,
- Common Stock (old),
- Deferred Stock.

The Mexican Government, which, through ownership of stock, already practically controls the National Railroad Company of Mexico, has caused to be prepared a plan for the Readjustment and Union of Mexican Central Railway Company, Limited, and National Railroad Company of Mexico, through the constitution of a new Company, to be controlled by the Mexican Government by Stock ownership.

The undersigned have consented to act as Readjustment Managers of such Plan.

In pursuance of legislation enacted by the Republic of Mexico, authorising the Federal Executive to issue the necessary decrees, and of a decree of the Federal Executive, issued accordingly, a Company, hereinafter termed the New Company, has been constituted in Mexico by Public Deed, under the name of

FERROCARRILES NACIONALES DE MEXICO
(NATIONAL RAILWAYS OF MEXICO),

which it is proposed shall acquire the securities and stocks of the Mexican Central Railway Company, Limited, and of the National Railroad Company of Mexico, and which will have corporate power to take over when deemed practicable the railroads and properties of said Companies.

NEW SECURITIES.

The New Company is to authorise the following bonds and shares:

All bonds are to be payable, both as to principal and interest, without deduction for any taxes which the Company may be required to pay thereon or to deduct therefrom under any present or future law of the United States of Mexico or of any State or municipality therein or of the United States of America or of the State of New York or any municipality in said State, and are to be payable, both as to principal and interest, in the City of New York, in gold coin of the United States of America, of or equal to the present standard of weight and fineness, and all coupon bonds are also to be payable, both as to principal and interest, at the option of the holder, in the City of Mexico, at the fixed rate of Two Gold Pesos to the dollar in Mexican Gold Pesos, or in London at the fixed rate of $4.86 to the Pound Sterling, and at such places as the Readjustment Managers may determine at the fixed rates of Four Reichsmarks Twenty Pfennigs if in Germany, or Five Francs Eighteen Centimes if in France, Belgium, or Switzerland, or Two Guilders Forty-eight Cents to the dollar if in Holland.

The dividends on the First Preferred Shares and on the Second Preferred Shares, and in case of liquidation, the amount distributable on either class of preferred shares, are to be made payable at the option of the holder, at the fixed rate of Two Pesos to the dollar, either in the City of Mexico in Mexican Gold Pesos, or in the City of New York in United States Gold, in each case of the present standard of weight and fineness. Such dividends are to be payable without deduction of any tax which the Company may be required to pay thereon or to deduct therefrom under any present or future law of the United States of Mexico or of any State or municipality therein.

a. Prior Lien Four and One-Half Per Cent. Sinking Fund Redeemable Gold Bonds, for $225,000,000 United States Gold.

The Prior Lien Bonds are to mature July 1, 1957, interest payable semi-annually, January 1 and July 1. They are to be secured under mortgage or deed of trust to Central Trust Company of New York, by the deposit and pledge as a first charge of all securities embraced in the Plan as finally carried out and otherwise as detailed in the Plan, and provision is to be made in the mortgage for the creation by the New Company of a sinking fund, beginning for the year 1917, and calculated to be sufficient, with accumulations, to retire the entire issue at or before maturity. They are to be subject to purchase for the sinking fund and to redemption on any interest day after January 1, 1917, at 105 and accrued interest, on not less than 90 days' notice.

The right is reserved to issue $6,000,000 additional bonds ranking *pari passu* with the other bonds of this series to take up or retire at or before maturity £1,200,000 Prior Lien Sterling Bonds of the Mexican International Railroad Company, or an equal amount of Prior Lien Bonds of National R. R. Co. of Mexico into which such Sterling Bonds of the International Company may have been refunded.

b. General Mortgage Four Per Cent. Sinking Fund Redeemable Gold Bonds for $160,000,000 United States Gold, unconditionally guaranteed, principal and interest, by the Republic of Mexico, by endorsement on each Bond.

The Guaranteed General Mortgage Bonds are to mature October 1, 1977, interest payable semi-annually, April 1 and October 1. They are to be secured under mortgage or deed of trust to the New York Trust Company, by a charge subject to the Prior Lien Mortgage on all securities and properties at any time embraced in such mortgage, and provision is to be made in the mortgage for the creation by the New Company of a sinking fund, beginning for the year 1937, and calculated to be sufficient with accumulations to retire the entire issue at or before maturity. They are to be subject to purchase by the sinking fund; and to redemption on any interest day after April 1, 1927, at par and accrued interest, on not less than 90 days' notice.

The right is reserved to issue additional bonds ranking *pari passu* with the other bonds of this series to take up or retire at or before maturity an equal amount of the Consolidated Mortgage Bonds of the Mexican International R. R. Co., or of Consolidated Mortgage Bonds of the National R. R. Co. of Mexico, into which such bonds of the International Co. may have been refunded, and also to issue additional bonds to take up or retire at or before maturity an equal amount of the Consolidated Mortgage Bonds of the National R. R. Co. of Mexico, into which Prior Lien Bonds of that Company may have been refunded.

c. Non-Cumulative Four Per Cent. First Preferred Shares for 60,000,000 Mexican Gold Pesos or $30,000,000 United States Gold.

To assure to the holders of First Preferred Shares the payment of semi-annual dividends of 1 per cent. for the period of three years from January 1, 1908, to the extent to which the net profits of the Company which shall first be applied for that purpose shall not be sufficient to make such payment, provision is to be made for the setting aside by the Company, as a separate fund of $1,800,000 Prior Lien Bonds, and $1,200,000 Guaranteed General Mortgage Bonds, or in case of a sale thereof, then a sufficient amount of the proceeds thereof.

d. Non-Cumulative Five Per Cent. Second Preferred Shares for 250,000,000 Mexican Gold Pesos or $125,000,000 United States Gold.

The Second Preferred Shares shall confer on the holders thereof the right to receive each year out of surplus profits dividends up to 5 per cent. on their par value after the dividend of 4 per cent. on the First Preferred Shares for such year shall have been paid or set aside and before any dividend shall be paid for such year on the Common Shares, but no deficiency in such dividend in any such year shall be made up out of the surplus profits of subsequent years. After payment of such dividend of 5 per cent. any residue of surplus profits distributable in dividends for such year shall be paid to the holders of the Second Preferred Shares and to the holders of the Common Shares constituting part of the initial capital, in proportion to their respective holdings, without regard to class.

e. Common Shares for 150,000,000 Mexican Gold Pesos or $75,000,000 United States Gold.

For a full statement of the rights of the holders of the respective classes of shares, reference is made to the Decree of the Federal Government of the Republic of Mexico, dated July 6, 1907, a copy of which has been filed with each of the Depositaries, and can be inspected at the offices of any of the Depositaries.

TABLE SHOWING BASIS OF EXCHANGE OF SECURITIES.

Deposited Bonds and Stocks.	Each $1,000 par Value of Old Securities is to Receive					
	Cash.	4½% Prior Lien Bonds.	Guaranteed 4% General Mortgage Bonds.	First Preferred Shares.	Second Preferred Shares.	Common Shares.
	$	$	$	$	$	$
Mexican Central Railway Company, Limited—						
Priority 5% Bonds		700	475			
First Mortgage 7% Bonds and Scrip (assented)		1,000				
Consolidated Mortgage 4% Bonds			325		75	
First Consolidated Income Bonds and Scrip					1,100	
Registered Income Bonds and Scrip					1,100	
Second Consolidated Income Bonds					1,000	
Stock					1,000	
National Railroad Company of Mexico—						
Preferred Stock	100			1,000		
Second Preferred Stock					1,100	
Common Stock (old)					733⅓	333⅓
Deferred Stock						1,000

The amount of the coupon due July 1, 1908, on deposited Priority 5 per Cent. Bonds, First Mortgage 7 per Cent. Bonds, Assented, and Consolidated Mortgage 4 per Cent. Bonds of Mexican Central Railway Company, Limited, will, when received by the Readjustment Managers, be paid to the holders of Certificates of Deposit on presentation of same to the proper Depositary to have such payment stamped thereon.

The new Prior Lien 4½ per Cent. Bonds delivered in exchange will carry coupon for six months' interest due January 1, 1909, and the Guaranteed General Mortgage 4 per Cent. Bonds will carry a coupon (stamped) representing three months' interest due October 1, 1908.

The 10 per cent. cash payment to be made on exchange of National Railroad Company of Mexico Preferred Stock is to be payable concurrently with the delivery of the new securities.

Non-interest bearing scrip will be issued for fractional amounts of bonds convertible, when presented in amounts of $500, into bonds carrying interest from July 1, 1908, and scrip for fractions of shares will be issued convertible, when presented in amounts of $100 gold, into shares ranking for dividends from July 1, 1908.

It is not proposed at present to deal with the following securities:

NATIONAL RAILROAD COMPANY OF MEXICO
- Prior Lien 4½ per Cent. Bonds
- First Consolidated 4 per Cent. Mortgage Bonds
- 5 per Cent. Gold Notes (Extended)

MEXICAN CENTRAL RAILWAY COMPANY, LIMITED,
- Four-Year 5 per Cent. Gold Notes,

but, as stated in the Plan, the new Company is to become liable for the punctual payment, both as to principal and interest of said securities.

CASH REQUIREMENTS.

The cash requirements as stated in the Plan will be met by the purchase by the Bankers constituting the Readjustment Managers for their own account of

$10,000,000 Prior Lien 4½ per Cent. Bonds and
$6,750,000 Guaranteed General Mortgage 4 per Cent. Bonds.

DEPOSIT OF SECURITIES AND STOCK.

Holders of securities and stock of MEXICAN CENTRAL RAILWAY COMPANY, LIMITED, called for deposit, who desire to become parties to the Plan, must, on or before May 1, 1908, deposit their securities and stocks, under the Plan with CENTRAL TRUST COMPANY OF NEW YORK, No. 54, Wall Street, New York, or with its agents for that purpose in Boston, KIDDER, PEABODY, & CO., 115, Devonshire Street, Boston.

Holders of stocks of NATIONAL RAILROAD COMPANY OF MEXICO who desire to become parties to the Plan must, on or before said May 1, 1908, deposit their stocks under the Plan, with THE MERCANTILE TRUST COMPANY, No. 120, Broadway, New York.

Deposits of stocks and securities of both of said companies also may be made:

In London with: J. HENRY SCHRODER & CO. SPEYER BROS., 145, Leadenhall Street, E.C. 7, Lothbury, E.C.
GLYN, MILLS, CURRIE, & CO. 67, Lombard Street, E.C.
SWISS BANKVEREIN, 42, Lothbury, E.C.

In Amsterdam with: HOPE & CO., TEIXEIRA DE MATTOS BROS.

In Mexico with: BANCO NACIONAL DE MEXICO.

No securities will be accepted for deposit unless in negotiable condition. First Consolidated Income Bonds of the Central Company must carry all coupons maturing after July 10, 1892, Second Consolidated Income Bonds must carry all coupons; other bonds must carry all coupons maturing after January 1, 1908; and all certificates of stock must be accompanied by proper transfers and assignments executed in blank. For securities deposited proper certificates of deposit will be delivered, and on such deposit the depositor will become bound by all the provisions of the Plan and Agreement of Readjustment and Union, of which the foregoing is only a partial summary, and to the exact terms of which reference is made, and upon the terms of which solely will deposits be accepted. Copies of the Plan and Agreement may be obtained at any of the above-mentioned offices. The Readjustment Managers are empowered in their discretion to declare the Plan operative, and in their discretion to abandon the Plan.

Application will be made to the London Stock Exchange for a quotation for certificates of deposit issued for securities already listed on such Exchange.

The Plan has been approved by the Government of Mexico and, subject to the sanction of its Debenture holders, by the Board of Directors of the Mexican Central Railway Securities Company, Limited, which holds over $17,500,000 Consolidated Mortgage 4 per Cent. Bonds of the Mexican Central Railway Company, Limited, and by the holders of a majority of the outstanding stock of the Mexican Central Railway Company, Limited, and of the National Railroad Company of Mexico, and by the respective Boards of Directors of the two Companies last-named.

Head Office: *YOKOHAMA.*

TO THE SHAREHOLDERS.

GENTLEMEN:—

The Directors submit to you the annexed Statement of the Liabilities and Assets of the Bank, and of the Profit and Loss Account for the Half-year ended 31st December, 1907.

The Gross Profits of the Bank for the past Half-year, including *yen* 1,055,058.72 brought forward from last Account, amount to *yen* 13,890,956.84, of which *yen* 10,809,404.16 have been deducted for Interests, Taxes, Current Expenses, Rebate on Bills Current, Bad and Doubtful Debts, Bonus for Officers and Clerks, &c., leaving a balance of *yen* 3,081,552.18 for appropriation.

Owing to heavy depreciation of Silver towards the end of the past Half-year, the Directors have decided to write off *yen* 480,000.00 out of the Silver Depreciation Fund in order to adjust the rate of the Silver Fund held in China. The Silver Depreciation Fund will hereafter appear as a separate item in the Balance Sheet.

The Directors now propose that *yen* 550,000.00 be added to the Reserve Fund. From the remainder the Directors recommend a Dividend at the rate of Twelve per Cent. per Annum which will absorb *yen* 1,440,000.00.

The Balance, yen 1,091,552.18, will be carried forward to the credit of next Account.

Head Office, Yokohama, 10th March, 1908. BARON KOREKIYO TAKAHASHI, Chairman.

BALANCE-SHEET, 31st December, 1907.

The Investors' Review

EDITED BY A. J. WILSON AND SON.

Vol. XXI.—No. 537. New Series. SATURDAY, APRIL 18, 1908. (Registered as a Newspaper.) Price 6d.

Replies to Inquiries about Stocks and Shares.

These are given each week in the INVESTORS' REVIEW on the following terms:—

One Reply to **One** Question — **One Shilling.** Any number of questions may be put and will be answered at the rate of **One Shilling** each. The questions should be numbered and a copy kept, as securities cannot be named with comments in the printed replies.

For a fee, however, of **One Guinea** per annum paid in advance, a **Key** to the previous week's replies will be sent early in the following week to Subscribers.

Deposits of "Query Money" may be made in advance, and will be acknowledged in the "Answers" column. Notice of exhaustion will also be given there.

If tempted to speculate by circularising brokers Readers should pause and ask the INVESTORS' REVIEW first; its reply will probably save them from many a loss.

Telegrams advising about new securities cost **Half-a-Crown** each, plus cost of the telegram.

Private Letters in answer to inquiries can be had if desired. The minimum charge for such letters is **Ten Shillings,** but for this three questions will be answered if desired. For every question beyond three replied to in any one letter the charge is **Half-a-Crown per question.**

Correspondents can have their lists of investments overhauled and advised upon by letter on precisely the same terms.

Also models of grouped investments will be supplied according to directions given and on the following terms, each list being distinct and never a mere repetition:—For any number of stocks up to **Five, One Guinea;** for from **Six to Ten** securities **Two Guineas,** and so on at the rate of **One Guinea** for each **Five.**

Deposits may be made for letters just as for replies given in the Paper, but letters are never volunteered.

PUBLISHERS' NOTICES.

The Investors' Review is a Subscription Journal, and will be delivered to subscribers in London by the first post, or sent to the country and abroad by the first mail, on Saturday Mornings on the following terms:—

One Year - £1 1s. Six Months - 11s. Three Months - 5s. 9d.

Short of Three months the Price is **6d.** per Copy *Inland*, and **6½d.** *Abroad, Post Free.*

Subscribers can change their address as often as they please, but notice of change must reach the Publishing Office not later than the First Post on Friday Morning.

For a fortnight before the Subscription expires the **Investors' Review** will be forwarded in a different coloured wrapper.

Cloth cases for binding the Half-Yearly Volumes price **1s. 6d.** postage **4d.** extra. Bound Volumes **15s. 6d.,** or **16s. 3d.** post free.

Cheques and P.O. Drafts should be made payable to

CLEMENT WILSON,
"Investors' Review" Office,
Norfolk House, Norfolk Street,
London, W.C.

The Editors cannot undertake to return rejected communications.

Letters from correspondents must, in every case, be authenticated by the name and address of the writer.

The Editors desire it to be understood that a charge is made for the insertion of reports under the heading of Company Meetings, and they cannot accept responsibility for statements made therein.

The Investors' Review.

The New Cabinet.

Mr. Asquith is to be congratulated. He had a job of extreme difficulty laid upon him by the lamented resignation of Sir Henry Campbell-Bannerman, it being naturally much harder to reshape an existing Cabinet than to make an entirely new one. But he appears to have succeeded wonderfully well, and the country will give the new team a favourable reception. It has youth in its favour and an enthusiasm which may make up, and more than make up, for what it lacks in experience; and it is decidedly more democratic in its composition than the last one was, even though it does include some men whose working days might well be over, but whose long careers may give them value as political Nestors. There never was a Ministry in this country in which so many young and youngish men whose origin is what we snobbishly call "humble" was embraced, and provided they avoid over-eagerness to legislate and refuse to become the mere executants of doctrinaire faddists or of their bureaucratic tutors, they should leave their mark, a lasting and definite mark, on the administration of the Empire. It is reform in the conduct and control of the nation's business, much more than the making of new laws and their new crimes, that we require; a simplification of methods and a cheapening, not a further multiplication of permanent tax and rate consumers.

A disposition has been shown to express disappointment over the acceptance of a peerage by Mr. John Morley, but those who sneer or complain understand neither the man nor the lesson conveyed by his career. Our complaint against him is not that he should have consented to enter the House whose mending or ending he philosophically advocated, for that is a step with which we can have no concern, but that his retention of the office of Secretary of State for India as a peer will tend to remove the affairs of that sorely tried dependency still further from the public eye. Who will care to pepper the Secretary of State with questions about Indian affairs in the Lords, or to discuss an Indian Budget there, or the vexatious partition of Bengal, or that decentralisation report now on its way home? Few, very few. Our discontent with the change will be shared by but a small minority which calls itself "friends of the Indian people," for the nation at large cares nothing about India, and never will care anything as long as the Simla Government punctually meets its engagements. It is as indifferent to the fate of those who pay and to the problems of finance and Government seething to a boil-over in India as the shareholders in a prosperous joint-stock company who measure prosperity by the dividends paid, and never ask whether the money comes from capital or from income. Even those who labour and agitate for what is called "self-government for India" hardly ever display the least knowledge of or interest in the economic corrosion going on year by year in the peninsula, and not one Anglo-Indian we ever knew or heard of has found himself prepared to go so far with "Home Rule for India" as to be willing to subject his pension and allowances to the control of an Indian Parliament. So Mr. Morley's translation will perhaps do less harm as things are than if he had taken a peerage and transferred his personality to the Home Office.

It is therefore in relation to the finance and spending departments that the changes are most interesting to us. Politicians habitually accept the current small change of financial speech as heaven-ordered gospel in things monetary. They never probe down to root principles, never examine the phraseology they employ to see whether it represents falsehoods and forgeries or the established truth, and most of them are equally ignorant of financial technique. It was so with Mr. Asquith; it is so with Mr. Lloyd George, and from our practical point of view, we should much rather have seen a keen, experienced and very able business man like Mr. E. H. Holden at the Exchequer than either of them. He at least would not have been at the mercy of plausible theorists, would not set the teeth of City men on edge by his ignorance, or suffer the wise gentlemen in the Treasury to mishandle the money market, upon which the smooth running of the great river of the world's daily business engagements so much depends. But the mere man of business is at a discount in all Governments, and we must be satisfied with the best we can get. That Mr. George is the best man for the Exchequer his chief could find among the politically eligible we think probable, for Mr. George has shown himself a capable and energetic man in all the affairs he has touched. The changes at the Admiralty may also work for relief, although we fear Mr. McKenna is of Sir Charles Dilke's school of "big navy" doctrinaires. We all must desire a powerful navy, but power and monstrosity are not necessarily synonyms. However, the time has not come to judge. It is the season of hope, and hope must always be subdued by the reflection that, after all, the best and ablest of Parliamentary chiefs of departments can do but little to modify or control the permanent staff. Most of them seek to do little but obey orders, and it is the law of the politician's being to be moved on to another department as soon as he has acquired sufficient knowledge of the one he presides over to make him a possible source of anxiety to those nominally his subordinates therein. He might take an independent line one day and disturb their sacred calm, or his instructed inquisitiveness might become troublesome. That being so, we may be thankful for so few changes in the *personnel* of the Government, and make up our minds to pay our quotas of the excessive taxation with what serenity of mind we can muster.

The Trade of British India.

If attention is confined to the summary figures placed at the beginning of the "Tables relating to the trade of British India with British possessions and foreign countries" in the five years ended 31st March, 1907, the inference might be that the country is prospering, the total over-sea imports, including Government stores and treasure, both private and Government, having risen from £74,132,000 at 15 rupees to the £ in 1902-3 to £107,881,339 in 1906-7. Of this total, private merchandise alone gives an increase of nearly £20,000,000, the value having risen from £52,252,000 in the earlier year mentioned to £72,205,000 in 1906-7. Exports, as is fitting for a tributary country, have gone up at greater speed even than this, and the outflow of Indian produce and manufactures rose from £83,920,000 in value for 1902-3 to £115,388,000 in 1906-7, the total exports, including Government stores, the trans-shipment of foreign merchandise and private and Government treasure, having mounted from £92,703,000 to £121,595,000, so that the total sea-borne trade of the Peninsula out and in expanded from £166,835,000 in 1902-3 to £229,746,000 last year, an increase of nearly 38 per cent., and much of this increase is due to extended business, for higher prices have only a moderate part in the development. Yet the growth is not in all respects healthy, although we cannot yet determine the extent to which it has been stimulated by the debasement of the currency; nor is it sufficient to cover the drain upon India caused by the British demands which the Simla Government is bound to gratify. In the five years the nett exports of merchandise, that is to say the excess of exports over imports, rose from £29,052,000 in the earliest to £39,621,000 in the latest year; but this increase, which would perhaps have been sufficient by itself to cover all the home charges, so called, of the Government, was neutralised to no small extent by the nett imports of treasure, which rose from £10,481,000 in 1902-3 to £25,908,000 in 1906-7 — with variations between, none of which, however, were sufficient to leave enough margin of excess exports to cover the drafts of England upon India. Thus in the best year of the five, 1903-4, when the excess exports of merchandise was £40,617,000, the final nett excess was brought down to £24,894,000 by a nett import of treasure amounting to £15,723,000, so that the free balance, as it might be called, the nett excess of exports, was at least £8,000,000 short of the amount required to cover all home charges for that year. And the balance is short every year. What can we infer from this but that India is sustained in an appearance of solvency by the steady inrush of ten to twelve millions sterling of British capital year after year? Without that the trade of India even on its present scale, and increasing in an apparently satisfactory manner though it is doing, would be altogether inadequate to sustain the strain imposed by the imperial raj.

And when we come to look through the details of the business comprised in these satisfactory looking round totals, doubts of another kind arise as to whether this trade is really as profitable to India as it looks or is as spontaneous as it should be. There are such violent fluctuations in some of the items composing the exports, and prosperity even when it is in a manner constant is limited to so few commodities, that one does not acquire a favourable opinion about the solidity of the Peninsula's development. Much of the import business, for instance, must be carried on to meet the requirements of the European administrators and traders, functionaries and manufacturers resident in India. It is never the native who orders large quantities of railway goods of every description, but the Government and European owned railways. Nor does the consumption of vegetable and other fibres used in manufacturing yarns and tissues drawn into the country from abroad indicate to any great extent the requirements of native manufacturers. Some of these native producers there are prosperous and progressive, especially in the Bombay Province, but in Bengal the spinning and weaving industries are to a large extent created and sustained by foreign control and capital. Much of the import of machinery and millwork is therefore in fulfilment of British orders, and we fear the same applies to a preponderating share of the general merchandise India imports from abroad. Who consumes most of the hardware and cutlery imported into India? Where does the old iron go as well as the bar, angle, beam, pillar and other iron? The natives doubtless consume Manchester goods, which form the largest item by far in the import values and the trade in which is on the whole progressive, but much of the apparel sent into the country must be called for by Europeans or Eurasians, and most of the arms and ammunition, as well as no small part of the building and engineering materials, the telegraph material, the cordage, sheet and plate glass and so on are sent in fulfilment of other than purely native orders.

The bulk of the export business is also in the hands of the European, and, apart from the Government opium and Indian textiles, it consists almost wholly of raw materials in which the fluctuations of quantity and value are often striking. Take wheat as an example. In 1902-3 India was able to send away only 10,292,000 cwt. of this cereal, but two years later it exported 43,000,000 cwt., and in 1906-7 the total again tumbled to 16,029,000 cwt. Expressed in the conventional pounds sterling this means an advance from £3,010,000, which was the value of the export for 1902-3, to £11,937,000, the value in 1904-5, and a drop again to £4,836,000 for 1906-7. Rice is a much more steady article of export, but also an unprogressive one, at any

rate in the five years covered by these elaborate tables. Apart from gold India exports very little of the heavier metals, its largest item in that category being manganese ore, and the whole of the gold sent out of the country, of which the account appears under treasure, is the property of people in this country. The export of tobacco is insignificant and the business in vegetable oils is small, but the export of raw jute is considerable on the average and also of goat skins, raw cotton, oil cake, linseed, rape seed and cotton seed. A large export business is also done in cotton twist and yarn of native manufacture as well as in Indian-made cotton piece goods, yet the value of the tissues apart from the yarn never reaches £1,500,000, while the export value of the cotton yarns and twist has fluctuated in the past five years between £5,693,000 and £8,258,000, but the increase is by no means progressive. A great business is also done in gunny bags and gunny cloth largely with the United States. None of these articles, however, indicate that a great industrial population is developing within the Peninsula, and the progress of agriculture, fisheries, working in metals and wood as well as in the high manufactures of cloth and works of art is terribly slow.

For all that India seems to be developing an export business with many countries of the world besides England. Of her total imports of merchandise the United Kingdom is still the chief source of supply, and in 1906-7 furnished £48,199,000 out of the £72,205,000 imported; but the exports of Indian produce are much more widely distributed, the whole British Empire sharing in this branch of business as well as many foreign countries. Out of a total export of merchandise value for 1906-7 at £115,388,000 the United Kingdom received only £31,290,000 worth, but the other parts of the empire took £21,050,000 worth. Even these two categories together, however, do not represent half the merchandise exports of the Peninsula, and among her other conspicuous customers Germany stood first, receiving £13,150,000, followed by the United States of North America, which took £10,416,000, France, which absorbed £7,470,000, coming third. Next came China with £5,319,000, followed by Belgium with £4,799,000, Japan with £4,730,000, and Italy with £3,804,000. Every civilised country may be said to buy Indian goods, and that is the most pleasant and satisfactory fact about the whole of these returns. China is the greatest consumer of the cotton yarn and twist produced by India, and still buys the greater part of the Indian Government's opium. Indian piece goods are also taken largely by India, although there was a formidable decline in 1905-6 both in the shipments of Hongkong and to the treaty ports. Turkey in Asia and Aden, British, German and Portuguese East Africa are all good if not steadily expanding customers to the Indian cotton manufacturer, and, as we have said, the gunny bags and cloth go principally to the United States, but with large shipments also to the Straits Settlements, Australia, and New Zealand, especially in the case of these colonies, of gunny bags. The United States, indeed, manufactures most of its own bags, buying mainly the cloth, and the same holds good of the Argentine Republic, which comes next as a customer. China, too, buys cloth more than bags, but the United Kingdom is a good and on the whole growing customer. Germany, too, buys very freely, and Egypt also, as well as the Foreign West Indies, Chile, Peru, French Indo-China, Cape Colony, Mauritius, the Sandwich Islands, and Belgium. A considerable over-land trade is done by India, whose figures are not included in those we have given, Nepal being one of its principal customers, but the total value of the "land trade," out and in, was only £11,788,000 in the last year given, and the value of the imports always exceeds that of the exports, so that it is not a trade to any degree helpful to India in bearing its Imperial over-burden.

Mr. Werner Laurie is shortly publishing "Every Man his Own Financier," by F. Mignon, M.A.

Great Central Railway.

It has changed its name but not its nature. From the very first this company has been swamped in watered capital. Under its name of the Manchester, Sheffield, and Lincolnshire Railway Company it never did well for its shareholders, and could not do well, partly because the concern thus named was overloaded with unreal capital from the start, and bad was made worse by its absorptions and annexations, always made at extravagant prices, but still more perhaps because, under the rule of Sir Edward Watkin, the outpouring of fresh capital went on at a speed unwarranted by traffic prospects. His greatest blunder was undoubtedly the extension to London, a most costly and, one might say, ruinous enterprise, but it would be unfair to blame this departed railway magnate with undue severity, for he only acted like his neighbours if in a wilder, more romantic, and less considerate fashion. The result now is that the line is a derelict, and in 1900 had to default upon its 1874 preference stock. Since then, under the able management of Mr. Sam Fay and the expert financial control of Sir Alexander Henderson, it appears to have recovered somewhat from this degraded position, and in 1906 actually managed to pay ten shillings per cent. upon its 1891 preference stock, giving the 1889 preference stock its full dividend for the first time since 1898. But that was only a transitory gleam of light amid the abiding darkness, and for the past year the results were again sufficiently depressing, although the 1889 4 per cent. preference stock did receive 3 per cent. for the year. That is the best we shall see for a long while to come, if ever. For many a year, indeed, we have considered the prospects of this company hopeless enough, and the failure of the attempted amalgamation with the Great Northern should prepare proprietors for greater disappointments in the near future than they have experienced in the worst year since Sir Edward Watkin died. The position of the preferred and deferred ordinary stocks appears to be quite hopeless, and the last dividend the preferred received was ¾ per cent. in 1898, since when nothing has been forthcoming. And the ordinary stock dividends were never paid out of genuine profits.

In 1907, however, the gross revenue of £4,461,282 showed an increase of £348,224, but of this £262,763 was absorbed in additional working expenses whose total amounted to £2,974,979. Locomotive power alone cost £133,121 more, and the increase in the cost of maintenance was £34,482, yet the total laid out in that direction was only £488 per mile of line worked, the lowest of any railway in England, and nearly £100 per mile less than the Great Northern, and repairs cost £15,236 more, and traffic expenses no less than £47,877 more. There was no appreciable saving in rates and taxes. The opening of the London extension has thrown upon the company a fatal outlay much beyond its capacity to meet on the running of competitive trains and in casting around for new business. Even compensation cost it £4,145 more last year at £36,750, and the ratio of the total expenditure to receipts was 66.68 per cent., a ghastly figure for an English railway. Were it not that it is part owner of the Cheshire lines along with the Midland and Great Northern its position would be worse still, much worse in the matter of nett revenue.

An analysis of the coaching traffic reveals an increase of £40,673 only in the entire income from passengers, parcels, and mails, whose total was £1,161,768, but of this revenue first-class gave only £43,839, and it is there that the waste must be greatest. In fact this figure showed a decrease of £613 on the previous year in spite of the efforts made to popularise the company's through passenger service between London and the North. Like the Midland, the Great Central has no second-class, but its third-class passenger traffic gave £741,314, an increase of only £32,658 in the twelve months, and the gain on the season ticket branch of the income was only £3,857, the total receipts therefrom being £55,776. Some of

these figures indicate a kind of progress, but it is altogether inadequate to cover the extra capital burden which, as we shall presently see, has been thrown upon the concern by its extensions and efforts at competition with older and more powerfully equipped rivals. Its merchandise and cattle traffic, however, yielded £1,461,011, and the mineral traffic income was £1,437,904, which was by no means a bad return on a line extending to only 855 miles, including 232 miles of partly owned road. The company's own system is only 622 miles long, and no doubt it has a fine business in the midlands which might have been profitable to the proprietors if an unbridled ambition had not prompted Sir Edward Watkin and his successors to plunge into vast enterprises that never promised success. The increase, however, in the merchandise traffic of the company for the past year was barely £71,000, but the mineral traffic gave £214,726 more, and here again the falling off in current business should warn proprietors that further defaults in preference dividends must be looked for because the mineral traffic above all branches of the company's business was the most inflated last year, and is now suffering and will continue to suffer.

As a result of the year's business, the nett revenue amounted to £1,486,303 from the company's own lines, an increase of £85,461, and its share of the nett receipts from joint owned lines, whose accounts are not published, was £242,146, or an increase of nearly £23,000. Of this income, debenture stock interest swept away £803,728, or £84,518 more, and interest on the company's various debts—Lloyds bonds, advances by the Great Western Railway, &c., took away another £224,231, of which £46,957 was the amount paid to the Great Western Railway, and £37,260 the charge imposed by Lloyds bonds. The aggregate showed an increase of almost £40,000, so that more than the whole of the benefit arising from the increased nett income was absorbed by interest on debt in one form of another. There was, in fact, an increase of £124,420 in the total prior charges of the company which absorbed £1,027,959 of the nett revenue. This figure left comparatively little for the more degraded or deserted lower preference stocks.

What is the position of the capital account? From observations already made it can be judged to be bad. The total nominal outlay has been £55,669,000, and of this no less than £1,030,408 was laid out in the past year mainly in a desperate effort to wrestle with fate and wrench prosperity out of lavishness. Of the total expenditure, however, £2,678,543 represents the amount paid for the Lincolnshire, Derbyshire, and East Coast absorbed property, an amount exclusive, moreover, of £226,552 handed over for its rolling stock in the first half of last year, and figuring in the total capital expenditure for that year. The company's own outlay, however, on lines open for traffic in the past year came to £528,793, as against a little more than £17,000 spent on new works, such expenditure on new works, however, being again exclusive of the outlay provided by the Great Western Company on behalf of the Great Central. During the year about £196,000 was also laid out on new rolling stock, bringing the total capital sunk in that direction up to £7,277,063, and in the capital aggregate £6,788,000, including £199,000 given away last year, is set down as subscriptions to other railways, while the total laid out to date on docks and steamboats is £4,662,000, Grimsby having from first to last been a perfect sink of capital. The company bought 54 new engines in the past year at a cost to capital of £116,000, and we doubt much whether this outlay was warranted by the actual or prospective traffic.

But the hopelessness of the property is perhaps better seen by these further particulars regarding the state of the capital account. On December 31 last this was overdrawn by £4,196,000, against which the company held altogether about £1,250,000 in the shape of trust funds, including £791,000 of savings-bank money, £127,000 of superannuation funds, a steamship renewal and insurance fund of £256,168, and £75,542 of fire insurance funds. Accordingly the board has been obliged to borrow £400,000 on "temporary" loan, and was besides at the date of the balance-sheet owing £931,500 on Lloyds bonds, and £1,237,266 to the Great Western Railway Company, making a total additional floating debt of £2,569,000, and even with this it is short of money to an extent which makes the possibility to go on much longer without either raising fresh capital or passing into the hands of a receiver most doubtful. Its debt on sundry outstanding accounts was £760,491, and to other companies £503,375, against which the traffic accounts due to the company amounted to only £390,514, and all other moneys to receive only to £140,000. Its position is thus in great measure hopeless, and now that bad times have fallen upon railway business throughout the United Kingdom, it is to be expected that the company will soon find itself in the utmost distress for money. Yet it goes on spending capital as if it were rich, and the estimated outlay for the current half-year is £248,000, of which £118,000 is to go into lines open for traffic, £22,000 into fresh working stock, and £90,000 as subscriptions to other railways. How many steamboats it owns or whether adequate reserve has been accumulated against this part of its property we have no means of knowing, for the abstract accounts published with the report contain no entries relating to this part of the business. Some account of the canals is set forth, but nothing is given about the steamboats either in these abstracts or in the general revenue account of a description full enough to enable us to say whether the business is profitable or the reverse; but in the past year the working expenses of the steamboat service went up by £25,300, while the receipts rose by no more than £10,800, giving a reduction of £14,500 in the nett income. As for the dock dues at Grimsby, on the most liberal estimate the profit yielded to them could only have been £40,000 in the past year, and taking the dock and steamboat businesses together, wihout making any allowance for depreciation, repairs and renewals, for no such allowance is mentioned in the accounts, the entire divisible profit for the past year would not represent a dividend of much more than 1 per cent. upon the capital sunk in these particular directions. As for the company's canals, it would seem to be a saving to close them altogether as now worked, for last year their working expenses exceeded the income by £9,843, and that was £930 better than the year before. We are depressed merely by looking at the thing; what must the feelings of the stockholders be? Could we forget the South Eastern and Chatham system, we might call the Great Central the "Erie" among English railways, and it fights that other Watkin's monument hard for supremacy in badness.

Economic and Financial Notes.

The Cunard Steam Ship Company.

If shareholders were expecting something marvellous or unusual from the board of this company as a result of its operations in 1907 they must be disappointed, for the dividend is again only 5 per cent. for the year. To us the wonder is that it should be so good for the company has had several adverse influences to contend against such as increased cost of fuel, labour and other supplies incidental to the running of ships, the rate war on the Atlantic in the latter part of the year, the effects of the financial crisis in the United States which were distinctly felt before the year ended, and the lateness of the dates at which the great new steamers *Lusitania* and *Mauretania* began running. Gross income, however, showed an increase of £229,258 at £2,499,275, and had it not been for increased cost of working and other expanded charges there should have been a sensible addition to the nett revenue. As it was mere working expenditure before deducting allowances for repairs and renewals or

insurance premiums paid rose by £214,089 to £1,724,931. The cost of running the vessels rose by £206,308, there or thereabouts at least, for superannuation charges are embraced in this total. Then office and agency expenses were £5,309 up at £86,891, and directors' and auditors' fees, law expenses, and charitable subscriptions and donations took £2,892 more at £8,508, the directors' fees alone having risen by £2,300 to £5,000. Hence the increase in the nett revenue was less than £15,000, and most of this was swept away by the other payments, as, for instance, £8,152 more devoted to repairs and maintenance of fleet at £159,424 and £4,417 more at £60,126 disbursed as insurance premiums, so that the ultimate profit balance of £554,794 was only about £1,600 more than for the previous year, and adding in £54,411 brought forward, the available balance was still only £613,909, out of which £254,907 was taken to cover depreciation of the fleet and of wharf properties, or £35,126 more than in the previous year. Other deductions of small amounts were also made, and thus the final credit at profit and loss was brought down to £289,883, out of which £100,000 was taken to specially write down cost of new ships, reducing the final distributable balance to £189,883, out of which the above-mentioned 5 per cent. dividend is paid, leaving £109,882 to be carried forward or about £56,000 more than was brought in. A year ago, however, £50,000 was added to the reserve, which this year is passed by, no doubt because of the extra £100,000 written off for depreciation. The book value of the fleet on December 31 last, after deducting altogether £344,658 out of the profits of the year, was £6,033,664, or the high figure of £24 10s. per gross ton. There is consequently a large amount of writing down to be done in the near future. Advances from the Government to the company, including interest accrued, have gone up by £660,000 during the twelve months to £2,615,867, and the company owes on bankers' acceptances and bills payable on account of new ships £785,000 or £135,000 more than a year ago. It also owes sundry creditors nearly £302,000 more at £611,097 and its overdraft from bankers was £54,638 at the date of the balance-sheet. A note therein states that the Government has been granted a specific mortgage on the steam ships referred to in the agreement between it and the company, and also a floating charge on the other assets and undertaking of the company in order to secure an issue of £2,600,000 of 2¾ per cent. debenture stock made by the company to the Government against its advances. Sundry debtors owe the company £139,976, which is nearly £14,500 more than a year ago, but cash in hand, &c., has dropped from £87,269 to £21,783. There is, however, about £30,000 more due to the company on account of the pending voyages of ships at £72,481. Movable plant and machinery, stocks of wharf materials, stores and coals are entered at £94,982, and the total of the balance-sheet is £6,556,505. The insurance fund, it may be added, stands at £500,000, and the reserve fund at a mere £200,000.

The Foreign Trade of Russia.

Mr. Vice-Consul Mackie tells the Foreign Office that Russian trade was better in 1907 than in 1906, although the harvest of 1907 was still below the average and the Government obliged to provide further pecuniary aid in order to keep the peasantry in certain districts alive, or to provide them with seed corn. This was not so much due to the failure of the crops in the distressed provinces and districts as to the fact that the previous year's bad harvest had led to the exhaustion of the local resources, and also because a number of hands had come back from the works and factories in towns to their native villages, driven to this step by the commercial depression. In some respects, however, the people do seem to make progress; at any rate the quantity of machinery imported into Russia for the textile industries was last year 58% greater than in the previous one, and in excess of the average for the past five years. The metallurgical industries of the country, however, are suffering, and although the production of Russian coal is on the increase and its export beginning to assume a certain importance, the total is still utterly insignificant for so vast a country. And so is its entire foreign trade, which only came to £172,568,316 for 1907, including the figures of the Grand Duchy of Finland. Of this total, exports were valued at nearly £103,000,000. Imports fell far behind at less than £70,000,000, exports having gone down by about 2½%, while imports rose by nearly 6¾%. The total trade of the year out and in thus displayed an increase of only £1,854,211. The Asiatic portion of the foreign trade of Russia seems to have fallen off nearly £2,000,000 last year as compared with 1906, and amounted to only £16,472,420; the exports, which are in this direction less than imports, having fallen off by £2,556,425, or 25.2%, and imports having risen by £619,000, or nearly 7½%. Russia's European trade shows a heavy excess of export values over import, as might be anticipated, not only because Russia is so enormously in debt to Western Europe, but because her customs tariff is fully as prohibitory as that of the United States. It is consequently inevitable that the empire should export much more than it imports, and the excess value of exports for 1906 was fully £40,206,000, while for 1905 it was nearly £49,000,000, the highest excess of the ten years for which a table is given by Mr. Mackie. Last year the excess was only £33,165,000. Amongst the leading products exported wheat is the largest, and yet neither the value nor the quantity was last year so large for the ten months of 1907, whose statistics are available, as for the like period in 1906, but there was a great increase in the export of maize, and although a smaller quantity of barley was exported the value was greater by upwards of £1,000,000. It is, however, useless to go into details here, because the figures for the entire twelve months were not available when the Vice-Consul compiled his interesting report. The greatest trade of Russia is done with Germany, whether as regards exports or imports; in fact, in the ten months of 1907 for which statistics can be had, the exports of Russia to and imports from Germany almost balanced each other at £26,536,000 for exports and £26,509,000 for imports. Next came the United Kingdom, to which Russia sent £21,380,000 worth of her products in the ten months, against an import of only £9,532,000, these figures being presumably exclusive of those provided by the Grand Duchy of Finland, whose statistics are kept separate. Mr. Mackie reports that the mineral oil industry has shown some signs of improvement during the year, but English companies carrying on this business in Russia have not yet found much of the improvement flow their way.

The British Chamber of Commerce in Paris.

A most successful gathering was that at the annual banquet of this busy and most valuable body held in Paris on Saturday last. Mr. Lloyd George had been eagerly looked for to come and give the members and their guests a speech, but the re-shapement of the Ministry prevented him from fulfilling this engagement, much to everybody's regret. The speech of the evening was consequently that delivered by M. Cruppi, the French Minister of Commerce. It was really an admirable speech in its cordiality, good feeling and hopefulness. We have never seen a deliverance by a French statesman more frank and hearty in its expressions of goodwill to England, but what should impress people here more even than the cordiality of feeling, are the remarkable statistics quoted by M. Cruppi illustrative of the expansion of trade between the two countries. In 1787 he pointed out, that is two years before the first French Revolution broke out, the total value of the trade between France and England was only £3,320,000, and in 1907 the total was £80,010,000. What was particularly satisfactory to the speaker to note was the fact that since 1904, the year of the *entente cordiale*, the trade between the two countries was only valued at £70 000,000, and that three years later it reached a grand total of £90,000,000. We do not know how the £90,000,000 total is arrived at, seeing that he had just given the figures

for 1907 at nearly £10,000,000 less, but no doubt even if a little anticipation of events is included in the larger aggregate it will soon be attained, and M. Cruppi was well entitled to describe this country as the best customer of France. A particularly interesting feature of the progress of the trade between the two countries, he went on to point out, was that it had been progress not in rivalry but in complement, so to say. France, in other words, was not fighting our traders with its products, but supplementing the requirements of the British people by selling them commodities they could not themselves furnish, and he contended that the development of relations between the two countries was capable of great extension and should pass far beyond the economical and material sphere into more intimate relations between the people of both the British and French nations. Both peoples would benefit thereby. His own countrymen would find examples and incentives in England, as for instance, in the long generations of politicians and statesmen who had been the architects of England's greatness. This is true and in the right spirit, and there is much that we might profitably learn from France. We like the whole speech very much, and if only France were able to lower her Customs tariff, it might not be long ere M. Cruppi's ideal was in great part realised. No small credit is due to the steady work done by the members of the British Chamber of Commerce in Paris in nursing and developing this spirit of goodwill, thanks to which we should never again see the old bad spirit of the manslayer obtain a mastery over the minds of either nation.

Spassky Copper and the Siberian Railways.

A correspondent in Omsk writes to us as follows under date March 27, and his information appears to be well worthy the attention of the public, whether shareholders in Siberian mines or not. The paragraph referred to by the writer appeared in our "Mining News," and gave a summary of the statements made by the board in justification of support of its further capital demands:—

"Sir,—In your issue for March 14 I note at page 343 a paragraph relative to the Spassky Copper Mine, and it may be of interest to you to know that the plant installed there is an excellent one, but—and in these matters there is too often a but—it is not correct to say that the railway projected by the Russian Government *will probably have an important bearing upon the company's interests*, for it is absolutely certain that this line will not run nearer to the company's property than between 700 and 800 versts. These mines are situated in an almost impossible country for railway construction, the district being very hilly; indeed, mountainous perhaps would be the more correct word to use, and there is not the least probability of the Russian Government spending 10,000,000 roubles to carry their projected line through that part of the country for the sake of 3,000,000 to 4,000,000 poods of coal they might require per year, and it is equally certain that would be the only reason to influence them in any deviation from the already selected route. As for the Spassky company making a line of the length named to link their mines with the projected railway, it would be sheer nonsense to even suggest that. It is really too bad for the directors concerned in this company to allow such statements to be put into circulation for the purpose solely of filling their coffers. The mines have abundance of metal in them, and this will probably pay to win, but before real success financially is a fact it is fairly certain that they will require all of the £500,000 capital which will be needed to link up their several properties with the central smelting plant and for new plant, but it certainly should not be stated for the purpose of pumping fresh capital from the British public that the railways projected by the Russian Government *will probably affect their interests*. Such a statement comes being very near to a fraudulent statement; it is, at all events, an impudent perversion of the actual facts.

"Being in a position here to know all about these Spassky mines, you may accept what I say as correct; indeed, I may say further that there is very little taking place in Siberia relative to such projected undertakings that I could not throw light upon, having followed up these matters for some eight or nine years, and being in touch with those who know still more than I do of them.

"It is a great pity that the operations of those we know here as the *Siberian Block* should have been such as to throw discredit upon much better openings for mining business than those which they have handled. There are much better properties in copper mines lying in quite accessible places in Siberia than the Spassky Mines."

American Business Notes.

Wall Street is said to have been disappointed with the Associated Bank averages for the past week. It always figures out the totals towards the end of the week, and is usually wrong. It looked for a larger increase in cash, but was particularly disappointed with the increase of £1,407,000 in the loans and advances. This increase is attributed to syndicate operations, and unless the foreigner buys new securities about to be put upon the market, the total will be a mounting one. Specie did increase by £1,044,000, and there was also an increase of £50,000 in the greenbacks held, so that although the deposits rose by £2,313,000 the average surplus reserve was £515,000 better at £8,653,000 compared with £3,171,000 at the same date last year.

The non-clearing banks and trusts also indicated an increased demand upon them for credit since their loan and investment average for the week showed an increase of £362,000 at £162,505,000. Their specie holding went down by about £18,000 to £9,268,400, but the greenbacks held rose by £65,000 to £2,153,000. The liability on deposits rose by only £37,000 to £130,440,000. Officially the proportion of the reserve, which amounts to £11,422,000 all told, is given as 29.5 per cent. of the liabilities against 29.7 per cent. the previous week, but we make it out to be only 8.7 per cent., or thereby.

Bank clearings, according to one authority, show a decrease of 38.1 per cent. for New York on the comparison of weeks and for the entire country outside New York the decrease is 29.5 per cent., but Bradstreet puts out a different figure, making the decrease in the New York clearings 29.5 per cent. and in the total clearings excluding New York only 15 per cent. Whether the dates selected are different or whether the data supplied do not agree we have no means of knowing, but that business is poor no one can question.

Money in the meantime remains so cheap on call loan that borrowers do not seem called upon often to pay as much as 2 per cent. for it. This does not imply that the issue of securities is going to be easy, nor that long credit can be had on comfortable terms, but cheap call money is keeping the exchange up and forcing it higher, notwithstanding the outflow of produce to other countries, and New York has been trying to put out of its mind the fear of gold exports. There is not much danger so far as we can see at present of any large return of the metal to Europe, but some will probably have to go, and if investors on this side the ocean fail to respond to the new capital demands about to be made in formidable masses by various railroad and other corporations the export may be important. It is reported, for instance, that Harriman will want £10,000,000 for the Union Pacific and £6,000,000 for the Illinois Central—or say £5,702,400, of which half only is to be issued at once—with an indefinite amount for the Southern Pacific; that the Delaware and Hudson Railroad has created a new mortgage for £10,000,000, and that £4,000,000 of this total will be issued at an early date in 4 per cent. secured bonds in order to pay off the floating debt and to provide for notes maturing in August. And that is only a beginning, because the New York Central, the Pennsylvania, the Baltimore and Ohio and several of the Gould roads, not to mention smaller undertakings, are all exceedingly

hungry for our money, and will be unable to maintain even the present show of traffic receipts unless they get it in tens of millions, still less to help the Steel Trust in maintaining the price of rails and other steel manufactures at monopolist prices.

Exports from the United States in March are said to have fallen back to £13,166,000 as compared with over £16,458,000 in March, 1907. For the nine months ended with March 31, however, the exports still show an increase of over £4,000,000 on the total for the same period in the preceding year at £156,556,000. In cotton alone, though, the decrease is £5,132,000, the figure for a year ago having been £82,646,000, while this year it is little more than £77,133,000, and in the south an agitation is being diligently carried on to persuade the farmers to reduce the areas planted. We fear the farmers must be in a very ticklish position in relation to their creditors when desperate expedients of this description are one after another being demanded. And certainly their efforts to form a crop-holding combine so as to keep up prices have come to the usual end of such. Cotton futures fell last Monday to less than 9 cents per lb. for the first time since September, 1906. May deliveries touched 8.96 cents, and there is every prospect that lower prices still will be reached and maintained purely as fruit of the efforts to set natural laws at defiance. Every year also will see the competition from other sources of supply increase, that too being a consequence of the unwise policy followed by United States cotton growers and gamblers.

The Chicago *Economist* has been having a merry fling at the lugubrious howlings of the New York *Commercial Chronicle*, and makes very pretty play with the utterances of that just now most melancholy organ. Reading the articles that have been appearing in its recent issues, and knowing nothing outside, one might imagine that the United States and all therein are about to be wiped out, to come to utter collapse. "Either higher rates must be obtained by the railways for their traffic," it wails, "or wages will have to be reduced, and the way losses in earnings are piling up may make it necessary to take both steps in order to avert general insolvency. Dear, dear, this is dreadful! and we never in our most gloomy moments thought so badly of the prospects of United States railroads and industries as this. No doubt traffic receipts are shrinking and working expenses are going up, or did so while the madness was on, but in spite of the terrible attributes bestowed upon President Roosevelt by despairing capitalist organs like this, the end of all things has not come yet even in the United States. It is doubtless true, though, that the old level of expenses cannot be continued, especially if there is to be a shrinkage in traffic earnings of from 10 to 25 per cent., but the people will live somehow, and while they live spend.

For the second time in its history, the board of the New York Central Railroad Company has published an abstract of the position and earnings of the entire system controlled by it, and the statistics are very interesting. Altogether there are 16 railroad companies, including the New York Central and Hudson River Company itself, in this system, and their total length of road rose last year to 12,282 miles, which is an increase of about 253 miles only upon the total length of two years before. It is not expansion, therefore, which lately increased the earnings of these roads, but growth of business, lavishly capital-stimulated business if you will, but still a remarkable growth. On this entire system of roads the gross earnings last year amounted to about £48,292,000, and it cost about £37,400,000 in working expenses to get that money in. Compared with the preceding year the increase in receipts was about £3,170,000, but expenses rose by over £3,400,000, so that the actual nett income of £10,892,000 was over £230,000 less than in 1906. As recently as 1903, when the total length of line operated was 11,163 miles, or nearly 1,180 miles less than last year, the gross earnings were barely £38,000,000, and the expenses £28,154,000. The large additional mileage on this longer comparison no doubt helps materially to account for the expansion in business, which is nevertheless remarkable enough. And all classes of traffic shared in that expansion during the last three years except the mail traffic. Passenger traffic income rose last year to nearly £11,900,000, and it was only £10,123,000 in 1905. The increase in the receipts from freight has been equally remarkable, last year yielding £32,668,000 from this source as against £27,896,000 in 1905, but fixed charges and share capital have gone up in a manner almost as striking. Bond interest, for example, took away £4,360,000 last year as against £3,964,000 two years before, and the total charges ranking before stock dividends, including taxes, came to £9,370,000 last year as against £8,270,000 in 1905. Every year large sums are charged against revenue for new construction and equipment else the growth of the debt would be much greater. Thus, for instance, new construction last year cost over £1,400,000 and new equipment £728,000, both these figures being sensibly less than in either of the two preceding years; that is to say, the total charged to new equipment in the past year exceeded £2,127,000, and in 1906 it amounted to nearly £2,550,000, while in 1905 it came to £2,721,000.

The total of the balance-sheet of this great combination of railroads amounted on December 31 last to £235,540,000, of which £138,520,000 represented cost of the road-bed and its equipment and £13,065,000 the advances to leased lines and other companies, while securities owned accounted for another £57,660,000. The funded debt of the combination is £109,840,000 and the common stock stands at only £73,270,500, while the preferred stock amounts to barely £10,500,000. There is no trace of floating debt in the combined account beyond £10,000,000 of gold notes, so that if we have a full, true and particular summary of the New York Central finance in the compilation, there ought to be no difficulty, bad as the Money market is, in arranging to fund that debt.

Canada is said to have only 2,500,000 bushels of grain left in the interior compared with 19,000,000 bushels at this date last year, and we can quite believe it, for last harvest was much more disastrous than has yet been admitted. We doubt, indeed, whether the small amount of grain now said to be in stock is of a quality that could be marketed abroad, and something of the true position of affairs is revealed in the statement of Canadian papers that for the third time this winter railway officials in the Dominion have received orders to cut down working expenses by another 10 per cent., either by dismissing men or reducing their wages. However, Lord Strathcona is to the fore with cheerful news about the spring sowings in Alberta. The spring has been backward, he has been told by the officials, but seeding is going on apace and there will be a large increase in the area sown. We hope the areas reaped will also be larger and that the crops will be much better than last year's, for otherwise the financial position of the Canadian North-West would become desperate indeed.

A great flow of immigrants from the United States is now pouring into Canada, and a Reuter's telegram from Montreal states that last Monday five big trains laden with "Americans" seeking a home in Canada reached Winnipeg. Every train coming from the south into the Dominion is heavy laden with settlers and land seekers. Is it the favourable spring weather which has attracted them, or are they failures in their own country? However interpreted, the incident is suggestive enough.

Messrs. J. Henry Schröder and Co. have received a cable from their Santos agents advising them that they have further encashed £7,150 in respect of the surtax collected weekly for the service of the State of San Paulo 5 per cent. Exchequer bonds, making a total of £730,550 encashed since August 1.

Passing Events.

With reference to our note on Victorian farmers and Western Australia, we hear that the outflow is not due to any unfair treatment by the Victorian Government, but may be traced back to the unwise policy of the past. In former days large blocks of land were sold at low prices, and now that a new generation is growing up the Government has had to buy back as much of this land as it can get. For some years now it has been devoting £500,000 per annum to this purpose, but the purchases have been so far from adequate to meet the demand that in one instance there were over 2,000 applicants for 290 blocks which became available. Farmers' sons therefore who wished to become something more than mere labourers have been forced to seek for land outside the State, and Western Australia, recognising the opportunity, has opened a land office in Melbourne. The Victorian Government, however, is now throwing open to settlers 1,000,000 acres of land which will require irrigation, and is contemplating the carrying out of large irrigation works by means of ditches, something after the style adopted in the Platte Valley, Colorado.

Egypt's foreign trade in 1908 shows no trace of the crisis through which certain finance houses and groups of speculators in town lands passed last year in Cairo and Alexandria. Imports for the year at £E26,121,000 were fully £E2,000,000 higher than in 1906, and, when contrasted with 1888, when the value of the imports was only £E7,738,343, bear remarkable testimony to the development of the country. In 1905 the total value of the imports was only £E21,500,000, and the increase over a period of 19 years has been no less than £E18,000,000. Exports for last year were also larger than ever before and amounted to £E28,015,185, or about £E3,300,000 more than in 1905. Before 1899, the Reuter's telegram adds, exports ranged between £E12,000,000 and £E13,000,000, reaching £E15,000,000 in 1899, so that in comparison with that year there has been an increase of over £E9,000,000. But how is Egypt able to import nearly as much as it exports seeing that the fixed charges upon the country payable abroad, including not only the interest and amortisation of the public debt, but the profits of all manner of foreign-owned enterprises carried on within the country must at a minimum estimate involve the payment of £7,000,000 per annum to foreign capitalists and creditors? The answer must be that Egypt, like so many other countries, is continually importing new foreign capital, and in proportion as it does so is able to absorb imports on the scale shown above, because the foreign capital counterbalances the drain of debt and other commitments abroad.

We are sorry to see the temper displayed by the men of the North-Eastern Railway. What the real ground of the dispute is we do not know because the technical phrases "all grades programme" and "all grades committee" have as yet no definite meaning to us, but we are quite sure that no motive, whether sentimental, technical or pecuniary, should be adequate at a time like the present to impel a body of men like the staff of this railway to enter upon a strike. Even had the past treatment the men have received from the directors been harsh or ungenerous this would not have been a time to strike, when trade is declining and likely to grow worse, but when we remember that no board in the three kingdoms has treated its working staff with greater consideration and generosity than the North-Eastern, the threat to strike now repels all sympathy. Long before the Amalgamated Society of Railway Servants gathered any great membership, its officials were recognised by the North-Eastern board and negociated with. In other ways the men have been met from time to time, their grievances frankly discussed and genuine efforts made to remove them when they seemed well grounded. Why, then, should men thus treated threaten to rebel, to throw up work and bring loss not merely upon themselves but upon the shareholders of the railway company, and upon trade throughout the whole north-east of England just at a time when that trade needs the utmost encouragement to prevent it from entering into a much worse state than it occupies now? We hope better counsels will prevail.

A temperately worded circular has been issued by Mr. A. Parrish with reference to recent transactions in Lisbon Electric Tramways shares. We have not space to go through his interesting story, but the point of it is that the shares were first worked up to over 30s. and sold heavily at the higher price to Portuguese buyers after 100,000 new shares had been issued in 1906 at 24s. or 4s. premium. Then the dividend was reduced from 9 per cent. to 5 and the shares tumbled back below 20s. Mr. Parrish contends that the board could easily have paid 9 per cent. after putting aside £17,000 to reserve, since the earnings for 1906 were £70,584. Then he shows from an analysis of the annual list of shareholders filed at Somerset House that of the holdings of J. Wernher, A. Beit, or his executors, L. Breitmeyer and Rube, L. Phillips, H. Burnay and others, the total of whose holdings was over 290,000 shares in 1904, the greater number had been converted into bearer shares so that they might be transferable on foreign markets. These changes were effected between the 1905 and 1906 return, wholly or in part. Mr. Parrish therefore suggests that the majority of the share warrants are probably now held in Lisbon, and that the registered shareholders here are therefore in a minority, and he further suggests that a shareholders' meeting should be convened in Lisbon by advertisement, that a committee be appointed at that meeting to represent the assenting shareholders, and that this committee should demand from the directors in London the appointment of a bank in Lisbon, the Crédit Franco-Portugais, for instance, where the share warrants could be deposited for voting purposes, the board furnishing a sample form of proxy. That seems reasonable enough.

A stormy meeting was that of Ind, Coope and Co., but the storm did not result in any clearing of the atmosphere which seems to be as stifling as ever. The chairman, Sir Thomas Skewes-Cox, made a long speech packed with useful information about the business of the company, the state of its finances and so on, but it did not satisfy a number of the shareholders there, and Mr. Normandy in particular followed up his attacks by circulars and otherwise, with some unpleasant remarks and questions. It was not the questions, however, that did so much to excite the audience as the answers they got. He wanted to know why the directors who were appointed at the instance of the shareholders' committee had resigned, and two of them answered in a way that set the meeting ablaze, Mr. Hargraves declaring that he resigned because he did not think it right for the company to continue trading, its present position being worse than in any of the three preceding years, while Mr. J. Barrington White, another of the new members, announced that his resignation was due to his dissent from the financial methods adopted by the board, and because he did not agree with the extravagant way in which the company was managed. Complaint was also made by Mr. Normandy about the accounts which, he said, showed no trace of provision made for depreciation. Had this been done a heavy loss would have been shown on the year's business instead of a profit. We really cannot say how far these strictures and assertions are justified, but undoubtedly the accounts ought to be stated in greater fulness, and as with all brewery and many other companies, the annual allowance for depreciation ought to be set out clearly in the balance-sheet or profit and loss account. Discontent was natural enough on many grounds, Ind, Coope having been one of the most conspicuous among the disastrous promotions fashionable some dozen or more years ago, and also one of the companies which most systematically added to its debts and capital commitments after it must have been perfectly clear to the directors that they had no security to offer. For all that shareholders

are, we fear, quite helpless to bring about an improvement in their company's affairs, and the sooner they consent to a drastic reduction in the capital, which will involve writing off to a heavy amount, the more chance there may be of something being saved from the wreck.

A curious point was raised by Mr. Herbert Gibbs, chairman of the Rio de Janeiro City Improvements Company, at the shareholders' meeting with regard to the incidence of the income-tax, and it would really gratify a legitimate curiosity if Mr. Gibbs would furnish the full explanation he deemed it unnecessary to give in his speech. Briefly, the point is this: During the past three years dividends aggregating £178,916 have been paid to the shareholders by this company, and the amount mulcted in income-tax on this sum was £17,203, equivalent to a 9 per cent. income-tax, whereas the rate should only have been 5 per cent. Mr. Gibbs wanted to know why an enterprise of this kind should be taxed so heavily when investors in Government securities earning 2½ per cent. per annum would only pay 5 per cent. on their revenue and any ordinary industrial enterprise carried on within the country 5 per cent., but he must explain first how it came about that the Rio City Improvements Company should have paid more than the usual scale. Did the revenue officials exact the income-tax upon a larger sum than this, on the gross profits before directors' fees, London charges and general expenses had been deducted, or how? Perhaps Mr. Gibbs will condescend to throw light on the obscurity.

Japanese traders seem to be making as many mistakes in dealing with business as their Government commits in handling the Chinese or the Koreans. Their latest effort to expand their business abroad has been to insert lottery tickets in bales of cotton yarn exported, apparently with the idea that this would ensure sales when merit might fail. There is a kind of childish simplicity in an expedient of this kind which almost disarms criticism, but it none the less excited the wrath of the Hongkong Chamber of Commerce, inducing it to address a circular to the leading English Chambers and to those of Shanghai, Tientsin and elsewhere, suggesting diplomatic action to put a stop to a device hurtful to Indian trade. Probably enough no such action will be necessary, for the Japanese are shrewd enough to understand that they can only make enemies by exhibitions of over-eagerness such as this. Altogether Hongkong imports about £2,500,000 worth of cotton—yarn we presume—of which 90 per cent. comes from India, so that there is a considerable volume of business to make raids upon, and the Japanese are perfectly justified in doing all they legitimately can to get a full share of this trade, but they are not wise in attempting to secure it by a trick so despicable as the dissemination of lottery tickets in the packages. It would have been indiscreet, even if allowable, to attempt that sort of thing in view of the intense excitement prevailing throughout China against Japan. So strong is this feeling that Chinese money-changers are supporting the boycott by refusing to accept Japanese bank notes even at a discount. That is too hot to last, but meanwhile it is very hurtful to the best interests of Japan in many directions.

That lamentable and disastrous fire in the Chelsea suburb of Boston, Massachusetts, does not seem to have hurt British insurance companies to any staggering extent, or would not were not several of them already drained almost empty. The first estimate of loss was from £1,400,000 to £2,000,000, but this has been cut down to about £1,000,000, and of that £700,000 is believed to be covered by insurance. Were the whole of such a sum to fall upon British offices, or even half of it, the experience would be unpleasant though bearable enough by them, but as far as has yet been revealed British offices will not suffer to the extent of more than £250,000, if that. But here is the complete list as compiled by the New York *Journal of Commerce*. It embraces all losses of £6,000 and upwards:—"The Aachen and Muenchen, £6,000; the Alliance, £7,000; the Caledonian, £8,700; the Commercial Union, £8,000; the Hamburg and Bremen, £8,000; the Liverpool, London and Globe, £20,000; the London Assurance, £20,000; the London and Lancashire, £19,940; the Northern Assurance, £30,000; the North British Mercantile, £19,440; the Norwich Union, £40,000; the Palatine, £16,000; the Phœnix, £9,000; the Royal Exchange, £12,000; the Royal, £100,000; the Sun, £16,000; and the Western Assurance Company, Toronto, £20,000." For the British companies this would mean a loss of about £300,000 even if no offices were involved for amounts below £6,000. There are doubtless offsets to this total—reinsurances, exaggerated estimates and so on—did not the Royal say that it could not lose so much as £20,000?—but for all that the experience is an unpleasant one.

The Week in Mines.

Kaffir Shares.

The past few days have been very uneventful and have thus in nowise differed from the state of affairs to which we have been so long accustomed. Dealers still find themselves with no business to do and will be hard put to it to account for the continued public apathy now that Mr. Winston Churchill has left the Colonial Office. It is a fact that not a few operators held the Under-Colonial Secretary responsible for much of the market misery and stagnation, as though he had been at the back of the faking, rigging and bamboozling that finally disgusted the public and caused them to be done with the Kaffir Circus for all time. Humorously enough the Cape was supposed to have picked up a few shares when Mr. Churchill's departure was announced and mainly for this reason prices picked up sixpence or a shilling. Continental bourses did absolutely nothing, and one jobber would not have made a fortune if he had booked all the bargains.

Land, Finance and Rhodesians.

The leading Land and Finance counters attracted very little notice and the others were never mentioned. Central Minings were easier again and General Minings were a poor market, but Gold Trusts added pence. Rhodesians started poorly but rallied a little before the finish with Tanganyikas, Zambesias and Explorations prominent. Chartereds are a very dead market once more, and the fluctuations have not exceeded 1½ either side of 14s. A circular by the Rhodesia Copper Company confirms the recent rumours that negotiations are proceeding for the extension of the railway northward from Rhodesia Broken Hill to the Congo Free State. The line, when constructed, would pass through or in close proximity to this company's Bwana M'Kubwa property, where work has been actively proceeding during the past year. The Rhodesia Broken Hill Development Company is supposed to have reached the point where the erection of a smelter is justified and shareholders are to be graciously allowed to find the necessary cash.

Diamond Shares.

The chief incident of the week has been the renewed slump in De Beers. Once again the air has been full of rumours, and it was reported that leading Antwerp and Amsterdam Diamond firms had threatened a complete stoppage of work for the rest of the year unless production by the De Beers and Premier was suspended for six months. This was immediately denied, but discussion of the company's finances was revived, and few would be surprised if the preference dividend due in June is not forthcoming. It seems impossible that the company can find the necessary money, because if what we hear is true its floating indebtedness in the way of bankers' overdrafts is enormous. Matters must, indeed, have reached a serious pass when, in spite of this fact, the chairman of the company's bankers, the Standard Bank of South Africa, tells us at the half-yearly meeting that "he has reason to believe that diamonds to the value of many

millions were held unsold in South Africa, this country, Amsterdam and America." And leading financial authorities in the City are convinced that America cannot be in a position to resume the purchases of diamonds for years to come. A little while ago those who were counted the pessimists said De Beers deferred would go to 10. Well, this week they were down to 10⅜ and the latest prediction is 8. Will they get there? Almost certain, and possibly below. There are a lot of bears waiting to cover between 8 and 9. Premiers, however, after an initial fall to 5¼ picked up rapidly to 5¾, the buying being described as good, and it looked as though shorts of De Beers were hedging on these. Jagers and the smaller priced shares were dull.

Australasian and West African.

Broken Hill shares were very neglected, but the tendency was satisfactory and Norths hardened on a good weekly return. Apart from lead, which weakened, the metals remained steady. Quite a number of West Australian shares showed early strength, but absence of business brought renewed dulness before the end. In the West African assortment Taquahs, Effuentas, Abbontiakoons and Presteas all lost a trifle.

Copper, Tin and Miscellaneous.

Copper shares have been a poor market, despite the comparative steadiness of the metal. Tintos fell early and after a sharp rally again settled down into dulness. Amalgamated and Anacondas went back with other Yankee things and Great Cobars were weak, falling to 6. Mount Lyells were only 29s. but Elliotts hardened a trifle on satisfactory development news. Tin opened weak but rallied later, and one or two shares in this division picked up, notably Pusing Lamas, after weakness, but there were several movements the wrong way. In the Miscellaneous division Alaska Treadwells fell away on a less satisfactory March return, but Esperanzas and El Oros were quietly bought and Tomboys also improved. Oroville Dredgings hardened the turn. Among Indians Mysore and Nundydroogs were firmer, but Ooregums showed dulness. New Zealands tended downward.

MINING NEWS.

**** Frank and unbiassed answers are given to all questions relating to Mines. Address Editor Mining Section and enclose* One Shilling *for each question asked. No bucket shop circular or advertisement should ever be responded to without first consulting the* Investors' Review.

Meyer and Charlton Gold Mining.—This is one of the principal gold producing mines controlled by the General Mining and Finance Corporation, commonly known as the Albu group, with whose annual accounts we dealt in a brief fashion last week. The complete document will not come to hand for some time yet, and meanwhile the position of individual companies may usefully be examined. The full mill of the Meyer and Charlton was in operation during the year 1907 and with tube mills crushed 151,042 tons yielding 24,695 ozs., a low percentage due to the circulation of cyanide solution through the mortar boxes and over the plates. Sands to the amount of 105,200 tons and slimes 43,847 tons produced 39,711 ozs., so that the recovery from all sources was 64,406 ozs. valued at £273,043, equal to 36s. 1.854d. or 8.528 dwts. per ton, being a decrease of 1.106 dwts. as compared with 1906. Including other items the revenue for the year was £278,523, while working costs took £154,829, leaving a profit of £123,693. Including 3s. per ton for mine development the costs per ton were 20s. 6.018d., a reduction of 1s. 3.698d. against the drop in yield of 4s. 8.152d., the latter being due to the smaller percentage of south reef and a corresponding larger percentage of main reef sent to the mill. This is owing to the limited quantity of south reef available for stoping. Profit on operations was £123,693 and the large sum of £100,612 was brought forward, making £224,305. Out of that two dividends and two bonuses aggregating 100 per cent. have been paid, depreciation takes £14,471, and £29,305 is carried to special reserve. Balance of profit tax for 1906 £2,945 and estimated amount for 1907 £9,599 take £12,544, and £67,905 remains to be carried forward. It may be remembered that the directors have been in negotiation for the acquisition of other claims, but the price asked was so greatly in excess of the board's views on the subject that all negotiations were dropped and a portion of the cash resources was distributed by way of bonus. Since the beginning of operations the dividends paid have amounted to £710,309 or 820 per cent. on the issued capital, but the life of the mine is nearing an end. At the annual meeting the chairman counted on another three years with the reservation "that it was a very difficult matter to definitely gauge the life of a mine as there are so many factors which can only be dealt with in an approximate manner." Payable ore in sight is estimated at 177,027 tons of an average milling value of 8.72 dwts. per ton. This is a decrease of 62,845 tons as compared with 1906, the ore mined being 111,162 tons in excess of the quantity developed. The unusually small development is due to the fact that the underground workings are approaching the southern boundary, and also to the occurrence of a big fault which necessitates a lot of dead driving before the reef can be exploited. The financial position is thoroughly sound.

Transvaal Gold Returns.—Last month's return from the Witwatersrand and outside districts was 574,901 ozs., worth £2,442,022, bringing the total for the first quarter of the year to 1,677,160 ozs., valued at £7,124,117, compared with 1,569,677 ozs., and £6,667,566 respectively in 1907. Against the preceding month there is an increase of 32,971 ozs. in weight, and £140,651 in value; but February contained two working days less and also the Chinese new year, so that the rate of production was not quite maintained, the daily average being 18,545 ozs., as against 18,687 ozs.

Native and Coolie Labour.—The returns improve month by month. In February 15,245 natives were distributed against losses of 4,015, so that the gain was 11,230, increasing the number employed to 137,075. No doubt a large part of the improvement is due to the curtailment of work in the diamond mines, but the prospect of increased activity there is so remote that the natives have doubtless come to stay. A further decline of 1,982 has taken place in the number of Chinese, and only 26,500 now remain or less than half the number in the country a year ago.

New Goch Gold Mines.—This mine seems to be steadily improving its position, and while the shareholders do not as yet reap any reward substantial progress is being made in the reduction of the company's heavy fixed and floating indebtedness. During the past year the debenture debt was lowered to £266,375 and a further amount of £19,125 has been drawn for redemption on July 1 next, while the loan from the General Mining and Finance Corporation was repaid to the extent of £44,521, leaving it at £442,987 bearing interest at 7 per cent. Profit from mining operations in the past year was £88,449, which sundry revenue increased to £91,002, and it is noteworthy that in the final months of the year the profits were in a steadily increasing ratio, the figure for October being £7,097, for November £8,507, and for December £9,007. The grade remained about the same, but a continued reduction in working costs from 21s. 6d. in September to 18s. 10d. for December sent up the profits. There was a debit brought forward of £6,311, and after providing interest on loans and debentures £46,617, debenture premium £1,462, profit tax and other charges there remains an unappropriated sum of £29,590. Ore crushed in the 12 months was 241,776 tons, yielding 40,867 ozs., while 180,106 tons of sands and 61,699 tons of slimes gave 41,562 ozs., an aggregate yield of 82,429 ozs. worth £348,532, being 6.818 dwts. or £1 8s. 9.973d. per ton. Working costs came to £260,083, being £1 1s 6.174d. per ton, which includes £36,266 or 3s. per ton for development redemption. Payable ore reserves are estimated at 65,403 tons of an average mine value of 7.41 dwts. over an average stoping width of 45 ins.

Cinderella Deep.—A considerable amount of development work was accomplished during the year ended December 31, and the ore exposed to date, excluding all quartz of 5 dwts. and under, is estimated by the manager at 289,000 mining tons of an average assay value of 10 dwts. over a stoping width of 42 ins. There are in addition approximately 150,000 tons partially developed, but until fully blocked out the values cannot be estimated. On the recommendation of the Single Outlet Commission permission was given by the Government early in November last for the company to carry out mining operations with the one existing shaft for a period of five years from the commencement of milling subject to certain precautionary measures. The directors are very grateful for this concession and decided to proceed at once with the erection of reduction works on an initial basis of a battery of 50 heavy stamps, tube mills, a complete cyanide (sands and slimes) plant, and the usual accessories for a treatment capacity of about 150,000 tons of ore per annum. The new construction work is well in hand, and it is anticipated that actual production will commence in September or October next. Total cash assets, including £66,559 in money, amount to £83,875 nett, and the capital expenditure to date is £376,834.

West Rand Consolidated Mines.—This very important undertaking is the outcome of an amalgamation between the West Rand Consolidated Mines, the West Rand Mines, and the Violet Consolidated. The fusion was consummated in April, 1907, and in December of the same year the directors issued an elaborate statement showing the actual position after everything had been straightened out and arranged. There is not much to be added to the information then set forth. Great progress is reported in respect of both the underground development and the surface equipment of the mine. The manager estimates that there are approximately 309,000 mining tons of payable ore developed and ready for stoping of an average assay value of 8.13 dwts. in addition to a considerable further tonnage partially developed. As regards surface equipment the 60-stamp battery formerly the property of the Violet Consolidated has been removed from its old position and with the addition of 20 new heavy stamps is being erected near the east vertical shaft. A complete cyanide plant, two tube mills, and the remaining auxiliary plant and machinery equivalent to a reduction works of 100 stamps capacity have also been ordered and are in course of construction. It is anticipated that actual milling will commence in either July or August next. The funds in hand are more than sufficient to bring the mine to a producing stage, the cash balance at the end of 1907 being £269,663.

Aurora West United.—Here we have an Albu property on which no work was carried out during the past year. The directors regret that the general financial conditions obtaining during this period have not been such as to allow of the reconstitution of the company or of obtaining the requisite funds to recruit a sufficient complement of labour, reopen the mine, and complete the preliminary work necessary to bring the property to a producing stage. At present there are about 100,000 tons of payable ore developed in the mine, of an average value of 8.5 dwts. over stoping width, and the work underground has been so laid out that further development can be rapidly done. The whole of the surface equipment, which includes a 60-stamp mill, conveying, sorting, crushing, cyanide, and slimes plant was either renewed or entirely rearranged just before closing down about two years ago. Last year the revenue was £291 and mine and general expenditure amounted to £20,078, so that £19,787 must be added to the debit at profit and loss, making £102,870 to be got rid of some day and somehow. A sum of £270,590 or considerably more than the share capital is owing to the parent company and others, and it will not be an easy matter to get the company on its feet again.

Marievale Nigel Gold Mines and Estate.—No work was done on this company's property during 1907, and not the slightest indication is given as to when operations are likely to be resumed. However, revenue for the period was £534 in excess of the disbursements, and a dividend of 22½ per cent. declared by the Witwatersrand Deep, in which the company has a moderate interest, will be credited in the current year. At the end of 1906 the holding in the Witwatersrand Deep and Driefontein Deep companies was valued at £55,011, but this was probably above market worth, as dividends actually received during the year, £4,750, have been written off. Sundry revenue to date is £26,038 and the expenditure £15,606, the company possessing, besides its investments, cash £11,029 and loans £16,092. The property is valued at £28,279 and the buildings, machinery and plant appear at £4,156.

Cloverfield Mines.—Here is another property on which no work was done during 1907, the directors having explained a year ago the reasons which induced them to stop shaft sinking and to husband the cash resources of the company. Nothing has occurred during the year to make it desirable to change that decision. However, considerable work has been done on the neighbouring Geduld Proprietary Mines, and the results of the development are of interest, as the centre of the northern block on which operations have been proceeding is only 1,500 yards from the boundary of the Cloverfield. The average assay value for 3,090 ft. sampled on the reef north of the Geduld No. 2 shaft was 14.26 dwts. over a milling width of 30 ins., results which may be considered satisfactory. General expenditure by the Cloverfield for the year to December 31 was £4,071, making £21,588 to date, and the cash balances remaining amount to £26,541. Property account is entered at £227,110 and £105,585 has been spent on buildings, machinery and plant, shaft sinking, prospecting and boring.

Knight Central.—We dealt with this company's report a week or two ago, and only return to it in order to emphasise an aspect of South African mining finance to which we have persistently called attention—namely the very unsatisfactory position of the independent shareholder, whether domiciled in Europe or in South Africa. The annual meeting was held in Johannesburg on February 19, and a shareholder, Mr. W. J. Haley was anxious to discuss and protest against the proposed amalgamation with the South Knights. No doubt the discussion of the plan, which was not before the meeting, was technically out of order, but this shareholder was not allowed to speak until the chairman had sought the opinion of the meeting as to whether he should be heard or not. Fortunately no objection was raised, although interruption was attempted when the speaker drove his points home. The basis of his argument was that the amalgamation was entirely unnecessary, and Mr. Haley declared that if the scheme went through, South Knights would make hundreds of thousands of pounds, with corresponding loss to Knights Central. He declared the South Knights claims to be non-payable (which was not denied) and urged the directors to employ two independent experts to value the South property, and at least to defer the fusion until the passing of the new Gold Law, which was designed to afford some protection to small shareholders. Mr. Haley proceeded to show the inequitable character of the proposed bargain, even on the basis of market values, and declared that the payment of claim licences alone would cost Knight Central £60,000. It would be 20 to 25 years before the South claims were worked. The Knight Central had enough cash to erect a 50 stamp battery, and why not start with that instead of the huge mill contemplated? Altogether a temperate and dignified protest, and all that could be or was said in reply was that the "amalgamation scheme was an eminently sound businesslike arrangement. The Knight Central had to get money, and here was the opportunity of doing so." No doubt the matter was more fully dealt with at the special meeting held on March 19 (of which no details have come to hand), but the independent shareholder was just as powerless, the magnates always taking care to have or control a preponderating vote.

Peiser Diamond Mining and Estate.—This company's operations for the year 1907 were exceedingly disappointing, adverse influences being many and serious. Operations were seriously impeded by heavy rains which caused floodings and falls of reef and a consequent stoppage of work for some weeks. This also led to a large quantity of reef and stone having to be constantly hauled with the diamondiferous ground, thus considerably reducing the number of loads put through the washing pans. Another trouble was the appearance of hard blue ground which has necessitated the whole of the ground hauled being put through the crusher, and has retarded washing operations to some extent. Add to all this the upset in the diamond market and it is no surprise that the company decided to suspend operations from the end of the year. Loads washed last twelve months were 281,709, of which 193,163 were diamondiferous ground yielding 21,892 carats, an average of 11.33 carats per 100 loads. Diamonds sold and on hand represent £16,179 and £2,170 came in from interest, transfer fees, &c., a total of £18,348, but the outgo was £25,586, and the loss on the year was £7,237, reducing the credit balance to £4,627. Quantity of diamonds sold in recent months has shown an improvement and the indications as to the broadening of the mine continue favourable. Boring operations have revealed the existence of blue ground to a depth of 255 ft. Mr. Peiser has renounced his claim to certain further interests in the company's property.

Tharsis Sulphur and Copper.—This well-known concern has had its ups and downs like most undertakings of the kind, but on the whole it has been exceedingly successful, and the financial statistics since the commencement, now running to 41 years, presented with the report provide a fascinating and instructive study. The smallest dividend paid in this time has been 5 per cent. and the largest 40 per cent., the total sum distributed

having amounted to £8,852,182 or 795 2-3 per cent., a record of which all concerned may well be proud. Most important of all is the fact that financial stability has never been sacrificed to the payment of dividends, and so we find the property to-day written down from its original value or cost of £2,590,254 to the practically nominal figure of £174,188, being total deductions of £2,416,066. Few indeed can be the companies in a position to boast of such an achievement, and the capital of £1,250,000 is represented to the extent of £1,138,244 by securities and cash. The past year's operations, if not so successful as those of 1906, were better than anything accomplished in the period 1902-5, and the dividend of 20 per cent. compares with 25 per cent. for the previous year. At the Tharsis mines the work of uncovering the mineral in the eastern extension of the Sierra Ballones lode has made satisfactory progress in the twelve months, the overburden removed being 81,938 cubic metres against 83,374 in 1906. Mineral extracted has amounted to 81,034 tons, a drop of 14,375 tons, the whole of which is being treated on the mine. Overburden removed from the Calañas mines was 128,266 cubic metres or 17,314 less, but the mineral extracted went up from 342,348 tons to 376,658 tons, an increase of 34,310 tons. The cupreous sterile extracted for treatment on the mine has been 27,758 tons as compared with 31,601 tons in 1906, a shrinkage in this case of 3,843 tons. This means that the actual quantity raised at the Calañas mines, including cupreous sterile, was 404,416 tons, an increase of 30,467 tons. At the Lagunazo mines the operations of washing the mineral heaps and treating the copper liquors produced therefrom were carried on regularly, the supply of water having been ample for all purposes. Rainfall at Tharsis was 32.59 inches and at Calañas 23.76 inches as against 19.23 and 16.77 inches respectively in 1906. The greater proportion fell during the last quarter of the year, and raised what threatened to be one of the driest years on record to the position of an exceptionally wet one. At the close of the year the reservoirs were full and the quantity of water was sufficient for all the current year's requirements. Total shipments for the year were 415,169 tons, the pyrites shipped, including washed mineral, being 406,015 tons as compared with 433,923 tons. Quantity of ore treated at the metal works was about the same as in 1906, but owing to the high price of coal the working costs have been higher. Deliveries of iron ore were somewhat less, but the price secured was considerably better. Refined copper produced was 4,410 tons, a drop of 329 tons. Profit for the year came to £282,057, interest gave £41,680, and £31,874 was brought in, a total of £355,611. After providing general expenses and making proper allowances against property the balance available is £292,897, of which the 20 per cent. dividend absorbs £250,000, leaving £42,897 to be carried forward. Prospecting on new properties has not led to any encouraging results, but further work is being carried out, options having been taken on two adjoining properties in Arizona.

Mount Lyell Blocks Mining Company.—This company's report for the six months ended December 31, 1907, discloses an unsatisfactory position, and owing to the severe fall in copper it was decided to suspend operations in October last. Since work was stopped several offers have been received for working portions of the mine on tribute, but they were not accepted, and the board has decided to allow the property to stand idle until the price of copper warrants reopening in the ordinary way. Quantity of ore treated up to the time milling operations were suspended was 11,132 tons, producing little more than 89 tons of copper, the assay value of the ore being 1.09 per cent. and the extraction 73.1 per cent. Loss for the year was £5,096, which includes the sum of £903 spent in testing and developing the Queensberry Mine, over which the company took a working option. The option was not exercised. To the above has to be added £2,375 for reclamations on concentrates sold and shipped during the previous half-year, but there is still a small credit to profit and loss.

Victoria and Queen Gold Mining.—This Charters Towers company operates on a very small scale, and in the half-year to January 20 crushed 259 tons for 357 oz., worth £1,160, the residues giving a further amount of £136, making a total of £1,296. Tribute parties crushed 192 tons for 191 ozs., valued with residues at £686. Including tributors' royalty, the receipts were £1,325 and the total outgo £1,850, leaving a debit of £525 to be added to £5,606 brought in, increasing the deficiency to £6,131. Regarding development, the most favourable points at present are the stopes over the intermediate level, and over the levels driven on the newly-discovered faulted body of stone. The reef is small, though of good value, and it is hoped it will open out as the stopes ascend.

Stratton's Independence.—What must, take it altogether, be considered an encouraging circular has just been issued to the shareholders of this company. The last annual report, issued in December, 1907, made lengthy reference to the erection of a dump and low-grade wet crushing plant then proceeding, and the following cable has just been received from Mr. P. Argall, the consulting engineer: "As far as tested ore treatment quite satisfactory. Cyanide process just commenced; filters will be completed within next few days. I am fully satisfied with everything up to the present; mill operations have proved entirely successful." In fact, Mr. Argall is quite enthusiastic about his mill, has described it as the best he has ever constructed, and is confident that the aggregate tonnage to be derived from the dumps and from the low-grade ore in the mine will be ample to keep a mill of 10,000 tons per month capacity in successful and profitable operation for eight or ten years to come. The dump is estimated to consist of 600,000 tons, from which the profit in sight is estimated at £120,000, and "with regard to the immediate prospect of obtaining the income to provide a yearly dividend on the shares nothing has occurred to lessen the profits after the completion of the new mining and milling scheme as estimated in June last, namely £50,000 per annum." Mr. Argall believes that his original profit estimate of £3,400 per month, with the mill in full working, will be exceeded, and it should be mentioned that a considerable reduction has also been effected in the London expenses. The company has found itself a little short of money, and towards meeting the requirements at the mill and providing working capital the directors have obtained a temporary loan of £8,000, which, under present circumstances, can only be paid off out of the profits.

Anantapur Gold Field.—We made a reference last week to this concern when dealing with the report of the Balaghat Company, which holds 4,000 shares. A circular has now been issued to the shareholders giving brief details of the present position and describing a change in the terms arranged with the owner of the three properties over which the company holds prospecting licences. The original terms were £1,000 for each of the three properties, with a minimum of £1,500, and one-fifth of the nominal share capital, exclusive of the working capital, in fully-paid shares of any company formed. This, of course, must have led to dual vendorship, and a modification of the agreement has been arranged, under which the properties and prospecting licences may be acquired for £5,000 in cash and 5,000 fully-paid shares in this company. It is now proposed to increase the capital to £60,000 by the creation of 30,000 shares of £1 each, £5,000 to go to the owner of the properties and 20,833 to be offered for subscription, of which the Mysore Reefs (1905) and Explorers, Limited, guarantee 15,000 for a commission of 20 per cent., payable in shares. The mining area controlled by the company has recently been extended, and now comprises 7,040 acres, having 11 miles on the course of the reef and one mile in breadth. The exploration of the lodes on the Anantapur field has been attended with most satisfactory results, we are told, and the directors are of opinion that the prospect of this field proving one of considerable mining importance is exceptionally bright.

Glamorgan Coal.—For several years this company did very badly, but since turning the corner it has made substantial progress and dividend arrears are being rapidly extinguished. Last twelve months to December 31 the profit was £94,814 and £3,166 was brought in, making £97,980 in all. Debenture interest requires £2,250, and the directors then proceed to pay no less than six years' preference dividend, leaving £1,272 to be carried forward. There will then remain 7½ years to be cleared away, and it appears that a revaluation of the company's properties has revealed a surplus of £205,072. It is therefore proposed to place £100,000 to a general reserve and replace £105,072 to the credit of profit and loss, so that when cash becomes available another six years' preference dividend will be paid, leaving only 18 months' outstanding. It is hoped to clear this off in the current year and to bring ordinary shareholders within reach of a dividend. Part of the large surplus arises from the expenditure during the last eight years of £128,000 on the improvement of the undertaking. The company has a splendid array of liquid assets, and will redeem the outstanding debentures amounting to £45,000 on May 1 next.

Critical Index to New Investments.

Goldsmiths and Silversmiths Co., Limited.

Established as a limited liability company in 1898, this company has a paid up capital of £600,000, divided into 60,000 5 per cent. cumulative preference shares of £5 each and 300,000 £1 ordinary shares, of which only the preference shares were issued to the public. The greater portion of the ordinary shares were held by the founders of the business, but one of them, Sir John Langman, who contemplates an early retirement from all active business, has sold 120,000 of his holding at a premium, and the purchasers are offering them for subscription at the price of 23s. per share. Nett profits for the ten years ended January 31, 1908, show a fair amount of fluctuation, but on an average the company has earned approximately 12 per cent. on its ordinary shares, and even in the worst year the income was nearly 9 per cent. Dividends, however (except in 1902-1904, when 10 per cent. per annum was paid), have been kept at a steady 7½ per cent., and a reserve of £85,000 has been built up, of which £31,000 is invested in trustee securities and the balance is employed in the business. In addition, the undivided profits amount to £20,800, which it is claimed brings the total reserves up to £105,800. Assuming that the dividend is maintained at 7½ per cent., the return at the price asked would be 6½ per cent., and the shares seem to be a fair industrial investment, hut not particularly cheap.

City of Santos Improvements Co., Limited.

This company, which was incorporated in 1880, carries on the water supply and gas works of the City

of Santos, in the State of San Paulo, Brazil, the electric light and power supply, the tramways system of the city and suburbs, and a six-mile railway from Santos to San Vicente, so that it has many strings to its bow. At present the tramways are worked by animal traction, and the railway by steam, but the electrification of the whole system is under consideration, and as a commencement it is proposed to convert about six miles of tramways extending to the residential quarter on the sea coast. For this purpose and to provide funds for the electrification of the San Vicente Railway and mule tramway and for an extension of the electric lighting to San Vicente, the directors offer £150,000 5 per cent. (Tramways) debentures, forming part of an authorised total of £200,000, at the price of 95. The debentures are secured by a specific charge on the tramway and electric lighting concessions in priority to the existing debentures and by a floating charge on all other assets subject to the existing issue, and will be redeemed at par by an accumulative sinking fund of 1½ per cent. per annum, commencing in 1909. From its formation in 1880 to 1899 the company paid regular dividends on its ordinary shares averaging upwards of 5 per cent., and for the last seven years the dividends have been at the uniform rate of 7 per cent. per annum. For 1907 the nett revenue exceeded £45,000, and after deducting £12,870 for interest and sinking fund on the outstanding debentures there would be a balance of over £32,130 to meet the charge of £9,750 on the present issue without taking into account any increase after the completion of the works now proposed. The directors estimate that this will amount to £10,000, but even on the present figures there is ample margin.

Letters to the Editor.

THE DEBT OF PORTUGAL.

Sir,—Referring to your remarks in your issue of 4th inst. concerning the finances of Portugal, I would point out that the amount of the debt, both funded and floating, works out, at par, at about £25 per head of population.

According to the last census the latter was in round figures 5,500,000.

On this basis, and exclusive of local taxation, monopolies, &c., the incidence of taxation per head was, for 1907-8, £1 19s., of which 15s. 9d. was from direct and £1 3s. 3d. from indirect taxes.

Twenty-five years ago, in 1882-3, the figures were 6s. 11d. from direct taxation and 11s. 4d. from indirect, forming a total of 18s. 3d.

I am, Sir, yours truly,

N.

April 7, 1908.

NEXT WEEK'S MEETINGS.

Wednesday, April 22.

Anglo-French Exploration.—Salisbury House, noon.
General Investors and Trustees.—75, Lombard Street, E.C., noon.
Kimberley Waterworks.—Cannon Street Hotel, noon.
Lancefield Gold Mining.—20, Copthall Avenue, E.C., 12.30 p.m.
Tharsis Sulphur and Copper.—Glasgow, 1 p.m.
Union Bank of Scotland.—Glasgow, noon.

Thursday, April 23.

Bank of Australasia.—4, Threadneedle Street, E.C., 1 p.m.
City of Birmingham Tramways.—Donington House, W.C., 2.30 p.m.
City of Santos Improvements.—Great Eastern Hotel, noon.
Clayton and Shuttleworth.—Lincoln, 2 p.m.
Cunard Steamship.—Liverpool, noon.
Locket's Merthyr Collieries.—Cardiff, noon.
Oldham, Ashton and Hyde Electric Tramways.—Donington House, W.C., noon.
Rio Claro São Paulo Railway.—Cannon Street House, 1 p.m.

Friday, April 24.

British and Australasian Trust and Loan.—Cannon Street Hotel 1 p.m.
Cambrian Railway.—Palmerston House, 12.30 p.m.

Continuing their "Romance of Empire" series, Messrs. Jack announce two new volumes, "Australia," by W. H. Lang, illustrated in colour by George W. Lambert, and "Outposts of Empire," by John Lang, illustrated in colour by John R. Skelton.

TRADE AND PRODUCE.

Wednesday.—*Owing to early publication this week some of the market reports have not come to hand.*

Wheat.—Little or nothing has been done this week, but holders as a rule showed less anxiety to sell, and in some cases asked higher prices. Samples of River Plate wheat, however, were fairly plentiful, and sellers of spot parcels, in view of the large quantities now in passage, seemed disposed to accept rather lower rates than shippers quoted. In speculative positions prices fluctuated in sympathy with American advices. A rally on that side was reflected by a firmer tone here, and quotations further advanced on Saturday owing to covering over the week-end, but apart from that the demand has been insignificant. Quotations were pushed up now and again, but each advance brought out sellers, and the improvements were not maintained for long.

Wool.—With the approach of the holidays business has been more restricted than ever, but the feeling with regard to the future seems to be a little more hopeful, and any further decline in prices is now considered improbable. Dealings in English wool have been small, and confined chiefly to American orders for the best and finest fleeces, but a rather better demand has been experienced for colonial wool. Arrivals up to last Saturday for the third series of colonial auctions, which will commence on May 12, amounted to 211,642 bales, of which 25,830 bales were from New South Wales, 30,449 bales from Victoria, 104,402 bales from New Zealand, and 24,852 bales from the Cape and Natal. Imports for the week ended the 11th inst. included over 12,000 bales from New Zealand, 5,800 bales from Sydney, and 4,700 from Victoria, the total being 25,000 bales. The home trade in manufactured goods is still below the average for this time of the year, but orders for summer goods, especially low-priced tweeds, have been a shade more plentiful. Continental and South American inquiries have also improved, but the colonial demand continues dull, and America is still doing nothing.

Cotton (from our Manchester correspondent).—No fresh feature of any moment has transpired in our market, and business has been confined to comparatively small dimensions. Here and there odd lots have changed hands, but buyers have not been at all stimulated to operate with any freedom. The easier tendency of American cotton in Liverpool has caused buyers of yarn and cloth to hesitate before committing themselves very far ahead. Complaints are met with from practically all directions, and the general demand from abroad is poor. The holidays this week-end are being extended in both spinning and weaving districts. The production at the present time is greater than the requirements of users, and while the demand is so poor the tendency all along the line is to restrict the output. Favourable reports continue to come through with regard to the prospects for next season's crop. The weather so far has been satisfactory, and it is generally considered that the acreage under cultivation will be quite equal to the present season. Makers of cloth suitable for shipment abroad have not met with much encouragement from any market. Rather more offers, perhaps, have come through from India, but limits are low, and in most instances very little can be done. A miscellaneous trade has transpired for various outlets, but no free buying has occurred. China remains quiet and unsatisfactory, but the prospects are not unhealthy. Very few sellers for the near Eastern markets have met with much success in bringing negotiations to a successful conclusion. Home trade goods have rather dragged in demand, and the reports from the distributing houses are not very promising. Burnley goods show very little change, the demand remaining slow. Offers for heavy cloths are too low to be put through. Yarns of both American and Egyptian descriptions have dragged in demand, the business offering in some quarters being scarcely sufficient to thoroughly test prices. Weak sellers are met with in most directions. The supply of twists is increasing rather rapidly. Home users have no need at the moment to anticipate future requirements, and no difficulty is experienced in getting necessary deliveries. Export kinds have been slow for practically all markets, and old orders are being cancelled wherever possible by shippers.

Copper.—In spite of the poor trade outlook sellers seemed disposed to hold off the market and with a certain amount of bear covering prices improved to £58 for cash and £58 10s. for three months. A little pressure to sell spot metal caused a relapse to £57 13s. 9d. and £58 2s. 6d. respectively, but the market hardened again and final quotations are £58 12s. 6d. for cash and £59 2s. 6d. for three months.

Tin.—Prices fell 15s. at the opening on the news that a fair amount of business had been done at lower levels, and were further pressed down by heavy selling on this side. At one time quotations were down to £141 15s. for cash and £140 15s. for three months, but at these figures strong support was forthcoming from the bulls and a recovery to £144 5s. and £143 15s. respectively was brought about.

Iron and Steel.—Traders are inclined to take a very gloomy view of the future and business has shrunk to very small proportions. So little has been done that quotations are for the most part purely nominal, with a tendency to move against sellers. In Cleveland iron prices of futures are from 2s. 6d. to 3s. under spot metal according to dates, the longer positions being the cheapest. Manufactured iron and steel are also tending downwards, with few orders about.

RAILWAY TRAFFIC RETURNS.

Foreign.

Alberta Railway and Irrigation.—Earnings for the 10 days ended April 7, $3,899, decrease $266; aggregate from July 1, $184,419, increase $40,293.

Argentine North Eastern. — Traffic receipts for week ended March 20, £3,995, increase £134; aggregate from July 1, £119,352, decrease £4,150.

Assam Bengal.—Traffic receipts for 7 days ended March 14, Rs. 88,500, decrease Rs. 3,280; aggregate from Jan. 1, Rs. 9,46,343, decrease Rs. 1,05,190.

Bilbao River and Cantabrian. — Traffic returns for March £8,355, increase £544; aggregate from January 1, £24,583, decrease £4,019.

Buenos Ayres Central. — Gross receipts for March £11,436, decrease £1,133; aggregate from Jan. 1, £93,412, decrease £3,664.

Canadian Northern Railway.—Traffic receipts for 7 days ended April 7, $167,600, increase $65,900; total from July 1, $7,164,600, increase $1,973,400.

Egyptian Delta.—Traffic receipts for week ended March 21, £5,540, increase £400; aggregate from January 1, £268,653, increase £18,650.

Lucknow Bareilly Railway.—Traffic receipts for 7 days ended March 14, Rs. 35,305, decrease Rs. 5,247; aggregate from January 1, Rs. 3,66,849, decrease Rs. 46,694.

Midland Uruguay.—Receipts for month of March, £4,957, decrease £1,597; aggregate from July 1, £50,386, decrease £4,660.

North Western of Uruguay.—Traffic receipts for Mch., $21,300, increase $736; aggregate from July 1, $175,429, decrease $11,930.

Quebec Central Railway.—Traffic receipts for the 1st week of April, $24,010, increase $6,859; aggregate from January 1, $262,278, increase $67,981.

Quebec and Lake St. John.—Traffic receipts for Feb. $31,941, decrease $2,037; aggregate receipts $68,216, decrease $1,606.

Rohilkund and Kumaon Railway.—Traffic receipts for 7 days ended March. 14, Rs. 22,645, increase Rs. 2,117; aggregate from Jan. 1, Rs. 2,23,679, decrease Rs. 29,219.

Uruguay Northern.—Gross receipts for month of Dec., £1,712, increase £3; aggregate from July 1, £11,422, increase £970.

White Pass and Yukon Railway.—Traffic receipts for week ended March 31 amounted to $14,686.

English.

Cleator and Workington Junction.—Receipts for week ending April 4, £1,366, decrease £46; aggregate from January 1, £15,608, decrease £3,137.

Cockermouth and Keswick Railway.—Receipts for week ending April 4, £714, decrease £148; aggregate from January 1, £9,247, decrease £868.

East and West Yorkshire Union Railways.—Traffic receipts for week ended April 11, £473, increase £7; aggregate from January 1, £6,869, increase £312.

TRAMWAY AND OMNIBUS RECEIPTS.

Home.

Bath Electric. — Traffic receipts for week ending April 8, £652, decrease £638; aggregate from Jan. 1, £8,059, decrease £1,300.

Blessington and Poulaphouca.—Traffic receipts for week ending April 8, £7, decrease £2; aggregate from Jan. 1, £88, decrease £35.

Bristol Tramways and Carriage.—Traffic receipts for week ending April 10, £4,583, decrease £118; aggregate from Jan. 1, £67,743, decrease £3,615.

British Electric Traction.—Receipts of all the Associated Companies for the week ending April 3, £26,904; 428¾ miles.

Burnley Corporation.— Traffic receipts for week ending April 11, £1,177, increase £59; aggregate from January 1, £18,716, decrease £195.

Dublin and Blessington.—Traffic receipts for week ending April 8, £115, decrease £42; aggregate from January 1, £1,383, decrease £110.

Dublin and Lucan.—Traffic receipts for week ending April 10, £108, increase £6; aggregate from Jan. 1, £1,377, decrease £48.

Dublin United.—Traffic receipts for week ending April 10, £4,811, decrease £148; aggregate from Jan. 1, £68,123, increase £587.

Hastings and District.—Traffic receipts for week ending April 9, £811, decrease £131.

Isle of Thanet. — Traffic receipts for week ending April 11, £268, decrease £82; aggregate from Oct. 1, £7,302, decrease £637.

London County Council.—Traffic receipts for week ending March 28, £31,025, increase £790; aggregate from April 1, £1,611,874, increase £242,623. Miles 116¾, against 113¾.

London General Omnibus.—Traffic receipts for week ending April 4, £19,661, decrease £2,551; aggregate from Jan. 1, £245,235, decrease £18,062.

London Road Car.—Traffic receipts for week ending April 11, £7,820, decrease £336; aggregate from Jan. 1, £96,548, decrease £5,254.

London United.—Traffic receipts for week ending April 11, £5,579, increase £179; aggregate from January 1, £76,299, decrease £4,880.

Provincial Trams.—Traffic receipts for week ending April 11, £1,522, increase £74; aggregate from Oct. 1, £40,206, decrease £258.

Rossendale Valley.—Traffic receipts for week ending April 10, £185, increase £1.

Sunderland District.—Traffic receipts for week ending April 8, £453, increase £47; aggregate for 23 weeks £10,201, increase £909.

Yorkshire (West Riding) Electric.—Traffic receipts for week ending April 12, £1,103, increase £150; aggregate from January 1, £15,953.

Foreign.

Anglo-Argentine.—Traffic receipts for 7 days ending April 8, £20,051, increase £1,628; aggregate from January 1, £258,162, increase £32,370.

Auckland Electric. —Traffic receipts for 28 days ending March 27, £11,212, increase £1,366; aggregate from January 1, £37,100, increase £4,948.

Brisbane. — Traffic receipts for month of March, £14,490, increase £1,291.

British Columbia Electric.—Nett earnings for February $68,541, increase $18,251. Aggregate nett earnings, including income from investments from July 1 to Feb. 29, $662,619, increase $186,087.

Buenos Ayres Grand National and New Tramways.—Traffic receipts for 7 days ending April 7, £8,302, increase £882.

Calcutta. — Traffic receipts for week ending April 4, Rs. 48,628, increase Rs. 4,119; aggregate from January 1, Rs. 6,96,512, decrease Rs. 31,519.

Cape Electric.—Traffic revenue for month of February, Cape Town, £10,497; Port Elizabeth, £2.984.

Carthagena and Herreiras.—Traffic receipts for the month of March, £1,849, decrease £4,389; total from January 1, £6,621, decrease £10,508.

Geneva Trams.—Earnings for February, fr. 173,497; increase fr. 19,986.

Kalgoorlie Electric. — Gross receipts for March, £4,264; aggregate from January 1, £11,319.

Lisbon Electric.—Earnings for February, milreis 107,472.

Madras Electric.—Traffic receipts for fortnight ended March 31, Rs. 19,446, decrease Rs. 1,195; aggregate from January 1, Rs. 116,368, increase Rs. 12,619.

Melbourne Tramways and Omnibus. — Traffic receipts for March, £49,500.

Mexico.—Nett earnings for month of January, $194,398, increase $65,167; aggregate nett earnings from January 1, $194,398, increase $65,167.

Monte Video United.—Gross receipts for March, £22,513, increase £2,569.

Perth (W.A.) Electric. — Gross receipts for week ended April 10, £1,403, decrease £79; aggregate from January 1, £21,170, decrease £1,052.

Rio de Janeiro.—Gross earnings for 13th week 1908, $27,084; increase $4,096.

Sao Paulo.—Traffic returns for February: nett earnings, $121,794, increase $7,020; aggregate from Jan. 1, $378,420, increase $31,608.

Twin City Rapid.—Traffic receipts for the month of November, $497,428, increase $38,791; aggregate from January 1, $5,552,879, increase $402,984. Nett traffic receipts, $233,018, decrease $649; aggregate from January 1, $2,852,445, increase $105,004.

DIRECTORS' REPORT

(Presented at the Fifty-fourth Ordinary General Meeting, 15th April, 1908).

The Directors have now to submit to the Shareholders the Balance-sheet and Profit and Loss Account of the Bank for the year ended 31st December last.

These show a net profit, after providing for bad and doubtful debts, of £361,551 14s. 9d. inclusive of £93,369 8s. 0d. brought forward from the previous year. The Interim Dividend at the rate of Thirteen per cent. per annum paid in October last on the old Shares absorbed £52,000, and a further sum of £18,000 has been appropriated to pay a Bonus of Ten per cent. on the salaries of the Staff. The amount now available is therefore £291,551 14s. 9d., out of which £17,068 4s. 7d. has been appropriated in payment of Interest on the new Capital to 31st December, 1907, and the Directors propose to pay a Final Dividend on the old Shares at the rate of Fifteen per cent. per annum, making Fourteen per cent. for the whole year; to add £50,000 to the Reserve Fund, which will then stand at £1,525,000; to add £10,000 to the Officers' Superannuation Fund; to write off Premises Account £25,000; and to carry forward the balance of £129,483 10s. 2d.

It is with deep regret that the Directors have to announce the death of their esteemed colleague, Mr. Jasper Young.

Mr. Thomas Cuthbertson, of Messrs. Edward Boustead & Co., London, has been elected a Director, and the Shareholders are now requested to confirm his election.

Sir Alfred Dent, K.C.M.G., and Mr. Thomas Cuthbertson, the Directors who now retire by rotation, present themselves for re-election.

The Auditors, Mr. Maurice Nelson Girdlestone and Mr. Magnus Mowat, again tender their services.

By Order of the Court,
CALEB LEWIS,
T. H. WHITEHEAD, } *Managers.*

The Investors' Review.

The Week's Money Market.

BANK RATE 3 PER CENT. (Reduced from 3½ per cent. on Thursday, March 19.)

Norfolk House, Wednesday Evening.

Although rates are low enough there is no real comfortableness in the Money market and no great readiness amongst credit dealers to accept long commitments. We have no key, however, to the movements of market money this week because the Bank return will not make its appearance until to-morrow, so that only general considerations are available on which to form an opinion. Prominent amongst the influences against cheap money, in fact the dominating influence, is the great hurry displayed by all sorts and conditions of borrowers to get control of new capital, and calls on the issues already made are certain to keep available balances fully employed for months to come, not only on our market but all over the world. Our market has pretty well succeeded in paying off the Bank, barring its debt on bills not yet run off, although it did renew a little on Monday and had to take the credits up to the 21st inst.; but outside rates for call loans have not dipped below 2 per cent. and rose briskly above that on very slight provocation. Seven-day money has generally been 2¼ per cent., but not infrequently 2½ per cent. has been paid. It all depended upon what the day's commitments might be. This morning, for instance, the market had to find an instalment of £1,250,000 due on the new India 3½ per cent. loan, and that made call money 2¼ per cent., while the seven-day rate rose for a short time or in places to 2½ per cent.

Discount rates are also firm with now and then a tendency to harden. Some houses go so far as to quote 2⅜ per cent. as the rate on three months' remitted paper, but others gave 2⅜ per cent. as an alternative, and that may be accepted as the finest working quotation. In fact, very keen dealers indeed quote 2⅜-11/16 per cent., although stating that the bulk of the turnover was at 2⅝ per cent., which is also the rate for very choice fours and sixes. In the afternoon the tendency became rather easier, partly because the day's business had been already done and also because of the revived tales about exports of gold from New York to Germany. Doubtless the German banks would like very well to get some of the metal from wherever it can be found, and it is definitely alleged that large parcels have been engaged by them in New York for shipment. This is conceivably true, but if the gold is coming it is being paid for by finance, since neither the state of German trade nor the credit position of German banks would allow them to pull the metal in freely from abroad. It is perhaps significant of what is going on that German finance paper has been offering in our market with considerable freedom this week. The financing in this way manifested may be due to the exigencies of credit arising from the issue of the new loans; it may also represent efforts to raise the means wherewith to buy gold.

Disappointment continues to be expressed in Germany at the non-reduction of the Reichsbank rate. It remains at 5½ per cent., and thus gives but a very cold welcome to the new Prusso-German loan. No doubt if the directors of the Bank could have brought their rate down they would have been happy to gratify the credit houses and the other banks, but in the present state of German business it would have been an imprudent step to take, since it is by no means improbable that, were money to be made artificially cheap on German markets, it would be an outflow of gold and not an inflow that we should witness. What will happen to the German banks, for example, should other markets get shy of their finance paper? As long as they can lean upon London and Paris, or even Amsterdam to a certain extent, for credit to enable them to keep a brave front to the world all may seem well; but if other markets grow suspicious, or draw in their funds because they want them elsewhere, and the German credit wielders are thrown back upon their own resources, an entirely different appearance may be put upon the markets of the Empire, and if gold had to be sent out of the country in order to meet credit engagements entered into abroad, the crisis which might ensue might very well startle all markets out of their equanimity. And the worst of it is that markets everywhere are more and more requiring their means to plaster over their own sores. The very fact that we have losses huddled up and concealed, or slurred over and financed, in every country to a really ghastly extent, when we try to peer beneath the surface, should compel prudent dealers in credit to be diligent in providing against disagreeable surprises.

Next Tuesday calls to the amount of £1,404,000 fall due on new issues, including £1,004,000 on the new Canadian Pacific shares, £200,000 on B.A. and Pacific new ordinary shares, and the same amount on Bahia Blanca new debenture stock.

SILVER.

Business in the market for bars was at a standstill, and quotations were left unaltered at 25 3/16d. per oz. for cash and 25 5/16d. per oz. for delivery two months forward until Tuesday. On that day a few orders came in from the bazaars, which were sufficient to lift prices by 1/16d. per oz. for both positions, and this was followed by a further advance of ⅛d. to 25⅜d. per oz. for spot and 25½d. per oz. for future metal. Applications for the Rs. 10,00,000 of Council drafts on India to-day only amounted to Rs. 50,176, all in bills, and tenders at 1s. 3 27-32d. per rupee received in full. Next Wednesday another Rs. 10,00,000 will be offered.

The following bullion movements on foreign account have taken place at the Bank of England since our last issue:—

Arrivals.		Withdrawals.	
Saturday, Australia	£100,000	Monday, Paris	£98,000

The Stock Markets.

We write so early in the week that it seems quite unnecessary to enter into any elaborate analysis of Stock Exchange business. There has been very little of it going on, and what has been done has not improved the mood of the markets. Prices, indeed, have gone back, and betrayed a most unpleasant disposition to slide on the least pretext or on none at all. Markets look as if they were still oppressed by hidden insolvencies or hampered by exhausted credit striving to keep up appearances and failing. New issues remain out of favour, and the lack of any disposition on the part of investors to come for them is another symptom of the same description. The new Peruvian debenture issue, for instance, is quoted at 1½ discount, and the underwriters had to take up 93 per cent. of the loan. The new London and North-Western preference stock, on the other hand, stands at 1¼ premium, proving that there is money somewhere and a keen scent for what is really good.

Consols have not been firm since we wrote last, and although business in them has been larger the market yesterday showed distinct weakness on a report that the Transvaal guaranteed loan of £5,000,000 is to be issued immediately after the holidays. Plenty of other issues will come then, but the £2,000,000 in 4 per cent. bonds of the Canadian Northern Railway to be offered at 92 is not yet all underwritten, although the commission is 2 per cent. Natal is said to be in want of another loan, and we have no doubt at all that it must have more money, but whether the British public will be disposed to lend it all it wants is another matter. It is the most debt-smothered country in the world now.

There is nothing to say about the general group of trustee securities or about colonial stocks because they all keep steady. Foreign Government bonds are also devoid of much interest. Russian and Japanese have shown weakness, and Brazilian bonds have given way here and there in spite of the fact that the £3,000,000 in six months bills offered by the Brazilian Government are said to have been taken up, but there has been no large decline at any point and the French have been buying Egyptian Unified. German and Prussian stocks lie dormant pending the fate of the new loan.

The prominent fact in the Home Railway market was yesterday's slump of 3 in the price of North-Eastern Consols. That weakness is due to the threatened strike, but all home railway stocks have been depressed, and notwithstanding the firmness of the market for North-Western new preference the ordinary stock has fallen 1½ since last Thursday evening. Metro-

politan stock has also gone back, and business does not spread, although a fair amount of trade has been going on in the leading heavy stocks. Preferences recede as well as ordinary when they move at all, and Scotch stocks are just as heavy as English.

Even Canadian Pacific shares have gone back a little this week notwithstanding the pleasant stories about the rush of land hungry Yankees into the North-West, but the weakness seems to come from the Continent rather than from America or London. Grand Trunk stocks have been in a manner neglected, and show no changes worth noticing. Nor is there really anything of importance to dwell upon in the Yankee railroad market. It is singularly lifeless all things considered, and nothing that the great magicians of Wall Street can do is able to endow prices with stability. Bonds though keep tolerably steady with now and then a few transactions in favourites, and there has been no fall worth mentioning in shares, on the contrary some of them are $\frac{1}{2}$ better.

Foreign Railways also make a most uninteresting display, the Argentine group still continuing to lose ground. Leopoldina stock also goes on declining, and this week the depression has slightly touched San Paulo stock, while no support is forthcoming for any Cuban Railway. Gambling in Mexican Railway stocks has been unusually brisk, and almost barren of results so far except to the bears of the ordinary stock, which is down $1\frac{1}{4}$.

Agricultural Bank of Egypt shares have been offered and are consequently lower, but that is almost the only change under Banks and Discount Companies, and the movements amongst Brewery securities have no interest for anybody. Dock stocks are also undisturbed, and the numerous mostly minute changes amongst Commercial and Industrial shares and bonds need not occupy our attention. The aspect of the market is just as unpleasant here as elsewhere, the majority of changes being adverse, but Catering shares are firm on the whole, and there has been no serious relapse at any point, only prices for Thos. Tilling preference shares and debentures are still notably melting away. Underground Electric profit-sharing notes have also been put lower.

Electric securities show a few changes, but the majority are favourable, although Brush debentures are flat, and Montreal Light, Heat and Power shares are quoted 6 up. Peruvian Corporation stocks have naturally dipped severely on the failure of the new issue, and the preference stock was dealt in yesterday at $31\frac{3}{4}$. Other Financial, Land and Investment securities require no mention, not even Hudson's Bay shares, the price of which is well sustained. Financial Trust securities are disposed to be more steady, and Bankers' Trust issues are all better, but Foreign, American and General deferred has been put down 4. We may pass by Gas stocks, and the only thing to be said about Insurance shares is that the Boston fire has not stimulated timid holders to sell. Iron, Coal and Steel shares and obligations have shown a little more activity of movement, but no more business, and prices are seldom favourable. Pease and Partners' shares and first debenture stock, however, rallied somewhat, and the only prominent decline is in Cargo Fleet debentures. Shipping shares are firm, with the one noticeable exception of Bucknall's preference, and the small movements in the Tea, Coffee and Rubber group are nearly all upward. Prices are also good or steady, with a few exceptions in the Telegraph and Telephone group. Marconi's shares, however, still lose ground, and we are thoroughly tired of waiting for that daily stream of American messages by this company's agency. Mexico Tramways shares and bonds have been in some request, and consequently show an advance, especially the shares. San Paulo Tramway, Light and Power shares have also been raised, although little or no business seems to have been done in them.

Wednesday Evening.

There is nothing whatever to say about Stock markets to-day, they hardly existed, for it is a Jewish holiday, and most people are in a mood to escape for the Easter recess. Therefore we have little information to give except about new issues and the quotations for the longish list of these is really quite suggestive. Take first those at a premium. As mentioned above, the largest premium is that on "Brum." preferred, viz., $1\frac{1}{4}$, then follow County Council at a premium of $\frac{15}{16}$ for cash and $1\frac{1}{16}$ for the special settlement, Moscow scrip is quoted at $\frac{1}{2}$, New Chinese at $\frac{1}{4}$, New Canada $3\frac{1}{2}$ per cents. at $\frac{1}{8}$ and New Copenhagen at $\frac{1}{4}$ premium. Discounts are more striking and disagreeable. Peruvian debentures, for instance, go out to-night at $1\frac{1}{4}$ discount, which is also the quotation for San Paulo City bonds, and Grand Trunk Pacific New is quoted at $1\frac{3}{4}$ discount. Even Grand Trunk guaranteed has dropped to $\frac{1}{2}$ discount and Antofagasta preference is 1 discount, while B.A. Pacific new debenture stock is $\frac{1}{2}$ discount and New South Wales $3\frac{1}{2}$ per cents. $\frac{3}{4}$ discount. At this rate many people will soon be disposed to quit the underwriting industry in disgust. But, bad as the show is, the markets as a whole were called steady at the end. The Mexican Railway announced its dividend this afternoon at the rate of $5\frac{3}{4}$ per cent. per annum on the second preference stock, making $5\frac{3}{4}$ per cent. for the year compared with $3\frac{15}{16}$ per cent. for 1906. This was well up to the highest anticipations of the market, but the effect on prices was only momentary.

THE WEEK'S PRICE MOVEMENTS.

BRITISH FUNDS.—Rise: Egyptian Govt. 1, to 99-101. **Fall:** Irish Ld Stk. Acct. $\frac{1}{2}$, to $90\frac{1}{2}$-$1\frac{1}{2}$, Bk. Engld. 1, to 270-4.

CORPORATION AND COUNTY STOCKS.—Rise: Portsmouth 1924-7 1, to 99-101, S. Shields 1, to 83-5, Swansea 3 p.c. 1, to 85-7, Bristol $3\frac{1}{2}$ p.c. Db. 1, to 101-4.

COLONIAL AND PROVINCIAL GOVERNMENT SECURITIES.—Rise: Canada (Dom.) 4 p.c. Red. 1, to $102\frac{1}{2}$-$3\frac{1}{2}$, Cape 1881 1, to 100-2, Ceylon $4\frac{1}{2}$ p.c. 1, to 102-4, N. Zealand 4 p.c. 1, to 101-3, Canada (Dom.) 4 p.c. Loan $\frac{1}{2}$, to $102\frac{1}{2}$-$3\frac{1}{2}$, do. $3\frac{1}{2}$ p.c. Stk. $\frac{1}{2}$, to $100\frac{1}{2}$-$1\frac{1}{2}$, do. Scrip $\frac{1}{2}$, to $50\frac{1}{2}$-$1\frac{1}{2}$, W. Australia 4 p.c. 1934 1, to 108-10, do. $3\frac{1}{2}$ p.c. 1920-35 $\frac{1}{2}$, to $97\frac{1}{2}$-$8\frac{1}{4}$. **Fall:** W. Australia 1915-35 $\frac{1}{2}$, to $86\frac{1}{2}$-$7\frac{1}{2}$

COLONIAL AND FOREIGN CORPORATION STOCKS.—Rise: Invercargill 1, to 100-2, Launceston 1, to 100-2, Melbne. and Met. Bd. of Wks. 1, to 100-2, Pt. Louis 1, to 103-5. **Fall:** Rio de Jan. (Fed.) 1, to 87-9, Tokyo (C.) 1, to 95-6.

FOREIGN STOCKS, BONDS, &c.—Rise: Argentine 5 p.c. Intern. $\frac{1}{4}$, to $98\frac{1}{2}$-$\frac{3}{4}$, Brazilian Gd. 1879 $\frac{1}{2}$, to 86-7, Chilian 1889 1, to 86-8, Egyptian Ins. Stk. 1, to 93-5, Russian 1859 $\frac{1}{2}$, to 64-6, Siamese Stlg. 1, to $94\frac{1}{2}$-$5\frac{1}{2}$. **Fall:** Argentine 4 p.c. 1897-8-9-1900 and Laws all $\frac{1}{2}$, to $84\frac{1}{2}$-5, Brazilian 1889 $\frac{1}{2}$, to $82\frac{1}{2}$-$\frac{3}{4}$, do. W. of M. Rly. $\frac{1}{2}$, to 94-5, do. 1903 Ln. $\frac{1}{2}$, to $97\frac{1}{2}$-$8\frac{1}{2}$, Colombian Con. $\frac{1}{2}$, to 43-4, Costa Rica "B" 1, to 29-31, Greek 1889 Rnts. $\frac{1}{2}$, to 27-8, Honduras 1867-70 $\frac{1}{2}$, to $7\frac{3}{4}$-$8\frac{1}{2}$, Japan 5 p.c. Bds. $\frac{1}{2}$, to 97-$\frac{1}{2}$, do. $4\frac{1}{2}$ p.c. $\frac{1}{2}$, to $88\frac{3}{4}$-$9\frac{1}{2}$, do. 1907 Stlg. $\frac{1}{2}$, to 97-$\frac{1}{2}$, Russian Ser. I. $\frac{1}{2}$, to $82\frac{1}{2}$-$3\frac{1}{2}$, do. 1906 Ln. $\frac{1}{2}$, to $94\frac{1}{2}$-5, Siamese $4\frac{1}{2}$ p.c. 1907 $\frac{1}{2}$, to $93\frac{1}{2}$-$4\frac{1}{2}$.

HOME RAILWAYS.—Rise: Caledonian Pfd. $\frac{1}{2}$, to $64\frac{1}{2}$-$5\frac{1}{2}$, Gt. N. and Picc. $\frac{1}{2}$, to 6-7. **Fall:** Glas. and S.-W. Dfd. $\frac{1}{2}$, to $29\frac{1}{2}$-$30\frac{1}{2}$, Gt. Nthrn. "A" $\frac{1}{2}$, to $38\frac{1}{2}$-$9\frac{1}{2}$, Barnsley $\frac{1}{2}$, to 46-$\frac{1}{2}$, S. Wstrn. Pfd. 1, to 97-9, N. Lon. 1, to 75-80, N. Staffs. 1, to 90-2, S. Estrn. Pfd. 1, to 102-4, Taff Vale $\frac{1}{2}$, to $76\frac{1}{2}$-$7\frac{1}{2}$.

Leased.—Rise: Shrews. and Hereford 1, to 167-71.

Debenture.—Fall: Cambrian "A" 1, to 92-7, do. "B" 1, to 88-91, Rhondda and Swansea 2, to 104-7.

Guaranteed.—Fall: Gt. N of Scot. 2, to 100-2.

Preference.—Rise: Metropolitan Conv. 1, to 73-6, Taff Vale 1900 1, to 104-7. **Fall:** Barry Cons. 1, to 103-6, Gt. Centl. 1881 5, to 100-5, do. 1891 2, to 52-7, do. 1894 3, to 40-5, Gt. Estrn. 4 p.c. 1, to 106-9, Gt. N. of Scot. "B" $1\frac{1}{2}$, to 94-6, Brighton 2nd 1, to 73-5, Neath and B. 2, to 45-8.

INDIAN RAILWAYS.—Rise: Shahdara (Delhi) 1, to 95-9, S. Punjab Ord. 1, to 128-30. **Fall:** Burma 3 p.c. 1, to 86-8, E. Indian "A" $\frac{1}{2}$, to $19\frac{3}{4}$-$20\frac{3}{4}$, do. "C" $\frac{1}{2}$, to $22\frac{1}{2}$-$3\frac{1}{2}$, do. "B" $\frac{1}{2}$, to $24\frac{1}{2}$-$5\frac{1}{2}$, E. Bengal "B" $\frac{1}{2}$, to 24-5, W. of I. Portuguese Deb. 1, to 102-6.

COLONIAL RAILWAYS.—Rise: Temiscouata both iss. 1, to 33-6. **Fall:** Canadian N. 4 p.c. Perp. Con. Deb. $\frac{1}{2}$, to 94-6, Quebec 7 p.c. Inc. 7, to 110-2.

AMERICAN RAILROAD.—Rise: Atchison Pfd. $\frac{1}{2}$, to 89-90, Erie 1st Pfd. $\frac{1}{2}$, to $34\frac{1}{2}$-$5\frac{1}{2}$, do. 2nd $1\frac{1}{2}$, to 24-6, Missouri Pfd. 1, to 60-2. **Fall:** Mex. Cent. 1, to $16\frac{1}{2}$-$7\frac{1}{2}$, Nat of Mex. 4 p.c. 1, to $49\frac{1}{2}$-$50\frac{1}{2}$, do. 5 p.c. 2, to 17-8, Rock Island 1, to $14\frac{1}{2}$-$5\frac{1}{2}$, Southern Pfd. 1, to 40-1, Wabash Pfd. $\frac{1}{2}$, to 18-9.

Bonds (Currency).—Fall: Allegheny V. 2, to 105-9, Mex. Cent. 2, to $16\frac{1}{2}$-$7\frac{1}{2}$.

Bonds (Gold).—Rise: Allegheny V. $1\frac{1}{2}$, to 100-3, Atchison 50 yr. 4 p.c. Conv. 1, to 90-2, do 10 yr. 5 p.c. Conv. 2, to 101-2, Baltimore 1925 1, to 94-6, Cent. Pac. 1949 1, to 97-9, Erie Prior Ln. 1, to 86-8, do. Gen. Ln. $4\frac{1}{2}$, to 72-5, do. 4 p.c. Underground Electric Railways Profit-Sharing Notes.

The directors of this company now announce a scheme for dealing with its financial position. As everybody knows that position is by no means roseate at the present time, and we are not surprised that the difficulty of the problem the board had to deal with has prevented an earlier publication of the proposals now made. Indeed, without the help of Messrs. Speyer Brothers, of London, Messrs. Speyer and Co., of New York, and Mr. Speyer-Ellissen, of Frankfurt-on-Maine, no scheme in the least degree acceptable could have been formulated at the present time. Thanks to the courage and, it should be added, magnanimity of these firms, an amount up to £300,000 is to be found if necessary in order to make the scheme workable to give it a start and a chance. But what is the scheme? It first of all provides for an issue of £1,000,000 in 5 per cent. prior lien bonds to bearer, repayable November 1, 1920. Then comes £3,000,000 of 4½ per cent. bonds to bearer due January 1, 1933, but redeemable at par in whole or in part at the company's option any time after six months' notice given. Finally there is to be an issue of £5,200,000 in 6 per cent. income bonds to bearer due January 1, 1948, but redeemable at any time on the same terms as the 4½ per cents. Holders of the sterling 5 per cent. profit-sharing secured notes to the amount of £3,599,268 will receive £1,439,707 in 4½ per cent. and £2,519,488 in the income bonds. In like manner holders of $16,550,000 of 5 per cent. profit-sharing secured notes, or £3,310,000, are to get £1,360,293 in the 4½ per cent. and £2,330,512 in the income bonds, while £200,000 in the 4½ per cent. and £300,000 in the income bonds are to be reserved for a special interest fund. The key of the arrangement, however, lies in the £1,000,000 of 5 per cent. prior lien bonds which have been underwritten by Messrs. Speyer and their friends, and the proceeds of these bonds, which will be offered in the first instance to the noteholders and shareholders at the price of 93 per cent., will immediately be devoted to the unfulfilled capital requirements of the various properties possessed by the company. To tide it over the intervening time until the revenue of the various Tubes rises sufficiently to make them independent of assistance, Messrs. Speyer and their friends have undertaken to provide the interest for the first few years on the 4½ per cent. issue in order that the noteholders may not suffer. "Beginning with January 1, 1909, the Speyer group will buy at par such an amount of 4½ per cent. bonds and income bonds at the price and rate of £300 and accrued interest on the 4½ per cent. bonds for £200 nominal of these bonds and £300 nominal of income bonds taken together as will make good any deficiency in the full interest for the preceding half-year on the 4½ per cent. bonds which the revenues of the company to the close of such half-year remaining after making or providing for all payments on revenue account, except interest on the income bonds, for the same half-year, but before providing for reserve, are insufficient to meet." The wording of this clause is involved but its meaning is sufficiently clear, and one can have little doubt from the way the traffic of the Underground lines is developing that the £300,000, which is the maximum amount of the guarantee thus given, should be sufficient to allow time for the nett revenues to grow large enough to cover both the prior lien and these 4½ per cent. bonds with perhaps something over. We hope therefore that noteholders will lose no time in depositing their securities with the banks named in the advertisement, viz., the London and Westminster here, the Guaranty Trust Company in New York, the Associatie Cassa of Amsterdam, and Mr. Lazard Speyer-Ellissen as agent for the London and Westminster in Frankfurt-on-Maine.

Since the above was written an explanatory memorandum has come to hand throwing further light upon the position and providing some encouraging facts much needed where results thus far so disappointing have had to be put up with. After mentioning that the development of the District Company's traffic has been much less rapid than anticipated, and that the Tubes were much more difficult to construct and took a longer time than was originally estimated, the memorandum goes on to speak hopefully of their traffic results and prospects. On the "Bakerloo" Tube, for instance, the first twelve weeks of this year has given a revenue per route mile of £728 per week, or about 13 per cent. more than in the same period of last year. Still better is the progress made by the Great Northern, Piccadilly and Brompton, whose receipts for the first twelve weeks of this year show an increase of about 37½ per cent. and amount to £584 per route mile per week. No comparison can be made in the case of the Charing Cross, Euston and Hampstead Tube because it was only opened for traffic in June last year, but for the same period of 1908, as in the other instances, it has been earning gross £403 per route mile per week. A less satisfactory display is made by the District Railway Company, miserable laggard that it is, but even it shows an increase of about 12 per cent. in the weekly receipts, which have amounted to £372 per route mile per week. No progress, however, is shown for the present by the London United Tramways Company, whose receipts have fallen to about £93 per route mile per week, a decline of 11 per cent. compared with the corresponding twelve weeks of 1907, but it is explained that the company has been suffering from exceedingly bad weather, and that a large section of its lines opened in 1907 has not yet had time to develop. As to the financial position, the memorandum explains that the untoward state of the Money markets of the world has compelled the Underground Company, not only to call up its £5,000,000 of share capital, but also to raise on the security of various assets about £2,275,000 in addition to £7,000,000 in notes, and there are over and above other outstanding commitments for construction work, &c., amounting to about £650,000. This explains the need for the prior lien bond above mentioned, and in regard to that and the other new securities to be created under the scheme it may be mentioned that the company will deposit and pledge an additional £3,500,000 nominal of Tube shares together with the equity of the Power House with the London and Westminster Bank as the trustee for the noteholders.

Continental Memoranda.

Speculation does not get under way on the Continent any more than here. One day Bourses are firm and the next day those who bought before the rise endeavour to snatch their profits, depressing markets in the process. From Paris the political clouds seem to have passed away for the moment and there is much less talk about Morocco or about the near East, where no sign of agreement amongst the Powers is yet visible. For all that the oppressive feeling remains that all is not well beneath the surface. The income-tax also still threatens, and in Paris the definite announcement of a rupture between the De Beers and the Premier diamond mining companies has had a bad effect on the entire market. The directors of the Premier company have sent a circular to its clients announcing that from May 1 it will undertake the independent sale of its stones as the arrangements between the company and the De Beers company have been definitely broken off. This news led representatives of the Amsterdam and Antwerp diamond-cutting houses and of the Union of Parisian Jewellers to hold a conference in Antwerp, at which it was decided to send a

deputation to London to try and get the agreement re-established. Another proposition has been put forward to the effect that the whole of the mines should shut down absolutely for six months, but that would be the solution of despair. The truth is this trade has been kept on a wholly unreal foundation by the agreement now about to elapse. Prices have been raised and held far above the scale they would have fallen to if the large production of stones had been allowed to exercise its natural effect, and the consequence of sustaining the market at an excessive range of prices has been to accumulate stocks in the hands of intermediaries of all grades to an unexampled extent. No wonder therefore that the diamond cutters and wholesale jewellers are in a state of nervous dread as to what will happen when the fetters are taken off. They see ruin staring them in the face, because they bought at the excessive prices and see no chance of disposing of their large stocks except at a tremendous loss.

Some interesting facts are forthcoming about the tobacco and match monopolies in France. It seems that as regards matches there was a large increase in consumption last year causing an increase of 5 per cent. in the harvest reaped by the Treasury from this monopoly, which altogether brought in over £11,000,000 to the Treasury in 1907. The tobacco monopoly is also highly profitable, the total receipts from the weed having been almost £20,000,000 in the past year. This represents a consumption of 12.66 francs per head, of which the Treasury get no less than 11.66 francs or 92 per cent. The quality of the tobacco generally consumed must be poor indeed when the State reaps such a harvest from its consumption.

Some figures have been made public relative to the scale of wages in France, M. Perrin having examined the facts since 1870. He arrives at the conclusion that in 1874 the average daily pay of the French workman was 3.02 francs, and in 1901 this had risen to 4.02 francs, and in 1906 to 4.20 francs. Since 1870 the same calculator says the cost of living has increased by 20 per cent., while the wages have gone up by 40 per cent. For all that the French workman is paid on a scale lower than that prevailing either in the United States or England, but his wages are higher than those of German or Belgian workmen. Pay advanced most rapidly between 1872 and 1893, during which period there was only an average of 60 strikes per annum in France, whereas between 1893 and 1905 the annual average rose to 600 strikes, and, oddly enough, where the workpeople are best paid the strikes are most frequent. This would seem to indicate that the better off a man is the more discontented he grows, and there is, no doubt, truth in that.

An interesting table has been published, which reveals the extent to which Russia has been calling upon foreigners for capital during the last 15 or 16 years. In 1892 £21,000,000 of Russian debt was absorbed at home, and only about £3,300,000 sold abroad, or 13½ per cent. In 1898, however, the proportion sold abroad rose to 22.4 per cent., or about £6,150,000 against £22,000,000 of public debt absorbed at home, and by 1900 the relative figures had become £15,320,000 at home and £11,400,000 abroad, 42.6 per cent. of the total emissions having been sent out of the country. It was worse still in 1905, when against £16,000,000 sold at home £15,000,000 was exported or 48 per cent., and in 1906 the home consumption of Government obligations was little more than half the total of the issues; that is to say £18,600,000 was sold in Russia and about £17,100,000 sent abroad, or 47.8 per cent. This table shows that not only the new loans but even the older ones which were at first taken up in Russia itself have dribbled away to foreign countries, and that the export was specially formidable between 1898 and 1904. To all appearance this tendency promises to become more pronounced still in the near future, because of the backward condition of Russia and the enormous magnitude of the public expenditure. In fact, the amount of foreign debt held abroad is probably at the present time quite half, if not considerably beyond half, the total obligations of the empire, and it is because of these excessive commitments of investors in Western Europe in the fortunes of the Russian Empire that all Bourses are so sensitive about any rumour pointing to a fresh Russian loan. Even the Paris Bourse was sensibly depressed last week by a report that the Austrian portion of the 5 per cent. Russian loan of 1906 which was kept back is now about to be thrown upon the market. It amounts to £6,760,000, and the mere rumour sent the price of the issued portions in Vienna 2 per cent. below the Paris price.

Germany is not showing any enthusiasm in subscribing for the loans, amounting to £32,500,000, offered by the Imperial and Prussian Governments. The highest estimate of subscriptions current on Monday was £38,000,000 or £5,500,000 more than the amount wanted, and it is pointed out that twelve months ago, when the German and Prussian Governments resumed the issue of 4 per cents. with an offer of £15,000,000 in Treasury bonds, there was such a rush after the new security that subscriptions for nearly £675,000,000 were received. Other guessers say the loan has been applied for twice over, but nobody knows. An unfamiliar reticence is displayed by the authorities, and we shall be in no way surprised to hear that the issue has been a dead failure so far as the real investor is concerned. Report says that the response has been poor from France and England, though it describes the demands from other parts of the Continent as "full," but there is very little trace of enthusiasm either at home or anywhere abroad. The price is too high for the stags, and the banks and moneyed class have already too much nursing on hand.

For a day or so German Bourses were happy over the passing of the new Bourse law. That is to say the markets for the sale of public securities were inclined to rejoice, while the produce markets swore more horribly than the English in Flanders. The reason for this divergence of sentiment lies in the fact that the Agrarian, Anti-Semite and Socialist parties have combined to put additional fetters upon the Produce Bourses, while liberating the Stock markets. Not only will produce brokers be still debarred, as they have been for the past 10 years or so, from dealing in futures, but they will be subjected to heavier fines for breaches of the law. The anomaly is thus seen of greater liberty to gamble on the Stock Exchanges and an additionally rigid restriction of dealings in all agricultural produce. The motive for the distinction is simple enough. No Agrarian cares a copper groschen for what takes place on Stock Exchanges, but his narrow mind is possessed by the idea that if speculators are allowed to play with cereals, prices may be depressed to the injury of the landlords. However, German Stock markets were happier for a day or two, reckoning upon an immediate revival of the gambling spirit. It did not revive with the speed or to the extent expected, showed no signs of reviving in any form, so the the next day markets became sad again.

Failures are still too numerous in Germany, and some of the earlier suspensions are being compounded on terms by no means calculated to feed the hope that the great banks will escape without having to write off severe losses before all is over, and as a writer in *Le Globe*, who has been contributing some very pungent and able articles on German finance to that Paris journal, points out, the banks are in this difficulty, that they are to a large extent shareholders in the undertakings whose paper they discount. Many people, the writer says in his latest article, thought that Germany was to make a firework display of ruin after the Yankee fashion. That has not come, but the trouble is by no means over within the Empire, and that the losses already incurred had made considerable inroads upon banking profits up to the end of 1907 is shown by contrasted dividend payments. Of seven important banks cited only two, the Deutsche and the Disconto Gesellschaft, maintained their dividends, the one at 12 and the other at 9 per cent. for both years. The

Dresdner and Schaaffhausen Banks knocked 1½ per cent. off their distribution, the Darmstadt Bank paid 1 per cent. less, the National Bank 1½ per cent. less and the Commercial and Discount Bank 1 per cent. less, the total amount represented by these reductions being about £550,000, or more than 10 per cent. of their profits. What is the reason, the writer goes on to ask, for this reduction? It certainly does not lie in the purely banking operations, because the necessity for capital was greater than ever in 1907 and discount rates higher than for years. The source of the reduction must therefore be sought in the finance business done, and an illustrative table is given in proof which shows that every one of these banks had to restrict its company promoting and loan underwriting operations in the past year, while the ordinary banking profits showed an increase in every instance where figures are obtainable. The losses or diminished profits in finance business in all instances except that of the Deutsche Bank more than wiped out the additional profit of the banking business.

Company Reports and Balance Sheets.

**** *The Editors will be much obliged to Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-sheets direct to the Office of the* Investors' Review, *Norfolk House, Norfolk Street, W.C., so as to ensure prompt notice in these columns*

BUENOS AYRES GREAT SOUTHERN RAILWAY COMPANY.

An interim report of this great Argentine railroad covers the half-year ended December 31 last, and discloses a better revenue position than at one time seemed probable. Gross receipts came to £1,897,209 or £48,315 less, but working expenses at £1,070,914 were down £51,722, so that there was really an increase of £3,407 in the nett revenue, which amounted to £826,295, exclusive of the balance of £173,590 brought forward from June, and of interest received amounting to £26,433. Altogether £1,026,319 was available to distribute, from which debenture interest, preference stock dividends and interest at the rate of 4 per cent. per annum on the 1910 Extension shares, together with the rent of various tributaries, and income-tax swept away £469,722, leaving £556,596 for the ordinary stock. Out of this the directors have decided to pay an interim dividend at the rate of 6 per cent. per annum, leaving £106,596 to be carried forward or £33,000 less than was brought in. As readers interested in Argentine affairs know, the maize crop of the 1906-7 season was a poor one, and led to a reduction of £48,315 in the receipts from the carriage of cereals, but the passenger traffic rose by 23.64 per cent. in number and 7.96 per cent. in yield, and although the goods traffic fell off by 17.42 per cent. in weight and nearly 12 per cent. in receipts, there was here also compensation to be found in the carriage of animals, which rose 28.92 per cent. in number and yielded 27.55 per cent. more in money, so that if one thing fails another comes in to help, and the half-year's exhibit was good on the whole. The new season's wheat crop is not so large as expected, but considerably better than last year's, and the traffic receipts for the 40 weeks of the year elapsed to April 5 are nearly £161,000 better than in the corresponding period. The board has decided to adopt as from July 1 next the Mitré National Railway Law, and by doing this becomes obliged to pay the Government 3 per cent. of the nett revenue to be placed to the credit of a special fund for the construction and improvement of roads and bridges giving access to the company's stations. There should be no loss at all caused by that addition to the fixed charges. Working charges, by the way, amounted to only 56.54 per cent. of the gross receipts, compared with 57.70 per cent. a year ago.

GREAT WESTERN OF BRAZIL RAILWAY CO., LIMITED.

Gross receipts for the year ended December 31 fell off by £48,165 to £432,458 owing mainly to the partial failure of the sugar crop in most of the districts served by the line. The season was one of severe drought, and as the very limited rainfall came too late to benefit the growing canes the crop in some sections was the smallest known in the history of the company. Entries of this commodity were further reduced by owners holding back for better prices on the advice of the "Sugar Trust," with the result that the tonnage carried dropped by 71,048 tons and the receipts were £33,551 lower. Maize also suffered from the drought, and showed decreases of 25,026 tons in weight and £12,872 in receipts, and sundries, including construction materials, yielded £9,071 less. A small reduction of 602 tons in cotton, however, was accompanied by an increase of £4,695 in revenue, cotton seed rose by 8,282 tons and £1,920 and wheat flour was £5,268 up on an increase of 8,505 tons. The total goods traffic came to 120,313 tons less at 669,681 tons, yielding £284,983 or a decrease of £40,497, and sundry receipts were £1,510 lower at £5,729, but passenger traffic was practically stationary and live stock showed a small increase, although the extension to Campina Grande was not opened in time to add much to the revenue. Working expenses were reduced by £33,506 to £290,352, a saving which is ascribed to the consolidation of the various parts of the system. Of this saving no less than £17,405 was in maintenance of permanent way and works and telegraphs, reductions of £6,315 being shown in road charges, £2,204 in company's properties and offices and £973 in station buildings, while no provision was made for renewals and betterments against £7,500 a year ago. Similar omissions likewise account for the greater part of the decreases under the heads of locomotive and rolling stock maintenance, £3,750, £1,200 and £2,500 respectively having been charged in 1906. Locomotive running expenses took £2,130 more, but traffic expenses were £2,319 down and administration and general charges came to £721 less. Nett revenue amounted to £142,106 compared with £156,765, but with small increases in the balance brought forward and receipts from interest the disposable total was only £14,382 smaller at £165,734. Payments to the Brazilian Government in accordance with the terms of lease contract were reduced by £2,244 to £22,209, but debenture interest took an extra £4,510 at £53,060 and £3,781 was absorbed by interest on the amount called up on the ordinary shares issued during the year. The balance remaining was £86,683 compared with £107,113, but by cutting down the contribution to amortisation fund by £1,000 to £4,000 and ignoring the reserve, which last year got £20,000, the dividends on the preferred and ordinary shares are maintained at 6 per cent. and £22,683 or £570 more is carried forward. Expenditure on capital account for the year amounted to £153,567, of which £75,213 was on the Campina Grande extension, £15,468 on the Pesqueira extension, £38,852 on linking up the Northern and Southern sections and £12,812 on general improvements. The total outlay is now £1,968,595, but the company issued £250,000 in ordinary shares and £52,200 in 5 per cent. debentures, and there is now a credit balance on this account of £267,167.

CREDIT LYONNAIS.

The year 1907 seems to have been remarkably prosperous in the circumstances for this great French bank, whose tentacles reach to almost all the ends of the earth. We gather this not so much from the fact that the administration was again able to distribute a dividend of 11 per cent. on the paid-up capital of £10,000,000, but from the cheerful assurances made by the managers in their report to the shareholders. They say that thanks to the prudence with which the affairs of the bank are always conducted, it has suffered comparatively little from the crisis in the United States or from financial troubles elsewhere. Its banking engagements have not resulted in any appreciable loss, the figure of bad debts being trivial, "of minor importance." Perhaps the very extent of the bank's connections helps it, for it has branches not only all over France, but in London and in Turkey, Russia, Egypt and Spain. For all that, although the profits of the past year amounted to £1,364,425, some of the principal items in the balance-sheet do show a reduction compared with the figures of December 31, 1906. Thus deposits, including current accounts, are down from £70,438,000 to £62,161,000, and acceptances have fallen from £6,774,000 to £5,228,000. Cash in hand is also fully £620,000 lower at £6,002,000, and bills receivable have receded by £1,717,000 to £22,738,000, but perhaps the most significant reduction of all is in the loans against securities and contangoes which have dropped from £19,701,000 at the end of 1906 to £11,886,000 at the end of last year. These changes to some extent balance and probably help to account for each other, and it is doubtless the result of careful supervision that the commitments of the Stock Exchange should be so materially reduced. Large expenditure on extensions and improvements has been going on in Lyons and other offices of the banks, the whole of which were paid for last year out of current revenue, so that the entry in the balance-sheet against bank property remains unchanged at £1,400,000. The total of the balance-sheet, it may be added, is £86,210,000.

LONDON BANK OF MEXICO AND SOUTH AMERICA, LIMITED.

The results from Mexico, Argentina and Peru during the year ended December 31 showed an improvement over those of 1906, but progress in Cuba has been slow, and the Banco de la Havana, which this bank helped to create, has not yet become a dividend-paying concern. An interest was acquired as from July 1 in the Banco Agricola Commercial in the Republic of Salvador, the returns from which for the six months were quite satisfactory. In one way and another the gross profits were increased by £5,834 to £73,587 and with £21,534 or £4,056 more brought forward the available total was £9,890 up at £95,121. General charges in London only took an extra £248 at £14,695, and £1,000 is again put to benevolent fund, so the directors are able to transfer £10,000 to reserve and maintain the dividend at 10 per cent., with a very small reduction to £21,426 in the sum carried to the new account. Current accounts and other liabilities have been reduced by £14,722 to £217,840, but liabilities on bills payable show a big advance of £237,350 at £760,071. Against these cash at bankers and short notice comes to £26,466 less at £89,904, but investments in banks have risen by £37,500 to £302,500, investments in London stand at £276,737 or £39,006 more, bills receivable are £12,885 higher at £245,821, and loans and advances have increased by £166,694 to £838,973.

ALLIANCE ASSURANCE COMPANY.

It is quite an interesting exercise going through the report of this company now, for it not only does life, fire, marine, accident and burglary business, but its acquisition of the Provident and Imperial Life companies has considerably extended the scope of the life branch. A summary of the accounts for the past year, however, can be given in small compass. The total life premium income, including the Imperial and Provident figures, was £860,560, and the income from investments came to £472,072, besides which the company received £35,877 in

capital paid in for annuities granted and some small other receipts, making the total income of the life department about £1,378,000. Out of this claims by death and maturity of contract absorbed £577,730, and commission and expenses a little over £113,455 or about 13.13 per cent. of the premium income, and at the end of the year the aggregate life funds were increased by £395,000 to £12,035,602. In the fire department the nett premium income amounted to £1,352,679 and the losses and expenses to £1,082,277, leaving a surplus of £270,402 to be carried to profit and loss as the gains of this branch for the year. This is exclusive of the interest income from funds belonging to the proprietors, which produced £155,589 nett in addition. The percentage of losses to premium income in the fire department was 42.64 per cent. and of expenses 37.32 per cent. The marine account also shows a profit or surplus of £20,427, which is carried to the credit of profit and loss, the premium income having been £166,027 and the losses and expenses and commission together about £146,000, the marine fund of £416,760 remaining unchanged. In the leasehold investment and general branch the accumulated fund was increased by £41,695 during the year to £434,730, and a considerable business was done in the accident and burglary departments, although they have only been in existence for nine months of the year. The premium income amounted to £61,655, and after deducting losses, commission and expenses there is a surplus, including interest on the portion of the fund relating to employers' liability insurances, of £32,291. Altogether the various funds and accumulations of the company, including a paid-up capital of £1,000,000, amounted at the end of the year to £16,902,758. Coming to profit and loss the directors are able to pay a dividend to the proprietors of 10s. per share, of which 4s. was paid in January last, leaving 6s. to be distributed at July next. This dividend takes £350,000, and in view of the depreciation of investments the board has applied £200,085 in writing them down to the market value of December 31 last. Income-tax also deducted, £1,900 written off the cost of premises and £12,393 transferred to the fire account, and after all the credit balance of £580,879 brought forward has only been reduced by £122,350 to £458,629, a very comfortable state of affairs.

THE EQUITABLE LIFE ASSURANCE SOCIETY.

In 1907 the new business done by this old mutual office brought £8,978 nett in new premiums, including £736 received in single premiums. Also £13,329 was received as capital handed in for annuities to the amount of £1,032 sold. The total income of the society from premiums was £189,933 and from interest and dividends £175,531, or over £365,000 in all, excluding the capital received from annuities. Claims with bonus additions took £258,390, including £22,953 of bonus additions previously surrendered. And so great is the profit earned on the sharing policies of the society that this large total accrued upon policies originally insuring only £125,000. Thus every £1,000 of original insurance had been increased by £2,067 on the average, or more than twice the original sum. As usual, an interesting table accompanies the report giving some analysis of the remarkable distribution of these profits, and it shows two cases where the amount assured and bonuses declared exceeded four times the original sum assured. Fourteen cases are given where the combined payment exceeded three times but did not equal four times the original assurance, and 26 cases where the sum paid was more than twice the original sum assured. The table is an interesting one and quite instructive, a document, in fact, that in the hands of a pushing institution would cause business to flow in much faster than the quiet, careful habits of the Equitable would tolerate. Expenses of management came to £12,638 or only 6.65 per cent. of the premium income and 3.31 per cent. of the total income. At the end of the year the life funds were increased by £77,411 to £4,987,757, the greater part of which is invested in mortgages, loans on rates and on the society's policies within the surrender value, these three divisions together accounting for about £2,643,000 of the whole.

CLAYTON AND SHUTTLEWORTH, LIMITED.

A lamentable report, indeed, is that produced by the directors of this company for the year 1907. The balance of the earnings on trading account after charging general expenses and making unspecified provision for bad and doubtful debts and contingencies was only £41,052 for that period, or £68,950 less than the profit of the year before. All the explanation offered by the directors for this terrible collapse is that the insurrection in Roumania and the failure of the harvest there and in other districts resulted in a serious reduction in the company's sales, but the accounts are in other ways not particularly satisfactory, and the directors are quite unable to pay any dividend on the ordinary shares, for after meeting debt interest and preference charges there was only £3,884 left to be carried forward. In the previous year £14,506 was written off for debenture issue expenses and £5,000 put to reserve, after paying a dividend of 6 per cent. on the ordinary shares. Depreciation, however, is allowed for on a slightly more liberal scale, taking £1,476 more at £18,435, and unfortunately interest on debenture stock and on a loan received from Mr. Shuttleworth took £3,510 more at £32,306. The company owes Mr. Alfred Shuttleworth rather less at £97,641, and owes its bankers rather more than £10,000, the total amount showing an increase of £6,741 on the year before. Otherwise the items on the liabilities side of the balance-sheet offer no ground for special criticism, but on the asset side the additions to the freehold land and buildings at Lincoln, Vienna, Pesth, Krajova, and Bucharest amounted to £4,334 last year and only £2,675 was written off for depreciation. The entry, however, was also brought down by another £2,369, being the price of land sold, so that altogether the valuation of £359,678 is down just £2,115 on the year. The book valuation of plant, machinery, &c., &c., at the various branches of the company at home and abroad also shows a reduction of £2,707, £15,760 having been written off for the year as compared with £13,053 of additional expenditure, and sundry debtors are £74,469 less at £576,345, but the item is still a very heavy one, and equally burdensome seems to be the stock of materials and manufactured goods, which is £50,458 higher at £494,284. Cash, however, is less by £15,021 at £46,096, but there is no change in the item investments at cost or market value at December 31 last, which remains at £26,280. The company has now a debenture debt of £650,000, which is plainly far more than is good for it, taking one year's chances with another.

YATIYANTOTA, CEYLON, TEA CO., LIMITED.

A further falling off in the yield from 487 acres of old tea which has been closely planted up in rubber was almost counterbalanced by the crop from 108 acres which came into bearing, and the total outturn was only 3,074 lbs. smaller at 1,576,756 lbs. Production from purchased leaf, however, dropped by 13,310 lbs. to 2,678 lbs. The average realised was 1.06d. better at 6.13d., while expenditure rose by only 0.13d. to 4.08d., the enhanced cost being principally due to extra weeding. Owing to the original bark on the 4,636 old rubber trees tapped having been used up, it was deemed advisable when operating on renewed bark to treat the trees leniently, and the crop consequently amounted to 5,870 lbs. against 8,790 lbs., and on this the nett average obtained was 1s. 9d. smaller at 3s. 7d. per lb., while the cost rose by ¾d. to 1s. 8¼d. Gross revenue from all sources was therefore only £4,726 up at £41,479, and with £2,568 or £275 more brought in the nett profits came to £15,207 compared with £10,768. Out of this the directors put £1,000 to a general reserve, in addition to writing off the customary £1,000 for depreciation, and then increased the dividend from 5 per cent. to 9, leaving a slightly reduced balance of £2,407 to be carried forward. Outlay on capital account exceeded the depreciation allowance by £414, a sum of £336 having been spent on the purchase of 97¼ acres of land, and it is due to this and to a heavy increase of £862 at £8,739 in coast advances that the directors have deemed it advisable to commence the above-mentioned reserve. Something of the kind, however, was badly needed, as with a block account of £174,649 the company had no reserves beyond the £45,000 received from premiums in byegone days. Sundry creditors and bills payable are £1,730 higher at £6,964, while produce in hand and tea sold but not delivered is up to £10,369, but cash shows a decrease of £2,441 at £2,147.

EASTERN PRODUCE AND ESTATES CO., LIMITED.

With 358 acres less at 10,754 acres under tea this company's crop for 1907 increased by 74,612 lbs. to 4,572,150 lbs., while the average price rose by 0.45d. to 7.66d. per lb. The yield of rubber was 14,970 lbs. larger at 37,528 lbs. and although it realised 1s. 3d. per lb. less at 4s. 2d. per lb., the income from all sources showed an improvement of £21,811 at £164,907. Adding £4,155 or £1,654 more brought forward, the total was £23,465 up at £169,062, but outgoings on the estate were £5,221 heavier at £113,431 and London office charges and income-tax took an extra £1,737 at £10,728, and as there was a decrease from £33,821 to £32,534 in value of produce on hand the disposable surplus was only £9,092 up at £43,616. Of this £5,000 is again put to reserve, but the directors further appropriate £2,000 as a reserve against coolie advances and £3,000 in reduction of outlay on rubber, after which they raise the dividend by another 1 per cent. to 8½ and carry forward £4,968 or £813 more. Including £11,724 spent on rubber, the expenditure on the property is £4,549 up at £368,204, while the £4,554 written off buildings and machinery exceeds the outlay for the year by £145 only, leaving the item at £20,083, and against these the reserve will now stand at £45,000, of which, however, no more than £8,098 is separately invested. Liabilities to sundry creditors and on bills payable, although £24,556 down, are still decidedly heavy at £44,738 compared with £24,130 to come in from sundry debtors, stocks are £1,287 smaller at £32,534, and advances against produce, &c., are £5,141 down at £15,123, but cash has risen by £2,674 to £9,870. Advances to coolies have been a big burden on the company for many years and as they now amount to £11,858 the commencement of a special reserve does not appear to have been commenced before it was needed.

NAHALMA TEA ESTATE CO., LIMITED.

Once again the directors have proved their inability to come within measurable distance of an accurate forecast of the crop from this company's estates, and their estimate for 1907 was even wider of the mark than usual. Instead of gathering 223,500 lbs. as expected, the outturn was only 177,249 lbs. or 18,100 lbs. below that of the previous year, and the excuse put forward is as thin as it could possibly be. The directors ascribe the deficiency to want of cultivation in previous years, owing to shortness of labour preventing pruning and manuring from being regularly carried out, but this state of affairs must have been perfectly well known at the time of making the estimate, and allowance should have been made for it. Owing to this heavy drop in quantity, the increase of 0.78d. to 5.89d. in the price brought an improvement of no more than £68 in the gross income at £4,355, but London sale charges, &c., were cut down in drastic fashion from £130 to £5, so that the nett receipts showed a gain of £191 at £4,350. Of this Ceylon expenditure

absorbed an extra £49 at £3,652, but London office charges took £92 less at £126, and after charging debenture interest and crediting £8 for interest, the loss on the year was only £59 against £301, making the debit balance to date £669. During the year another 18 months' arrears of debenture interest were paid off, but liabilities, including outstanding interest, are only £219 down at £1,035, and against these debtors owe £133 or £241 less and stocks have dropped by £167 to £683, while cash is £118 up at £233.

KELANI VALLEY TEA ASSOCIATION, LIMITED.

Gross profits for the year ended December 31 improved by £4,072 to £15,274 as the result of an increase of 36,331 lbs. to 565,404 lbs. in the crop and of the higher prices of 6.30d. and 37 cents realised in London and Ceylon respectively. Expenses only took an extra £203 at £10,983, general charges, interest, &c., were a trifle lighter at £1,293, and after deducting the debit of £286 brought in the amount available was £2,713. Out of this 18 months' dividends on the preference shares have been paid and the ordinary shares now get 7½ per cent., after which £638 is written off buildings and machinery, leaving £515 to be carried forward. During the year 117 trees were tapped for a yield of 133¾ lbs. of dry rubber, which realised an average of 3s. 5d. per lb. No great advance in this output is expected during the current year, but a considerable number of trees should be crop-producing in 1909. Estates account is unchanged at £28,545, but buildings and machinery will now stand at £10,500 and rubber extensions have gone up by £522 to £2,654. A call of £1 per share in the partly-paid shares increased the paid-up capital by £1,257 to £21,350, and the money appears to have been used to reduce floating indebtedness, as sundry creditors and bills payable are £2,422 down at £6,344. Against these stocks come to £2,837 or £1,280 more, debtors are £164 up at £180, and cash has risen by £293 to £1,027. Coast advances have been reduced by the substantial sum of £498, but are still too large for comfort at £1,004.

NEW SYLHET TEA ESTATES, LIMITED.

Extraordinarily good results were obtained by this company during the year ended December 31, and the directors rightly claim that they reaped the full benefit of the favourable market conditions. The average prices obtained rose from 4 annas 2½ pies to 6 annas 3½ pies, and with an increase of 54,735 lbs. to 907,787 lbs. in the crop the nett profits, including £239 brought forward, were no less than £10,021 up at £11,817. Of this £913 or £496 more is written off machinery and £2,000 is applied in reduction of extension account, and after meeting preference dividend the ordinary shares receive 15 per cent. against 4 per cent. a year ago and nil for 1905, leaving a larger balance of £497 to go forward. The directors state that the statistical position of tea still remains good, but as there has been a drop of 1d. per lb. since the company's last invoice was sold, it seems doubtful if the success just noted will be repeated, and under the circumstances it would have been better if they had contented themselves with a less sensational jump in the dividend, and had given some thought to the formation of a reserve. Nothing of the kind exists at present, and although the block account is £2,200 lower at £48,470, this is the first important reduction for some years. Still, the position of the company has undoubtedly improved very materially, a decrease of £2,997 to £722 in floating liabilities having been accompanied by an increase of £2,921 to £4,849 in cash.

BANDARAPOLA CEYLON CO., LIMITED.

The average yield per acre from this company's Bandarapola estate during 1907 increased by 118 lbs. to 719 lbs. and that from Gansarapola was 103 lbs. up at 473 lbs., the result being an increase in the total crop of 123,070 lbs. at 708,063 lbs. Tea made from bought leaf raised the total output to 736,745 lbs. or £128,974 more, and at the same time a substantial advance of 1.16d. at 5.89d. was secured in the average price. Nett profits including £498 brought forward were £4,286 better at £7,228, but instead of adding any part of this gain to the tiny reserve the directors seize the opportunity to double the dividend, making it 15 per cent., and after writing off £930 for half cost of new buildings and machinery they carry forward £698 or £200 more. Outlay on rubber for the year was £3,570, making a total of £11,466, for which the company now has 1,114 acres of rubber alone in addition to 730 acres of interplanted tea, and it is estimated that 5 to 10 per cent. of the trees on the 74 acres first planted will be tappable during the second half of the current year. Block account is unaltered at £33,688 and buildings and machinery are valued at £5,315 less the sum now written off, and against these the reserve is trifling at £2,000. A decrease of £1,059 to £2,633 in sundry debtors is more than neutralised by an advance of £2,200 to £6,200 in bills payable and on the other hand while stocks are £1,442 larger at £4,522 and sundry debtors have risen by £371 to £451, cash has dropped by £498 to £2,640 and investments are £500 down at £989. The position thus disclosed is far from strong, and the action of the directors in doubling the dividend would seem to have been very ill-advised, especially as the final instalment will absorb £3,764, which the company cannot spare.

BELL'S ASBESTOS CO., LIMITED.

Profits for the year ended December 31, including £49 from transfer fees, amounted to £29,606 showing an increase of £1,197 and steady and continued progress. After charging £1,611 for interest on mortgage and loan, £2,645 for renewals and additions to plant and machinery and £4,650 for fees and bonuses to directors and managing director there remains a surplus of £20,700, giving with £9,480 or £2,000 more brought forward a disposable sum of £30,180. The distribution is again at the rate of 15 per cent. for the year including a bonus of 2½ per cent. and the balance carried forward is increased by £2,700 to £12,180, no addition to reserve being considered necessary. Cash is sufficient at £13,124, but bills receivable are £11,634 down at £16,547 and debtors owe £8,169 less at £30,856. On the other hand, however, £21,813 less at £20,778 is due to creditors including a loan of £10,000 secured on premises at Greenwich and elsewhere. Stocks do not seem heavy at £52,776, plant, machinery, &c., is written down £1,612 to £13,403, freehold premises are a little lower at £18,633 and leasehold premises at Greenwich stand at £8,541 or £39 less. The holding of first mortgage notes on the Asbestos Estates in Canada redeemable over a period of four years have been paid off to the extent of £20,090, leaving £77,949 outstanding.

MINOR NOTICES OF COMPANY REPORTS.

Alliance Tea Company of Ceylon.—Not only did this company enjoy an increase of 194,334 lbs. to 1,304,784 lbs. in its crop for 1907, but it secured an advance of 0.62d. to 7.65d. in the price. The output of rubber was also larger by 2,185 lbs. at 3,840 lbs., realising a profit of £555 or £149 more, and the nett profits from all sources rose by £5,880 to £12,894. Adding £317 brought forward the disposable total was £5,826 up at £13,211, and after writing off £1,000 for depreciation as usual, an extra £1,000 at £2,500 is put to reserve, together with £1,900 to debenture redemption account. The dividend is then increased by 1 per cent. to 8, leaving a considerably larger balance of £2,484 to be carried out. Block account was increased by £11,563 to £125,059 mainly through the purchase of two estates in payment for which 974 £10 shares were issued at par, making the paid-up capital £75,000, while the reserves, including £4,632 from premiums, will now amount to £13,532. Creditors and bills payable are £1,771 down at £5,166 and against these debtors have risen by £1,288 to £1,897, produce in hand and in transit is valued at £8,287 and cash is £760 up at £2,799. A big increase of £332 is shown in coast advances, bringing them up to a total of £3,409, and we hope they will all prove good.

Chardwar Tea Company.—Prices for medium Assam teas such as this company produces were lower during the past season and the average realised dropped by 0.14d. to 7.82d. The crop, however, was 21,292 lbs. larger at 363,632 lbs. and gross proceeds were 495 up at £11,862, while nett profits, including £565 or £57 more brought in, rose by £470 to £1,635. It is so many years since anything was added to reserve that the directors appear to have forgotten its existence, and after raising the ordinary dividend from 3 per cent. to 5 they increase the sum carried forward by £270 to £835. Block account is £304 up at £17,021, and against this the reserve is £1,500, of which only £175 is separately invested. Sundry creditors, bills payable and factory wages unpaid have been reduced by £583 to £4,664, but the overdraft at the bank has risen by £1,169 to £1,671, and, on the other hand, increases of £282 to £1,377 in sundry debtors and £21 to £4,818 in stocks are accompanied by a drop of £102 to £58 in cash.

Golden Hope Rubber Estate.—During the past year 143 acres of the reserve land were planted with rubber making a total of 845 acres under cultivation. Some of the trees were planted as far back as 1898, but the crop last year was comparatively small at 4,615 lbs. dry of Para and 976 lbs. of Rambong. This sold at an average of 3s. 7⅜d. per lb. nett and produced £1,079, while rubber seeds and stumps brought in another £2,295, but the principal source of revenue was still the coffee crop, which amounted to 1,480 piculs and sold for £3,585. Including £48 from sundries and £82 from interest, &c., the total income was £7,089, of which estate expenditure took £3,305, and London office charges and income-tax £595. After writing off £16 for depreciation £3,174 was left, out of which a dividend of 6 per cent. is paid and the sum carried out is increased by £777 to £2,017. Purchase of property took £37,000 out of a capital of £40,000, and £4,590 has since been spent on the estate together with £265 on buildings and machinery. Debtors exceed creditors by £604 at £1,213, produce on hand is valued at £285 and cash comes to £1,498, but the company is in great need of further capital, and it is proposed to create another 10,000 £1 shares, which are to be offered to existing holders in the proportion of one for every ten held.

Panawatte Tea and Rubber Estates.—The tea crops for 1907 amounted to 605,250 lbs., being an average of 571 lbs. or 20 lbs. more per acre from the 1,029 acres mature tea and 88 lbs. from the 203 acres young tea which commenced bearing in the previous season. In addition, 5,077 lbs. were made from bought leaf and the total output realised a nett average of 6.04d. compared with 4.85d., while the cost rose by 0.25 to 4.39d. owing to labour difficulties consequent upon sickness, greater outlay on manuring and loss on rice. With £10 from 67 lbs. rubber sold and £45 from sundries the income was £15,429 and gross profits, including £26 from interest, &c., amounted to £4,285. After meeting administration charges and adjusting the rupee assets to 1s. 4d. exchange by writing off £122 the nett surplus was £3,816, out of which a dividend of 5 per cent. is paid against 2 per cent. for 1906, £500 is written off depreciation, and the balance carried forward is raised from £4 to £533. During the year £4,608 was spent on clearing 136 acres, upkeep of area not in bearing, &c., making a total, less depreciation, of £52,210, and it is perhaps unnecessary to say that the company has no reserves of any kind. Creditors come to £2,902 against £5,259 in stocks of produce and £2,640 in cash. Coast advances seem much too heavy to be comfortable at £5,769.

DIVIDENDS ANNOUNCED.

RAILWAYS.

Argentine Great Western.—Interim on account of year to June 30 of 2½ per cent. on the preferred stock and the ordinary stock, and 4s. per share on the new shares of £10 each (Nos. 162,501 to 325,000).

Bengal Dooars.—2½ per cent. on the ordinary stock for half-year ended Dec. 31, making 4 per cent. for the year.

Buenos Ayres and Pacific.—Interim on account of year to June 30, 1908, of 3 per cent. on the ordinary stock and 1s. 11½d. per share on the ordinary shares (Nos. 525,001 to 625,000).

Cuban Central.—Interim of 5s. 6d. per share on the preference shares, payable 30th inst. on account of profits for year ending June 30.

Missouri, Kansas and Texas.—Half-yearly of 2 per cent. on the preferred stock, payable May 9.

Piræus Athens Peloponnesus.—Drachmas 6 a share for 1907.

MISCELLANEOUS.

Babcock and Wilcox.—2s. 4 4-5d. (including bonus) per share, making 20 per cent. for the year.

Benger's Food.—Final of 1s. 3d. per share on the ordinary shares, placing £10,000 to reserve, and carrying forward £6,782.

Boxax Consolidated.—At the rate of 6 per cent. per annum on the preferred ordinary shares for half-year ending 31st March.

City of Dublin Steam Packet.—At the rate of 2 per cent. per annum for half-year ended Feb. 29.

Colonial Gas Association.—Interim of 4 per cent. per annum on ordinary shares and 4 per cent. per annum on the founders' shares for half-year.

Commercial Union Assurance.—6s. per share of £10 each (£1 paid), making 12s. per share for 1907.

Dundee Coal.—Interim of 9d. per share.

General Steam Navigation.—5 per cent. on the ordinary shares for year, carrying £2,195 forward.

Industrial and General Trust.—On the ordinary stock at the rate of 6 per cent per annum for half-year to 31st ult., and a bonus of 1 per cent. for whole year, placing £25,000 to reserve, carrying forward £38,000.

J. B. Brooks.—Interim of 5 per cent. per annum on the ordinary shares for half-year.

Mexico Tramways.—On the capital stock at the rate of 4 per cent. per annum for three months to March 31.

Monte Video Telephone.—6 per cent. per annum on the ordinary shares for half-year.

Nantyglo and Blaina Ironworks.—Further instalment of 55s. per share on account of arrears on the preference shares.

Pranges Estancia.—Interim of 4 per cent.

River Plate Electricity.—Six per cent. on the ordinary shares, placing £4,000 to general reserve, carrying forward £5,410.

Spillers and Bakers.—On the ordinary shares of 7½ per cent., making 10 per cent. for the year ended Feb. 29, placing £10,000 to general reserve and £10,000 to insurance reserve, carrying £110,675 forward.

Tarapaca Waterworks.—Final of 4 per cent., making 7½ per cent. for 1907.

Weardale Steel, Coal, and Coke.—Interim of 6 per cent. per annum on the preferred and deferred ordinary shares for quarter.

MINING RETURNS.

Alaska Treadwell.—Crushed 28,722 tons, value $38,243; saved 520 tons sulphurets, value $25,830.

Abosso.—Crushed 5,265 tons, 1,820 ozs.; tailings, 5,419 tons, 546 ozs.; old tailings, 1,085 tons, 171 ozs.; total, 2,587 ozs.

Brilliant and St. George.—705 tons, value £3,714, including concentrates and residues.

Chinese Engineering.—Output of coal, 29,000 tons; sales, 29,500 tons; consumption, 1,375 tons.

City and Suburban.—Crushed 26,000 tons, 7,800 ozs.; profit, £10,579.

Consolidated of New Zealand.—Progress: Crushed 4,731 tons, value £5,987; profit, £1,349. Wealth of Nations: Crushed 1,180 tons, value £2,157; profit, £1,119.

Duff Development.—Total 225 ozs.

Durban-Roodepoort.—Milled 12,656 tons, 2,653 ozs.; tailings, 8,515 tons, 1,020 ozs.; slimes, 4,005 tons, 224 ozs.; total, 3,897 ozs.

Eaglehawk Consolidated.—Crushed 1,100 tons, 186 ozs.; cyanide, 106 ozs.

Famatina Development.—Shipment of 200 tons copper matte, and will consist of 90 tons copper, 800 ozs. gold, and 10,000 ozs. silver; value, £10,000.

Foldal Copper and Sulphur.—Ore produced, 5,710 tons; ore sorted from tonnage already published, 812 tons; ore shipped, 6,082 tons.

Hannan's Reward.—Crushed 5,500 tons, 547 ozs.; royalties, £323.

Langlaagte Estate.—Ore crushed 46,140 tons, 9,749 ozs.; tailings 27,600 tons, 3,424 ozs.; slimes 23,244 tons, 1,737 ozs.; total, 14,910 ozs.; profit, £23,000.

Loddon Valley.—418 fathoms wash, value £930.

Lucky Girl Group, Nevada.—Crushed 1,900 tons, 290 ozs. gold and 178 ozs. silver.

Messina.—Output 623 tons copper ore; 77 tons shipping ore, assaying 46 per cent. copper; the balance of 546 tons remaining for future treatment.

New Ravenswood.—Crushed 1,675 tons of ore, value £3,441; 184 tons concentrates, value £2,102; from tailings treatment 86 tons concentrates, value £1,154.

N. Broken Hill.—Treated 2,600 tons crude ore, assaying 15·8 per cent. lead and 6·2 ozs. of silver per ton, producing 440 tons concentrates, containing 303 tons 8 cwt. lead and 9,064 ozs. silver.

N. Randfontein.—Ore crushed 17,620 tons, 3,734 ozs.; tailings 11,040 tons, 1,940 ozs.; slimes 6,403 tons, 599 ozs.; total, 6,273 ozs.; profit, £9,200.

Penhalonga Proprietary.—Crushed 8,300 tons, 1,707 total ozs.; profit, £2,851.

Porges Randfontein.—Ore crushed 16,003 tons, 3,969 ozs.; concentrates 1,622 tons, 493 ozs.; tailings 9,828 tons, 1,396 ozs.; slimes 4,458 tons, 506 ozs.; total, 6,364 ozs.; profit, £9,200.

Rezende.—Crushed 3,400 tons, 923 total ozs.; profit, £433.

Robinson Randfontein.—Ore crushed 15,030 tons, 2,974 ozs.; concentrates 1,450 tons, 429 ozs.; tailings 9,000 tons, 393 ozs.; slimes 4,231 tons, 427 ozs.; total, 5,223 ozs.; profit, £4,500.

Salisbury.—Crushed 5,550 tons, 1,820 ozs.; profit, £2,650.

S. Randfontein.—Ore crushed 15,093 tons, 3,118 ozs.; concentrates 1,575 tons, 450 ozs.; tailings 9,475 tons, 1,648 ozs.; slimes 4,189 tons, 534 ozs.; total, 5,750 ozs.; profit, £7,100.

Surprise Gold.—1,209 ozs. from 2,778 tons.

Tyee Copper.—1,474 tons customs ore, producing 250½ tons matte.

Willoughby's.—Queen's—524 ozs. from 1,464 tons. Eiffel Blue—467 ozs. from 621 tons. Danga—102 ozs. from 336 tons. Queen's West—288 ozs. from 460 tons. Off Chance and Queen Adelaide—33 ozs. from 140 tons. Total, 1,414 ozs. from 3,021 tons. Bonsor—137 ozs. from 850 tons. North Bonsor—162 ozs. from 655 tons.

Answers to Correspondents.

**** A Key to these Answers will be posted early each week to Subscribers of ONE GUINEA per annum, 11s. for six months, or 5s. 9d. for three months.***

Deposits against future queries may be lodged with the Publisher.

B. W. J.—It seems a pity to accept a loss on these, as neither company is unsound. It is only a question of time before the country recovers from its present depression, and both companies will share in the improvement.

W. G.—If the bonds are genuine the interest would be secure enough, but profits depend on result of drawings. Sometimes these prove to be below cost price. There are three loans bearing that rate of interest, and unless we know which we cannot say how much is outstanding. No English paper publishes the prize lists. In any case you should not enter into a transaction of the kind through the agency named. Your own broker can obtain them more reasonably.

D. R.—We believe the company is carefully managed, although it has, perhaps, been a little too eager to extend its operations. It is hardly the time to average, as it is possible the price may go lower yet, but they should be watched. The turn in the tide will not be very soon we fear.

J. N.—We still think the stock quite a good one, but not likely to rise in the present condition of markets. The interest should be safe.

Timothy.—(1) We do not think the trouble you mention has much to do with the shrinkage. In other directions there should be improvement in the general trade, and interest should be safe. (2) There has already been some recovery in price, and we think the improvement may go further. Traffics are good, and it is only a fresh spell of liquidation that would upset the market.

London and County Banking.—Liabilities on March 31 amounted to £45,211,795 on current, deposit and other accounts, and £3,972,226 on acceptances, against which the assets were £9,449,695 in investments, £7,852,684 in bills of exchange, £20,872,680 in loans and advances to customers, £7,073,076 in cash at the Bank of England and on hand, and £3,183,268 in money at call and notice. The daily average for the month of cash in hand and at the Bank was £6,475,208.

The Crown Agents for the Colonies beg to give notice that the bonds of the Straits Settlements Government 4 per cent. 5-year convertible bond loan are ready for delivery in exchange for the scrip certificates. The scrip must be left at No. 1 Token-house Buildings, E.C., three days for examination prior to the issue of the bonds. It is essential that the exchange should be effected through a bank or other agent in London, as the Crown Agents cannot in any circumstances undertake to forward the debentures through the post. Holders of scrip certificates are reminded that they have the option until May 14 next of converting their holding into Straits Settlements 3½ per cent. inscribed stock, at the rate of £105 of stock for each £100 converted.

Thomas Barr, Limited.—Two large bad debts prevented the profits for the year ending December 31 being considerably in excess of those for the previous one, as the volume of business done showed an increase. At it was trading profits came to £8,776 and nett to £7,058, giving, with £380 brought in, £8,044. After paying preference dividend £500 goes to reserves and 5 per cent. is paid on ordinary shares, leaving £419 to go forward. Goodwill is still £23,940. Stock at £42,604 is claimed to be much under value, cash is small at £3,575, while a lumped item of book debts, partly secured loans, and bills payable £125,953 is large and uninforming, although the items of creditors for £19,246 are particularised. Reserves and suspense account aggregate £21,453 but so far are only represented by goodwill.

COMPANY MEETINGS.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

The fifty-fourth ordinary general meeting of the shareholders of the Chartered Bank of India, Australia, and China was held on Wednesday at the Cannon Street Hotel, E.C., Sir Montagu Cornish Turner presiding.

The Joint-Manager (Mr. Caleb Lewis) having read the notice convening the meeting,

The Chairman said: Gentlemen,—You will notice from the report now before you that we have to lament the loss of an esteemed friend and valued colleague through the death of Mr. Jasper Young, for several years a director of this bank. Combined with a prolonged and varied business experience in the East and in London, Mr. Young possessed a sound and mature judgment, and by his capable advice was of great service in assisting to direct the affairs of this bank. We have been fortunate in securing as his successor Mr. Thomas Cuthbertson, senior partner in the late Mr. Young's firm, and in regard to that gentleman I can only say that we could not possibly have made a better or wiser selection. Gentlemen, since we last met a great and momentous change has occurred in the conditions of trade and commerce throughout the world. From a period of abnormal activity and general prosperity we have fallen to a state of inaction and general stagnation. The causes of this momentous change are partly natural and partly exceptional. The natural causes are such as overproduction and an overwhelming keenness on the part of merchants to pour goods into markets already sufficiently stocked, and so, for the time being at any rate, the world of commerce is suffering from a somewhat severe attack of indigestion, and until sufficient time has elapsed to allow of the process of normal digestion to take effect, we shall not be likely to see any appreciable improvement. As a result, in most markets of the East and Far East there is a considerable lock-up of merchandise. For exceptional causes we may look to India, which, in addition to the prevalence of plague, is suffering from a somewhat severe visitation of famine, owing to the failure of rains during the last autumn and winter—a famine which is affecting the United Provinces, the Punjab, and, to a lesser degree, the Central Provinces—a famine extending over an area of 150,000 square miles, with a population of 50 millions, of which 1½ million are at present dependent on State aid. In respect to that, however, I am glad to see from this morning's report that the prospects are somewhat brighter, rain having fallen in some districts, and the number on relief having diminished to a small extent. But, gentlemen, as the result of this famine, we have decreased and decreasing exports of wheat and seeds, and a diminution in the offtake of goods, especially piece goods, from the large seaports and the central trading depôts in India itself. Another exceptional cause to bring about the present depressed condition of trade has been the American financial crisis, in regard to which so much has been said and written that I need not dilate upon the subject, except to note that, owing to the partial stoppage of the financing of commercial industries in that country, America was unable to take her usual supplies of foreign goods, especially from the Far East. Japan, for instance, has suffered in regard to her silk crop, which a year ago was estimated to be worth as export value £11,000,000, but owing to one of her chief markets, America, being closed, the value of this crop has fallen by some 25 per cent. to 30 per cent. This, in some degree, accounts for the fact that the balance of trade is at the present moment against Japan. In North China the exports of hides, skins, furs and wool have suffered for the same reason. In the Straits also there has been a falling off in the exports of tin, and in India we find very considerable reduced exports of hides, skins and, to some extent, manufactured jute goods. Here in England, as an effect of the American crisis, we suffered, as you all know, from an abnormally high Bank rate in the winter months of late year. That, of course, was unavoidable, inevitable, and necessary, but at the same time it did affect adversely our trade in this country; and for the reasons which I have already given, it is not surprising to note that in the first quarter of this year there has been a decrease in our trade returns, both in regard to exports and imports. It would be, indeed, remarkable if, under the circumstances it were otherwise, and in my humble opinion the decrease of our trade has nothing on earth to do with out present fiscal system. Along with this falling off in trade there has been a natural depreciation in the values of commodities all round. I will mention a few, and the dates I take for comparison are June 30, 1907, up to December 31 of the same year. During that period copper (standard) fell 37½ per cent. in value, tin 35 per cent., American cotton 14¼ per cent., silk (China-Japan) 26 per cent., wool 15 per cent., hemp 19½ per cent., jute 17½ per cent., rubber 25¾ per cent., and shellac 42 per cent. Added to this there has been a heavy fall in the value of silver—about 25 per cent.—in the closing three months of last year, and this, of course, has added very appreciably to the difficulties of business in the Far East, especially in countries such as China, which still work on a silver basis. With these adverse conditions which we have to contend with—involving, as you can quite understand, considerable anxiety to those engaged in banking and other commercial business—it behoves us all to act discreetly, cautiously, carefully, and circumspectly, and your directors have acted on these principles in drawing up their report, and in framing the resolutions which I shall presently ask you to adopt.

Before I sit down you will, no doubt, expect me to say a few words with regard to the new freehold site in Bishopsgate Street, including the area of Crosby Hall, which has been acquired for the purpose of providing the bank with the accommodation absolutely and urgently needed by its greatly increasing business. The site, which had been for many years used for business purposes, was practically in the market for some time before May last, the date of our contract purchase; but immediately after the sale became known a public discussion arose as to the preservation of the hall. The Corporation and the London County Council did not see their way to effect the necessary arrangements, but a committee was formed, and for some months endeavoured to obtain sufficient public support to enable them to acquire and maintain the Hall. The directors thought it the wiser and more dignified course not to notice any unfavourable comments made upon their conduct during the course of these efforts, but to afford time for the promoters of the scheme to ascertain whether they could carry it into effect. Appeals were made again to the Corporation, to the London County Council, and ultimately to the Government, but in the end the Government in January last declined to interfere, and as no sufficient support was forthcoming the scheme failed. Both the Lord Mayor, who introduced a deputation on the subject to Mr. Lewis Harcourt, and Mr. Harcourt himself expressed their sense of the great consideration with which the bank had acted. Indeed, the bank did not give directions for the removal of the Hall until it had been decided that nothing could be done to acquire and maintain it upon the site. The fabric has been carefully preserved, and arrangements are in course of being made to hand it over to a recognised public body for re-erection elsewhere. And now, gentlemen, I have the pleasure to move the first resolution: "That the report now presented, together with the balance-sheet and profit and loss account, be approved and adopted."

Mr. Emile Levita: I have much pleasure in seconding the resolution.

Mr. H. M. Ross: Mr. Chairman, in the very interesting speech which you have made I am sorry to observe no mention of the matter of the utmost importance—I should say of vital importance—to Indian banking. I refer to the heavy fall in exchange which took place about the month of November last, and which temporarily jeopardised the maintenance of the gold standard in India. What we as a bank owe to the maintenance of the gold standard may, perhaps, be shown if I say that though we were incorporated as a bank in 1853, 40 years afterwards, or in the year 1892, our £20 shares changed hands at as low a figure as £18. In 1893 the Indian mints were closed for the coinage of silver, and 14 years later—that is to say in 1907—our £20 shares were sold at £70. I do not think therefore that we can well overrate what the gold standard has done for Indian banking, nor that we can well overrate the debt of gratitude we are under to your partner, Sir James Mackay, who almost singlehanded initiated the agitation in India which culminated in the establishment of the gold standard. As you know, I was honorary secretary of the Indian Currency Association under the presidency of Sir James Mackay, and his successor, Mr. John Anderson, and I therefore speak with some knowledge when I refer to the vacillation and irresolution which marked the conduct of the Government of India during the early steps of that great reform. In the *Times* of the 6th inst. I read a long pronouncement made in the course of the Budget debate by Mr. E. N. Baker, the present Finance Minister of India, and I am sorry to say that timidity and irresolution are as marked to-day as they were 15 years ago. I will not trouble the meeting with the details of that long pronouncement; it will suffice if I say that when the crisis arose, to provide against which the Government of India had accumulated a large gold standard reserve fund, the Government showed itself unable to deal with it resolutely. When applied to to issue gold to the banks they refused, or, rather, they limited their offer to sums of £10,000 to any one individual or firm in one day. Now, such an offer would have been absolutely ludicrous but for the possible gravity of its effects. Startled no doubt by the outcry which arose further measures were taken, but instead of taking them openly and boldly they, so to speak, whispered in the ears of the exchange bankers that if the exchange should continue to fall the Government, in addition to withholding Council bills, would be prepared to issue to a certain extent telegraphic transfer on London for gold, but that they would or might withdraw this offer at a moment's notice. Now Mr. Baker claims that as the result of these later measures the panic, or the impending panic, was arrested; but I am much more inclined to give the credit to the coolheadedness of Indian bankers and merchants, who refused to be carried away by the panic which was nearly provoked. Mr. Baker alleges that his reason for issuing these small sums was the inadequacy of the gold at his disposal, amounting to only three and three-quarter millions sterling. Well, surely the policy of investing the greater portion of the gold reserves, something like 14 millions, in interest-bearing securities in this country, stands self-condemned, and should be changed. Mr. Baker speaks of these interest-bearing securities as his second line of defence, and rejoices that it was not necessary to fall back upon them. Well, if we remember that the American crisis coincided with the Indian crisis, I would ask any merchant or banker in this room to say what would have been the effect had the Government of India fallen back on its second line of defence—if, in other words, it had commenced to sell freely interest-bearing securities for the purpose of replenishing its stock of earmarked gold. We all know they would not have been permitted to do anything of the sort, the conse-

quences in London would have been too dreadful. In that great work written by the late Walter Bagehot "Lombard Street," it is said that "any notion that money is not to be had or may not be had at any price quickly raises alarm to panic and enhances panic into madness." This was the state of affairs which I contend the Government of India almost provoked. Now, my object in rising to address this meeting at this length, for which I apologise, is that some months ago the Bengal Chamber of Commerce addressed the Government of India on this very subject, and urged the appointment of a committee to go into this question of the gold standard reserve. I would therefore respectfully urge that our directors should give their immediate attention to this matter, and should join hands as far as possible with the Bengal Chamber and other Indian banks in getting such a committee appointed. It seems to me that it is useless for this bank to build up large reserves for the purpose of securing its interest and those of its customers, if the large funds we employ in India are to be exposed to sudden, serious, and possibly permanent depreciation by mismanagement on the part of the Government. (Hear, hear.)

The Chairman: I am sure that we are much indebted to Mr. Ross for his most interesting and lucid speech on the subject of the maintenance of the 1s. 4d. rupee in India, for that is what it amounts to; and no one can speak better or more authoritatively on the subject than Mr. Ross, for he has studied the matter from the very commencement of the question up to the present day, and with his natural ability, which is by no means small, he has been able to conquer the difficulties of the question. I must confess I purposely avoided a reference to such a thorny question, for, in the first place, unless you speak with an expert knowledge you are likely to make mistakes; and, in the second place, I do feel assured that the Government of India are fully alive to the gravity of the question. We know that with varying conditions of trade there must be a variation in exchange, but I am confident that the Government of India or the Secretary of State's Council, would never allow the stability of the rupee to be broken. At any rate, Mr. Ross, I can assure you that the question has occupied the consideration of the managers, and some of the directors of the bank. As a matter of fact, our manager in Calcutta, Mr. Preston, is a member of the finance committee of the Bengal Chamber of Commerce, and I believe he has been an active element in raising this very important question of a commission. I think myself it may have to come, but whether the present is quite a suitable time for appointing a commission and so possibly spreading doubt as to the stability of the rupee, is another question. I quite agree that there are matters to be inquired into, and which it will be for the advantage of India as a country, and for all of us concerned, to have thoroughly threshed out. (Applause.)

The resolution was then put to the meeting and carried unanimously.

The Chairman: I have now to move the second resolution:—"That a dividend at the rate of 15 per cent. per annum, free of income-tax, for the half-year ended December 31 last be now declared, payable on and after the 22nd inst."

Sir Alfred Dent, K.C.M.G., seconded the resolution, which was unanimously agreed to.

The Chairman: I have now to move:—"That Mr. Thomas Cuthbertson be elected a director."

Mr. L. A. Wallace seconded the motion, which was carried unanimously.

The Chairman: I have now to move:—"That Sir Alfred Dent, who retires by rotation, be re-elected a director."

This was seconded by Mr. H. N. Gladstone, and carried unanimously.

The Chairman: I have now to propose:—"That Mr. Thomas Cuthbertson, who retires by rotation, be re-elected a director."

Sir Henry S. Cunningham, K.C.I.E., seconded the motion, which was unanimously agreed to.

Mr Victor Murray: I have much pleasure in proposing: "That Mr. M. N. Girdlestone and Mr. M. Mowat be re-elected auditors for the ensuing year."

This was seconded by Mr. Henry B. Henley, and carried unanimously.

Mr. Murray: The honour has been entrusted to me to propose a vote of thanks to the directors and staff for their successful management of the bank. I do consider it an honour to be entrusted with this proposal, and I am only sorry that it has not been put into the hands of some worthier shareholder. We are quite well aware that the financial crisis which struck the world in the last quarter of last year required the greatest attention on the part of the directors, and of the head office in London, in watching over the affairs of this bank, and I am sure the splendid balance-sheet which has been put before you might have been better but for that financial crisis. Still, the shareholders must appreciate the skill of the directors and the management in steering the ship safely into port, and excelling the record profit which was made in the previous year. We are aware that the directors control the management of this bank, but we cannot get over the fact that without having an adequate and intelligent staff, no success can possibly attend the working of the bank. I know from travelling in the East a very large number of the members of the staff of the Chartered Bank, and I can assure you that a more intelligent and more persevering class of men it would be impossible to secure. Therefore, the vote of thanks which I have been called upon to propose will, I feel sure, be concurred in by all those present here to-day. It is very gratifying to me to notice that the staff have been awarded a bonus of 10 per cent. On previous occasions I have had to refer to this subject, as I am very conservative on the subject of the staff receiving an adequate bonus when the shareholders receive an adequate dividend, and I trust that as the Chartered Bank of India proceeds on its prosperous path, and as dividends increase, the bonus to the staff will not be overlooked, but will be increased likewise. With these few remarks I beg to propose that the best thanks of the shareholders be given to the directors and staff for their successful management of the bank.

Mr. Henley seconded the motion, which was unanimously adopted.

The Chairman: I thank you very sincerely on behalf of my colleagues and myself for the kind words in which you proposed the vote of thanks. As regards the staff, I must say that in the last few months they have had more than the usual cares and anxieties to contend with, but we must expect those in business, and I have no doubt that the staff are quite willing to accept the rough with the smooth. At the same time we shall always bear in mind the services rendered by the staff, and if it is possible on a future occasion to give them an increased bonus, the directors will have the very greatest pleasure in doing so. (Hear, hear.)

The proceedings then terminated.

GENERAL ACCIDENT, FIRE, AND LIFE ASSURANCE CORPORATION.

The twenty-second annual general meeting of the General Accident Fire and Life Assurance Corporation, Limited, was held in the board-room at the head office, General Buildings, Perth, on Monday, April 6, 1908. There was a large and representative gathering of shareholders, and the whole proceedings were marked by the utmost unanimity.

The Chairman, who was received with applause, said: Gentlemen,—I presume that you will as usual take the report and statement of accounts as read. (Applause.) With regard to the accounts you will notice that they are in a different form, but we were not free agents in this matter, as, being now under the Board of Trade, we have to conform to the rules and regulations which they in their wisdom have laid down; this we have readily done, as it results in a clearer and more concise statement. Moreover, as issued in this form, they are the same as the accounts of other large companies, which make comparison a simple matter. The chief alteration affecting the actual figures is in the method of stating the reserves. Hitherto we have only had one reserve fund, including unexpired risk and general reserves. We have now calculated our unexpired risk, and stated that as a separate amount. In the fire department we have set aside 40 per cent. on account of this being necessitated by the fact that the Christmas quarter is so near the end of the year, which is ample when we take into consideration the fact that a great part of our business comes in in the months of May, June, and July. You will have observed that we have had a very satisfactory year, and I am sure you will agree with me that it is even more satisfactory than it appears when you have heard my explanation with regard to the accounts. As I foreshadowed in my speech of last year, the year 1907 has resulted in a large accession of new business to the Corporation, and in view of this and the change in the form of our accounts, I think you will be better able to follow me in my remarks if I deal with the accounts under the various headings. I shall therefore take each department separately, and in conclusion refer to the results as shown in the balance-sheet. Before proceeding to do this, however, I take this opportunity of heartily congratulating the shareholders on the very satisfactory position to which our company has now attained, and to inform them that our issue of capital was well applied for. We had applications for over 30,000 shares, and have been able to add to our list of shareholders several hundred of the most influential business men in all the large centres. Thus we shall increase our connections and business during the current year, and be in a much stronger position financially to compete with our opponents. First, I shall take the accident department, which meantime is our premier department, and I refer you to page 8 of the report and accounts, from which you will see that our income totals over £850,000. This shows a very substantial increase on the figures of last year, which increase is shared in by all classes of business under this head. The income derived from our personal accident and sickness business alone amounts to between £300,000 and £400,000, which our general manager informs us in the largest personal accident income of any company in Europe, and in placing it on our books we have built up a department that should be consistently profitable in the future. In the workmen's compensation department the income is about £200,000. We have been most careful in our selection of this class of business, and while it is too early to say anything definite as to the results of the working under the new Workmen's Compensation Act, one thing is evident, and that is that employers will require to pay a very much higher premium to cover this risk unless they see to it that they employ only young and healthy workmen. As you are aware, this department of business is now under the Board of Trade, and as a result certain returns require to be made. This has necessitated our establishing a statistical department, which has the advantage that it keeps us more closely informed of the working of this branch of our business. Formerly many people were under the impression that the risk in the cases of domestic servants, shop assistants, clerks, and those employed in similar occupations was so slight that it

was scarcely worth insuring against. Well, gentlemen, we obtained a large amount of premiums for these classes of business, and all I can say is that the result has been most fortunate for those employers who were fortunate enough to insure. In the domestic servants' department alone we have paid compensation for no fewer than 1,000 accidents, six of which were fatal, and we already find that the period of disablement in this class is much longer for minor injuries than in any other, which I think is largely due to the fact that so many domestic servants in large towns are not in general good health, and the slightest accident results in their being laid up for a lengthy period. Our experience with regard to shop assistants has been the same. In this class also we have had a large number of accidents, including eight fatal cases. In one case the payment of a few shillings by the employer relieved him of the payment of £150. We have had claims for clerks in lawyers' offices, banks, and even insurance offices, which is evidence of the fact that accidents are by no means confined to the apparently hazardous risks. The premiums under this heading include fidelity guarantee, contract, guarantee, burglary, vehicle, third party, and such-like classes of insurance, all of which show substantial progress and fair profits. Our motor car department is not in itself as profitable as we would wish, but it is valuable in that it influences other good business. It may interest you to know that altogether we have dealt with no fewer than 493 fatal accidents during the year, paying sums varying from £1,000 to £10, and that since commencing business we have paid in compensation over two millions sterling. Our fire department continues to make steady progress, our income from this source being now £105,000, or an increase of £18,000 over the previous year. Claims have been somewhat heavier than we would like to see, but if you take into account the thirteen years we have transacted this business you will find that our claims work out at an average of slightly under 50 per cent. In this department we hope to show a considerable increase in premiums in the current year—our attention being more strongly directed to our home fire business—and we shall not be satisfied until we have a home fire income of at least £250,000. The expenses in the department, we are pleased to note, are moderate. The figures in the life department will be dealt with more fully by Mr. Steuart Fothringham, the convenor of our life committee. I may remark, in passing, however, that the results have been highly satisfactory. New proposals were received for no less than £279,839 of insurance, of which £194,248 was completed. We might have completed a much larger sum but for the special care we exercised in accepting cases, and we are extremely indebted to our medical officers, Drs. Dobie and Stirling, for the valuable guidance they gave us. When we take into consideration the fact that the whole time of our outside staff was for three or four months last year taken up in arranging workmen's compensation business, the progress made by this department speaks volumes for the value of our organisation. If you turn to the balance-sheet you will find that our funds are there set out clearly, and that we have total assets of £822,000 in addition to uncalled capital of £525,000. Our investments, with two small exceptions, are dividend paying, and although in common with other companies we have suffered from depreciation, we have a fund of £10,000 against that depreciation. Moreover, the depreciation will, I hope, disappear as times become more prosperous and Stock Exchange values improve. If there are any questions you would like to ask regarding any of the figures appearing in the accounts, please do so, and I shall be glad to give you any information I can. In addition to our head office, we now own buildings in Philadelphia, London, Southampton, Aberdeen, and Dundee, and all the space in them not occupied by ourselves is let, with one exception, and we get a very handsome return for our investments in these buildings. As I mentioned above, and as you are aware, we have a building of our own in London which we purchased from the Imperial Insurance Company in King Street, Cheapside. When we purchased this we thought it would answer our purpose for many years. The rapid growth of our business in London, however, long since necessitated additional offices, and we have now, as you know, offices not only in King-street, but in Chancery Lane, High Holborn, Pall Mall, North London, and East London. While our Pall Mall, North London, and East London offices are strictly speaking sub-branches, our King Street, Holborn, and Chancery Lane offices are entirely occupied by what we may call the head London office staff, so that the work is very much split up. Our business in London has attained very large proportions, but yet we are not satisfied that we have there the amount of business which the size and importance of our company entitle us to expect. We have, therefore, in order to lessen the present rate of working expenditure and also with a view to becoming better known, and also by this means more rapidly to extend our connections in London, decided to build a central London office. For this purpose we have obtained from the London County Council a piece of ground in a very fine position at the corner of the Strand and Aldwych, upon which we intend erecting a handsome building replete with every modern improvement. The total cost of the building will be about £65,000. In it we will be able to concentrate our head London office staff, and as we shall only occupy a portion of the building we shall have the other portions to let, and this will prove a very remunerative investment and show as large a return for our money as we could get by investing it in first-class securities. Moreover, we shall be getting all the accommodation we need at a practically nominal rent. We have not entered into this transaction without due thought and considerable discussion. The plans submitted to us by our architect, Mr. Burnett, are such that we feel confident that the office we are to erect will readily let and at a substantial rent, and this opinion is shared by those experts whom we have consulted in the matter. As I remarked previously, all departments of our business have shown a profit, and I am pleased to be able to state that nearly all our foreign branches have shown a profit also. We are pleased to have with us to-day a number of our managers, including Mr. Franklin J. Moore, our American manager; M. Robert, our manager for France; M. Thys, our Belgian manager, and M. Wegener, our manager in Holland. These gentlemen take a loyal and enthusiastic interest in the affairs of our company, and share the pride felt by all of us in the General. Our American and Belgian business have been specially profitable during the past year; our French business consistently shows a fair profit, and I am pleased to say that in Canada we have made a very good start, having already an income of £20,000, and although in the past year our profit was small, we are fortunate in having a most influential board and managers who are most enthusiastic. The year has been one of great stress for all members of the staff. We have passed through our hands over 200,000 policies. The work has had to be carried on day and night, but our staff have stuck loyally to it, and the difficulties of so great an influx of business as we experienced have been overcome, and I am convinced that every member of the staff, both at home and abroad, has done faithful work for the company. As you are aware, the competition in every department of business is now greater than it has ever been. Formerly we talked of accident companies, fire companies, and life companies, but that is a thing of the past, for practically every company transacts all classes of insurance business, and now we can only speak of "insurance companies" without a qualifying adjective. Prospects for the future have never been so bright. We have powerful assets, a magnificent organisation, and a premium income of close upon one million sterling. We are now so well and favourably known that business of all kinds is offered us from all parts of the world, and with this foundation to work upon, and the additional advantage we possess in our influential local boards—to the members of which we are deeply indebted for their valuable assistance—I feel confident that we shall go on prospering and show even better results than ever before. I repeat that if any of you desire to ask questions in connection with the report or the observations I have just been making I will be glad to answer them, and now I beg formally to move: "That the report and statement of accounts for the year ending December 31, 1907, as printed and circulated, be and are hereby adopted, and that a final dividend for the half-year to December 31, 1907, be and is hereby declared payable on and after April, 1908, at the rate of 6 per cent. per annum on the preference shares, and after the rate of 15 per cent. per annum on the ordinary shares."

Mr. D. M. Mackay said: I rise with pleasure to second the adoption of the report. In my position as the sole remaining member of the original directorate formed at the inception of the company, I cannot but express my great satisfaction at the splendid position to which the company has attained. The chairman in his remarks has dealt with the figures so fully that it is unnecessary for me to further refer to them. I would like, however, to emphasise the fact that the corporation have a magnificent asset in the goodwill of the business, and to point out that after so comparatively short a period as 21 years we find ourselves in a position to which no other company has attained in a like space of time. We have a splendid organisation, alike of branches, officials, agents, and assured, and have thus a field for working all departments which is well-nigh unlimited, our name being well known in all parts of the world. While our business has undoubtedly been energetically managed and increased, it has, at the same time, been carefully selected, and if you will look back over our history you will see that, as compared with other companies during a similar business, we have had a lower claim ratio. Our expenditure may have been somewhat heavier than in the case of some of those companies, but I concur in the opinion of the management that it is better to have the best class of business on our books at a maximum cost than a bad class of business at a minimum cost. We can always look to reducing our expenses, but if bad business is on the books it is impossible to reduce the ratio of claims. We now transact life business in addition to fire and accident business, and I take this opportunity of urging our officials who have worked so energetically in our interests during the past year, to continue and increase their efforts, and all our shareholders and policyholders also to support the company by giving us all their business in all departments, and so enjoy the advantage of the additional benefits offered under our tables as compared with those of other companies. I have much pleasure in seconding the adoption of the report.

Mr. W. J. Steuart Fothringham said: I have been asked by the chairman to make a few remarks on the subject of life assurance, which was taken up by this company within the last two years. I suppose it is the youngest child of this general office, but I hope that it is a very thriving and promising one. We have perhaps not done quite so much during this last year as we had expected, and were justified in expecting that we should do with the very efficient staff at our command. The reason of that was that during four or five months in the middle of last year the staff was so tremendously worked with the new Workmen's Compensation Act that they really had not very much time to be getting life assurance business. At the same

time, however, we managed to get in £194,000 worth of business, which is very satisfactory, and on comparing that with other companies that have started that business in the last 25 years or so, I think ours is the best any of those have ever done in the second year of its business as a life office. (Hear, hear.) There is one other very satisfactory thing in the accounts which the chairman did not refer to. On page 7 you will see that the claims against the life assurance department were nil. That is the most satisfactory statement possible to make from all points of view. It is not only very good for the office and also for the shareholders, but it is also extremely good for the policy-holders, who, no doubt, would rather be alive than that some-one else should get the value of their policies. (Laughter.) That, I think, arose mainly from the fact that we selected these policies very carefully. On page 4 you will see that we declined what may possibly appear to you a rather large proportion, but I think we were quite justified in that, and in only taking and selecting the best business put before us. (Hear, hear.) If we got into the habit of accepting indifferent lives, no doubt we should be flooded with business, but not of a profitable nature. (Hear, hear.) There is one thing that does not appear in our accounts, but which will do so before long; that is the very good prospect we have of paying a good bonus to those who take out life insurance policies. Our working expenses are kept down to 17½ per cent., and we will be in a position that probably no other company is in, because I think no other company manages life business at this rate. I do not know that we shall do this either; but anything over this is charged against the accident department. At the same time it makes the life policies of this company very desirable things to possess, because of the prospect of a very good bonus. I hope you will remind all your friends, if they wish to live for a long time, the best thing they can do is to take out a life insurance policy in this company. (Applause.)

Mr. Wegener said: This is the third occasion on which I have been at the annual meeting of the company, but the first on which I have been asked to speak. I have represented the company since 1902, and I am very much pleased to tell you that notwithstanding the severe competition in my small country the "General" business has increased every year, and I think I may promise you that it will increase every year in the future. (Applause.) It is not a business of big figures, but in all the last five years it has shown a profit, and last year about 20 per cent. on the premium income. It is a good and a sound business. In the accident branch the competition is very heavy, and it is very difficult to establish a new branch principally for personal accident insurance. It takes a lot of time and money. I am indebted to the general manager for the most liberal, businesslike way he assisted me in my difficulties. My greatest competitor in Holland, in the last two months, got only twice as much business as we got. You will believe me that we are in the right way when I mention that he has been in this business for twenty years, while we have been only twenty months. I have to thank the manager and officers of the company for their warm support, and assisted as I have been, I consider it my duty to do my utmost for the company. (Applause.)

The resolution was then put to the meeting, and was agreed to unanimously.

Mr. Simpson moved "That the retiring directors—Messrs. A. Bonar Law, Charles M. Douglas, Gerard A. Moncrieff, James Macnaughton, and Colonel Arthur W. H. Hay Drummond—be and are hereby re-elected directors of the corporation." He said: I regard this resolution as a mere formality. I do not suppose any shareholder would propose anything else. Nor need I say anything in support of the resolution. The accounts submitted, backed up by the speeches delivered and by the statements given by the representatives abroad who appeared before us, are the very best evidence that can be produced of the capacity and efficiency of the board of directors as a whole. If I might refer to one item that emphasises that, it is the remarks of Mr. Fothringham. The fact that in the life department, with almost £200,000 of premiums, there has not been one death is evidence of the most careful work on the part of the board and its officers. The same holds good taking the accounts throughout and in detail. The board as a whole cannot be improved upon, and those members who retire and fall to be re-elected, are not the least efficient. They are distinguished men—eminent in various walks of life. (Applause.)

Mr. Macfarlane seconded.

Mr. Russell moved: "That Messrs. Rorie, Collier, and Company, C.A., be and are hereby re-elected auditors of the corporation for the current year at a fee of £300.

Mr. Reid seconded, and the motion was agreed to unanimously.

Mr. Charles M. Douglas said: Before I submit the resolution entrusted to me perhaps you will allow me on behalf of my colleagues and myself to thank you for the honour you have done us in re-electing those of us who fall to retire. I need not, I think, say more than that. I am sure we are all united in the resolve to do our utmost for the company so long as you honour us with your confidence. The resolution I have to put is: "That a vote of thanks be accorded to the general manager, staff, and agents at the head office and British branches, and also to the managers, staffs, and agents in the United States and other foreign countries." I am sure you will recognise how much we owe to all these gentlemen. I do not know whether you remember in the early days of the Russo-Japanese war that every despatch regarding a Japanese victory ended with the statement, "This victory was entirely due to the illustrious virtue of the Emperor, but the officers and men also played their part." (Laughter.) In the same spirit we might say the success of this company is entirely due to the directors, or perhaps I should say the chairman, but the manager and staff also played their part. (Applause.)

Mr. A. H. B. Constable seconded, and the motion was agreed to unanimously.

Mr. F. Norie Miller said: I rise to thank you all very much, and Mr. Douglas especially, for the too flattering and kind way he proposed this resolution, and for the way it has been received. Let me say at once it would be absolutely impossible for me to be standing here or to have done the work done for this company were it not for the splendid staff I have been so fortunate in having under me. Every one of the staff is more loyal and enthusiastic even than myself with regard to the "General." Their determination is that it shall be the greatest company of this kingdom. If I may for two minutes go back to the fact I should like to say that this is the twenty-second occasion upon which I have had the honour of acknowledging the vote which you have just so kindly passed. As a rule it is taken as a formal resolution. It is a formal resolution, but at the same time it is very much appreciated by the staff. Twenty-two years ago I spoke at a meeting in reply to this resolution. In looking up my reports I find that the total premium income was £2,600, and that we had a paid-up capital of £5,000. On that occasion I stated that I was proud of my staff. The head office consisted of myself and three clerks. We had four district managers, one inspector, and about two hundred agents. I was younger in those days and more optimistic, I believe, than now. On that occasion I said we were engaged in building up what was to be one of the greatest insurance companies of the country. It seemed ridiculous when you look back on it now. I never thought that in 21 years I should be privileged to stand here and return thanks on behalf of a staff of a company in the position to which we have attained to-day. We have funds of nearly £2,000,000 as security for our policy-holders. We have a premium income of practically £1,000,000 sterling. We have 52 branch offices, about 800 salaried employees, and about 24,000 agents, and we do business in every part of the world. (Applause.) This organisation has been built by persistent, able, and enthusiastic effort on the part of the staff. The following figures will show our income for the past 21 years:—

PREMIUM INCOME.

	£		£
1886	2,600	1897	35,000
1887	7,162	1898	57,000
1888	10,600	1899	102,000
1889	12,900	1900	120,000
1890	14,000	1901	170,000
1891	15,000	1902	231,000
1892	17,000	1903	262,000
1893	19,000	1904	359,000
1894	23,000	1905	485,000
1895	26,000	1906	617,000
1896	33,000	1907	968,000

Mr. Franklin J. Moore and Mr. Wegener also spoke.

Sir William Taylor moved a vote of thanks to the chairman.

The proceedings then terminated.

CALCUTTA TRAMWAYS.

The ordinary general meeting of the shareholders of the Calcutta Tramways Company, Limited, was held on Tuesday, at 1, Queen Victoria Street, E.C., Mr. E. C. Morgan (the chairman) presiding.

The Secretary (Mr W. R. Elston) having read the notice convening the meeting and the report of the auditors,

The Chairman said: It is desirable that I should give a more detailed analysis of the position of the company, which it was difficult to deal with more exhaustively in the report, as it is the wish of the directors to give the fullest details of the causes which have led to the large increase which has taken place in the expenditure. Commencing with the capital account, it will be seen that very large sums of money have been expended upon the works rendered necessary for the extensions which have been in progress during the currency of the year. You will notice that small lengths of the extensions were brought into operation during the year, but only for short periods, so that we derived comparatively little benefit from them, especially as they only constituted fragments of longer lines. In spite of these difficulties which have retarded the natural growth of our system, we have succeeded in obtaining receipts amounting to £167,378, or £8,521 more than was realised in 1906, and about double the amount earned in 1902, when electric traction was first brought into operation. Unfortunately, as far as last year is concerned, our increased receipts were more than counterbalanced by heavy expenditure, which became necessary to obtain from our old system the larger receipts. The power expenses are higher by £2,024. This is partly due to fuel, which has cost us more by reason of the higher price we had to pay for coal. The main increase, however, has been owing to the maintenance and repairs to our plant rendered necessary by the severe strain placed upon our D.C. engines in order to obtain the increased traffic receipts. Traffic expenses are higher by £1,710, which is not excessive, having regard to the additional staff needed to secure efficiency in control. Maintenance and repairs show the heavy increase of £7,164, which is mainly

due to the fact that we have been unable, for want of space, to deal efficiently and economically with the maintenance and upkeep of our cars. I may say here that we have, after much difficulty, succeeded in acquiring a site for the erection of a shed to house sixty trains, or 120 cars, and when this has been completed we hope that much of our difficulty under this head will disappear. General expenses show an increase of £6,418, some £1,200 of which is increased income-tax, due, of course, to our increased profits, and of the balance about £4,100 is under the head of track rent. You will remember that when we obtained our concession it was stipulated that the track rent was to be Rs. 35,000 per annum for the existing system. A discussion arose with the corporation as to what was the "existing system." However, matters were finally settled, and then came the question of additional lines which in terms of the concession were to pay track rent at a rate to be agreed between the corporation and the company. Finally, it was agreed that the rate to be paid was to be Rs. 4,000 annually per mile of double line within the city and Rs. 1,000 annually in the suburbs. Whilst these negotiations were proceeding, no payments were made for the extra lines, and it was not till 1907 that the actual payment was made. It is this which has so swollen the amount now shown in the accounts, which is most of it a non-recurrent item. No further provision has been made this year for the depreciation fund, as so large an amount has been paid for maintenance, and the present amount of the fund stands at £48,080 separately invested. It is now necessary that I should say a few words regarding those lines for which concessions have been granted, but upon which no work has yet been done. The most important is that to the north, which we have called in previous reports the Barnagore line. This has been the subject of negotiation for about three years, and was entertained by us at the urgent request of the residents of the Cossipore Chitpore Municipality, the authority through whose area the line is to pass. After much negotiation matters were finally arranged with the Municipality, who desired the work to be carried out immediately, but when we were about to commence we were informed that it was necessary to have the assent of the Government of India. A committee was appointed on their behalf to consider the question, who, by a majority, came to the conclusion that the roads selected were not of sufficient width to carry our lines, and that permission could only be granted if the width of the road was increased to 40 ft. We could not agree to bear the expense of this improvement. The matter, therefore, is hung up for the present, but as this is the only outlet from Calcutta to the North, it is possible that in view of the requirements of the Calcutta improvement scheme, the authorities must before long adopt a more reasonable attitude. The other line is one in Howrah, which does not press, and is not undertaken at present by reason of alterations and strengthening being needed on a bridge over which our cars must pass. During the year under review there have been certain untoward incidents which have operated prejudicially to our business. It is a matter of common knowledge that a severe and widespread strike took place amongst the employees of the East Indian Railway. This interfered with the ordinary service on the railways and prevented the usual flow of passengers into Calcutta and was reflected upon the volume of our traffic. It also made the carriage of goods upon the railway difficult, and prevented us from obtaining our supplies of coal with the ease and regularity which ordinarily obtain.

As regards the incidents especially affecting our industry, one of the most important has been the obtaining from the Corporation permission to alter our method of running by having fixed stopping places for the cars. When the electric service was opened we stopped our cars at the request of any individual, without regard to the general convenience. This system was open to great abuse, and frequently the cars were stopped every few yards, which, when a quick service was being carried on, led to serious blockages of the cars, and rendered it almost impossible to maintain a service with anything approaching to regular intervals. In order to remedy this we applied to the Corporation to alter the bye-law which compelled us to stop at the will of any passenger, under heavy penalties. This salutary change was contested, and much time was lost before the alteration was made. It will now, however, be possible to render our service much more regular and convenient to the public.

Sir Henry Kimber, M.P., seconded the motion for the adoption of the report, which was carried unanimously.

STOCK EXCHANGE PROPRIETORS' MEETING.

The annual general meeting of Stock Exchange proprietors took place on Tuesday morning. After the excited gatherings recently held in the same room to discuss Stock Exchange reform, the proceedings were decidedly tame. Out of 1,777 proprietors who hold shares, perhaps there were a hundred present.

Mr. Edward Cazenove took the chair, and after the formal business had been concluded, he dealt gently with the bad state of business, which had resulted in the managers having a less excellent balance-sheet than usual to present to their fellow-shareholders. Mr. Cazenove's clear and lucid speech was concerned mainly with the domestic details connected with the Stock Exchange balance-sheet, but his passing reference to the uncertainty in regard to licences was punctuated with subdued applause, while the other five managers on the platform signified a grave assent. Mr. Cazenove attempted no forecast of the course of business, and, in moving the adoption of the report, expressed his willingness to answer any question that might be raised.

Mr. John Coles, one of the most respected fathers of the Stock Exchange, amused the meeting with the genial consolation that it would not be many years before the twenty-guinea subscribers dropped out of the ranks, to be replaced by those who paid at the higher rates. Leaving his tone of light banter, he told his fellow-members how an experience of forty-five years had taught him that times of depression alternated with days of good business, and he exhorted his hearers to take comfort from the consideration that the Stock Exchange would see activity return to it again. He suggested a further splitting of the shares to make them a more popular investment, and to enable the younger generation to acquire further interest in the Stock Exchange.

Mr. Baker dwelt upon the need for economy in every direction. He pointed out how expenses had increased while revenue fell away, and urged, amidst the increasing plaudits of his hearers, that the managers should follow economy as closely as possible, even as individual members had to practise it in these dull days.

Other speakers emphasised the same theme. The only point at which further expenditure was suggested lay in the more forcible advertisement in the public Press of the fact that members of the House are not allowed to advertise. One critic animadverted upon the cost of the electric lighting, another showed the price paid per Bank rate indicator, and a third pleaded for suspension of capital outlay upon the Stock Exchange strong-rooms.

Mr. Cazenove promised that the various matters raised should be duly considered by the managers, and, after the usual vote of thanks, the meeting dispersed. Several members noticed, however, that the fusion of interests between managers and Committee is apparently not yet fully developed, judging from one or two hints dropped by the speakers yesterday.

IND, COOPE AND CO.

The twenty-second ordinary general meeting of Ind, Coope and Co., Limited, was held on Monday at the Great Eastern Hotel, E.C., Sir Thomas Skewes-Cox (chairman of the company) presiding.

The Secretary (Mr. Charles E. Sheffield) having read the notice convening the meeting and the report of the auditors,

The Chairman, in moving the adoption of the report, said that, considering the stormy times through which they had been passing, coupled with the effect of bad trade and excessive taxation, they could not but agree that the result of the past year's working was, perhaps, a little more satisfactory than the most optimistic of them could have expected. The suspense account amounted to £773,849, against £655,522 in the previous year. The board regretted the additions they had had to make to this account, but they had thought it wise, at all events for the past year, to follow the plan laid down in the previous 12 months, and to carry to suspense account the depreciation and other charges, and to set them out clearly in the report. When the reorganisation of the capital had taken place these depreciations, which now amounted annually to an abnormal sum, would be considerably reduced. After dealing with other items in the balance-sheet, he said that the gross profit on brewing was £386,182, against £416,671 in the previous year. This difference was accounted for by the slight diminution in their sales, which amounted to 2·2 per cent., and had principally arisen in London, where trade had been in a most unsatisfactory condition. Although the wine and spirit business had been somewhat curtailed at home through lack of funds to develop it properly, it still yielded a handsome profit. It was thought that, by working this business separately from the company, with additional capital brought into it, a much larger return might be obtained and increased business done, while, at the same time, if the capital now locked up in the wine and spirit business in stocks and book debts were released it would be of considerable benefit to the company, and help to replenish, to some extent, the working capital which had been so largely drawn upon of late years by the repayment of depositors. Negotiations were well in progress in this connection. As to the reorganisation and cutting down of the capital, which had had the careful consideration of the shareholders' committee and of the directors, he said that, owing to the Government Licensing Bill, it was quite impracticable to prepare a scheme with any idea of finality, but a scheme was under consideration, and would be proceeded with as soon as possible. The board believed that if the Government Bill passed in anything like its present form, there could be no hope for the future of the company. Several shareholders having expressed the opinion that the costs which, under the Judge's ruling, were chargeable to the directors should be reimbursed them, the board would accept the suggested motion with that object, and they hoped that the proposal would be unanimously agreed to. (Hear, hear.)

Mr. A. W. Ruggles-Brise, in seconding the adoption of the report, said that the board was doing its "level best" to make the company a dividend-paying concern. He had no objection to friendly criticism, but he trusted that the shareholders, in the present crisis of the trade, would do what they could to help to increase the sales of their two breweries.

After considerable discussion the motion was adopted, with a number of dissentients.

Mr. Bailey moved, and Mr. Peach seconded, a resolution to the effect that the defendants in the action of "Normandy v. Ind, Coope, and Co., and others," should be reimbursed by the com-

pany the costs and expenses incurred by them in their defence, and authorising the board to pay such costs and expenses as between solicitor and client.

Mr. Normandy objected to the company's paying the directors' costs in the action, and reminded the meeting that the judgment severely censured the conduct of the directors, and ordered them to pay their costs.

The resolution was carried, notwithstanding considerable opposition.

Scottish Life Assurance Company.—In 1907 this vigorous young life office earned a nett premium income of £140,299, of which £25,513 seems to have come from new premiums, including £6,393 single premiums. Interest income gave £49,767 and claims took £43,153. At the end of the year the life funds showed an increase of £109,310 at £1,305,273. Expenses and commissions took nearly 13 per cent. of the premium income. A dividend at the rate of 8 per cent. per annum was paid to the shareholders on the paid up capital of £50,000. The company does an accident and general business, which, however, is quite small.

Motor Union Insurance Company.—The accounts are made up to December 24, 1907, instead of to the end of the year, and premium income of £36,366 besides an income from investments of nearly £557. Claims and commissions paid and outstanding took £15,757 and £12,122 is set aside against unexpired risks. Out of the available balance a dividend of 5 per cent. is declared on the paid-up capital of £12,000. A sum of £20,000 has been invested in trustee securities, but the total of the balance-sheet is under £30,000.

Co-operative Insurance Society.—Life, accident, burglary, fidelity and fire businesses are all embraced in this company's field, and the aggregate premium income for 1907 from the whole of the branches was £73,210 or £21,888 more than in 1906. At the end of the year the several funds were increased by £28,070. Such figures indicate that the business is small in every one of the branches, and we are not sure that we grasp fully the principles on which it is conducted, but the company has been in existence for 40 years.

Refuge Assurance Company.—The larger portion of this company's business is in industrial insurance, but it has also a very substantial ordinary branch of life insurance, the accumulated funds of which amounted to £3,785,150 at the end of last year as against a fund of £1,449,359 gathered up by the industrial branch. The premium income from both together was £2,340,040 last year or £129,948 more than in the previous year, and the total funds were increased by £631,208 to £5,534,509. A surplus of £143,052 was brought out on the annual valuation in the industrial branch, of which £9,671 went to the shareholders, the balance being retained as reserve.

Abstainers' and General Insurance Company.—In its ordinary branch this company gathered a premium income of £71,217 and its industrial branch one of £6,944. It also did a small business in leasehold redemption and fire, burglary and fidelity insurance, which seems to have been only begun towards the end of the last year. The total of the balance-sheet on December 31 last was £456,879, and £371,080 of this was invested in mortgages within the United Kingdom.

United Kingdom Temperance and General Provident Institution.—Last year this life office collected £582,113 nett in premiums, including £45,606 of new premiums. Interest and dividend income came to £302,602, the entire income being about £886,000. Claims and surrenders took £549,000 of this and expenses and commissions together £70,628. The accumulated funds at the end of the year amounted to £8,487,334. The directors have put aside £100,000 to an investment reserve fund, and that seems little less than the amount by which the life funds proper were increased at the year's end.

National General Insurance Company.—This is only a beginner, one of the new companies brought into existence in such numbers of late years, but it took over the business of the National Burglary and Fire Office, Limited, during the past year, and has been doing business on its own account since August last. Its board is able to show a premium income of £46,426 nett, and £48,815 has been received as premiums on the issue of the share capital, so that after paying and providing for claims and setting aside £15,475 against unexpired risks, there is enough left to cover the preliminary and formation expenses, £13,287, and to provide the purchase consideration payable to the National Burglary and Fire Office absorbed, besides putting aside £2,000 to the cost of reorganising the business taken over, these items altogether taking £40,720, and leaving £7,266, of which £5,000 is carried to general reserve, £2,000 to investment reserve and £266 to the new account. Including the paid-up capital, the total funds come to £71,436.

Portland Cement Company of Utah.—Trading account showed a profit of £19,801 for year ended December 31, 1907. After deduction of charges, interest, and tax, £12,176 remains as nett profit. With £10,414 brought in, £22,418 is carried forward after paying the small amount of £343 for preference dividend. Property, &c., figures for £109,509 and stock is £14,138. Trade balances are small, debtors at £3,926 being £1,618 the right side, and cash is smaller still at £350. Bank loan has been reduced during the year by £15,721 to £3,626.

THE MEXICAN CENTRAL RAILWAY SECURITIES COMPANY, LIMITED.

NOTICE IS HEREBY GIVEN that a General Meeting of the Holders of the "A" Debentures and "A" Debenture Stock and "B" Debentures and "B" Debenture Stock of the above-named Company (hereinafter called "The Securities Company") constituted by a Trust Deed dated the 1st of March, 1899, and made between the Securities Company of the one part and the Right Honourable Charles William Baron Hillingdon, the Right Honourable John Baron Revelstoke and Henry William Smithers of the other part will be held at Winchester House, Old Broad Street, in the City of London on Monday, the 4th day of May, 1908, at 12 o'clock noon for the purpose of considering and if thought fit passing an Extraordinary Resolution (1) varying the provisions of the said Trust Deed (*a*) in such a way as to enable the Trustees thereof with the sanction of an Extraordinary Resolution of the said "A" and "B" Debenture Holders and Debenture Stock Holders to deposit the Consolidated Mortgage Bonds subject to the trusts of the said Trust Deed with any Banker or firm, English or Foreign, for the purposes of or in connection with or in contemplation of any plan for the reorganisation of the Mexican Central Railway Company, Limited, or any arrangement affecting any such Bonds whether at the time of the deposit any plan may have been formulated or not or with the object of supporting or facilitating any such plan or facilitating negotiations for the preparation of a plan for protecting the interests of the holders of the said Consolidated Bonds and also (*b*) in such a way as to authorise and direct the said Trustees without any such sanction as aforesaid to transfer and deliver up forthwith all the said Bonds now subject to the trusts of the said Deed upon the terms of an Agreement dated the 6th of April, 1908, and made between Kuhn, Loeb and Co., Speyer and Co., Ladenburg, Thalmann and Co., Hallgarten and Co., Speyer Brothers, Berliner Handelsgesellschaft, and Bank für Handel und Industrie, of the first part, and the holders of Bonds or Stock therein mentioned who shall become parties thereto of the other part, and (2) authorising the said Trustees to concur with the Securities Company in executing such Supplemental Trust Deed (if any) and taking such other steps as may be deemed expedient for the purpose of giving effect to any arrangement for the exchange of the Consolidated Bonds for the Bonds, Stocks or Shares of any Company taking over the property of the Mexican Central Railway Company or the securities and shares issued by that Company or any of them; (3) Providing for the constitution of a Standing Committee of holders of "A" and "B" Debentures or Debenture Stock with power by a majority to require the holders to exercise or abstain from exercising any power or discretion vested in them by reason of their being holders of the said Consolidated Bonds.

This Notice is given in pursuance of the provisions contained in the Fourth Schedule to the said Trust Deed.

Copies of the said Deposit Agreement may be inspected or obtained at any time during business hours before the Meeting at the Office of the Securities Company and an explanatory circular has been forwarded to the holders of registered "A" and "B" Debenture Stock, and can be obtained by holders of "A" and "B" Debentures on application at the Company's Office at 3, Gracechurch Street, London, E.C.

Every holder of "A" Debentures or "B" Debentures intending to be present and vote at the Meeting must either produce the Debentures in respect of which he proposes to vote at the Meeting or not later than 12 o'clock on the 2nd day of May, 1908, deposit his Debenture or Debentures at the office of the Company, with a statement in writing of his name and address or a certificate from a Banker or Trust Company in a form obtainable at the office of the Company, to the effect that his Debentures have been lodged with such Banker or Trust Company; whereupon a voting ticket will be issued entitling the depositor to attend and vote in respect of such Debenture or Debentures at any meeting or poll named in the ticket and any adjournment of such meeting and any poll to be taken in consequence thereof, and after the transaction of the business of the meeting or the poll, if any, the Debentures will be returned upon surrender of the voting tickets.

Registered holders of Debenture Stock and holders of the above-mentioned voting tickets may appoint proxies on forms which can be obtained at the office of the Company, and should be lodged not later than 12 o'clock on the 2nd May, 1908. Each holder of Debentures or Debenture Stock is entitled to one vote in respect of every principal sum of £100 held by him.

Dated the 10th day of April, 1908.

By Order of THE MEXICAN CENTRAL RAILWAY SECURITIES COMPANY, LIMITED.
FREDK. M. SPANKIE,
Secretary.

Offices of the Company—
3, Gracechurch Street,
London, E.C.

To Solicitors, Agents, and Others having control of Capital MORTGAGES.—Wanted, Agents for placing high-class Mortgages in Business Premises, Offices, and Residential Properties in British Columbia. Interest ranging from 6 to 8 per cent. Fifty per cent. margin in conversative values. For full particulars apply, Julius H. Griffith, 161, Dashwood House, New Broad Street, London. Appointment only by letter up to departure—end of April—for Vancouver.

MEXICAN CENTRAL RAILWAY COMPANY, LIMITED, NATIONAL RAILROAD COMPANY OF MEXICO.

To the Holders of the following Securities:—

MEXICAN CENTRAL RAILWAY COMPANY, LIMITED.
- Priority Five per Cent. Bonds.
- First Mortgage Seven per Cent. Bonds and Scrip Assented.
- Consolidated Mortgage Four per Cent. Bonds.
- First Consolidated Income Bonds and Scrip.
- Second Consolidated Income Bonds.
- Registered Income Bonds and Scrip.
- Stock.

NATIONAL RAILROAD COMPANY OF MEXICO.
- Preferred Stock.
- Second Preferred Stock.
- Common Stock (Old).
- Deferred Stock.

Referring to our previous notice dated April 6th, the undersigned have consented to act as Readjustment Managers of a Plan of Readjustment and Union of Mexican Central Railway Company, Limited, and National Railroad Company of Mexico through the constitution of a new company, under the name of Ferrocarriles Nacionales de Mexico (National Railways of Mexico), to be controlled by the Mexican Government by stock ownership.

The New Company is to authorise the following bonds and shares:—

a. Prior Lien Four and One-Half per Cent. Sinking Fund Redeemable Gold Bonds for $225,000,000 United States Gold.

b. General Mortgage Four per Cent. Sinking Fund Redeemable Gold Bonds for $160,000,000 United States Gold, unconditionally guaranteed, principal and interest, by the Republic of Mexico, by endorsement on each bond.

c. Non-Cumulative Four per Cent. First Preferred Shares for 60,000,000 Mexican Gold Pesos or $30,000,000 United States Gold.

To assure to the holders of First Preferred Shares the payment of semi-annual dividends of 1 per cent. for the period of three years from January 1, 1908, to the extent to which the net profits of the New Company which shall first be applied for that purpose shall not be sufficient to make such payment, provision is to be made for the setting aside by the New Company, as a separate fund, of $1,800,000 Prior Lien Bonds and $1,200,000 Guaranteed General Mortgage Bonds, or, in case of a sale thereof, then a sufficient amount of the proceeds thereof.

d. NON-CUMULATIVE FIVE PER CENT. SECOND PREFERRED SHARES for 250,000,000 MEXICAN GOLD PESOS, or $125,000,000 UNITED STATES GOLD.

e. COMMON SHARES FOR 150,000,000 MEXICAN GOLD PESOS, or $75,000,000 UNITED STATES GOLD.

TABLE SHOWING BASIS OF EXCHANGE OF SECURITIES.

Deposited Bonds and Stocks.	Each $1,000 par value of old securities is to receive					
	Cash.	4½ % Prior Lien Bonds.	Guaranteed 4 % General Mortgage Bonds.	First Preferred Shares.	Second Preferred Shares.	Common Shares.
Mexican Central Railway Company, Limited—	$	$	$	$	$	$
Priority 5 % Bonds		[illegible]	475			
First Mortgage 7 % Bonds and Scrip (assented)		1,000				
Consolidated Mortgage 4 % Bonds		600	325		75	
First Consolidated Income Bonds and Scrip					1,100	
Registered Income Bonds and Scrip					1,100	
Second Consolidated Income Bonds					1,000	
Stock					1,000	
National Railroad Company of Mexico—						
Preferred Stock	100			1,000		
Second Preferred Stock					1,100	
Common Stock (Old)					733⅓	333⅓
Deferred Stock						1,000

For further particulars with respect to the rights of the holders of the respective classes of Bonds of the new Company, and certain rights reserved to the new Company to issue additional Bonds of each class, ranking pari passu with the other bonds of the same class, as well as for additional details touching the exchange of securities, reference is made to the plan and agreement of readjustment and union, copies of which may be obtained at the Office of any of the Depositaries.

For a full statement of the rights of the holders of the respective classes of shares of the new Company reference is made to the decree of the Federal Government of the Republic of Mexico, dated July 6, 1907, a copy of which has been filed with each of the Depositaries, and can be inspected at the Office of any of the Depositaries.

Holders of Securities and Stock of MEXICAN CENTRAL RAILWAY COMPANY, LIMITED, called for deposit, who desire to become parties to the plan, must, on or before MAY 1, 1908, deposit their Securities and Stocks, under the plan with CENTRAL TRUST COMPANY OF NEW YORK, No. 54, Wall Street, New York, or with its Agents for that purpose in Boston, KIDDER, PEABODY and CO., 115, Devonshire Street, Boston.

Holders of Stocks of NATIONAL RAILROAD COMPANY OF MEXICO who desire to become parties to the plan must, on or before said May 1, 1908, deposit their Stocks under the plan with THE MERCANTILE TRUST COMPANY, No. 120, Broadway, New York.

Deposits of Stocks and Securities of both of said companies also may be made:

In London with: J. HENRY SCHROEDER and CO., 145, Leadenhall Street, E.C.; SPEYER BROTHERS, 7, Lothbury, E.C.; GLYN MILLS CURRIE and CO., 67, Lombard Street, E.C.; SWISS BANKVEREIN, 43, Lothbury, E.C.

In Amsterdam with: HOPE and CO., TEIXEIRA DE MATTOS BROS.

In Mexico with: BANCO NACIONAL DE MEXICO.

No securities will be accepted for deposit unless in negotiable condition. First Consolidated Income Bonds of the Central Company must carry all coupons maturing after July 10, 1892; Second Consolidated Income Bonds must carry all coupons; other Bonds must carry all coupons maturing after January 1, 1908; and all Certificates of Stock must be accompanied by proper transfers and assignments executed in blank. For securities deposited proper certificates of deposit will be delivered, and on such deposit the depositor will become bound by all the provisions of the Plan and Agreement of Readjustment and Union, to the exact terms of which reference is made, and upon the terms of which only will deposits be accepted.

The Plan has been approved by the Government of Mexico, and, subject to the sanction of its debenture-holders, by the Board of Directors of the Mexican Central Railway Securities Company, Limited, which holds over $37,500,000 Consolidated Mortgage 4 per Cent. Bonds of the Mexican Central Railway Company, Limited, and by the holders of a majority of the outstanding Stock of the Mexican Central Railway Company, Limited, and of the National Railroad Company of Mexico, and by the respective Boards of Directors of the two Companies last named.

Dated April 15th, 1908.

"THE INVESTORS' REVIEW" Office,
NORFOLK HOUSE, NORFOLK STREET STRAND, W.C.

To the PROFIT-SHARING SECURED NOTEHOLDERS of the

UNDERGROUND ELECTRIC RAILWAYS COMPANY OF LONDON, LIMITED.

The Directors of the Underground Electric Railways Company of London, Limited, have carefully considered the best means for meeting the Company's financial requirements, and for dealing with its 5 per Cent. Profit Sharing Secured Notes, which mature 1st June, 1908. The Directors have, in consultation with Messrs. Speyer and with Advisory Committees in London and Amsterdam, formulated a Scheme of readjustment which they, Messrs. Speyer and the Committees, recommend to your consideration and approval.

The main features of the Scheme may be briefly summarised as follows:—

The Company is to create the following securities:—

£1,000,000 5 Per Cent. Prior Lien Bonds to Bearer, due 1st November, 1920.

(Redeemable at par in whole or part, at the Company's option, at any time on six months' notice.)

Principal and interest will be payable in London in Sterling, or at the holder's option in New York at the exchange of $4.86·66 per £, or in Frankfort on Maine at the exchange of Mks. 20.40 per £, or in Amsterdam at the exchange of Fl. 12.12 per £.

Interest will run from the 1st May, 1908, and will be payable half-yearly on the 1st May and 1st November. The rate of interest will be such as to yield a clear 5 per cent. per annum after payment of British income-tax.

The Trust Deed will, under carefully drawn restrictions, empower the Company to issue an additional £250,000 Bonds, ranking *pari passu* with the other Prior Lien Bonds for the time being outstanding.

The Bonds are to be secured by a first charge upon the collaterals now deposited as security for the Profit Sharing Secured Notes, with an addition of £3,500,000 (nominal) of Shares of the Baker Street and Waterloo, Great Northern, Piccadilly and Brompton, and Charing Cross, Euston and Hampstead Railway Companies, and a charge (without power of sale or foreclosure) on the Company's Power House undertaking, subject to the now authorised Power House First and Second Debenture Issues or any reissue thereof or reborrowing to redeem such Debentures.

£3,000,000 4½ PER CENT. BONDS OF 1933 to Bearer, due 1st January, 1933.

(Redeemable at par in whole or part, at the Company's option, at any time on six months' notice.)

Principal and interest will be payable in London in Sterling, or at the holder's option in New York at the exchange of $4.86·66 per £, or in Frankfort on Maine at the exchange of Mks. 20.40 per £, or in Amsterdam at the exchange of Fl. 12.12 per £.

Interest will run from the 1st December, 1907. The first coupon will represent seven months' interest, and will be payable one month after the Scheme becomes binding. Subsequent coupons will be payable half-yearly on the 1st January and 1st July. The rate of interest will be such as to yield a clear 4½ per cent. per annum after payment of British Income Tax.

The 4½ per Cent. Bonds will be secured by a charge on the same collaterals as the Prior Lien Bonds, similar to but ranking immediately after the charge of those Bonds.

The Trust Deed will provide, *inter alia*, that, in the event of four consecutive coupons being at any one time in arrear and unpaid, the charge for securing the 4½ per Cent. Bonds shall become immediately enforceable, in which event the Trustee may and, upon request of bearers of a majority in value of the outstanding amount of such Bonds, shall (subject to the rights of the Prior Lien Bondholders) realise the Stocks and Shares deposited as collateral.

£5,200,000 6 PER CENT. INCOME BONDS to Bearer, due 1st January, 1948.

(Redeemable at par in whole or part, at the Company's option, at any time on six months' notice.)

Principal and interest will be payable in London in Sterling, or at the holder's option in New York at the exchange of $4.86·66 per £, or in Frankfort on Maine at the exchange of Mks. 20.40 per £, or in Amsterdam at the exchange of Fl. 12.12 per £.

The Trust Deed will provide for payment of the interest on the Income Bonds (which is to be non-cumulative) in semi-annual instalments out of the profits of each half-year available for the purpose and remaining after making or providing for all other payments on revenue account for such half-year and setting aside such sums for reserve as the Directors may think expedient. The full rate of interest will be such as to yield a clear 6 per cent. per annum, free of British Income Tax.

The holders of the Income Bonds are to be entitled, as far as the law will permit, to attend and vote at all Meetings of the Company, but they are not to vote on any resolution for putting the Company into liquidation. They are to have eleven votes for each £100 of principal of the said Bonds.

TERMS OF CONVERSION.

Noteholders will be asked to exchange their Notes as to 40 per cent. of their nominal value into 4½ per Cent. Bonds of 1933 at par, and as to 70 per cent. of their nominal value into Income Bonds at par, the exchange taking place as on the 1st December, 1907.

The 4½ per Cent. Bonds of 1933 and the Income Bonds given in exchange for those Notes which are payable in United States currency, will be issued in even amounts of Sterling, the exchange being made at the rate of $4.86·66 to the £ sterling, and Scrip will be given for the resulting fractional parts, convertible into new Bonds when presented in amounts of £20 or multiples thereof.

The following table shows the way in which it is proposed to deal with the new securities:—

Application of Proposed New Securities.

	5 per cent. Prior Lien Bonds.	4½ per cent. Bonds of 1933.	6 per cent. Income Bonds.
To Holders of £3,599,268 9s. 8d. 5 per cent. Profit Sharing Secured Notes	—	£1,439,707 7 10	£2,519,487 18 9
To Holders of $16,550,000 5 per cent. Profit Sharing Secured Notes (taken at $4.86·66) ..	—	1,360,292 12 2	2,380,512 1 3
Reserved for Special Interest Fund	—	200,000 0 0	300,000 0 0
Underwritten by Messrs. Speyer and their friends	£1,000,000 0 0	—	—
	£1,000,000 0 0	£3,000,000 0 0	£5,200,000 0 0

The Coupon due the 1st December, 1907, on the Notes, and the seven months interest, due 1st July, 1908, on the 4½ per cent. Bonds of 1933, will be paid in full in cash out of the proceeds of the issue of Prior Lien Bonds.

SPECIAL INTEREST FUND.

The estimated net revenues of the Company would scarcely warrant the Company in undertaking a definite obligation to pay the interest during the first few years on the 4½ per cent. Bonds of 1933, but in order that the Noteholders may not suffer so serious a reduction in their income as would otherwise be the case during the further development of the enterprise, Messrs. Speyer Brothers, of London, Messrs. Speyer and Co., of New York, and Mr. Lazard Speyer-Ellissen, of Frankfort on Maine, have by Agreement with the Company dated the 7th April, 1908, undertaken to purchase on or before each 1st January and 1st July, commencing with the 1st January, 1909, such an amount of 4½ per Cent. Bonds and Income Bonds at the price and rate of £300 and accrued interest on the 4½ per Cent. Bonds for £200 (nominal) of 4½ per Cent. Bonds, and £300 (nominal) of Income Bonds (taken together) as will by the proceeds make good any deficiency in the full interest for the preceding half-year on the 4½ per cent Bonds which the revenues of the Company to the close of such half-year remaining after making or providing for all payments on revenue account (except interest on the Income Bonds) for the same half-year, but before providing for reserve, are insufficient to meet. Messrs. Speyer, however, stipulate that they are not to be liable under such undertaking for more than £300,000 in all (being the purchase money of £200,000 of 4½ per Cent. Bonds and £300,000 of Income Bonds). The Company are to set aside the purchase money of the said Bonds, and apply it solely for payment of the interest on the 4½ per cent. Bonds.

The Directors are of opinion that the Special Interest Fund of £300,000 wil be sufficient to make up any deficiencies down to and including the 1st July, 1912, and that thereafter, if not before, the surplus income of the Company will be sufficient to meet all the Company's fixed charges.

As Messrs. Speyer agree to purchase the above Bonds at the price named from a desire to assist the Company in arranging with the Noteholders, and their agreement to do so is conditional upon the scheme becoming binding, all Noteholders are urged to accept the Scheme and deposit their Notes under the Deposit Agreement referred to below without delay.

SALE OF PRIOR LIEN BONDS AND APPLICATION OF PROCEEDS.

The proposed issue of £1,000,000 Prior Lien Bonds will be offered to the Noteholders and Shareholders for subscription at the price of £93 per £100 Bond as soon as may be after the Scheme becomes binding, the Bonds to carry interest from the date of payment of the final instalment in each case, and the whole of such proposed issue has been underwritten by Messrs. Speyer and their friends at the foregoing price, conditionally on the Scheme being accepted by the Noteholders and Shareholders and becoming binding.

An Agreement dated 7th April, 1908, has been entered into between Messrs. Speyer Brothers, Messrs. Speyer & Co., Mr. Lazard Speyer-Ellissen, and Messrs. Teixeira de Mattos Bros., all therein referred to as "the Readjustment Managers," of the first part, those holders of Profit Sharing Secured Notes who deposit their Notes under that Agreement of the second part, and the Depositaries referred to below of the third part. This Agreement provides for the deposit of Notes for the purpose of better ensuring the carrying of the Scheme. The Directors, however, reserve the right to decide whether, in view of the number of Notes deposited under this Agreement or otherwise, they are justified in proceeding with the Scheme.

DEPOSIT OF NOTES.

Noteholders are invited to deposit their Notes, under the terms of the foregoing Agreement, on or before the 1st May, 1908, with one or other of the following Depositaries, viz.:—

The London & Westminster Bank, Limited, Lothbury, London, E.C.;

The Guaranty Trust Company of New York, No. 28, Nassau Street, New York;

The Associatie Cassa, Amsterdam;

Or with Mr. Lazard Speyer-Ellissen, Frankfort on Maine, as Agent for the first-named Depositary.

Under the above Deposit Agreement negotiable receipts for the deposited Notes will be issued by the respective Depositaries, which, if the Scheme becomes binding with or without modification, will be exchanged in due course for the new securities mentioned above, stamped with the British Stamp duty where necessary. If the Scheme does not become binding, receipt holders are, on being so requested by advertisement, to surrender their receipts and withdraw the Notes and coupons represented thereby (or a like amount of Notes and coupons).

Owing to there being no other means of binding a dissentient minority of the Noteholders, it is intended to proceed with the scheme under the Joint Stock Companies Arrangement Act, 1870.

Copies of the complete Circular (of which this notice is only a synopsis), to which the Deposit Agreement and the full Scheme are scheduled, may be obtained at the Offices of the Company in London, or at the Offices of the above-mentioned Readjustment Managers, where copies of the Agreement as to the Special Interest Fund can also be inspected.

By order of the Board,
W. E. MANDELICK,
Secretary.

14th April, 1908.

Referring to the foregoing Notice, the undersigned recommend to the Noteholders the prompt acceptance of the Company's proposals, and urge them to deposit their Notes on or before 1st May, 1908, with one or other of the Depositaries mentioned in the foregoing Notice.

As the Company's Circular contains further information of importance to the Noteholders, they are advised to obtain copies thereof at the Office of either of the undersigned.

SPEYER BROTHERS.
SPEYER & CO.

London and New York,
18th April, 1904.

The Investors' Review

EDITED BY A. J. WILSON AND SON.

Vol. XXI.—No. 538. New Series. SATURDAY, APRIL 25, 1908. (Registered as a Newspaper.) Price 6d.

Replies to Inquiries about Stocks and Shares.

These are given each week in the INVESTORS' REVIEW on the following terms:—

One Reply to **One** Question — **One Shilling.** Any number of questions may be put and will be answered at the rate of **One Shilling** each. The questions should be numbered and a copy kept, as securities cannot be named with comments in the printed replies.

For a fee, however, of **One Guinea** per annum paid in advance, a **Key** to the previous week's replies will be sent early in the following week to Subscribers.

Deposits of "Query Money" may be made in advance, and will be acknowledged in the "Answers" column. Notice of exhaustion will also be given there.

If tempted to speculate by circularising brokers Readers should pause and ask the INVESTORS' REVIEW first; its reply will probably save them from many a loss.

Telegrams advising about new securities cost **Half-a-Crown** each, plus cost of the telegram.

Private Letters in answer to inquiries can be had if desired. The minimum charge for such letters is **Ten Shillings,** but for this three questions will be answered if desired. For every question beyond three replied to in any one letter the charge is **Half-a-Crown per question.**

Correspondents can have their lists of investments overhauled and advised upon by letter on precisely the same terms.

Also models of grouped investments will be supplied according to directions given and on the following terms, each list being distinct and never a mere repetition:—For any number of stocks up to **Five, One Guinea;** for from **Six to Ten** securities **Two Guineas,** and so on at the rate of **One Guinea** for each **Five.**

Deposits may be made for letters just as for replies given in the Paper, but letters are never volunteered.

PUBLISHERS' NOTICES.

The Investors' Review is a Subscription Journal, and will be delivered to subscribers in London by the first post, or sent to the country and abroad by the first mail, on Saturday Mornings on the following terms:—

One Year - £1 1s. Six Months - 11s. Three Months - 5s. 9d.

Short of Three months the Price is **6d.** per Copy *Inland*, and **6½d.** *Abroad, Post Free.*

Subscribers can change their address as often as they please, but notice of change must reach the Publishing Office not later than the First Post on Friday Morning.

For a fortnight before the Subscription expires the **Investors' Review** will be forwarded in a different coloured wrapper.

Cloth cases for binding the Half-Yearly Volumes price **1s. 6d.** postage **4d.** extra. Bound Volumes **15s. 6d.,** or **16s. 3d.** post free.

Cheques and P.O. Drafts should be made payable to

CLEMENT WILSON,
"Investors' Review" Office,
Norfolk House, Norfolk Street,
London, W.C.

The Editors cannot undertake to return rejected communications.

Letters from correspondents must, in every case, be authenticated by the name and address of the writer.

The Editors desire it to be understood that a charge is made for the insertion of reports under the heading of Company Meetings, and they cannot accept responsibility for statements made therein.

The Investors' Review.

Happy Denmark.

This little State is not burdened with an empire, and its budget consequently presents no items that excite foreboding about its future. The people live their own lives and appear to be happy and prosperous. This, at least, is the inference to be drawn from an interesting report furnished to the Foreign Office by Mr. J. C. T. Vaughan, Secretary to his Majesty's Legation at Copenhagen. It contains a full review of the financial position of the kingdom dealing with the sources of its revenue, the directions in which the money gathered in is spent and the conditions of the National Debt, with other items of information more or less purely domestic in character. Altogether the revenue of Denmark was £7,057,000 in 1906-7 and that showed a great jump from £4,487,000 the year before. This, however, is not all revenue, since £1,111,000 of a loan raised for the National Mortgage Bank appears to be included in these figures, so that the real revenue for 1906-7 was under £6,000,000 and the expenditure only about £5,750,000, deducting the State Mortgage Bank loan from both sides. This showed a surplus of about £733,000 and is the largest for the five years whose figures are grouped. Indeed two of these years yielded a deficit of about £100,000 each, but for all that the accumulated balances in the Treasury at the end of the latest return amounted to £2,095,000. The actual revenue is small from each particular category as is to be expected from a country whose total population is only about 2,500,000, but direct taxes altogether, including income and capital taxes, which gave nearly £496,000, yielded £1,164,000, and indirect taxes £2,856,000 or thereby, the Customs revenue alone having produced about £2,180,000. It shows a progressive increase. Then the Government railways gave £380,000 nett, which was rather less than in 1905-6, but considerably more than the estimate, and the Post Office yielded over £95,000 nett, domains and forests £52,000, the lottery £86,000, and interest on various State assets over £48,000. Judicial fees produced £226,000, and miscellaneous sources produced £253,000. Most of the railways appear to be owned by the State, and a profit-sharing system was introduced in connection with them which involved a charge of from £56,000 to £63,000 in each of the past three years, but this does not seem to have satisfied the majority of the railway employees, and a Bill has been presented to the Rigsdag by which it is proposed to raise wages and abolish profit-sharing, except in the case of the highest classes of officials. The gross traffic receipts of the railways amounted to £2,183,000 in 1906-7, and the working expenditure absorbed £1,803,000.

Expenditure is just as suggestive as revenue of the quiet, steady-going character of the administration, and the first item set down is the cost of the funded debt, which was last year £546,000. Interest on the foreign debt alone took £301,000 of this, while certain amounts were assigned to repayments both of the foreign and the internal debt, which, including the above-mentioned Mortgage Bank loan, brought the debt aggregate up to little more than £14,000,000. The Government also spends a little money, about £25,000 per annum in all, on subsidies to various trading steamship lines, including one to Parkeston and one to Grimsby, and the Civil List of the King and other royal grants represent an outlay of only £64,178. Amongst the large items of administrative expenditure the War Office stands first with an

outlay in the past year of less than £664,000, and the navy took less than £417,000. Public worship and instruction took £511,000, or a good deal more than the navy, and the Ministry of the Interior absorbed £331,000, while justice took away upwards of £345,000, and £189,000 was devoted to agriculture. In the budget also considerable capital expenditure on the railways seems to be included as well as on other public works such as harbours, telegraphs and telephones, the total assigned to these altogether being about £515,000 in the past year. These figures are exclusive of what is called the "extraordinary expenditure," but its total under all heads was little more than £315,000, of which public works took £93,000, agriculture £62,000 odd, justice £27,000, the army £40,000, and the navy rather over £39,000. Everything is thus on quite a moderate scale and obviously well within the country's resources. We do not hear anywhere that Denmark is going to build a *Dreadnought*, but the State does a great deal of useful work which is left to other agencies in other countries, at any rate in the United Kingdom, and, therefore, a good deal of the debt is merely capital expenditure upon public works. Thus in 1906-7 the total outlay upon railway construction was about £430,000, but the data before us do not permit the segregation of this sum between capital and revenue. Denmark has an old age pension system, which, however, does not lay much of a load upon the taxpayer, and in a country where there are so few destitute people the charge is never likely to become serious. In the past year £213,000 was paid under old age pensions and an equal sum was contributed by the communes. Presumably there is no poor law in Denmark, and that being so the maintenance of a pension system may be justifiable. Grants are also given to sick clubs and amounted last year to £94,445, while the State has begun to contribute towards a seamen's insurance fund against accidents, contributing half the amount of the premiums paid by sailing ships to this end. It is pointed out by Mr. Vaughan that the figures in the budget do not represent the true expenditure of the State upon education, since between £111,000 and £166,000 is annually drawn from various funds in the possession of different institutions such as the University, secondary schools, &c. It is, moreover, computed that the towns and parishes in Denmark contribute something like £666,000 per annum towards the schools. Adding all these items together it will be found that the cost of education represents a higher aggregate expenditure in Denmark relatively to the other outgoings of the country than any large country in Europe can show.

Local finances are also dealt with to some extent, and from the total exhibiting this we gather that the revenue of Copenhagen in 1905-6 was about £172,000 below the expenditure, but that is probably because expenditure includes some of the loan money which the city has been raising in London. At any rate Copenhagen's solvency is well assured, since against assets of £8,848,000 the city has liabilities of only £5,764,000, that is, as on March 31, 1906, and other towns, parishes and communes are in an equally happy position, the assets of the group classed as "other towns" being put at £5,809,000 on the same date, against liabilities of £3,555,000. Parishes again show assets of £3,353,000 against liabilities of £1,482,000, and communes assets of £1,260,000 against liabilities of £729,000. And necessarily year by year the wealth and prosperity of these local communities tend to increase because, living, as they do, in complete peace with all their neighbours, and possessing the land, the inhabitants of the country make a great deal more out of their soil than we do. To help them still further the Mortgage Bank, already alluded to, has been organised, and has raised £1,111,000 of capital under the guarantee of the State, which also gives it power to borrow abroad against its assets, the idea being that money will thus be procured on comparatively low rates of interest and lent on correspondingly easy terms to borrowers on mortgage within the country. Up to the present the State seems to have been lending direct upon mortgages to the owners of small holdings, and the repayment by sale of the assets these mortgages represent, or by redemption, has been included under the heading "Realisation of assets," the total of which is likely to be diminished in future budgets because the State-held mortgages will be transferred to the State Mortgage Bank.

Estimates alone have been given of the National Budget for the current year, and they show increases under many heads, but the charge on the foreign debt for interest is steadily coming down as it gets paid off, £94,455 per annum being devoted to its redemption. The cost of managing the foreign debt, by the way, is only £833 per annum, and adding in the cost of managing the internal debt—another £278—only £1,111 altogether annually goes in this direction. Repayment of internal debt gets less than £16,000 per annum, but it is of a much smaller amount than the foreign debt, and in the meantime little or any new borrowing, directly by the Royal Government, at least, appears to be in contemplation. Slight increases are shown in the estimates for 1908-9 in the expenditure of the great departments, Interior, War, and Marine; but all three together, assuming these estimates to be fulfilled, only consume about £1,737,000, of which the War Office will take £733,000. Most of the growth revealed or estimated for is doubtless automatic, increase in pay accounting for a good part of the additional outlay of the War Office, which also provides nearly £6,000 extra for remounts and nearly £9,000 for camping expenses and allowances. No increase is made in the number of men under arms, and £26,000 of the additional sum required by the Navy is in order to buy a submarine. Perhaps changes of a more costly description may come after the Committee on National Defence, which has been setting for five years back, has made its report. Evidently, however, Denmark is in no particular hurry to rush into costly outlays in order to guard against an imaginary war.

Economic and Financial Notes.

The Death of the Ex-Prime Minister.

Sir Henry Campbell-Bannerman passed away from this life on Wednesday morning. Regret is universal, not so much because of the man, his character or his career, as because of the pathos of it all. Struck down by illness at the height of his power, when there seemed to lie before him a long reign at the head of a triumphant party, he lay dying long enough to reach the imaginations and hearts of the people. He was in no sense a genius like Gladstone or Disraeli, nor had he ever at any time in his long political career touched the soul of the multitude as with fire from Heaven—or the other place—causing it to rise above the sordidness of life at his call. It was only in dying that he won all hearts and disposed even his political enemies to praise him. This is no place in which to discuss his career, and we are in no position to do so even if it were, but that he was a sincere man and that he worked for his country unselfishly always is beyond doubt. His greatest fault, so it appears to an outsider, was easygoingness. Definite though his own aims and opinions might be, he clung to them in silence, if need was, rather than imposed them upon his followers, and was ever willing to concede many things in the interests of party union and peace. A harder man, a man more determined to lead, would not have been so easily placated as to put men like Asquith and Haldane in two of the most responsible posts of his Ministry, if such an one had been treated by them as they dealt by Sir Henry after Lord Rosebery left the Liberal party. But Sir Henry never appeared to have any memory for personal wrongs, and in this friendly indifference showed himself more magnanimous than many greater men. Whether his easy humour and conciliatory disposition would have helped him through a crisis as they helped him when forming his Cabinet and in the early months of his Government are points upon which no decision can now be given. He died ere the sheen of his triumph had faded away, and left to his successors the storms to be

faced and triumphed over; and, to our thinking, he has been happiest of them all in his end. The ideals he nurtured were perhaps commonplace, his conception of statesmanship did not as a rule rise much above that of the loyal partizan; but in all he was sincere, and his character was strong enough to imprint some part of that sincerity on the minds or speech of his colleagues. Will there be much sincerity left among them now that Sir Henry is gone? We have our doubts, and feel certain of one thing at least, the peers need now have no fear for their privileges. Nor is there much danger for the brewers. Assaults upon outworks are good tactics when the object is to deceive the enemy regarding the point upon which the real attack will be made, but when the whole campaign becomes "an affair of outposts" observers know what to think. "Call no man happy until he is dead." Sir Henry Campbell-Bannerman, the honest, plain-dealing citizen, has gone to his rest at the right time.

Marconi's Report and Lectures.

It is more than two years, as the *Morning Post* points out, since Marconi's Wireless Telegraph Company honoured the world with a report, and, so far as we can see, it need not have bothered to issue one now, only that more capital is wanted; no less than £250,000 of it in 7 per cent. £1 preference shares. Assuredly the report tells us nothing about the true position of the company or its subsidiaries, £2,394,107 of whose paper is held by the parent and taken into the balance-sheet at £242,966. We should not care to give the odd £966 for them. No profit and loss account is furnished, from which it is natural to infer that there has been no profit. The balance-sheet is one of the most reticent we have seen for some time, and very little light is thrown upon it by the carefully-drawn certificate of the auditors, Messrs. Cooper Brothers and Co. It is an explanatory certificate, which fails to illuminate, probably because there is really nothing to generate light by. So far as the display permits us to guess, the company seems to have no cash at all, but it owes £117,394 to various creditors, including £93,620 due to banks, directors and large shareholders on advances against security. There is also a contingent liability, £67,488, for amounts uncalled on shares in associated companies, and the share premium account of £25,577 together with the reserve of £22,868 are not represented by any separate entry on the asset side of the balance-sheet. Indeed the reserve is a curious product altogether, "being the amount of valuation of freehold property and works at Dalston in excess of cost." That entry reveals more than any other of the true inwardness of the entire exhibit. And the assets are really more or less of a corresponding kind. For instance, £127,203 is due to the company by its associated companies, this sum including £100,681 due by the Canadian Company, more than half of whose share capital is owned by this parent company. Then long distance stations are entered at £75,323, but whether they are worth that or half that amount it is impossible to guess, because nothing is shown relative to the results of the business.

We do indeed get in the report an exhibit of "nett receipts," which looks comfortably progressive. For 1905 the nett income is given at £13,066, for 1906 at £27,501, and for 1907 at £37,936, but we should like to know how these totals are made up. Is all the revenue derived from the working of the wireless telegraph services or is a good deal of the money the product of what might be called domestic finance, dealings between the parent company and its subsidiaries? Not a word of explanation is given, but the report is full of large promises, big words and information valueless to those who wish to know what is really going on. It tells us, for instance, that in Italy there are 22 Marconi stations available for communication with ships fitted with Marconi instruments for the purposes of trans-oceanic communication with the other long-distance Marconi stations, and the Italian Government is cordially thanked for its support. But what amount of trans-oceanic message transmission is done by these stations and at what cost? In spite of its apparent fulness, the directorial report is really singularly reticent with regard to the Atlantic service. One newspaper in New York, the report informs us presumably the *New York Times*—which, like the London *Times*, has championed Marconi throughout, stated that it had during five months received despatches totalling 68,404 words "promptly and efficiently transmitted" by the Marconi system. Well, that is not so very much after all. Probably any one of the Atlantic cable companies transmits many a week quite as many words as the Marconi system managed to send in five months. Most of them could send as many in a single day. Why has that wonderful service not been continued by the Marconi Company? A little while ago there was one day's great parade of Marconi telegrams from New York in our *Times* newspaper, but that show was not completed, and in the meantime expenditure goes on so that new capital must be had in spite of the nett revenue figures just quoted. What became of that nett revenue? Did it materialise in additions to the works or what, and is Mr. H. Cuthbert Hall, who has now severed his connection with the company whose managing director he was, to get nothing but 10,000 fully paid up shares of the company in liquidation of all his present and future claims for commission? What were those claims? According to the balance-sheet, the company is only in debt to the amount of less than £117,500, exclusive of the uncalled liability on shares held. What therefore does it want £250,000 for? Where will the money go? One other question and we have done. Pages 19 to 44 of the report inclusive contain two lectures by Mr. Guglielmo Marconi, with diagrams and illustrations. They are doubtless interesting to specialists, and appear to be written with much verve and minute lucidity, but should these lectures have been printed at the cost of the shareholders, or are they so printed? A most unsatisfactory exhibit altogether is this report, and we agree with the City editor of the *Morning Post* in the opinion that without more information the public ought not to find a shilling of the additional money required. Personally, Mr. Marconi has done wonders, but his company holds no patents worth £243,000, and his long-distance services have never yet established themselves.

The Licensing Bill.

We have received from Bailie Roderick Scott, of Glasgow, the following memorandum illustrative of the facilities given in so-called clubs for indulging in drunkenness. The Bailie's statements are definite enough, and speak for themselves, so that we need not go over the ground again, or repeat what has been already said in this Review about the Licensing Bill of the present Government. It may, however, be mentioned that some people appear to look upon us as enemies to all interference with the drink traffic. The very reverse is the fact. We should be delighted to see habits of sobriety in fashion amongst the people of this country, and would heartily support any measure genuinely designed to bring about reformation in this respect. The Licensing Bill of the Government is opposed by us because it is neither a genuine or well-planned measure of reform, nor, within its limits, an honest attempt to put temptation out of the way of those inclined to drink. How can the Bill be honest when the Government requires all the money indulgence in drink can give it and more, and how can it be an effective measure when it practically leaves the drinking club and the licensed grocer alone? The measure is the product of hysteria, and we begin to doubt whether the bulk of those who noisily advocate it really intended it should pass. Many nights of the session may be wasted in displays of rhetorical humanitarianism and in wrangles over the rights of property, and then the Bill will vanish among the Lords. But there will be a great asset left for benevolent M.P.'s to brag about on platforms.

"I enclose you a report which I obtained from the Depute Town Clerk of Glasgow, which is an excerpt from the police report *re* Saxhan Recreation Club, Cathedral Street, Glasgow, for Sunday April 12, 1908.

"You will see that out of this club 17 men were

apprehended and fined, or forfeited their pledge as being drunk and incapable. All those cases appeared before the Northern Police Court on Monday morning, 13th. Those 17 cases were all out of the same club, and as the law stands in Scotland, before a man can be apprehended it does not matter how drunk he may be, if he can take care of himself and behave himself he cannot be locked up, and it would be a nice calculation to ascertain how many men came out of the same club who were drunk, half drunk, and generally the worse of liquor, when 17 were so bad that they were incapable of taking care of themselves. Of course, the publican gets the blame of these records which, I think, is grossly unfair, as he is under direct supervision of the police, while these clubs have no police supervision whatever.

"The present Government do not intend, so far as I can ascertain, to deal with clubs at all, and I am of opinion that the club question requires more drastic treatment, and, as the police report shows, is of a more clamant nature than the ordinary publican."

This is the report referred to by Mr. Scott. Note the time of night at which the arrests are mostly made :—

A. Goerz and Co.

This is one of the Rand group of owning, controlling and nursing ventures, and like all the rest it has been stricken down by what we have come to call the depreciation in South African mining values. This depreciation consists of the inevitable collapse after gross and absolutely unjustifiable inflation, and as it is next to impossible that any part of the shrinkage can be regained there is nothing for it but to make provision for the wastage as soon as possible. In some instances this is rendered a comparatively simple task by the presence of a secondary capital account in the shape of share premiums, the use of which to make good losses being one of the conspicuous artifices of South African mining finance. But all are not blessed with this additional example of public madness, and where the second line of defence is absent the consequences are apt to appear serious although not in reality worse. In some respects the position is decidedly better, because the upset must be faced fairly and squarely, and actual facts placed before the shareholders. In a sense Goerz and Co. comes within both categories. A substantial share premium account has been built up in the past, but it has been largely dissipated in filling or partially filling gaps in former years, and the amount left is nothing like sufficient to meet the losses of the past twelve months. True an additional special reserve of £130,000 is also in existence, but that is wanted to fortify advances to mining companies amounting to £326,527, and represents about two-
the coun the amount thus used. These advances were
we do. T ring the year from £372,053, mainly due to
already allud by the Roodepoort United Gold Mining
£1,111,000 of The chief interests of the company are
which also gi different undertakings, and the course of
assets, the idea rkets during the past year reduced the
comparatively oldings by the tremendous sum of
respondingly e Worse still, there was an unprovided de-
the country. £145,891 brought forward, making
been lending all. Balance of reserve £110,804 is applied against this huge loss, leaving £301,012 still to be made good. What renders the position so exceptionally serious is the wasting character of some of the assets. In three years the Geldenhuis Estate will have come to an end, and the life of the May Consolidated is very little farther from its end. Moreover, prospects in many cases are anything but brilliant, and if ever A. Goerz and Co. is to attain a profitable dividend-paying condition we fear the time lies a long way in the future. Nothing can prevent a further fall in values in some directions, because in the case of the mines with short lives all dividends are in the nature of capital redemption. Notwithstanding this the distributions on the company's holdings go into the general revenue account, and deficits still result quite apart from the depreciation already referred to.

Last year the company received dividends, interest, rent, commission and sundry receipts to the amount of £31,910 (the capital is £1,400,000), but salaries alone took £30,002 and general charges £5,710, so what chance is there? Other items include directors' fees £2,500, exploration expenses £3,374, sundry expenses £2,198, loss on share transactions £1,277, and amount written off sundry participations and interest, sundry debtors, &c., £13,375. Altogether the expenditure or outgo was £63,594, and after using up the balance of £15,052 brought in there is a deficiency to be taken into the current year of £15,831. Happily the general finances are not strained, and after deducting the special reserve of £130,000 already mentioned, there is an excess of cash assets, first-class securities and sundry debtors over liabilities of £327,267. In all the circumstances it is somewhat useful on account of the lesson it teaches to take note of the fact that the depression in the share market has been in sharp contrast to the intrinsic position of the mining industry. Says the report, at the end of December, 1907, the market valuation of the Transvaal gold mining companies and finance companies referred to in past reports was £116,000,000, showing a drop of £19,000,000 during the year and comparing with £276,000,000 at the end of 1904. Just think of it, a shrinkage of 160 millions! Who is standing this colossal loss, and does it not go far to explain the Stock Exchange exhaustion now going on before our eyes, the absence of business, the periodical fears and tremors as difficulties of unknown extent loom up, threatening this institution and that, only to be forced beneath the surface again and papered over, making inevitable sooner or later a wholesale liquidation and clear-up such as this generation has never witnessed? Yet the mining industry continues to steadily advance, and the subjoined table is altogether too illuminating to be omitted :—

Year.	Stamps at Work (Average).	Tons of Ore Milled.	Value of Output.	Working Profits.	Dividends Paid.
			£	£	£
1904	4,795	8,022,736	15,453,312	5,800,000	3,821,846
1905	6,521	11,160,422	19,991,658	6,700,000	4,898,970
1906	7,527	13,571,554	23,615,400	8,500,000	5,580,971
1907	8,245	15,523,229	26,421,837	10,000,000	7,007,417

Working expenses have steadily decreased, companies of the Goerz group participating, the average cost per ton which in 1905 was 23s. 10d. being only 21s. 2d. in 1907. Moreover, the directors confidently expect that it will be possible to improve these results, and by their utterance unconsciously condemn the Chinese labour policy without the continuance of which the industry was bound for utter and complete ruin.

Light on Life in Canada.

A correspondent has obligingly forwarded to us a copy of the *Bolton Evening News*, which contains a letter sent to it by a correspondent in Hamilton, Ontario, dealing with the present state of labour in the Dominion. It is an honest letter written by a man

who knows his subject, who is speaking from experience, and because there is so much falsehood disseminated regarding life in Canada, the openings for labourers in Canada, the chances for farmers in the North-West, and so forth, we think some extracts may prove valuable. Here they are:—

Canada is not the Eldorado it is represented to be; it is already overstocked with the clerk, artisan and labouring class. The country is the dumping ground of the overstocked nations of the world. Here are hordes of Italians, Germans, Norwegians, Russians, French, Chinese, Swedes, Hindoos, Swiss, Assyrians, Egyptians, and Japanese and I ought to have mentioned Danes and Poles. Here is Canada a British colony, which would be excellent ground for the excess population of British possessions to settle on; a country whose great enterprises, viz., railroads and other great undertakings, are chiefly worked upon British capital; yet the British population does not get the advantage of being British. The excess of other nations being dumped here has overcrowded the labour market, and at this present moment there are thousands of men and women who have had no work to do since last November. There is also a scarcity of money throughout Canada, as well as in the States, and factories which shut down last fall have not opened their doors, although we are advancing in April. It is plain to be seen that whatever wages a man receives (taking the long winter into consideration) is cut in half; viz., a man earns $20 a week for six months, his firm shuts down for the next six months, his wages are practically reduced to an income of $10 per week, and yet the expense of living still remains the same, viz., $4 a week board and room, that is if he has a room mate. If he has a room to himself he pays an extra half dollar per week.

Now, I may inform your readers that the great majority of men do not earn more than $9 per week, and a great number do not earn $8, so you may learn how difficult a matter it is for the majority to live until they get a re-start in the spring time. There are men in this city who are owing $70 for board, and are still out of work. I know boarding-house keepers to whom is owing from their boarders $600; whether they will ever get the money I know not. These facts are sufficient to show the havoc that a long winter and no work creates. So the would-be emigrant would be wise to ponder well whether the game is worth the candle. In regard to work on the farm, this is a kind of white slave business; a farm hand commences his duties at 5 a.m., and does not cease until 10 p.m., this seven days to the week; and he has to be a very experienced hand if he earns $260 per year and his board. Here in this very country there is a man and his wife both engaged on the same farm, and all they receive for their united labour is $15 per month and their board. Hence you learn that the remuneration for labour is not very liberal. This low pay for labour has been brought about by the foreign element, who are ever ready to take on work at any price; in fact, the Italians (or Dagoes as they are called) will cut their own countrymen out of a job by offering to do it for less money. The Italians and Poles are the trouble makers in any country they emigrate to; rarely a week passes without some bloody deed being done by them. It would be greatly to the benefit of Canada if the Ottawa Authorities would prevent these hot bloods from entering this land, for it costs the community thousands of dollars per year in Court expenses; and, further, these people have a very demoralising influence on the rest of the people of Canada.

There is another agency at work which is increasing the poverty in Canada, viz., the Salvation Army. Now, whilst I am an admirer of the great, good work accomplished by the Army, I very much deprecate that force entering into business conditions with the Government at Ottawa and receiving a subsidy therefrom; a subsidy which is an inducement to gather up all kinds and conditions of men from our crowded centres in the old land, and dump them in Canada, whether there is work for them to do or not. Great is the complaint of many thus brought out, they come here and expect to strike a job at once. Some do get work, but are soon out of it again, as employers of labour will not retain a man one hour longer than a job lasts, consequently the poor fellow is out of employment, his means to live exhausted, and he incurs debts which will take months to remove. At the present time there are meetings being held in cities appealing to the authorities to oppose this system of the Army, bringing their cargoes of humanity, and dumping them in an already overcrowded country (overcrowded because the influx is many times greater than the demand for labour). I am told by Canadians that for a period of 26 years there has not been such bad conditions in the labour market as at present exist. Here is an instance or two:—In this city the carpenters have a union, there are some 246 of them on this club and have been since last November, and there are no signs of work opening out yet. A contractor required a mason yesterday, 40 men turned up at his office for the job, a plain proof of the sad condition of things here. To take a walk on the streets any time of day, you will find thousands perambulating, nothing to do. And yet the Army continues to take this country's money, and is encouraged by the Government to bring cargo after cargo of emigrants to make it harder to live. Of course, the employer of labour is the one who profits considerably by this great influx of labour on the market. His motto seems to be, what care I who sink if I swim. There is very little conscience, if any, in Canada. There is not the same regard for human life as in England. There are many things the Canadian has yet to learn; rush is practically all that he knows; hence all his manufactures have much of the jerry build about them; there is nothing thoroughly finished. If the product has something of a resemblance to what it ought to be, well, that is quite sufficient. Even the wiring of property for electric lighting is allowed to be done in a fashion that would not be tolerated in England; and this, too, in cities where a great proportion of property is entirely of timber construction. Hence through this slip-shod way of cheaply wiring property we have property destroyed by fire every day in the week. I have known the fire-fighters called out 13 times in one day in one city that I resided in, and the chief cause of the trouble has been jerry wiring. Jerry seems to be stamped on all that the Canadians do, and they do not like to have this pointed out to them.

American Business Notes.

It is small wonder that gold is leaving New York for Europe, since week by week the New York Associated and other banks get more and more oppressed by the quantity of metallic and other currency flowing back upon them. Last week's New York Associated Bank averages, for example, showed an increase of only £1,663,400 in the loans and advances, while specie increased by over £1,906,000 and greenbacks by £440,000. Deposits were therefore about £4,018,000 up and the surplus reserve increased by £1,342,000 to £9,995,000 against £2,341,000 a year ago. No doubt if the procession of fresh capital issues in the form of stocks and bonds becomes imposing the demands upon the resources of these banks will soon overtake the supply of credit, but for the present the excess is so great that were Mr. Cortelyou to withdraw £8,000,000 or £10,000,000 of Washington Treasury deposits, as it is reported he intends to do in order to prevent gold from leaving the country, the market would hardly feel any inconvenience, because trade is so backward and the demands of the every-day user of currency so much less than they were six months ago. This week £1,000,000 has left or been engaged for Europe.

The outside banks and trust companies show a decrease of £1,230,000 in their loan and investment average for the week which amounts to £161,275,000, so a portion of their commitments would seem to have been transferred to the Associated Banks, and the changes in their other published items are insignificant, specie being up about £105,000 at £9,373,000 and greenbacks held £75,000 larger at £2,229,000, so that the increase of £473,000 in the deposits, whose total is now £130,913,000, is not to be accounted for upon the visible data. The reserve in specie and paper amounts to about 8.8 per cent. of these liabilities measured in the same way as the New York Associated Banks.

Among new issues presently to be put upon the market is a large one for the Pennsylvania Railroad Company, whose board sought power from the Public Service Commission at Albany to create £8,000,000 of new long-term 4 per cent. bonds, and the whole of the issue is said to have been underwritten by a strong syndicate. A large proportion of the amount is to be placed abroad, principally in London and Paris, at the price of about 96 per cent., through the agency of the houses of Baring and Rothschild. The Inter-Borough Metropolitan Company of New York is also about to issue £5,000,000 in traction bonds through Messrs. J. P. Morgan and Co., and the Wabash Railroad has already succeeded in getting out £180,000 of 5 per cent. first gold bonds, the proceeds to be employed in paying off the bonds of subsidiary roads maturing in July and October next. Messrs. Morgan are also said to have undertaken to issue £4,000,000 in long-term notes of the Southern Railway, and all kinds of waste will be thrown on the market on the strength of the Pennsylvania issue, which is a good security issued under an old mortgage and covering some of the most valuable railroad property in the country. A bond issue by the Union Pacific is also imminent, and small lots of various parcels of paper are being sold every day—£400,000 5 per cent. first mortgage bonds by the Chesapeake, which is also emitting £300,000 in the form of collateral 6 per cent. trust notes due in 1910 to meet £240,000 in notes falling due next June; the Norfolk and Western Company

has sold £1,500,000 in two-year 5 per cent. notes, to be offered, it is said, at 99.

A much-talked-of New York bank amalgamation is receiving more notice on the Continent than here. It is no less than the fusion of the Standard Oil ring's National City Bank with the National Bank of Commerce in New York. These banks together have a capital of £10,000,000 or £5,000,000 each, and an aggregate capital and surplus of £17,970,000 or thereby. Their liabilities on deposit total £66,000,000, and if they fuse they will constitute by far the largest bank in the United States. On the mere strength of the report the shares of the Bank of Commerce rose $35 and those of the National City Bank nearly $40.

There is not much going in the way of reports about industrial and railroad concerns in the United States, but what there is does not lead to the inference that business will soon revive. The output of pig-iron in the current year appears to be only about 50 per cent. what it was before the crisis of last October. According to the *Iron Age*, the daily output in March was 39,019 tons as against 37,163 tons in February, but during the last week of the month a number of furnaces were blown out, so that the furnace capacity at April 1 was only 265,590 tons per week as against 267,437 tons at March 1 and 511,397 tons at October 1 last. All hangs at present on the promise of the grain crops, and upon that nothing can at present be built.

It appears that the Westinghouse Electric and Manufacturing Company of Pittsburg has not succeeded in carrying through the original scheme whereby it was to start business again and to go on as if nothing had happened. A fresh plan has had to be put together the essence of which is a subscription at par for £1,200,000 of new "assenting stock," the money to be utilised as additional working capital. There is a merchandise debt due by the company amounting to £871,200, and it owes the banks nearly £1,600,000—that at least was the amount on October 23 last—and as much of this debt as is not converted into assenting stock is to be provided for partly by convertible bonds of the existing authorised issue at par and partly by 5 per cent. notes running at least five years, or for an average period of five years. It will be recollected that an issue of convertible bonds dated 1906 and due 1931 was authorised to the amount of £5,000,000, of which £906,200 remains available, £3,700,000 having been sold and the remainder of about £400,000 being reserved to retire debenture certificates due in 1913. Apparently the unissued or unpledged portion of this mass of debt will be drawn upon to supplement the share call or assessment, as it may be designated, now proposed, but the company's debts are not all met even then, for there are collateral notes to the amount of £1,200,000 due on August 1, 1910, and there is also a French loan of £540,540 running to October, 1917. If, however, the company can manage to get these assenting shares issued it may go on for some considerable time longer. At any rate the directors say that under "reasonably favourable conditions the company ought to be able during the next five years to pay all its fixed charges, 7 per cent. per annum on its preferred stock, 6 per cent. on its entire issue of assenting stock"—said stock amounting to nearly £7,000,000 when this plan is effective, because the old share capital will be merged with the shares representing the new assessment—"and to leave an annual surplus of about £200,000." Those who can may believe this agreeable picture, but in the meantime the business is hung up for want of money. A committee of the merchandise creditors, the directors proceed to say, have expressed confidence that by June 1 it will be able to furnish subscriptions at par for £2,000,000 of new assenting stock payable as to £800,000 in floating debt, chiefly merchandise claims, and as to £1,200,000 in cash in instalments extending over a period of ten months, so that if the Westinghouse Company owes you anything you can take payment in assenting paper. Whether the new proposal will succeed better than the previous one is more than anyone can just now say, but in this country the reputation of the company has been irretrievably damaged.

A large business was done last year by that coal-owning road, the Delaware and Hudson, and most of the profit was carried to the credit of the railroad itself, whose gross earnings amounted to £4,350,000, or over £605,000 more than in the previous year. Working expenses, however, rose to £2,460,000, an increase of £292,000, but even so the nett earnings were £333,000 more than in the previous year, expenses coming to only 60.12 per cent. of the receipts as against 62.58 per cent. the year before. This is an unusually flourishing display, but when we look to the coal mining department, from which so much of the company's prosperity is drawn, we find that the gross receipts were, as usual, almost entirely swallowed up by the expenses, taxes being excluded from the exhibit in both instances. Thus the gross income from coal last year was £4,637,000 and the expenses £4,402,300. In fact the total nett revenue from this large business was less than £235,000. What would be the position of the railroad company were the two businesses, that of carrier and that of miner, completely separated? It would be very interesting to have some reliable data to go upon in answering a question of this kind. As it was last year's prosperity enabled the Delaware and Hudson Company to pay 2 per cent. more upon its stock, making the dividend for the year 9 per cent. as compared with 7 per cent. the year before, and there was a surplus left which was fully £72,000 larger at £530,000.

Last year's production of minerals in Canada, including coal and other non-metallic substances, is valued at £17,240,000. As recently as 1898 the total value was barely £7,700,000. Amongst the component parts of this total last year, metals alone gave £8,500,000 or thereby, and out of this Yukon gold represented £630,000, gold from other regions £1,023,000, silver £1,666,000, and nickel £1,907,000.

Passing Events.

In his speech, or some of his speeches, at Manchester delivered this week in support of Mr. Winston Churchill's candidature, Mr. Lloyd George expressed willingness to bet. We were rather shocked when the word "bet" first caught the eye in reading the speech of such a man, but his use of the word was quite safe and proper, because he sedately added, "if I were a betting man." What he ran the risk of damaging his morals over in this fashion was old age pensions. "I have offered," he said, "at another meeting, to bet, if I were a betting man, that there will be old age pensions in this country within 12 months," and his sporting prophecy was welcomed with loud cheers. Well, we also would not mind taking a bet, and it might even be a definite one. We are prepared to stake a year's income against half a year of Mr. Lloyd George's salary as Chancellor of the Exchequer, that if he retains his post and in the meantime carries a system of old age pensions, he will be obliged within three years' time to rise in his place and advocate an imposition of protective duties upon more than one article of our foreign commerce now duty free. Most eloquent were his addresses in Manchester on Free Trade and the advantages thereof; powerful were his arguments, apt his illustrations, but he destroyed the whole effect of his eloquence by this one announcement. Theoretically, Mr. Lloyd George is obviously a convinced and ardent Free Trader; practically, as a working statesman, he is an out and out Protectionist. The ideal he and his new chief follow in instituting old age pensions is that of the despot, of the corrupt party politician, of the man who climbs to power by bribes and subornation—not the ideal of the man who strives to emancipate the nation he helps to govern from those hampering bonds and fetters that prevent the individual from attaining to freedom and independence. If Mr. Lloyd George is to make good in deeds his prophecy at Manchester we shall have to oppose him

to the uttermost. And why did he lug in, when talking about Free Trade, as an illustration of the real attitude of London City its coldness towards the new Prusso-German loans? "When the people of the City, Tariff Reformers mostly, were asked to advance money on the freehold of this Protectionist Garden of Eden they insisted upon 4 per cent., and with reluctance advanced it." Only a rhetorician perfectly ignorant of City habits and the laws governing credit could have made a blunder of the really preposterous description these words reveal.

Rather a knock on the head was given to President Roosevelt's noisy Imperialism in the House of Representatives more than a week ago. The President of the Republic wanted Congress to sanction a Naval Appropriation Bill, which provided for the construction of four battleships. He sent a message to Congress urging this step upon its members, and Congress defeated the recommendation of the Naval Committee by 190 votes to 79. The result of the division was received with loud cheers. In his speech, Mr. Tawney, the chairman of the Committee on Appropriations, pointed out the danger to the Treasury of the immense increase in the navy votes, which the adoption of the President's recommendation would involve, and he added that the United States was spending in preparation for a possible war more than any other nation in the world. That perhaps is hardly true; but the Republic is certainly on the way to attain this bad eminence, and we are delighted to find a body of representatives somewhere in the world capable of resisting the luxury of being in the fashion and on the highway to national ruin.

The foreign trade of the Argentine Republic is put at £164,130,000 in 1907, of which £57,176,000 represents imports, and £59,240,800 exports. Imports rose by £3,178,000 and exports by only £790,000, but then foreign, chiefly British, capital was poured into the Republic last year in an almost unprecedented volume. Our share in the Argentine import trade was £19,600,000 and Germany's £9,162,200, but the increase in the value of British goods sent into the Republic was only £621,000, whereas in the imports from Germany it was £1,478,800. The United States made no headway, and France, which sent £5,093,600 worth, suffered a reduction of £255,200. Of Argentine exports we took £10,743,200 worth or £2,098,400 more than in 1906.

A suggestive exhibit of the debt of Uruguay is quoted in a recent issue of the *Montevideo Times*. It shows that in spite of provisions for repayment, the drawing of bonds and the application of sinking funds, the debt year by year grows. It began in 1860 with a total of £545,400 or thereby, and at the end of last year that total had been raised to £25,268,000, turning the dollar roughly into sterling at $5 to the £. The present head of the republic, President Williman, has not been adding much to the debt, in fact he has issued no new loans at all, but a certain automatic increase seems to go on, thanks to the various public works in progress, which more than obliterates the effects of the sinking funds, although the increase for the past year was less than $1,000,000, and the journal quoted very properly insists that some attempt should be made to introduce greater economy in the administration. Improvement has to be acknowledged compared with former days, when the Government was openly carried on mainly for the purpose of plunder; but there is still plenty of room for reform, and the debt of over $128,000,000 is a very heavy one to be laid upon a population which totals a bare 1,000,000. What is wanted is a Minister of Finance who will take a higher view of his functions than that of a mere extractor of taxes.

German banks have again come to the rescue of the impecunious Sultan of Turkey. He wanted money to pay a month's wages to the Government employees on the occasion of the Prophet's birthday, and applied to the Ottoman Bank, which met him with obduracy, the telegram says—refused the money, in fact; so then he went to the Deutsche Bank, which promptly consented to advance £T150,000 at 7 per cent. interest, guaranteed on the incoming sheep tax. Then the Deutsche Orient Bank followed with an advance of £T70,000 on the same terms, while £T25,000 was borrowed from the Tobacco Régie. Thus the Sultan got enough to enable him to pay a full month's salary by the help of the little money in hand. What he will do next month fate must decide, but we suppose the Bagdad Railway project will be helped by this accommodating attitude of the German banks.

The financial news from Cape Colony is the reverse of cheerful. Mr. Merriman, the new Premier and Treasurer, told the House of Assembly on Thursday that he expected a deficit for the current financial year of £965,000, revenue being reckoned to show a reduction of £983,000. This will make the total deficit for the past four years £2,881,000, and we are therefore justified in the inference that these deficiences were made good by loans raised in London on increasingly onerous terms. That being so, what is the meaning of an additional Appropriation Bill for £261,418, apparently to provide money for the current fiscal year? Would it not be well to endeavour to effect retrenchment? This does not seem to be the first thought of the new ministry, for in speaking of the Customs conference to be held soon at Pretoria, Mr. Merriman assured the House that the policy of Cape Colony would be reasonable protection for the products of her soil and for her existing manufactures, with opposition to the policy of preference. We may describe this attitude as semi-intelligent. Protection will not cure Cape Colony of a wasting sickness in its finances.

That renowned speculator and seller of shares on a "toppy" market, Mr. Abe Bailey, has been favouring a Reuter correspondent with his views on things political in South Africa. They are not worth much, and we have no intention of either quoting or discussing them, but his remark that he was "puzzled" why there was no greater activity in gold mining shares does deserve a passing reference. The mining industry "never looked brighter," said Mr. Bailey, and we suppose he has something to sell. There is a plentiful supply of native labour, and the "deep levels are opening up very well." So the Chinese are not missed. Costs are also going down because at last some glimmer of intelligence in mine management is penetrating the dense atmosphere of the Rand or of the Corner House in Johannesburg. But Mr. Bailey need not worry or rack his brains to account for the apathy of the public. He has only to look back to some of his own transactions and to reckon up how much money he contrived to extract from the European, and especially the British, public by his last great share deal. He is rich; those who bought his shares are poorer, and the experience the public acquired through dealing with Mr. Abe Bailey was calculated, when repeated in its dealings with other great South African players, to eliminate all desire to repeat the operation.

In view of what is said in the letter of a Canadian resident, quoted on another page, the following statistics of Canadian immigration, forwarded by the Ottawa correspondent of the *Times* this week, possess a somewhat sinister significance. If these hard facts could be supplemented by particulars of the present condition of the people thus drawn into the Dominion ideas about the chances of fortune or of a decent livelihood there might experience wholesome adjustment:—

The number of immigrants into Canada during the year ended March was 262,469, of whom 120,182 came from Great Britain, 83,975 from the Continent of Europe, and 58,312 from the United States. The increase for the twelve months was 30,767. For the previous year the figures were:—British, 103,066; Continental, 59,473; United States, 59,263. For the first three months of this year the immigrants numbered 27,144, a decrease of 14,904. British immigration showed a decrease of 11,878 and Continental immigration a decrease of 4,700, while from the United States there was an increase of 1,764.

Mexican Light and Power Company.—Gross earnings for March $489,817, increase $122,759, nett earnings $252,533, increase $34,378; surplus $57,748, decrease $10,658. Ratio of expenses to receipts, 48½ per cent. against 40¼.

Continental Memoranda.

Adding in the Municipal and State loans raised in Germany the nation and its financiers have had to find £40,342,500 this year already besides the £10,000,000 in Treasury bonds not offered to the public. No wonder, then, that the response of investors to the Imperial and Royal appeal has been niggardly or that a sub-syndicate has had to take up £6,000,000 of the £32,500,000 offered. For all that the original underwriting syndicate is said to have made a profit of 0.65 per cent. In reality, however, only £26,500,000 of the loans can be considered sold outright, and probably most of that is in the hands of groups, or of banks and market operators who lie in wait for the individual called investor. Investment business grows less and speculative manipulation increases with each expansion in the manufacture of instruments of credit.

You would like to know when the interesting experiment of nations and empires living on credit is likely to come to an end? It is simple; when they are no longer able to borrow. As things are, every financial crisis increases the pressure upon the credit distiller, and in Germany, as in the United States and here, capital demands increase and multiply in proportion to the distress produced by reaction or "slump." Not only has Hamburg this year already raised £3,250,000, Leipsig £3,000,000, Wiesbaden £600,000, and so on, but the Hamburg-American Line wants £1,500,000, the North German Lloyd £1,250,000, and many other business enterprises seek greater or less amounts to keep them going. Berlin itself is seeking to raise £5,000,000, and it is said that the first half of a loan of this magnitude will be put on the market by the municipality in June.

The French and German members of the commercial committees formed by the two nations have been conferring in Paris. These committees are designed to bring about happier mercantile relations between the two countries, and among the practical reforms to be worked for are accelerated passenger and goods transport, reduced postage on printed matter, and uniformity in the treatment of patents. Interchange of statistical and economic information is also to be provided for so as to give each country a more accurate knowledge of present conditions and possible improvements in the commerce of both. No political discussion will be allowed. This is a notable move in the right direction.

The F.I.A.T. Motor Company has called its shareholders together to sanction a proposal by which the capital would be tripled, raised, *i.e.*, from three million lire to nine. In the circumstances this is bolder than brass.

Bavaria is going to electrify its railways. At least, the Government of the State has presented a petition seeking authority to make this change, and the step is said to have made a great sensation not only in industrial circles, but also among the professional man-killers. So Prussia is preparing to follow Bavaria's example, only where is the money to come from?

In a most interesting and carefully drawn up analysis of the balance-sheets of German banks, including 9 Berlin banks and 37 others, the *Frankfurter Zeitung* prints a table illustrative of their assets and liabilities taken in groups. We have no space to go into details, and they would hardly interest the general reader in this country, but one or two entries in the summary or grouped analysis deserve a word of inquiry. Amongst "easily realisable funds" held by the Berlin banks the *Frankfurter Zeitung* classes about £29,000,000 of loans and about £17,000,000 of investments and participations, or £46,000,000 altogether, out of a total of £140,000,000. Does the writer of the essay or the compiler of this table really mean us to infer that the loans granted and investments and participations entered into by the banks are of an easily realisable character? If so German business must be conducted on lines very different from those we are accustomed to in this country. Perhaps the *Frankfurter Zeitung* will explain.

Although the financial condition of the Spanish Government is by no means brilliant, or even healthy, the country appears to be plodding along slowly towards a better state of economic health; at any rate, the North of Spain Railway is said to be likely to pay a dividend of 10 pesetas, the first it has distributed for fifteen years back. It shows a nett profit of 9,500,000 pesetas after deducting 62,000,000 pesetas spent upon various improvements, &c. The Madrid-Saragossa, Alicante Railway has likewise done well, and shows a nett profit of 14,400,000 pesetas, or, adding in the profits from the company's mines, of 14,650,000 pesetas. A dividend of 16 pesetas will accordingly be proposed on May 16, and after that is paid 6,500,000 pesetas will remain to be placed to the reserve, improvement, and liquidation funds.

For the first quarter of this year German imports have increased by £2,060,000 to £108,110,000 and exports £1,000,000 to £82,930,000. Precious metals were imported to the value of £2,060,000, as against £1,610,000 in the same quarter of last year, and the exports amounted to £920,000 compared with £840,000.

The Week in Mines.

Kaffir Shares.

No real attempt has been made to open out business in the Kaffir Circus since the House resumed after the holidays, and the market is, for all practical purposes, quite dead. Nor can we see the slightest prospect of an early improvement. The public gives no sign, the Continent seems to have forgotten the existence of South African shares, and the entire professional group on this side, punters, jobbers, and the shops are sick at heart despairing of ever again seeing a bright streak in the dark clouds; and it must be confessed that, taken as a whole, the reports of individual mining companies and controlling concerns, of which we have recently had a liberal dose, afford every justification for the do-nothing attitude of the general public. Here and there a fair prospect might be encountered, but, generally speaking, the chances seem still against the investor, notwithstanding that prices are very nearly the lowest touched since the war shattered for all time the hopes and aspirations of the multitude of people involved in Rand mining finance. Thursday was option day, and to-day (Friday) the carry over has been arranged so that in any circumstances nothing like activity would have developed. Small adjustments were necessary here and there, just raising or depressing a share sixpence or a shilling, but there has been no real dealing, and one day an operator was reported to have observed at closing time that the market had not yet opened. It is all very regrettable, especially on account of the innocent victims of the distrust and suspicion that have been aroused, but what is sown must be reaped. The Geduld Deep is proposing an alteration in its articles, so as to enable all shareholders to be represented at the company's meetings, an excellent step worthy of universal adoption.

Land, Rhodesian and Diamonds.

It would be vain repetition to say anything about the Land and Finance group. Its case is on all fours with the market for gold shares, and it is impossible for either to mark out a course for itself. All are in the same boat, and it is getting badly waterlogged. A few of the prominent shares slipped away, but a feeble attempt was made to rouse the Rhodesian section from its stupor. One or two of the bolder spirits bid for Bankets and Eldorados, but the alacrity with which they were supplied soon chilled their spirits. Tanganyikas were declared to be as firm as a rock, but Zambesias could not keep up, and Chartereds were 13s. 9d., no buyers. Victoria Falls Preference could be had at 10s. No fresh developments have occurred in the Diamond situation, and the position now is that unless differences can be immediately patched up, a very unlikely event, next

Friday will witness the Premier Company making its own arrangements for the sale of stones. Prices showed some irregularity, picking up when the bears covered and dropping again the moment this sustaining operation was finished. Every bear that climbs in leaves the market with less strength. And the latest rumour is that the De Beers Company has had to pawn its Consols. Paris says so, and Paris often knows more than we do.

Australasian and West African.

The most excited market has been that in Broken Hill shares. The announcement by the South Company that the regular dividend would not be forthcoming in consequence of the low price of metals caused prices to break badly, and fears are expressed that the directors of the Proprietary Company, whose dividend declaration is just about due, will adopt a similar policy. The South Company's mill is not running full time because arrangements cannot be made for the sale of concentrates, and unless a speedy improvement in metal prices sets in a wholesale curtailment of production, involving suspension of dividends, seems inevitable. Heavy selling of Props and Souths from the provinces sent quotations rattling down, and the rest of the list suffered in proportion. Except that the Colony took most of the shares offered the shrinkage in values must have been much more severe. Among West Australians Ivanhoes were helped in a small way by the annual report, and encouraging development news kept Horse Shoes steady, but Kalgurlis showed dulness, and Perseverance were not quite maintained. New Zealands showed firmness, with Waihis leading as usual. West Africans were fairly steady.

Copper, Tin and Miscellaneous.

The copper metal and share markets have been very neglected, and there is little to say about them. Copper slipped away, and Paris sold Rio Tintos, but only to a small extent, so that fluctuations were narrow. Anacondas eased at first, but subsequently the American group picked up owing to a rise in Yankee Railroad shares. Great Cobars recovered from a poor start, but Lyells were dull to the end. In the Tin group Pusing Lamas continued heavy, but Tekkas advanced ⅛ on an announcement that hydraulic operations can now be commenced. An initial rise in the metal was subsequently lost. Among Miscellaneous, the American things moved irregularly, but late prices were the best. Indians were quite inactive, and Siberians were not influenced by the issue of a circular to the shareholders of the Orsk Goldfields announcing the probable abandonment of the property with a view to acquiring another with the assistance of the parent, the Siberian Proprietary. The accounts are now being prepared, and at the general meeting the directors will lay their views before the proprietors.

MINING NEWS.

**** Frank and unbiassed answers are given to all questions relating to Mines. Address Editor Mining Section and enclose* One Shilling *for each question asked. No bucket shop circular or advertisement should ever be responded to without first consulting the* Investors' Review.

Geldenhuis Estate and Gold Mining.—This is another famous Rand gold mining company which is nearing the end of its tether, and even though its life has proved to be somewhat longer than was at one time considered likely a further three years will witness the end. Last twelve months to December 31 the tonnage crushed was 215,921 yielding pure gold to the amount of 49,310 ozs., while 159,866 tons of slimes gave 22,873 ozs. and 56,055 tons of sands 4,967 ozs., a total from all sources of 77,150 ozs., in addition to which twelve months' working of the Stark's process produced 674 ozs. Average yield per ton was 30s. 4.177d. and the working cost 15s. 7.449d. leaving a profit of 14s. 8.728d. Compared with the previous twelve months, which, however, included gold from reserve, the value of the output has declined 5s. 11.513d. per ton against which the expenditure was reduced 2s. 0.276d. to the very low figure mentioned, and the general manager is certainly entitled to the praise bestowed upon him for a notable achievement. It is all the greater because stoping operations were spread over a larger area than in 1906. Value of the gold won was £327,640 and the working expenses came to £168,643 leaving a profit on operations of £158,996. Add to that £54,127 brought forward, estate revenue and other items and the total credit is £218,860. Two dividends aggregating 75 per cent. required £150,000, depreciation took £15,225 and £14,542 was provided for Government tax, the balance remaining, after providing minor charges, being £37,512. Estimates of ore reserves are difficult to make, but the general manager calculates that the balance of ore in sight is 437,986 tons, and the directors add that last year 75,000 tons of the quantity milled was obtained from ore reserves which could not be surveyed, found in the footwall of worked-out stopes. They hope that a considerable proportion of payable ore will continue to be obtained from this source. Since the commencement of operations the company has paid £1,490,750 in dividends on the capital of £200,000, and there may be a sporting chance in the shares at present price as the value of the machinery and plant on exhaustion of the mine should not be inconsiderable, and the company possesses the freehold of the farm Elandsfontein, which returns a moderate income.

Princess Estate and Gold Mining.—During the past year it became necessary to modify the financial arrangements which this company had with the parent concern, Messrs. A. Goerz and Co., and it was agreed to finance the Princess up to July 15, 1908, to the extent of £120,000, including interest, in consideration of an option at par over 120,000 shares to the same date. These advances are secured by a second mortgage bond, and Messrs. A. Goerz have the right to demand bills of exchange for the amount of the debt. Debenture bonds to the amount of £4,920 were drawn for repayment within the twelve months reducing the debt to £29,080 and a further £5,200 were drawn last year repayable with 8 per cent. per annum in July next. Tonnage milled in the year was 100,279 yielding 33,554 ozs., while 6,699 tons of concentrates yielded 5,000 ozs. and 60,292 tons of sands gave 8,292 ozs., a total under all heads of 46,849 ozs., being 9.344 dwts. per ton. Total value was £198,589 or 39s. 7.289d. per ton, and the working costs, including £27,577 or 5s. 6d. per ton for development redemption, came to £146,577 being 29s. 2.8054d. per ton, leaving a profit of £52,012 or 10s. 4.4837d. per ton. Allowance for mine development was £3,854 in excess of the expenditure. Including sundry items the total revenue was £55,566 from which debenture and other interest, profit tax and depreciation took £18,730, leaving £36,830 to go in reduction of the debit brought in lowering it to £25,321. Ore reserves are put at 206,600 tons, averaging 10.9 dwts. to the ton.

Roodepoort United Main Reef.—This is another important Albu company, and in the year to December 31 last the quantity crushed was 179,517 tons, yielding 46,529 ozs., in addition to which 118,235 tons of sands and 61,282 tons of slimes gave 26,541 ozs., making 73,070 ozs. in all, the money value of which was £309,788 or 34s. 6.163d. per ton as against 35s. 6.219d. Expenditure was £206,500 or £1 3s. 0.075d. per ton, a drop of 3s. 10.075d., leaving the profit at £104,848, including sundry revenue, being 11s. 6.088d. to the ton. The reduction in costs was no doubt partly due to the larger stamping power in operation. With £87,213 brought forward the total credit is £192,061, from which no less than £112,185 is written off permanent works, machinery, plant, buildings, &c. A dividend of 5 per cent., being half the amount paid for 1906, takes £14,750, interest and profit tax come to £7,670 and £51,422 is carried to reserve, leaving £6,033 to be carried forward. Reserve now amounts to £75,000, and during the year the indebtedness to the General Mining and Finance Corporation, amounting to £77,142, has been entirely liquidated. The company's financial position is a very good one, and the directors have every reason to believe that the position of the concern is now such as to ensure periodical declarations of dividends. Payable ore reserves are estimated at 196,100 tons, averaging 9.1 dwts. This is an increase of 10,140 tons in quantity, but a small decline in the contents due to the increased stoping width now taken.

Durban Roodepoort Gold Mining.—During the year ended December 31 last this company milled 51,408 tons from the south leader and 85,128 tons from the main reef for a yield of 36,398 ozs., while 93,715 tons of sands gave 11,780 ozs. and 43,521 tons of slimes 2,590 ozs. A few ounces were also secured from by-products. Value of the output was £215,387, and the total revenue £216,537. Actual working expenses came to £122,348 and Transvaal general expenses to £16,463, a further £4,500 being required for profit tax. Balance remaining is £73,226, but after deducting London charges and depreciation the actual nett credit is £48,086, exclusive of £3,094 brought in, £2,079 from sale of slimes and £122 on account of income-tax adjustment. Dividends for the year amount to 40 per cent. or 15 per cent less, requiring £50,000, and £4,279 is carried into the current year. Owing to the larger tonnage of main reef milled in comparison with former years the grade of ore fell from 34s. 3d. in January to 28s. 3d. in December, but working costs were lowered about 4s. per ton. Ore exposed is put at 428,586 tons, but nothing is said about the value. Including the 10 per cent. paid for the first quarter of 1908, the distributions have totalled about 80 per cent. or over £1,097,000. The financial position is sound, and apart from the mine itself all wasting assets have been rigorously written down. The company is one of the very few South African concerns which have their offices in and are controlled from London.

Geduld Proprietary Mines.—This is an interesting enterprise from more than one standpoint. Time was when the prospects were thought so highly of that the shares were run up to a very giddy height, but it was soon discovered that there was no justification for such fancy figures, and when the first assay results came to hand something like consternation was spread. They were exceedingly disappointing, but fortunately not a true index to the actual value of the reef. Prospects now appear to be fairly encouraging and a very fair quantity of payable ore ought to be developed for the commencement of

crushing in November next, by which time the 50 heavy stamps and cyanide works should be completed. Mine development has been carried out chiefly in the northern section of the workings from No. 2 shaft, and the opening up of this part of the mine is described as very satisfactory. The new plant will be arranged with a view to an extension to a greater capacity at the least expense if and when the milling results and development of the mine justify. The amalgamation with the subsidiary companies has now been completed and the assets acquired located to their proper accounts. Reference is made to the financial scheme arranged with A. Goerz and Co., under which that firm guaranteed an issue of 100,000 new shares at par in consideration of an option for two years from November 1, 1907, to take up 50,000 new shares at 25s. each and 50,000 at 30s. per share. Geduld shareholders took up 70,392 shares, leaving 29,608 for Messrs. Goerz. Including the £50,000 still to come in on account of these shares the cash assets amount to about £106,000. This will not meet all the necessary expenditure, but the directors do not expect to experience difficulty in raising the additional £20,000 or £25,000 that will be required. Revenue last twelvemonths was £2,038 and the outgo £11,282, including £2,969 for depreciation, leaving a debit of £9,244, increasing the deficiency to £10,223.

Northern Copper (B.S.A.).—This company's accounts cover the comparatively brief period (for a Rhodesian company) of 30 months, but the shareholders had two years' figures to June 30, 1907, with the circular issued in July last. In addition to its own concessions, which are in a state of suspended animation, the company holds large interests in the Rhodesia Copper Company, the Kafue Copper Development Company and the Rhodesia Broken Hill Development Company, and current prices indicate the market's estimation of the whole bunch, parent included. The figures are not flattering. Operations of the Rhodesia Copper have been principally directed to the further development of the Bwana M'Kubwa claims on which up to the end of December last 7,386 ft. of sinking and driving had been accomplished, and we are told that, exclusive of blocks No. 1 and No. 5, 71,396 tons are developed of a value of 16.4 per cent. copper. Later information is to the effect that the quantity is 82,560 tons averaging 15 per cent. copper, and great play is made of the vast richness of the property and handsome profits to be derived from the working of the main lode alone, "while if, as is probable, it should be found possible to work also certain sections of the vast mineralised zones which surround the main lode the possibilities of the mine will be very great." Apparently, however, little can be done until railway communication with the Southern ports is established, although process tests for dealing with the low-grade ore are being made with promising results. In connection with all this we have only one question to ask. What is the probable cost per ton of copper, put down in London, extracted from the low-grade ore, namely anything up to 6 or 7 per cent. As to the Kafue company, operations have been chiefly directed to the Sable Antelope, and the erection of the 25-ton smelter on this property is now completed and trial smelting operations are being conducted. The Rhodesia Broken Hill Mine is really a subsidiary of the Rhodesia Copper, and a circular sent to the shareholders and embodied in the Northern Copper Company's report tells us something about what has come to be known as the Broken Hill ore problem. There seems to be no doubt that the company possesses ample material to work on, but the question is, Can it be commercially worked? We have heard the question replied to negatively and affirmatively, and reading between the lines we cannot conclude that the problem is yet solved. What is the commercial value of the zinc when and if recovered? It is proposed shortly to purchase and erect the necessary plant for the treatment of the ores, and proposals will shortly be submitted for the provision of the necessary funds, as also for the commutation of the Chartered Company's interest in the property. Surely this is not to be a cash payment before it is known that the company can earn profits and pay dividends? As we remarked last week, negotiations for the extension of the railway line northwards from Rhodesia Broken Hill to the border of the Congo Free State have reached an advanced stage. The northern company has redeemed the greater part of its debentures, and its general finances are in very fair order.

Wankie (Rhodesia) Coal, Railway and Exploration.—There is nothing very exciting about this company's report for the two years ended December 31, and this period has not brought the shareholders appreciably nearer the dividend stage. Sales were 73,932 tons in the first year and 76,585 in the second, not sensational progress, and it appears that in order to extend the market further the price of all coal was lowered by 10 per cent. in June, 1907, the Rhodesian railways also granting a 10 per cent. reduction on the freight. The directors will consider further reductions in the pit's mouth price as soon as new and larger outlets for the coal are assured, and are looking forward to the copper, zinc and lead mines north of the Zambesi becoming good customers. As announced when the contract was fixed up, the company will supply 56,000 tons of coal to the Cape Government during the present year. It is said to have a valuable asset in its fireclay and limestone deposits, and it is intended to extend the operations of the undertaking by the sale of cement fireclay and firebricks. The company has had a lot of trouble with its boiler plant. Reserves of coal in stalls actually gained by development amount to 139,770 tons. Revenue for the twelve months was £108,693 and the profit £11,487, sufficing to reduce the debit to profit and loss to £45,469.

Anglo-French (Transvaal) Navigation Coal Estates.—During the year 1907 the output of marketable coal was 85,178 tons and the operations resulted in a loss of £199 apart from £500 reserved for bad and doubtful debts. Cost of development is included in the working expenses, which, however, are not set out nor are details afforded of the actual revenue. Total debit to profit and loss is £1,112, including £412 brought in. Bearing in mind that the past was the first of the colliery's life, that the output was limited, and that it was necessary to push ahead with the development of the mine, the results achieved are not considered as unsatisfactory as might appear at first sight. The company is a member of the Coal Owners' Association, but certain undertakings have remained outside and competition remains unnecessarily keen. Arrears of preference dividend amount to £11,556.

South-West Africa Company.—Although actually a limited company registered under the Company Acts, this is really a semi-Imperial enterprise over which the German Government keeps a watchful eye. In a way it reminds us of our own magnificent Chartered Company, except that its finances are clear and straightforward and are fairly well up to date; there is no crushing deficit to render dividends impossible this side the millennium, and altogether the operations seem to be undertaken in a thorough and businesslike fashion. A considerable increase in capital took place during the twelve months to June 30, 1907, involving the creation of several options, and the total issued capital is now £1,400,000. The final collapse of the South-West Africa rebellion has permitted the company to proceed energetically with the development of its territories, and a branch line from Otavi to Grootfontein has been constructed at an estimated cost of £125,000. This should materially quicken the process of colonisation in the freehold territory, and mining exploration will be greatly assisted. Surveying and land settlement are proceeding apace, and a set of mining regulations, not to apply to the Otavi Company's area, has been agreed upon. Development work on this company's Tsumeb mine appears to be opening up a good property, and two smelting furnaces capable of dealing with 50 to 60 tons of ore daily have been erected. In addition to developing the Tsumeb mine the Otavi Company has commenced the extraction of ore from Guchab, of which regular shipments are now being made containing from 30 to 40 per cent. copper. The important question of the water supply is being taken in hand, and an electric light plant has been provided for the whole of the works at Tsumeb. The Damara and Namaqua Trading Company, in which the South-West Africa has a large interest, continues to operate with satisfactory results. Arrangements will be made to compensate subscribers of the working capital of the Hanseatic Land Mining and Trading Company, whose concession has been revoked by the Government. The South-West Company has a good supply of cash resources, and is practically free of floating liabilities. In future a profit and loss account will be prepared.

African City Properties Trust.—In their report for the year 1907 the directors have much to say concerning the continued depression ruling in South Africa, but this will be news to no one, and shareholders' chief concern will be the prospects held out for the future. Unhappily the directors do not look for any improvement yet awhile, and in the meantime are anxious to conserve the resources of the company. Hence no dividend is proposed on the ordinary shares compared with 5 per cent. for 1906. Rents have naturally fallen, and to let new premises has been practically impossible. Naturally fresh building operations have been restricted to the smallest possible extent, but later on considerable outlay will be entailed in connecting the company's buildings with the new water-borne sewerage system just completed by the municipality. This, however, should result in a marked saving of rates. The municipal valuation of the properties has been greatly reduced, but it is still in excess of the amount the properties stand at in the books. Revenue in the twelve months was £41,968, and the outgo, including £10,000 for debenture interest, £33,892, leaving a net profit of £8,076. To that is added £9,862 brought forward, making £17,937, and after providing preference dividend a balance of £10,437 is carried forward. From this it is obvious that any ordinary dividend must have come from previous profits, and the directors are wise not to pay one. The company has reserve, depreciation and suspense accounts to the amount of £80,500, a portion of which is separately invested. The properties are valued at £553,257.

Ivanhoe Gold Corporation.—This famous West Australian mine again issues a most excellent report, the record for 1907 being very similar to that of the previous year. Tonnage crushed was 231,050 and the value of the bullion recovered, including the yield from sands, slimes, and concentrates was £525,946, an increase of about £2,000 compared with 1906. Interest, rebate, and other items increased this to £537,332. Actual working costs were £210,607 or just over 17s. 10d. per ton, a decline of 1s. against 1906, and it is useful to note that in 1902 the costs per ton were £1 7s. 1d., since when there has been a steady and highly satisfactory reduction. Outlay on buildings, plant, and machinery £12,165, and on mine development £35,720, is deducted from profits, and with this included the expenditure works out at 21s. 11.92d. per ton. The amount spent on these items since the formation of the company is £740,314, but the balance-sheet figure is only £54,295, the amount of the original working capital, the whole of the difference having been provided from the company's profits. After meeting administration charges, well-earned bonus to staff, West Australian dividend duty, &c., the balance of profit is

£261,375, or as near as may be 50 per cent. of the value of the bullion recovered. To it is added £6,511 brought forward and the directors are again able to provide dividends totalling 24s. per share or 24 per cent., adding £20,000 to reserve and carrying forward £4,289. Dividends paid to the shareholders during the company's existence now reach £1,990,000. In all respects the financial position is a very strong one, reserves aggregating £135,000, while liquid assets come to little less than £300,000. The general manager's estimate of ore reserves is 926,737 tons, worth 52s. 2d. per ton, but the consulting engineers calculate the quantity at 1,049,714 tons averaging 48s. 2d. per ton.

Golden Horse-Shoe Estates.—This company's operations for the year 1907 were again very successful, and the total revenue of £629,379 showed a moderate increase over the preceding twelve months. Total outgo, including mine development and provision for additions to plant, machinery, buildings, &c., was £371,920, and £257,459 remained as profit, an increase of £8,643. Including £61,599 brought in, there is £319,058 to dispose of, and the dividends for the year aggregate 17s. or 1s. more than in 1906, the sum distributed being £255,000 compared with £240,000. Property account is reduced by £9,304 to £1,500,000 and £54,754 is carried forward. In the twelve months the quantity of ore treated was 247,020 tons, a slight increase over the preceding year, but the yield was less by 5,798 ozs. On the other hand the working costs per ton were reduced from £1 6s. 8.880d. to £1 3s. 9.859d., clearly indicating that the mine is benefiting by the alterations and additions previously mentioned, in addition to which other economies have been introduced. Underground operations were hampered during the year owing to the inadequate supply of compressed air, but a new large compressor is now in course of erection, and this should increase the work done by the rock drilling machinery, reduce stoping expenses, and enable the company to push ahead with development work and shaft-sinking. Ore reserves, calculated on a conservative basis, are estimated at 1,062,332 tons, an increase of 69,465 tons, but the grade has further declined from 0.685 oz. to 0.612 oz. per ton, so that the gold contents are worth £650,608 against £680,355. Total costs of mine development £267,679, and of plant, machinery and buildings £440,251 have been entirely written off, and the financial position is all right, but it seems a pity that the capital was swollen from the original modest amount to the huge figure of £1,500,000. During the year the company purchased from the Ivanhoe South Extended Company leases Nos. 1,001E and 1,002E, comprising 22 acres, together with all the machinery and plant.

Great Boulder Perseverance Gold.—The estimated increase in output for 1907, in consequence of alterations to the plant, was fully realised, the average for the entire year being 16,663 tons per month and for the second half 17,564 tons per month. Total quantity treated was 199,958 tons, an increase of 30,764 against the previous year, but the average value was lower and the yield was 80,927 ozs. of gold and 9,917 ozs. of silver compared with 80,648 ozs. and 10,813 ozs. respectively for 1906. Realised value was £344,131 and the total expenditure £247,549, which includes £32,992 for mine development, £14,650 for depreciation, and £7,529 for mine management, &c. The important sum of £76,452 was brought in from previous account, making £173,296, and once more the shareholders get two sixpenny dividends or 5 per cent. for the twelve months. Next £8,795 is applied to write down investments, £50,000 is added to reserve, doubtless for some special purpose, and £44,528 is carried forward. Average cost per ton was 18s. 2.050d., as compared with 20s. 10.118d., and the manager estimates the average cost for 1908 will not exceed 18s. per ton. Ore reserves are estimated at 461,598 tons of an average value of 7.41 dwts., say 171,022 ozs. worth £726,455, in addition to which there are 161,597 tons of probable payable ore. When an estimate was made at the end of last year the quantity was put much lower, but important additions were made in the last three months of the year. It is intended to go slow with development work during the current year, with efforts directed towards locating in the property the ore body now being worked on the Eastern boundary by the Associated Company, the opening up of the El Oro lode in the south end, and the testing of high values obtained by the borehole at a vertical depth of 1,424 feet. Latest news by cable is encouraging.

Esperanza.—In the absence of any sensational discovery, it seems almost certain that this company cannot repeat the brilliant achievements of the past year or so, and we hope shareholders are carefully putting by a portion of their dividends so as to have capital more or less intact when the rich ore from which recent big returns have come is exhausted. How near exhaustion it is cannot be definitely said, but the fact that the company paid 21s. in dividends on account of 1907, while the market value of shares is only about 27s. 6d., should permit of of a pretty shrewd guess. The English concern derives its dividends from the Esperanza Mining Company, which in the past year produced 155,671 dry metric tons, having a gross value of $3,212,666, giving a nett operating profit of $1,668,457, including miscellaneous receipts to the amount of $75,017. Undivided profits brought forward came to $3,081,086 making $4,740,544, from which no less than $3,037,500 was distributed in dividends, and after providing a small amount for capital charges written off there remains a sum of $1,695,626 to be carried into the current year. The profit and loss account of Esperanza, Limited, shows a net balance of £484,150, to which is added the credit from 1906, £35,069, making £510,219 in all. From it dividends amounting to 21s. per share have been provided, and £45,701 is carried forward. The Mexican company's balance-sheet shows an excess of liquid assets over liabilities of £316,176, but shareholders will be more concerned about ore reserves and prospects. According to the report of the consulting engineers, the estimate of ore reserves to be "all in sight were only 15,485 dry metric tons, calculated to yield a profit of £46,163, but shareholders are asked to bear in mind that these reserves represent, as always, ore bodies fully developed without reference to possibilities or probabilities of further exploration which should yield an additional amount equal to the tonnage estimated. It is also conservatively estimated that the re-treatment of the tailings dumps, after absorption into operating charges of the entire cost of re-treatment plant, will give a profit of £50,000 to £60,000, and, of course, further development work will be vigorously carried on. It is useful to point out that the company now mills its entire output instead of shipping a portion, and although this policy is productive of success, much less tonnage can be handled. It is also clear that last year the ore showed much falling off in richness, as the profit mentioned is $1,668,457 compared with $4,644,270 in 1906, when the dividends paid were no less than 32s. 6d.

Oroville Dredging.—During the twelve months to July 31 this undertaking had twelve dredges in operation, most of them for the complete year and others for varying periods. Area dredged was 163.28 acres and the ground dredged 7,973,678 cubic yards, yielding gold to the value of $895,024. Production per cubic yard was 11.23 cents, the expenditure 5.34 cents, and the nett profit 5.89 cents. Total ground dredged showed an increase of no less than 66.7 per cent., while there was a decrease in the working expenses of 0.87 cents in spite of the abnormal climatic conditions of March, 1907, and the inefficiency and costly repairs and renewals of some of the old type of dredges, coupled with the hardness of the gravel and heavy overburden. There were also adverse features in the starting of work on the Bear River property. Some decrease occurred in the average yield of the whole gravel worked, but the general manager gives reasons for regarding this as temporary, and the returns for the week ended March 23 of $21,750 from ten dredges goes to prove his contention. Nett earnings of constituent companies were $527,653, inclusive of bank interest, from which administration charges take $25,291 and $94,774 is placed to reserve, making it $250,000. Dividends for the year aggregate 10 per cent. and $57,068 is transferred to the surplus fund. Consideration is being given to the question of displacing the old dredges with new machines, but the policy might entail the further postponement of the semi-annual bonus, and the expenditure would only be undertaken on clear evidence that the shareholders will gain from the resulting economies. The estimated saving of 1½ cents per cubic yard would add £24,000 to the yearly profits.

Mount Lyell Comstock Copper.—The directors of this company propose to acquire another property in the neighbourhood of the one now owned, and in order to provide the preliminary payments are making a call of 3d. per share. It is not anticipated that any further call will be necessary. The property consists of 232 acres, a nice workable size, has tramway and railroad connection with two shipping ports, can be secured on very favourable terms, and has been favourably reported upon by Messrs. Alexander Hill and Stewart, the company's managers and mining engineers. A very considerable amount of development work has already been done on the mine, and has proved the existence of a definite and regular fissure lode, carrying average values of copper 6.8 per cent., silver 25 ozs. to the ton and tin 5.7 per cent. A large tonnage of ore has already been disclosed, and further developments now in progress "must greatly increase the quantity of ore in sight." Within five months the mine will be returning profits at the rate of £3,500 per month from the copper and silver alone—at least this is the directors' belief—and in addition to the lode mentioned there are several others providing accessory ores of a very profitable nature, besides several lodes of galena. In fact, it all reads very much like a "snip," and we hope it is.

Inverness Railway and Coal.—This Canadian company's operations during the year to June 30, 1907, were anything but satisfactory, although the output was 258,725 tons or an increase of 76,764 tons over the preceding twelve months. However, improved methods of mining which have been introduced should bring greater benefit during the year now current, and it is the general belief that the success of the undertaking depends only on increased production. Careful prospecting has proved the existence of a very large payable tonnage on the property, and experts hold the opinion that the output might be doubled, and at the same time the cost of operating materially reduced, by the opening of new seams and the introduction of improved methods of working at a capital expenditure not exceeding $250,000. In order to provide this money, the directors will seek authority for the creation of an issue of prior lien bonds. A portion of the proceeds would be devoted to the purchase of new railway rolling stock, so as to secure the traffic likely to be afforded by a new manufacturing industry which is being established two miles from Inverness. Gross earnings from all sources were $608,571 and the operating expenses $540,206, apart from a loss of $22,456 on operating the boats. Mortgage and other interest takes $169,564 and the debit balance is increased from $153,653 to $277,390. The company's financial position is poor.

Baku Russian Petroleum.—Production of crude oil for week ending April 18, 206,000 poods, equals 3,321 tons.

Russian Petroleum and Liquid Fuel.—Production of crude oil for week ending April 18, 194,000 poods, equals 3,128 tons.

RAILWAY TRAFFIC RETURNS.

Foreign.

Alberta Railway and Irrigation.—Earnings for the 7 days ended April 14, $3,825, decrease $625; aggregate from July 1, $188,244, increase $39,668.

Argentine North Eastern. — Traffic receipts for week ended April 17, £3,389, decrease £1,115; aggregate from July 1, £132,363, decrease £6,226.

Assam Bengal.—Traffic receipts for 7 days ended March 21, Rs. 92,500, increase Rs. 12,179; aggregate from Jan. 1, Rs. 10,44,242, decrease Rs. 87,611.

Bilbao River and Cantabrian. — Traffic returns for March £8,355, increase £544; aggregate from January 1, £24,583, decrease £4,019.

Buenos Ayres Central. — Gross receipts for March £11,436, decrease £1,133; aggregate from Jan. 1, £93,412, decrease £3,664.

Canadian Northern Railway.—Traffic receipts for 7 days ended April 14, $165,200, increase $35,900; total from July 1, $7,329,800, increase $2,009,300.

Egyptian Delta.—Traffic receipts for week ended April 4, £2,741, decrease £1,604; aggregate from April 1, £2,741, decrease £1,604.

Lucknow Bareilly Railway.—Traffic receipts for 7 days ended March 21, Rs. 32,127, increase Rs. 1,376; aggregate from January 1, Rs. 4,01,056, decrease Rs. 43,238.

Midland Uruguay.—Receipts for month of March, £4,957, decrease £1,597; aggregate from July 1, £50,386, decrease £4,660.

North Western of Uruguay.—Traffic receipts for March, $21,300, increase $736; aggregate from July 1, $175,429, decrease $11,930.

Quebec Central Railway.—Traffic receipts for the 2nd week of April, $22,099, increase $4,273; aggregate from January 1, $284,377, increase $72,254.

Quebec and Lake St. John.—Traffic receipts for Feb. $31,941, decrease $2,037; aggregate receipts $68,216, decrease $1,606.

Rohilkund and Kumaon Railway.—Traffic receipts for 7 days ended March 21, Rs. 27,379, increase Rs. 5,991; aggregate from Jan. 1, Rs. 2,51,178, decrease Rs. 23,108.

Uruguay Northern.—Gross receipts for month of Dec., £1,712, increase £3; aggregate from July 1, £11,422, increase £970.

White Pass and Yukon Railway.—Traffic receipts for week ended March 31 amounted to $14,686.

The Investors' Review.

The Week's Money Market.

Bank Rate 3 per cent. (Reduced from 3½ per cent. on Thursday, March 19.)

Norfolk House, Friday Evening.

Low rates in the Money market still fail to give it comfort. On the surface all money markets are in a much better position than they were at the beginning of this year. New York, we note, is so surcharged with cash and instruments of credit that it has borne with equanimity the export of £1,000,000 in gold this week, and rates for call loans on Wall Street have never risen above 2 per cent. The Bank of France is steadily improving its position, and although its note circulation increased by £1,205,000 a week ago, the decrease this week is £4,255,000, while the stock of gold is steadily augmented, the increase in the fortnight having been well on to £2,000,000. A much better show is also made by the Imperial Bank of Germany in its latest return, so that its excess of tax-paying note circulation above the legal non-tax maximum was only £1,481,200, according to the return published last Monday, against an excess of £9,990,000 the week before. Our own Bank is also strong compared with a year ago, in spite of the outflow of over £2,000,000 in gold and currency last week. Part of that currency has already come back and the banking reserve is still £26,879,000 or nearly £1,000,000 better than it was a year ago. The open market is also, in appearance at least, richer than it was last week, although other deposits are still £5,387,000 below the total of twelve months back. It is in this weakness of the other deposits that the uncomfortableness of our market lies. The total of £42,763,000, although enough for current wants, is insufficient to give the market elbow room amid the exceptional subsisting conditions. Therefore the credit users are never far away from the Bank's door, and although a week ago they managed to pay off about £747,000 of the current indebtedness to the Bank, that left them so bare that this week other securities show an increase of £178,000, representing to that extent a nett addition to the market's debt. Any little disturbance, in fact, sends the market to the Bank for accommodation, and until other deposits expand by several millions nothing like ease can be assured to dealers in credit.

But why should the other deposits be so low when the reserve is so comparatively strong? The return indicates an adequate enough explanation. To begin with, the Government has not disbursed so freely as it did in April last year, and public deposits are still £10,367,000 or £1,454,000 more than then. Further, the Government securities held by the Bank are, in spite of an increase of £103,000 during the past week, still £1,461,000 less than they were a year ago, but worst of all the other securities of £30,211,000 are £3,521,000 less than at this time last year. In one sense this last diminution is a favourable one, indicating a reduced dependence of the market upon credit generated at the Bank of England, but in another sense it means shortness of banking money at every turn, and the market is thus altogether nearly £6,500,000 poorer in working credit, so to say, than it was a year ago.

To these influences must be added the continual strain imposed by new emissions. This week, for example, the market had to find £3,000,000 for Brazil, and although the money was almost immediately let out again, the payment of this money drained away balances for one working day. In all directions likewise the loan underwriter is utilising credit to an extent which often embarrasses the market and causes short loans to be scarce in spite of the diminution in business, the smaller supply of bills and the competition for such supply as there is by foreign bankers.

Yesterday, for example, call money rose to 3½ per cent., or the rate charged for seven-day advances by the Bank, and it has been more or less 3 per cent. every day this week. Bankers have often got 2½ per cent. for call money and never less than 2¼ per cent., but owing to the fact that the Bank yesterday renewed the small amount due by the market and lent a considerable sum in addition, making the two days' borrowings probably about £1,500,000, call loans were less severe to-day. Borrowers for a week though paid 2¾ per cent.

No wonder therefore that discount rates keep steady. Fine three months' remitted bills are seldom to be got for less than 2 11/16 per cent., but French bankers are moderate buyers at 2⅝ per cent., and even when short loans are scarce it is difficult for our own bill brokers to get a higher rate, some of the business being done at 2⅝ per cent. with the concession of 1/16 per cent. out of that on sixty-day paper, while 2¾ per cent. is really about the best figure for four and six months' bank paper, although leading houses quote 2⅞ per cent. for sixes alone. One day the tendency is towards the lower of the two quotations and the next the brokers try for the higher, but the market is not working smoothly or in comfort. This afternoon it closed firm owing to the larger bill business done during the day and to rumours of failures in Barcelona and New York.

Messrs. Samuel Montagu and Co. write that most of the £500,000 or more of gold available in the open market last Monday went to Paris at 77s. 10⅜d. per oz. Next Monday about £1,100,000 will be on the market, including £1,040,000 from South Africa, and at the same price it likewise may go abroad for the most part.

Calls on new issues are heavy this week, and lead off with £255,175 for the Cape, following with £567,000 payable on Tuesday on the Moscow loan, and on Wednesday with £362,500 payable on North British Railway new preference. On Thursday the payments amount all told to over £4,160,000, including £750,000 for Canada, £781,000 for Copenhagen, £625,000 on Great Central and Great Western guaranteed and £940,000 on North-Western new preference. The Vickers company will also take up £400,000, and the week's capital absorptions will amount in all to £5,345,000, causing the Money market frequent qualms.

Silver.

This week's steamer is the last by which shipments can be made to reach Bombay in time for the May settlement, but a good deal of metal required was bought before the holidays, and bazaar orders have since been on a moderate scale. They were sufficient to keep prices steady from day to day, but no more, and when the demand ceased on Thursday quotations were marked down ⅛d. to 25 1/16d. per oz. for spot and 25 7/16d. per oz. for delivery two months forward. America has shown more disposition to sell, and in the absence of support from any other quarter a further relapse was recorded to-day, leaving final values at 24⅞d. and 25d. per oz. Applications for the Rs. 10,00,000 Council drafts on India offered this week were again insignificant, amounting to no more than Rs. 40,176, all in bills, and tenders at 1s. 3 29-32d. per rupee received allotment in full. Next week

another Rs. 10,00,000 will be offered. Sales of drafts on London in Calcutta on Wednesday were £320,000, making a total to date of £1,570,000.

BANK OF ENGLAND.

The Stock Markets.

Before Easter everybody was more or less confident that when the holiday was over business would revive. Easter has come and gone and business on the Stock Exchange is worse than ever. There is hardly any solid investment business going on and the wheels of speculation are clogged to an indescribable degree. It is here, indeed, where the source of the trouble lies. There has been no adequate liquidation of overcharged speculative positions, prices have not been permitted to recede far enough to tempt the public to renew its play, and intermediaries are leaning on credit to an extent that cramps their energies. The market is consequently stifled even now beneath the mass of unreal values, and such operations as go on mostly represent efforts of groups and cliques either to create an appearance of activity which will enable them to unload, or to snatch profits out of each other's pockets. When this paralysis is going to give place to something healthier, to free movements and active markets, it is impossible to guess. Our view, however, remains unchanged that until there is a great clearance of market waste and a far-reaching diminution of credit-sustained commitments, there will be nothing in stock markets to attract the outside public. The truth is that the October crisis in the United States was not allowed to go far enough. The whole world was summoned to prop up the rocking fabric, and its engineers and builders succeeded in staving off what looked like an inevitable catastrophe. On the Continent the same diligent and skilful application of credit props has prevented the German liquidation from proceeding to its natural conclusion, and the result is that all markets are now hampered by their engagements undertaken to support worm-eaten and undermined positions. At the same time they are being called upon to absorb fresh capital emissions every day in the week, and between the old locks up and the new demands, the chance of recovery and of a revival in genuine business is slender indeed.

Trustee Securities.

Prices have gone down in all directions since markets opened on Tuesday, and in the trustee groups there is hardly a security which has resisted the tendency except when left completely alone. Consols have subsided and are now below 87. A report that the Government has wisely decided to employ its accrued surplus, or part of it, in making advances to the Irish Land Commissioners is blamed for the weakness, but it is really inherent in the market, and the mere hint that an issue of Metropolitan Water Board "B" stock is impending or that the Transvaal guaranteed loan of £5,000,000 is about to make its appearance, is quite sufficient to stimulate bear selling of the stock. It is, indeed, supported solely by the size of the bear account already opened, and were the bears to be forced or frightened into closing, we should probably see the price back again in the neighbourhood of 85. India stocks were also heavy, especially the 3 per cents., and Water Board and County Council stocks tended to recede. The Colonial market was in a manner firm because left alone.

Foreign Government Stocks.

Foreign Government stocks were also depressed with the exception of some of the Brazilian Provincial issues and one or two Greek loans. No particular movement took place in any South American security, but they were heavy and no important issue left off at an improvement. The Brazilian Government has got its £3,000,000, to the temporary inconvenience of the short loan market, and the coupons on its debt are therefore safe for some little time, but that did not induce people to buy Brazilian bonds. Japanese bonds continue weak. Russian bonds, however, have been sustained by manipulation, and the reiterated assurance that no foreign loan will be issued this year, only an internal loan of £20,000,000. Central American issues are all inclined to dip with scarcely anything going on in them. Nicaragua Railway bonds, however, are prominently depressed.

Home Railway Stocks.

The only improvement worth noticing amongst Home Railways is in North-Eastern Consols, which have recovered the dip of last week on less blatantly pessimistic rumours about the chances of averting a strike amongst its men. Other Home Railway stocks have generally lost ground a little, and Metropolitan and City and South London alone have resisted the tendency. Business is exceedingly thin, and the improvement of about £120,000 shown in last week's traffic receipts was regarded as disappointing, product of a comparison of the first of the Easter figures this year with an ordinary week last year. The debenture stocks and other privileged issues continue to fall back with the rest, partly because there is nothing at all going on in them.

Colonial, American and Foreign Railway Stocks.

The changes amongst Indian Railways are adverse on the comparison of weeks, and days pass without a single transaction in most of them. Gambling is still active in Canadian Pacific shares, and they keep firm on the whole, but Grand Trunk stocks are flat, the third preference having fallen 3¼, and many of the

sectional bonds being lower, but the business in all the preferences has been much more extensive, and real holders are selling because they do not relish the way the company is engaging its credit to build that Pacific extension.

Apart from Union Pacific and a temporary splutter in Erie shares, very little goes on amongst Yankee Railroads. They, however, keep their prices fairly well, and a demonstration was made on Wall Street to help the Pennsylvania issue. We may be sure prices will be maintained there at all costs until other borrowings and stock emissions have been accomplished, but the public here is not gambling, and has very little interest in what Wall Street does. We are not even buying bonds to any appreciable extent, and the prices of those quoted here seldom moved. The new Pennsylvania issue, however, will go off, and deserves to.

There has been no recovery amongst Argentine Railway stocks, and business in them has for the most part centred in the ordinary stocks of the Pacific, Rosario and Great Southern Companies. Buenos Ayres and Pacific ordinary has kept its price, but the Great Southern and Great Western stocks are each down 2 and the others have receded to a lesser extent. All Entre Rios emissions are prominently depressed. Antofagasta ordinary stock has also relapsed, and weakness is noticeable in the debentures stocks and shares of the Ottoman Railway as well as in Leopoldina stock, while the stocks of the old Mexican Railway Company have been offered, with results most injurious to the bulls. Nitrate Railways shares, however, are steadier, and there has been something like a pause in the decline in United of the Havana stock, although it is still down on the week.

Banks, Breweries, Docks and Commercial Securities.

Bank shares have been a very poor market since business was resumed, and the only noticeable improvement has been in those of the London and County, up 1. Generally speaking, the shares of our home banks have kept their prices well, and there has been no material reaction in the foreign banks, the chief characteristic of the market being absence of business.

Here and there a little recovery is noticeable in Brewery securities. Characteristic of that market also is its complete lifelessness, and where any business springs up the movements are usually adverse. Watney, Combe first preference stock, for instance, was sold yesterday at 53. Life has likewise gone completely out of Dock securities.

If there is any change at all for the better it is here and there amongst Commercial and Industrial emissions, but it seldom amounts to much and is usually unaccompanied by any signs of investment business. Bonds also are more in favour than shares, although a good many improvements of sixpence to half-a-crown are to be found in the list. The shares of Motor companies, however, are still depressed, and Gordon Hotels debenture stocks have been offered at lower prices, always without finding ready buyers. Harrod's Stores shares are also weaker, and there is no indication as yet that the securities of Nitrate companies are bracing up. Maple's "C" shares have been offered a little, James Nelson and Sons ordinary have shrunk on the poorer dividend, and the securities of most Russian Petroleum companies are heavy, while the profit-sharing notes of the Underground Electric Railways have been sold as low as 38. Against the declines there are very few improvements to be noted, hardly one, indeed, of other than minor significance, but Nobel Dynamite shares have rallied, as well as J. Lyons and Co.'s ordinary, and Liverpool Nitrate shares are also better.

Electric, Financial, Insurance, Iron, Coal and Steel, &c.

There is nothing to detain us in the Electric securities list, and amongst Financial Land and Investment things the only important movement has been an advance of 2 in the shares of the Hudson's Bay Company. This is the product of bear closing in anticipation of the end of the month settlement which begins on Monday in the general market. Financial Trusts have ceased to be swayed by the Brewery scare, but prices stagnate all the same and sometimes recede.

Gas stocks are steady. Northern Assurance shares have risen to 81 on the dividend, and Royal Insurance have dropped back to about 210.

Further declines have taken place in the debenture stocks of Cammell, Laird and Co., and altogether the Iron, Coal and Steel list is far from cheerful, in spite of a further advance in the common and preferred stocks of the Carnegie Steel Trust, but there is nothing going on to test prices in most of these things. Shipping shares are also more or less out in the cold with few movements in them, but Bucknall's debentures have been put up again and there is no important relapse visible anywhere. Tea, Coffee and Rubber securities have been steady and let alone. Telegraph securities are firm with here and there slight advances recorded. The debenture stock of the Anglo-Argentine Tramways Company shows an advance of 4 and its shares have also improved a little, indeed the movements amongst Tramway and Omnibus securities are on the whole favourable, and B.E.T. ordinary shares are 2s. 6d. better, while the shares of the London United Tramways have gained ¼. Mexican Tramways shares and bonds, together with Montreal Street Railway debentures and Rio Tramways, Light and Power bonds, have all risen on the week.

Friday Evening.

An interesting table of new issues made on our market this year has been compiled by the *Financial Times*. It embraces no amounts below £1,000,000, and yet the total attained is £48,000,000, all but £10,000,000 of it raised for foreign and colonial borrowers or capital stock emitters. Our market has been asked to furnish all this money between January 8 and April 22, inclusive, and their are other issues immediately pending to the amount of another £24,000,000 or thereby, including the Pennsylvania Railroad Company's £8,000,000. If we also reckon in the multitude of smaller loans and capital creations for amounts under £1,000,000 we shall not err much on the wrong side in placing the aggregate of the demands for new money made upon us this year or about to be made at between £75,000,000 and £80,000,000. Is it to be wondered at that the Stock Exchange should be sick and underwriters ready to give up the ghost, or that banks should have little cash to spare?

Prices, however, have been steadyish to-day, and Consols have hardened after a limp opening. Markets are not buoyant anywhere, but they are not so bad as some talkers would make them. Trunks though, still wilt, and there is no strength in Home Railways or in Foreign bonds. As for new issues, here are those at a premium:—New Pennsylvania, variously quoted at 1½ to 2½, County Council 1, Canada ⅝, "Brum." pref. ⅝-¾, Moscow ⅞-⅞, New Chinese ⅛ to ⅜, and B.A. and Pacific debentures, par to ¼. And these are the discounts:—Trunk guaranteed 2½, Trunk Pacific 2½, New South Wales 3½ per cents, ⅞, and Antofagasta pref. 1.

The meeting of the Broken Hill Proprietary Company directors took place yesterday in Melbourne, and in the absence of any official announcement as to the dividend the market is assuming that none will be paid. It is suggested that in addition to the low prices of the metal the need of increasing the concentrating plant will be given as a reason for withholding a distribution. As the market has already the appearance of being oversold the passing of the dividend is probably considerably discounted.

Negotiations are reported to be proceeding for a combination of Scottish steel tube makers, which will be one of the most important of the kind in the United Kingdom. The new organisation, if constituted, is to be an entirely independent one.

WATERWORKS.—Rise: Cons. of Rosario Db. 1, to 93-5, Pernambuco Certs. 2, to 93-6, Tarapaca ⅛, to 11⅛-2.

It is understood that in the acquisition of Hudson's Soap Works by Lever Brothers, Limited, no change will be effected in the position of the large number of employees engaged. The works at Liverpool and West Bromwich will be carried on by Lever Brothers under distinct management.

Critical Index to New Investments.

Canadian Northern Railway Company.

A further issue of £2,000,000 4 per cent. perpetual consolidated debenture stock, ranking *pari passu* in all respects with the £2,342,750 existing stock, is offered by this company for subscription at the price of 92 per cent. The stock is secured by a general charge upon the property, undertaking and assets, other than land and money subsidies, subject to the £1,180,600 bonds primarily charged on the Ontario division and to charges created, or to be created, not exceeding $10,000 per mile or $15,000 per mile if guaranteed by the Parliament of the Dominion, or any of the Provinces. It is further secured by a specific first mortgage upon certain securities deposited with the trustees, particulars of which are not given in the prospectus. The company is now operating 2,874 miles, including 710 miles of leased lines, and has constructed 350 miles of new branches, which will shortly be opened. A reference to the report for the year ended June 30 last shows that out of gross earnings of $8,350,198, expenses took $5,424,164 or 73.49 per cent., but after meeting fixed charges there was still a surplus of $1,043,505. For the nine months to March 31 the gross earnings show an increase of $1,907,500, and the nett revenue one of $657,400 compared with the corresponding period of 1906-7, an improvement due in part, no doubt, to the greater mileage worked. This looks like progress, but the future is, nevertheless, still too uncertain to make the issue an attractive one.

Kaministiquia Power Co., Limited.

This company owns extensive rights granted in perpetuity by the Provincial Government of Ontario for the development of the power of the Kakabeka Falls on the Kaministiquia River, which it is estimated can, with comparatively small expense, be made to produce a minimum of 30,000 h.p. at all times throughout the year. Its power-house is distant 18 miles from the twin cities of Fort William and Port Arthur, at the head of Lake Superior, which have been selected by the Canadian Pacific, Canadian Northern and Grand Trunk Pacific for the location of their central terminals, and contain some of the largest grain elevators in North America. The share capital is $2,000,000, all of which has been issued, and in order to provide for the discharge of liabilities incurred in the construction of the power plant and for general purposes an issue of $1,325,000 first mortgage 30 year 5 per cent. gold bonds is offered at the price of £99 13s. 3d. per bond of $500 or £102 14s. 10d. A number of contracts have been made for the supply of power to, amongst others, the two cities for general municipal purposes, the Canadian Pacific Railway for the operation of its extensive workshops, grain elevators, coal docks, &c., and, quite recently, with the Grand Trunk Pacific for their full power requirements at the Fort William terminals for ten years from the commencement of supply. The plant was put into operation in December, 1906, and the annual income from the sale of power under contracts already made (on the basis of a verified statement for the three months ended January 31 last) is $118,368. Operating expenses are only $18,142, leaving a nett revenue of $100,225 to meet the interest on the present issue, exclusive of any income from two comparatively large contracts which did not become operative until February 1. These are estimated to produce at least $12,000 without additional expense, and when arrangements have been made for placing the whole of the 15,000 h.p. available from the present development, it is estimated that the nett revenue should not be less than $225,000. Interest on the bonds will take $75,000, and the issue seems to be well enough covered.

Messina (Transvaal) Development Co., Ltd.

This company owns copper mines in the Northern Transvaal covering about 14,000 acres, and has contracted to purchase an adjoining property of about 6,600 acres. It has a capital of £200,000, of which

£94,993 is held in reserve, and £100,000 was issued in payment for the assets of the G. G. Syndicate, and has also raised £43,500 on debentures. Further working capital is now required, and to provide this, as well as to redeem the debentures and to pay for the new property, the Company offered £120,000 6 per cent. convertible debenture stock at par. The stock will be repayable at par on Dec. 31, 1930, by means of a redemption policy to be taken out with the Alliance Assurance Company, but when fully paid up will carry the right to exchange on or before June 1, 1910, into fully paid shares at £2 per share, or within a further year at £2 10s. per share on three months' notice. During the year ended June 30 the efforts of the management were mainly devoted to exploration and development work, but the operations resulted in a profit of £14,833, although the Company at that time had to depend on hand sorting. A concentrating plant is now being erected with a capacity of fifty tons per day, and it is estimated that with copper at £60 per ton the monthly profits should amount to £3,600. Ore reserves on Dec. 31, developed in the mine above the second level at 200 feet, were given as 15,423 tons of an average value of 24·04 per cent. copper, and have since been increased by the lode having been struck at 310 feet, while there are 5,440 tons of 11·06 per cent. ore on the dump. Other assets consisting of the freehold and leasehold properties, mine development, buildings, machinery, stores, etc., are valued at £144,017, and altogether the debenture stock seems a fair speculative investment.

Chicago, Indiana and Southern Railroad Company.

Messrs J. S. Morgan & Co. are prepared to forward applications for $15,150,000 50 year mortgage 4 per cent. gold bonds of this company which are offered by the parent house of J. P. Morgan & Co. in New York at 91 per cent. and accruing interest. The company was formed in April, 1906, by the consolidation of the Indiana, Illinois and Iowa Railroad Co. and the Indiana Harbour Railroad Co., and now owns 329 miles of line. Its capital consists of $5,000,000 preferred stock, $15,000,000 common stock, and $20,000,000 bonds of which the present issue forms part, the remaining $4,850,000 being reserved to provide for outstanding bonds of the Indiana, Illinois and Iowa Co. For the year ended December 31 the gross earnings were $3,004,483 and the nett including miscellaneous receipts $1,149,531, of which fixed charges took $926,351. The bonds in addition to being a first charge on the properties owned are guaranteed as to both principal and interest by the Lake Shore and Michigan Southern Railway Co., and should therefore be a good enough investment.

Answers to Correspondents.

Deposits against future queries may be lodged with the Publisher.

G. H. B. P.—(1) A moderately good second-class investment, but quite dear enough. (2) A fair bond, but not very marketable. (3) These are good as the roads are doing well, price should recover in time. (4) Fair, but the stock is nearly at its full value. (5) Prospects are favourable, as receipts are good, and the issue is backed by another company, which should do well. Remittance right. Thanks.

E. T.—It seems a pity to sell just at present, when friction excites fear. We hardly think the powers concerned can allow the trouble to go so far as to imperil the interest on the debt. For all that, the price may go lower before recovery begins.

Houghton.—(1) No; do not put any money in these shares, the company is on the down grade. (2) This also is a concern about which we have no very favourable opinion. It includes all kinds of debentures, but the kind you mention is not more risky than many of its other commitments. So leave the concern alone. These are two answers, the charge for which—see scale—is 1s. each. You therefore owe us 1s. 6d., including a copy of the paper.

Megrim.—Probably the stock is over-valued, much over-valued looking at the way the property is managed, and more capital will be wanted by-and-by. Just at the moment, however, the stock is more likely to go up than down.

W. B. B.—Look at the traffic receipts. We do not think you should sell any of these stocks at present, for the proportion is not too large to your total capital, the security considered. Your letter is really only one question, so we hold 4s. to your credit.

Company Reports and Balance Sheets.

**** The Editors will be much obliged to Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-sheets direct to the Office of the* Investors' Review, *Norfolk House, Norfolk Street, W.C., so as to ensure prompt notice in these columns.*

BUENOS AYRES AND ROSARIO RAILWAY CO., LIMITED.

The improvement in this company's business during 1907 was much less pronounced than that for the previous year, but, all things considered, the growth in earnings must be regarded as satisfactory. Under ordinary conditions, a large proportion of the goods traffic is derived from maize, and at one time it looked as if the partial failure of that crop would have a very serious effect on the revenue. As a matter of fact, the quantity carried fell off by 984,781 tons or 55.6 per cent., and the receipts by £265,323, but the decline was to a large extent neutralised by increases of 85,881 tons and £61,092 in wheat and flour, 104,790 tons and £44,505 in linseed, &c., and 166,190 tons and £174,922 in general goods. Decreases of 28,668 tons and £19,378 in foreign timber and 10,002 tons and £9,343 in sugar were more than offset by gains of 57,912 tons and £19,425 in native timber and 83,284 tons and £19,671 in firewood and charcoal, and in the goods and livestock traffic, although 552,520 tons less in weight and 8,554 in numbers produced an additional revenue of £22,006 at £3,082,578 Passenger traffic improved by 1,471,334 in numbers and £65,780 in receipts, mainly on the suburban lines, as the second-class main line traffic was adversely affected by the reduced movement of agricultural labourers. Gross income from all sources amounted to £4,604,380 compared with £4,530,747, an increase of £73,633, but unfortunately the company had to face a considerable expansion in expenditure in various directions, and working expenses rose by £174,042 to £2,726,797 or 59.22 per cent. of the receipts against 56.34 per cent. Of this increase £38,896 was due to coal, but the enhanced cost of living and the large demand for labour of all classes owing to the opening of new railways and briskness of trade generally have also made it necessary to raise wages in all departments, while additional staff has been required by the growth of the business. The increased pay to enginemen amounted to £25,790, and to the station and train staff, signalmen, telegraph clerks and porters to £56,978, and these items, with the duties paid on working stores imported for use on the Central Argentine section accounts for the big jump in outgoings. Nett revenue was £100,409 less at £1,877,583, but interest, remittance exchange account, &c., produced £1,646 more at £55,520, and the balance brought forward was £19,456 up at £50,306, making a total of £1,983,409 compared with £2,062,717. Debenture stock interest and Western annuity absorbed £405,765. Of this, £13,278 was paid for general interest and £892 for bill stamps leaving £1,563,473 or £92,307 less to be dealt with. After providing for the dividends on the preference shares and stock, and for a dividend on the 1906 new shares at the rate of 7 per cent. from the due dates of the instalments, the ordinary and deferred stocks again receive distributions at the rate of 6 per cent. each. In order to pay these, however, the appropriations to the various reserves have to be reduced, the renewals and contingency fund getting £55,000 less at £50,000, the fire insurance fund £30,000 less at £20,000 and the reserve nothing against £50,000, but another £15,000 is transferred to staff pension fund and £5,000 is again written off the grain elevators at Madero Port, leaving £33,830 or £16,476 less to be carried to the new account. Capital is still being spent very freely, the total last year amounting to £1,854,586, of which £379,654 was on the Rosario main line and branches, £387,116 on the Central section, including the purchase of the Malagueño Railway, £10,316 on the grain elevators and £1,077,499 on new rolling stock. After deducting £34,672 for works in course of construction, the company has a credit balance of £161,943 in hand, and apparently this will be sufficient to go on with, as there is no reference to any fresh issue being made. Negotiations for the consolidation of the company's concessions were continued during the ordinary and extraordinary sittings of Congress, and resulted in the formation of an *ad referendum* agreement with the Executive Power. Under this agreement, the company undertook to construct some 800 kilometres of new lines in the Provinces of Santa Fé and Cordoba, which it had been strongly pressed to build by landowners and others interested. Unfortunately circumstances prevented the measure coming before Congress, and the works have, therefore, to be postponed. The outlook for the present year is regarded as unusually promising, as heavy receipts for some months to come are assured through the big wheat and linseed crop, and although the maize fields are beginning to suffer from drought the manager expects to carry at least a million tons more than last year.

ENTRE RIOS RAILWAY CO., LIMITED.

The financial crisis in the United States had its effect even on the earnings of this company for the half-year ended December 31, as in consequence of that the local banks reduced their credits in all directions and North American buyers retired from the hide and wool market. Less traffic therefore was derived from these items, and receipts from stock products fell off by £1,234, but in all other directions there were improvements of a more or less decided character, and the total income from goods rose by £7,206 to £68,911. The number of passengers carried increased by 17,714 and the receipts therefrom by £6,782, and the revenue from all sources amounted to £106,660 or £14,174 more. Expenses, however, were £13,837 larger at £73,273, or 68.70 per cent. compared with 64.27 per cent., as the directors deemed it

expedient to spend freely in anticipation of an exceptionally heavy crop, and of an increase in the volume of business on the opening of the Buenos Ayres connection. Owing to this the outlay on locomotive maintenance was £3,486 higher, and amounted to £197 12s. per engine against £119 8s. 3d. a year ago. Another cause contributing to the higher working expenses was the cost of fuel, which rose by £2,432 or 35.4 per cent., but this trouble would seem to be less acute now, as the manager reports that coal is coming forward at a much reduced rate. The improvement in nett receipts was no more than £337 at £33,387, and general interest, &c., gave £128 less at £1,372, but with a considerably larger balance of £9,183 brought in, the sum carried forward to be incorporated in the annual accounts was £2,403 better at £43,942. Interest on the 4 per cent. debenture stock for the half-year has been charged as usual to the subvention account, which, on the other hand, is credited with the proceeds of the sale of subvention bonds, interest on capital money on deposit and receipts from sections of the new extensions opened from time to time to partial public service during construction. The various extensions, amounting to some 183 miles, are nearing completion, and it is expected that the Buenos Ayres route will be opened for passengers and the full service inaugurated shortly. Under the terms of the concession the Provincial Government handed to the company the third quota of $250,000 subvention bonds on the opening of the line to Medanos on February 1, and the last quota will become due on the arrival of the first car in the Province of Buenos Ayres.

SAN PAULO (BRAZILIAN) RAILWAY CO., LIMITED.

A year ago this company had an exceptionally good time owing to the large coffee crop, and the prosperity continued throughout the first half of 1907, but since then a big change has taken place. For one thing the coffee crop was considerably smaller and the quantity carried fell off by no less than 281,000 tons, and for another there was again a drop of 0.782d. to 15.166d. in the exchange, which helped to accentuate the adverse comparison. Passenger traffic yielded £2,404 more owing to an increase of 108,749 in the numbers carried, but merchandise as the result of the above-mentioned decrease and of a decline of £25,015 in other goods brought in £577,998 less at £693,507. Miscellaneous receipts, too, were smaller all round, and the gross income amounted to £803,074 compared with £1,382,268. Savings were effected in all branches of expenditure except tractive power, which rose by £10,606, but the total reduction was only £72,603 at £518,107 and the nett revenue including £5,666 or £5,421 less from the Bragantine section, showed a decrease of £501,170 at £279,300. The sum brought in, however, was £176,769 larger at £243,705 and with £16,610 from interest the available balance after providing for debenture interest was £313,590 down at £498,407. A year ago the directors took advantage of the big surplus to transfer £100,000 each to the general and rolling stock reserves and to write down the holding of Consols by £50,370, but this time, of course, there is no question of any such appropriations being made. The dividend on the ordinary stock is maintained at the usual rate of 10 per cent. per annum with a bonus of 1 per cent., making 13 per cent. for the year and after setting aside £25,000 or £10,000 less for income-tax the amount carried forward is £53,219 down at £268,407. Stockholders can view with equanimity the omission to increase the reserves as these at present stand at £1,070,641 apart from the special income-tax fund of £61,865 and the position generally is very sound. Liabilities in England for interest, uncompleted contracts, &c., come to £146,167 and outstanding accounts in Brazil to £161,619, but assets in England total £1,460,532, including £425,538 in cash and loans, £230,071 in bills receivable and £697,800 invested in £850,000 nominal of Consols, and Brazilian assets are valued at £351,084. Prospects for the current six months do not show much sign of improvement as the estimate of coffee to be marketed is only about 2,000,000 bags or 120,000 tons compared with 5,000,000 bags or 300,000 tons expected at the corresponding date in 1907.

CENTRAL URUGUAY RAILWAY COMPANY OF MONTE VIDEO, LIMITED.

Gross receipts of this company's main line for the six months ended December 31 amounted to £251,019 or an increase of £15,669 and were the largest in its history, but good though these figures were they did not come up to anticipations. An exceptionally busy season had been looked for owing to the heavy wool clip and the good crops of both wheat and maize, but just as the wool was coming forward rapidly the New York troubles broke out and paralysed business completely. Receipts from that traffic fell off suddenly, and in the end there was a decrease of 356 tons in the quantity carried, while hides and skins dropped by 4,269 tons owing to the condition of cattle throughout the winter having been excellent and flour was 1,311 tons lower. In wheat and maize, however, there were increases of 14,732 tons and 17,877 tons respectively and limestone, building materials and general goods were all higher, so that on balance there was an improvement of 41,921 tons in goods traffic with a gain of £8,057 in receipts. Considerably less live stock was carried owing to the reduction of its output by the freezing establishments in Monte Video and to strikes amongst labourers in the jerked beef factories, but more of the business came from the Northern Extension and with the larger haulage receipts were £1,905 better. A very small increase of 94 is shown in the number of passengers carried, but this was due to the fact that the 1906 figures included company's labourers travelling at reduced rates, whereas now they travel free and are omitted from the statistics, and with gains of £1,499 more in parcels, &c., and £1,475 in sundries the revenue from coaching traffic was £5,708 up. The sudden collapse of business affected the company adversely in another way. Preparations had been made for a heavy traffic, and as it was impossible to cut down the expenditure immediately the working expenses were £18,447 heavier at £134,390 or 53.54 per cent. against 49.26 per cent. a year ago, and nett profits consequently showed a decrease of £2,778 at £116,629. Gross receipts of the Eastern Extension improved by £4,778 to £52,800, of which expenses took £25,080 or £1,069 more, the percentage of receipts being 47.50 per cent. compared with 50 per cent., but the Northern Extension revenue only rose by £91 to £37,178 and those of the Western Extension dropped by £1,652 to £34,410. Adding to the nett receipts of the main line the balance of £17,613 brought forward, together with £16,996 for interest on Western Extension 6 per cent. debenture stock and £783 for interest on Government bonds, profit on remittances, &c., the available total was £152,022 compared with £158,351. Of this debenture interest, preference dividend and rent of the Northern Extension line took £85,202 and £6,073 was advanced to the Western Extension under guarantee, leaving £60,146 or £8,988 less to be dealt with out of which an interim dividend is paid on the ordinary stock at the rate of 4 per cent. per annum against 5 per cent. a year ago and £20,140 or £1,012 more is carried forward. Prospects for the current half-year are regarded as excellent in spite of business having been demoralised by the strike, which commenced on February 22 and lasted until the 4th of this month. The wheat harvest was a splendid one and much of it remains to be carried, while the maize is promising well, and there are large quantities of merchandise waiting to be carried outside.

RIO CLARO SAO PAULO RAILWAY COMPANY.

The total revenue for the year ending March 31 amounted to £135,700, including £586 transferred from reserve as against £965 in preceding year. The last dividend of 13¾ per cent. is repeated and the necessary outgoings provided for in the way of debenture interest, directors' fees, and tax. Capital expenditure account is reduced by £390,600, Paulista bonds redeemed, and now stands at £976,724, there being a small credit of £633 on account of a land claim settlement. The outstanding Paulista bonds amount to £2,312,400. Cash and interest accrued to date total £64,003 and investments £425,246, subject to a depreciation as at March 31 of £16,083. Reserve after the deduction mentioned will be £772. Compensation fund stands at £18,243 and £25,424 is owing in loans against security. The nett receipts of the Paulista company show a decline of about Rs. 4,000,000 to Rs. 14,534,000 $000, equal to £923,515, of which only £164,970 is required for interest and redemption of bonds held by the company.

THE NITRATE RAILWAYS CO., LIMITED.

For the year 1907 this company's earnings were wonderfully good, all things considered, but the nett income only permits the directors to make up the dividend on the unconverted ordinary shares to 6 per cent. for the year, which is 2 per cent. less than the distribution for 1906, and this means that the deferred shares get nothing as compared with 1 per cent. To pay this dividend the balance carried forward had to be reduced by £57,833 to £16,688. A glance at the figures explains this diminished revenue. Gross receipts were only £570,238, nitrate traffic alone having declined by £46,902, a loss which no other branch of business made good, although coal traffic gave £10,000 more than in the previous year. The passenger earnings, however, were £4,624 down, and the decrease in the entire income was £39,090. At the same time the expenses went up by no less than £27,395, locomotive charges alone having cost £25,319 more, and every other item except maintenance of way and expenditure in London show more or less serious increases. It resulted that the nett revenue balance was actually £66,485 less at £226,177, so that although the balance brought forward was £13,810 up the directors were unable to do more than as has just been stated. Many things, indeed, seem to have been against the company, and the revenue account had to be made up at an exchange of 12.46d. to the $ as against 14.34d. in 1906. Percentage of working expenses in Chili was 58.59 as compared with 49.73, and the total expenses of all kinds in Chili and London came to 60.33 per cent. against 51.96 per cent. for a total traffic of 23,115,907 quintals against 24,923,247 quintals in 1906. The directors say that the reduction in traffic is caused entirely by the strike which took place in December, but surely the reduction of 1,577,223 quintals in the amount of nitrate of soda exported, of which 14,702,350 quintals or 1,988,000 quintals less were carried by the Nitrate Railways, cannot altogether be attributed to that strike. In fact, the total quantity of nitrate carried by the Nitrate Railways last year was 2,378,291 quintals down at 14,800,000 quintals. At the date of the balance-sheet the capital was over-spent to the amount of £97,530, but the company is steadily reducing its debenture debt, and the total outstanding on December 31 last was at £1,008,000, £69,100 less than at the end of 1906.

H. H. THE NIZAM'S GUARANTEED STATE RAILWAYS CO., LIMITED.

Gross earnings of the broad gauge system for the half-year ended December 31 amounted to Rs. 25,52,137 or an increase of Rs. 3,00,691, of which Rs. 73,426 came from passengers and Rs. 2,16,014 from goods. Working expenses were slightly lower at Rs. 8,08,807, the proportion to receipts being 4 81 less at 34.04 per cent. and nett revenue showed an improvement of Rs. 3,06,695 at Rs. 16,83,330. The sterling rate of exchange at which nett earnings were converted was 15 29-32d. against 16⅛d. a year ago, but even so the surplus, after deducting

£5,625 paid to the Government on account of the Bezwada Extension was £19,397 up at £105,939. Of this £86,126 or £1,126 more was required to meet the guarantee on the 4 per cent. debentures and sinking fund together with 5 per cent. per annum on the capital stock and the debentures on which the guarantee has expired, leaving £19,813 to be divided between the Government and the company. On the metre gauge line the gross earnings fell off by Rs. 17,520 to Rs. 12,02,442, the decrease being due entirely to goods as passenger receipts rose by Rs. 77,552. Expenses, however, were reduced by Rs. 1,81,460 or 46.13 per cent. against 60.34 and nett revenue was, therefore, Rs. 1,63,940 better at Rs. 6,47,763. Converted into sterling this gave £117,976 or £22,318 more to be dealt with, and after providing for the guarantee on the 3½ per cent. debentures and sinking fund £36,976 is left to be divided equally between the Government and the company. The company's proportion of the surplus earnings of both systems, which amounts to £28,394 compared with £20,139, has been carried to reserve and the directors again recommend a dividend at the rate of 5 per cent. per annum.

DEMERARA RAILWAY COMPANY.

Passenger traffic on this company's own line during the six months ended December 31 showed an increase of 6,955 in numbers and £341 in receipts, but merchandise fell off by 6,710 tons and £1,549, owing to the shortness of the sugar crop. Gross revenue was £1,200 down at £19,306, but expenses were reduced by £2,044 to £8,882, thanks to decreases of £1,278 in maintenance charges, £512 in locomotive power and £151 in traffic expenses, leaving the nett revenue £844 better at £10,424. On the Berbice line the gross income rose by £329 to £4,365, but as expenses were £953 heavier at £7,207 the nett deficit amounted to £2,842 against £2,218, while on the West Coast line a drop of £211 to £3,285 was accompanied by a saving of £965 at £3,425 in expenditure. With £957 brought forward and £6,250 of Government subsidy, the balance at credit of the nett revenue account was £17,631 compared with £17,480, and after deducting the losses on the Berbice and West Coast lines together with the proportion of debenture interest charged to their accounts, the surplus was £281 better at £13,249. The dividend for the half-year on the extension preference shares is covered by the subsidy, but the directors now pay a dividend at the rate of 7 per cent. per annum on the preference stock, making the full 7 per cent. for the year compared with 6 per cent. for 1906. An extra £500 at £1,500 is then appropriated to renewal fund and £500 is transferred to contingency fund, with the result that the sum carried out is reduced by £719 to £974. The dividend on the 7 per cent. preference stock being cumulative, the distribution now proposed will leave £32,200 or four years' arrears still outstanding, and with regard to this the directors state that they are expecting to hear by cable very shortly that the Ordinance funding these arrears in 3½ per cent. preferred ordinary stock has been passed.

UNION BANK OF SCOTLAND.

In the year of this bank which ends on April 2 the gross profits earned were £5,666 up at £350,869. Expenses, however, came to £2,708 more at £157,624, so that the increase shown by the nett profit of £193,245 was just £2,958. The balance brought forward, however, was at £37,657, £8,787 more than that of the previous year, so that altogether there was £11,745 more to divide, and the directors accordingly placed an additional £10,000 on one side. A year ago £40,000 was assigned to the securities and investment account, doubtless against market depreciation. This year £50,000 is carried to the reserve or "rest," raising it to £925,000, exclusive of the balance at the credit of profit and loss carried to meet the dividend payable May 9 and November 9, and amounting to £175,902. Then £5,000 is again placed to reduction of cost of premises, and out of the balance the now customary dividend of 26s. per share or 13 per cent. per annum is declared. Income-tax is also paid, taking £6,500, and £39,402 is left to carry forward. This is a quite satisfactory out-turn, especially when it is seen that the items of the balance-sheet indicate some diminution in the resources and business done. On deposit and current accounts, for example, the liability has declined by £287,357 to £12,976,988. Notes in circulation are also £57,523 less at £907,274, and there is a decrease of £10,278 in the liabilities on acceptances, which only amount to £26,087. Current drafts on London, however, show an increase of £55,001 at £138,855. Changes in the assets are seldom large, but naturally correspond with these diminutions. Thus bills under discount, less rebate not stated, are £13,427 less at £2,931,596, and there is also a decrease of £68,193 in the advances on cash credits and current accounts, which at the date of the balance-sheet aggregated £2,841,622, and loans on stocks and other securities show a reduction of £237,531 at £2,443,396, making a decrease in this group of the company's assets of £319,151, their total being £8,216,614. Then £1,000 has come off the value of London property at £68,371, but the Scotch offices are valued at £732 more, the figure being £245,204. Holdings in Consols and other British Government securities show an increase of £31,351 at £1,160,443, and other securities and investments held have gone up by £229,647 to £2,012,375. Money lent at call and short notice is also £9,571 more at £3,071,887, but cash balances due to the bank are less by £145,526 at £229,756, and gold and silver coin, notes of other banks, &c., &c., show a diminution of £43,958 at £1,119,368, the total of the balance-sheet being £248,412 down at £16,150,106.

LONDON AND BRAZILIAN BANK, LIMITED.

The extra capital provided by the issue of 25,000 shares, £10 paid, at a premium of £6 per share, which was made last year seems to have been employed at remunerative rates. Gross profits for the twelve months ended January 31 showed an increase of £35,143 at £443,479, and with £100,366 brought forward the available total was £35,381 up at £543,845. Charges at head office and branches were slightly lower at £176,283, but taxes at home and abroad took £3,952 more at £27,084, leaving a nett profit of £340,477 against £308,866. The new shares rank for dividend with the old, so that to pay the usual dividend and bonus aggregating 15 per cent. per annum requires an additional £37,500 at £150,000, but the directors put £90,000 to reserve compared with £60,000 to that fund and £30,000 written off bank premises, and by omitting the £6,000 added to staff pension fund still have £100,477 to carry forward. The reserve fund was further increased by the premium received on the new issue, and now amounts to £1,000,000 or the same as the paid-up capital, while the staff pension fund stands at £60,000. Current accounts and deposits are £433,146 smaller at £4,290,028, and bills payable are £1,390,050 down at £296,312, but agents and sundry accounts owe £556,142 or £18,792 more, and bills held for collection show an increase of £43,388 at £2,174,884. On the other hand, there is an increase of £537,432 to £4,202,349 in bills discounted and loans, but specie and cash has dropped by £419,332 to £2,498,733, bills receivable have been reduced by £1,160,842 to £2,863,869, and cash and remittances in transit by £269,189 to £362,321.

BABCOCK AND WILCOX, LIMITED.

A very profitable business was done by this well-known engineering company in 1907. Manufacturing profit came to £318,261, or almost £23,000 more than in the previous year, and the total income from all sources was £26,439 up at £337,063. General expenses were kept down so carefully that after meeting rents, rates, and taxes, patent expenses, fees, and directors' and auditors' fees, as well as paying income-tax, the nett balance available for distribution was £23,841 up at £309,769. The balance brought forward, however, was £6,072 less at £25,895, so that the final free profit was only £17,769 up at £335,664. Out of this the preference and ordinary share dividends have been paid, the ordinary receiving 8 per cent., the same as last year, together with a bonus of 4 per cent., also the same as before, all tax free, and after these assignments have been made £163,664 is left, out of which £100,000 is again placed to the reserve fund, making it £400,000, and £25,000 to the dividend equalisation fund, increasing it to £170,000. These adjustments leave £38,664 or £12,769 more to be carried forward. It is stated in the report that the extensions of the works referred to a year ago have been completed, and have enabled the increase in the business during the year to be dealt with. A considerable volume of orders was on hand at December 31. The balance-sheet shows the company to be in the happy position of having no fixed debt, and it owes sundry creditors only £237,551, which, however, seems to be a considerable increase on the amount owing a year ago, because the reserve for estimated further expenditure on orders invoiced, and to meet a fall in the value of investments, &c., is only £11,000 up at £128,000, whereas the total of this item and "sundry creditors" together shows an increase of £145,918 at £366,254. The company is strong in cash, which is £24,747 larger at £111,848. Investments at cost are down £9,298 to £305,821, and debtors owe the company £163,899 more at £802,412. There is also an increase of £73,441 in the stock of merchandise and work in progress, entered at £309,764, and the value of freehold and leasehold property, plant, buildings, &c., has gone up by £38,508 on the year to £421,663. Expenditure on orders not invoiced amounts to £27,012, and the total of the balance-sheet is £2,007,518.

BRITISH ALUMINIUM CO., LIMITED.

Bad times seem to have hit this company rather hard last year and yet it is possessed of a fine business. All aluminium manufacturers being now embraced in one group or ring, it should be able to hold its own and more in the future. For the year 1907, however, the profit was £34,542 less at £120,482. Some savings have to be set against this. Debenture interest, for instance, took £813 less at £28,515 and only £7,227 was spent as cost of issuing new capital last year compared with £12,545 the year before, and the £10,764 written off the cost of the company's temporary factory at Kinlochleven compares with £7,829 written off goodwill the year before. Altogether £17,992 thus disposed of compares with £28,800 set aside a year ago, and the money has been applied in purchasing and cancelling debenture stock. Then £20,000, or the same amount as last year, is written off for depreciation, leaving £53,975 as nett profit, to which £34,549 has to be added, being the balance brought forward. Thanks to the fact that this balance is £30,668 larger than the previous year's, the distributable profit is brought up to £88,524, and the directors are able to pay the full dividend upon all the preference shares as well as to give the ordinary shares 7 per cent. for the year. This done and £8,086 devoted to the purchase and extinction of 2,196 funding certificates of £5 each, there remains £36,503 to be carried forward or £1,054 more than was brought in. The amount paid for the funding certificates was £5,548 less than in the previous year, although the number cancelled was greater by 937 at 2,196. It is stated in the report there there is now no prospect of any power being derived from the Kinlochleven Power Establishment before the summer of next year, and even then the works will

not have been completed, but the Orsières projects are said to be going ahead well, and both the hydraulic section of the works and the Martigny-Orsières Railway are well forward. The company, however, is consuming capital at a great rate, and during the year 40,000 1908 conversion shares of £10 each were offered, of which 39,070 shares were subscribed and 20,000 "A" 6 per cent. preference shares of £5 each were also put out and all taken up, so that the total share capital of the company paid up to date amounts to £772,822, and it owes a large amount of money on debentures; in fact, £541,497, besides which it has borrowed £120,000 on temporary loan and another £40,000 on security, while it owes sundry creditors £15,489 more at £54,686. Goodwill stands as an asset at £92,171 and seems for the present likely to remain there, while the value of "property" has gone up by £54,447 to £573,667 in spite of £20,000 written off for depreciation. Then the company is interested in the Loch Leven Water and Electric Power Company to the extent of £496,486, which represents the cost of 50,052 shares in that company held by it. It has also £187,091 sunk in the Orsières enterprises, and its other investments, including shares in and loans to subsidiary companies at or under cost, figure at £155,301. Sundry debtors, however, owe it £17,692 less at £62,118. Cash is only £13,098.

FREDERICK LEYLAND AND CO. (1900), LIMITED.

If the shareholders are agreeable "1900" is to be knocked out of this company's name because the old business of Frederick Leyland and Co., Limited, which it took over is now wound up. Last calendar year the shipping business carried on by the company was not so profitable as in 1906 by £26,165. Gross profit, that is, after providing for insurance, repairs, overhauls and thorough maintenance of the fleet, came to only £188,704, but £5,774 was saved in general expenses and fixed charges which were brought down to £72,185, so that the nett profit of £116,520 was only £20,391 to the bad, but depreciation, written off on the same basis as has been debited each year since the formation of the company, took £112,684 of this, and even that was £5,438 less than the amount thus applied in the previous year. It was enough, however, to reduce the nett profit on the year's working by £14,953 to £3,835, which has been applied in reduction of the balance at debit of profit and loss, bringing it down to £125,486. This is a lamentable result, and we fear no immediate prospect exists of better times to come. The company, however, is slowly reducing its debenture debt, having purchased and cancelled £8,500 last year, bringing the total down to £360,600, and when it gets its new steamers into operation the prospects may improve. Last year, although there was some improvement in average voyage earnings, the company suffered from increased charges, particularly for coal, and experienced both direct and indirect loss through strikes and labour troubles in Montreal, New York, New Orleans, Antwerp and other ports. It was also hurt towards the end of the year by the monetary stringency in the United States, especially in respect to West-bound freight earnings. The balance-sheet, apart from the weight of capital, which is undoubtedly excessive, seems to be clean enough, although the company owes sundry creditors £238,306 and is indebted to the Wilsons and Furness-Leyland Line, Limited, to the amount of £72,356. Steamships, goodwill, leases, furniture, plant, &c., &c., after deducting depreciation and book value of steamers lost, about which no particulars are given, beyond the statement in the auditors' certificate to the effect that depreciation at the rate of 5 per cent. per annum has been deducted from the book value of the steamships as in previous years, form an entry of £2,398,342. The company has also £446,269 invested, principally in shares of the Wilsons and Furness-Leyland Line, Limited. Cash stands at £58,986, and £98,760 is due on account of steamers building, including £28,360 in suspense. Sundry debtors owe it £66,308, and the accounts due on pending voyages aggregate £58,986.

SCHIBAIEFF PETROLEUM CO., LIMITED.

Another depressing experience has been the lot of shareholders in this unfortunate company for the year ended April 13 last, or March 31 old style according to the Russian calendar. It depends almost entirely for its fortunes or misfortunes upon the Russian company called S. M. Schibaieff and Co., Limited, of Moscow and Baku, and that company's operations resulted in a loss of £53,835 for the year, bringing the total debit balance up to £76,698 against which the English company has a credit balance of £73,510. Thus there was no revenue at all for the English company, in spite of the fact that it earned £10,925 as dividend upon its investment in the French Société Anonyme d'Armement d'Industrie et de Commerce. Worse than this it seems to have pledged a good deal of its assets for advances, 1,457 shares in S. M Schibaieff and Co. having been given to bankers as security for loans made by the Schibaieff Petroleum Company to the Russian company. Also 1,844 shares in the French or Belgian company have been pledged with bankers as security for loans amounting to £60,000. Altogether the Russian Schibaieff Company appears to owe the London one £139,307, and the London company has had to borrow £85,000 of this by pledging the above-named securities. In the balance-sheet there is an entry of £60,376 representing premiums received on shares sold, and the whole of that is also swallowed up in these advances. The prospect is therefore anything but encouraging, and even if there is no further disturbance at the works in Baku, chances of profit would appear to be remote since the prices for petroleum in the interior of Russia are said to be lower now than they were during the company's working year. The oil-fields, it is stated in the report, showed a considerable profit, but owing to prices in the interior of Russia being below the Baku parity, the refinery and distribution departments made a heavy loss. That loss seems likely enough to continue.

THE EGYPTIAN MARKETS, LIMITED.

Quite a mass of interesting information is supplied in the report of this company's board for the year 1907. We gather that difficulties are still plentiful, but the company does not seem to have suffered much by the financial crisis of last year, although the dividend has been curtailed by ½ per cent. to 6½ per cent., and even then the balance carried forward is £542 less at £504, after allowing for the £250 estimated to be due to the Egyptian Government as its share in the profits. The company is entering into many lines of business besides cattle dealing and market holding, and a beginning has been made in the sale of nitrate and other chemical manures. Salt is also handled by the company, and its connection in that business has led to an action against it on the part of the United Egyptian Salt Company, or the Egyptian Salt and Soda Company, we are not quite sure which. Gross receipts for the year came to £45,586, of which £25,395 came from cattle markets, £13,295 from general markets, £1,144 from abattoirs, £3,440 from the sale of nitrates, and £2,313 from sundry sources. Expenses took £24,205, an increase of £4,440 on 1906, and the nett revenue of £21,382 was £4,373 better, the gross increase having been £8,812. Altogether the distributable revenue amounted to £21,928, including £546 brought forward; but the dividend is lower because the money has to be spread over the £50,000 in new shares issued last year, and yielding results to the revenue only during the past quarter of the year. There is nothing in the balance-sheet calling for special notice, but the premium obtained on the just mentioned new issue of shares has been appropriated to establish a fund for their redemption at par when the Government concession ends in 1938, and the sinking fund for the redemption of the debenture capital accordingly figures in the balance-sheet at £56,634. The debenture debts of the company agreegate £98,200, and it owes sundry creditors £15,922, while preliminary expenses figure among the assets in the balance-sheet at £19,022; but it is explained that owing to the establishment of the sinking fund for redeeming the capital this is quite a right entry. The stock of nitrate in hand was £38,799, and cash was abundant, including £14,000 lent on security at £31,513.

SCOTTISH UNION AND NATIONAL INSURANCE COMPANY.

In its life branch this large insurance company earned a premium income of £304,556 and an interest and dividend income of £165,225. Claims absorbed £307,489 and £4,095 was paid in the form of cash bonuses. Expenses and commissions came to about 13.28 per cent. of the premium income, and at the end of the year the life funds were increased by £105,235 to a total of £4,422,458. The company also received £20,717 for annuities sold, and the increase in the annuity fund on the year was £12,183. In the fire department the result of the business was a credit balance of £67,105 carried to profit and loss, the premium income having been £642,503, the losses, including provision for the Valparaiso and Jamaica conflagrations, taking £357,018, and commissions and expenses £218,380, the one being at the rate of about 43 and the other at almost 34 per cent. of the premium income. After adding in the surplus on the fire account and the interest on the shareholders' capital and reserves, and taking in the balance of £43,472 brought forward, there was £146,194 available as profit, and out of this the directors propose to pay a dividend at the rate of 17½ per cent. and to write £20,000 off, being the balance of the purchase price of the accident business bought. Then £15,000 is set aside to the investment contingency account and £52,382 carried forward. This, however, is after paying £6,192 as interest on accident bonds and writing off £120 of agents' balances irrecoverable. The dividend will be paid in equal halves on June 1 and December 1 next.

THE MUTUAL LIFE INSURANCE COMPANY OF NEW YORK.

We have received the following dazzling tale from Mr. J. H. Harrison Hogge, the general manager of the Mutual Life Insurance Company of New York, and relating to its business for the year ending December 31, 1907:—Assets, £101,473,000; contingent guarantee fund and divisible surplus, £13,519,800; total income for the year, £16,668,000; new business, issued and paid for, £10,004,000; payments to policyholders, £9,026,000; insurances in force, £298,306,449; total expenses, £1,758,000, as against £2,299,000 in 1906 and £3,147,000 in 1905. Not a share of the stock owned by the company failed to pay its regular dividend and on £45,775,000 of bonds (book value) there was not a shilling of interest in default at the close of business on December 31 last. The assets exceed the legal liabilities by over £11,800,000, notwithstanding the abnormally low market quotations of December 31, 1907. We are promised "full particulars" later, and then we shall see.

A. W. GAMAGE, LIMITED.

In its year to January 31 last this company earned a nett profit of £22,098. This is after deducting directors' fees and providing for depreciation, &c., and the amount is £2,751 more than the profit of the previous year. The balance brought forward was also £578 up at £7,232, so that altogether the divisible profit of £29,330 was £3,329 better. Of this excess, however, debenture interest at £4,500 takes £1,055, that being the increase in this charge, and after the preference dividends have been paid, the dividend on the ordinary shares brought up to 8 per cent. for the entire year by a final distribution at the rate of 11 per cent. and £1,000 each placed to the special reserve, making it £8,000 and the general reserve, raising that to £6,501, a balance of £8,005 is left to carry forward or £1,672 more than was brought in. The report is a commendably full one and enters

into particulars about the business which will be very interesting to the shareholders, telling all about the fire and its effects and also giving an account of the acquisition of the old-established business of Benetfink and Co., Limited. Owing to this purchase and to the building operations going on, the company has been compelled to go into debt and it owes Lloyds Bank £40,202, at the same time that its debt to sundry creditors is £19,631 larger at £81,735, including £8,540 of bills payable. It is therefore reasonable that more capital should be asked for and the shareholders will be invited to authorise the creation of £100,000 additional share capital, half of it in 5½ per cent. cumulative preference and half in ordinary £1 shares. At present, however, only £80,000 will be issued in equal portions at 5s. per share premium, and the £10,000 in premium thus received is to be added to the special reserve. The company owes £102,138 on debentures, including accrued interest, in addition to these other debts, and among its assets goodwill figures at £43,300, while leases, fixtures, fittings, motor vans, &c., have gone up by £3,981 to £62,380 within the year. There is also an increase of £8,024 in the amount sunk on buildings which now stands at £150,618, so that altogether the company is somewhat handicapped by capital outlay. Stock-in-trade has fallen off by £1,392 to £126,810, and cash is £3,311 less at £13,386, but the accounts are not so lucidly drawn up as we should like to see them. Thus sundry debtors are entered "less reserve" at £19,563, and under the building account the £8,024 just mentioned is entered as the expenditure of the year "less depreciation on boilers." Why cannot the amount of the depreciation be stated in all instances? In spite of £1,000 written off, £2,252 still appears in the balance-sheet as an asset representing expenses attending the issue of £100,000 debentures in 1906. The shares of Benetfink and Co., Limited, together with the head lease of the premises in Cheapside and Honey Lane Market, cost the company £39,716.

GOLDSMITHS AND SILVERSMITHS CO., LIMITED.

Gross profits on trading for year ending January 31 amounted to £96,706 and sundry receipts brought the total revenue up to £97,977. After allowing for expenditure, which includes £2,573 redemption of leases and £517 depreciation of fittings, the nett profit is £45,720. Adding £17,580 brought forward £63,300 is available. Preference dividend paid, £5,000 is put to reserve and 7½ per cent. paid on the ordinary shares for the fourth year in succession, and £20,800 is carried forward. Goodwill, leases, &c., collectively figure at £445,941, stock at £185,373, and stationery dies, &c., £3,785. Investments at cost £34,970 and cash £27,914. Debtors at £94,152 are heavy and over-balance creditors at £57,381 by £36,771. Leases redemption fund amounts to £12,795 and reserves to £80,000, only a portion of these amounts being separately invested.

CALGARY AND EDMONTON LAND CO., LIMITED.

Ordinary sales of land during the year ended December 31 were no more than 11,480 acres for $94,292 compared with 77,140 acres for $447,995 in the previous year, the average price per acre being $8.21 against $5.81. Sales were also made of mineral rights on 511½ acres at an average of $19.70 per acre, while in addition entries have now been passed through the books in respect of mineral rights belonging to the company sold in past years by the Dominion Government, and which aggregated 8,491 acres at $7 per acre. Instalments on land sales less £33,150 reserved produced £41,815, instalments on mineral rights £6,924, interest on unpaid purchase money £14,534, and with miscellaneous receipts the total income was £67,215. After providing for expenditure in Winnipeg and London the nett profits amounted to £57,762 compared with £56,285, and with £102,921 brought forward the disposable total was £160,683, out of which dividends aggregating 10s. per share or 100 per cent. have been paid leaving £45,967 to be carried forward. Of its original area of 859,479 acres the company has sold 709,581 acres, leaving it with 149,898 acres, which stand in the books at £91,790. Other assets consist of unpaid instalments, accrued interest, &c., £222,831, bills receivable £2,484, cash £32,635, and a suspense account for survey fees £14,322. Against this there are the capital of £120,755, sundry creditors £1,493, a reserve of £2,002 from discount on redemption of debentures, and a suspense account of £193,844 for future instalments on land sales to be credited in subsequent accounts.

LAMSON PARAGON SUPPLY COMPANY.

Trading profits for the year ended January 31 totalled, with £17 from transfer fees, £23,818. Adding to this £1,295 brought forward £19,877 comes to be dealt with. Directors' fees take £1,000, depreciation reserve £4,230, £886 is written off expenses of capital increase, and £2,000 put to investments reserve. The preference shares provided for the ordinary get 7½ per cent. and £1,323 is carried forward. Leasehold property, machinery, &c., is increased by £8,342 on the year to £135,484 less £6,472 is transferred to special accounts. A similar deduction of £1,366 has reduced goodwill, patents, &c., to £61,218. These special accounts are presumably the carbon factory, plant, &c., at Leyton, figuring at £31,698, which has since been formed into a separate company under the title of "The Caribonum Co., Limited," and for which capital was raised by the issue of 31,459 ordinary shares. There is in addition a subsidiary business account of £5,433. Cash stands at £15,507. Investments in trading companies £34,449. Creditors £30,362, and bills receivable £1,031 against creditors £15,544. Stock figures at £29,505 and £2,000 is out on loan. Reserves aggregate £43,650 with the year's increment, while the issued capital now amounts to £269,097.

MINOR NOTICES OF COMPANY REPORTS.

Bath Electric Tramways.—For the year ending December 31 gross receipts amounted to £41,452, showing a decrease for which the clerk of the weather is held responsible. His defence is not to hand. The nett profit was £13,369. After paying interest on debentures and loans and dividend on preference shares £2,489, including £381 brought in, is carried to balance-sheet. No dividend is paid on preferred ordinary, nor is any contribution made to depreciation reserve against £2,000 this time last year. Capital expenditure has been increased by £1,285 during the year to £347,114, cash is £3,488, and debtors owe only £936 against £4,367 due to creditors, £1,614 unclaimed debenture interest, and £1,823 unclaimed preference dividends. Reserves total £4,000.

British and Australasian Trust and Loan Company.—Nett profit for 1907, including £11,168 brought forward, was £29,890, and out of this £5,000 is added to the reserve, raising it to £115,000. Then the dividend is made up to 5 per cent. for the year by a final payment of 1s. 3d. per share and a bonus of 1s. per share is added, leaving £10,890 to be carried forward. The interest revenue was £48,609, and the interest paid and due was £22,828. Altogether the company's debenture debt is £618,214, and it has £723,738 lent on mortgages and properties in the colonies. Investments in marketable securities amount to £136,595.

Buenos Ayres and Belgrano Electric Tramways Co., Limited.—The accounts for the year ending December 31 show profits on working for six months only to June 30, and six months' interest on the balance of the purchase money due July 1, 1908. Gross traffic receipts for the former period were £97,559, advertising and sundries raising this to £98,611. Expenses in Buenos Ayres totalled £62,488. With the addition of £28,738 nett interest received from the Anglo-Argentine Tramways Company total receipts came to £129,086 and the nett profit to £61,402, which, with £4,034 brought forward, gives £65,436 available. Out of this is paid the dividend on the preference shares and £20,660 debenture interest, which is reduced by six months' interest on £173,600 first debenture stock paid off July 1, 1907, leaving £24,526, which is carried forward as part of the fund to be distributed among ordinary shareholders on the approaching liquidation. The balance-sheet shows balance of purchase consideration due £1,148,173 and interest £28,738, redemption of debenture premium £26,040, cash £23,817, Buenos Ayres assets £5,244, while small debit and credit accounts nearly balance. In the final distribution the ordinary shares will receive about £4 17s. 6d. each.

City of Birmingham Tramways Company.—This B.E.T. enterprise naturally suffered in 1907 from the lopping off to which it was subjected the year before. It now works only 18.13 route miles as compared with 33.85 in 1906, and this has meant a reduction of nearly 18,000,000 in the number of passengers carried. The average receipts per passenger have also fallen off, and the proportion of expenses to income have risen from 59 per cent. to 64 per cent. Nevertheless the disposable balance was £33,668 after paying the interim dividend at the rate of 5 per cent. Out of this the final dividend at the same rate, together with a bonus of 5 per cent., or 10 per cent. in all, is paid and £27,354 transferred to reserve, raising that to £459,122. Negotiations have been carried on with the City of Birmingham and with other local authorities in regard to the disposal of the company's remaining interest in the tramways, but nothing has yet been settled. The report states that the Birmingham and Midland Tramways system is being successfully worked by the joint committee, but the Motor Omnibus Company of like name has proved very unsatisfactory, so efforts are being made to dispose of it.

Cork Electric Tramways and Lighting Company.—The number of consumers in the lighting and power section increased during 1907 by 191 adding 13,643 8 c.p. lamps to the system and receipts from this source improved by £2,870 to £26,134. Bad weather, however, caused a decrease of 185,739 in the passengers carried by the tramways and the revenue was £792 smaller at £24,729. The income from all sources was £51,513, but expenses were heavier owing to the cost of coal, and after writing off £126 for bad debts the nett balance was £19,716. Of this £2,500 is put to depreciation reserve and £2,990 is written off wiring consumers' premises, plant on loan, &c., after which the ordinary shares receive 3 per cent. or 2 per cent. less and £734 is carried forward against £703 brought in. Capital expenditure amounts to £350,741 against which the reserves, including £3,163 from premiums, total £17,641. Floating liabilities come to £6,224 but the company has £13,949 to come in from sundry debtors, £5,974 for hire purchase instalments not yet due, and £3,698 in cash.

Cuba Submarine Telegraph Co., Limited.—Traffic receipts for the half-year ending December 31 produced £15,521 against £18,458 for corresponding period, while interest and fees added £1,957 and £6,500 was brought forward, giving a total credit of £23,978. Amongst charges expenses at stations absorb £4,372 and £17,800 remains available. Preference dividend paid £3,000 is put to reserve, a dividend at rate of 6 per cent. paid on ordinary shares and £7,000 carried forward. The balance-sheet shows cables, land, buildings, &c., £215,752, spare cable £2,500, investments at cost, less £10,000 reserve for loss, £95,586 against reserve of £106,000. Cash £22,516, bills receivable £1,393, and creditors £28,298 against liabilities of £25,892.

Chamberlain, King and Jones.—Gross profits for the twelve months ended January 31 were £9,261, and after providing for debenture interest, leasehold sinking fund, remuneration and fees £7,522 is available, including £2,523 brought forward. Preference dividend paid, the ordinary shares get 7½ per cent. for the year, and £2,055 goes forward. Debtors at £30,365 exceed creditors and bills payable by £20,058, and cash seems ample for requirements at £8,050. Property is valued at £56,087, and stock at £32,131. Reserve is unaltered at £6,000, but is not separately invested, while £1,650 in Birmingham Corporation 3½ per cent. represents leasehold sinking fund of £1,967.

Ederapolla Tea Company of Ceylon.—Including 7,768 lbs. from bought leaf the output for 1907 was 534,703 lbs. or 7,809 lbs. less, but the prices realised improved by 6.72d. to 6.37d. in London and 6.40 cents to 37.13 cents in Ceylon. Nett profits with £262 brought forward were £1,430 better at £4,040, out of which £663 is written off rubber extensions compared with £1,074 a year ago and £500 is put to reserve. The surplus remaining is still sufficient to enable the directors to raise the dividend from 5 per cent. to 10 and to add £65 to the sum carried out, making it £326. Block account is unaltered at £28,950 and we should like to see the reserve fund increased at a rather more rapid rate. At present it amounts to no more than £1,800 or about 6¼ per cent. of the cost of the property, which for 12 years' accumulations seems decidedly meagre, especially as only £583 of it is separately invested. Creditors and bills payable come to £3,548 or £452 more, but stocks are slightly higher at £3,317, debtors have risen by £476 to £479 and cash is £1,003 up at £1,217.

Imperial Ceylon Tea Estates.—An increase of 128,929 lbs. to 821,926 in the tea crop for 1907 was accompanied by a rise of 0.40d. to 7.13d. in the average price and nett profits advanced by no less than £3,565 to £6,611. Balance brought in was £154 down at £380, but after writing off another £500 for depreciation a dividend of 5 per cent. is paid against 3 per cent. a year ago, and £1,991 or £1,611 more is carried forward. Floating liabilities are £2,923 higher at £8,447 while stocks show a decrease of £112 to £3,527 and cash is £632 down at £119, but debtors come to £134 more at £453, and coast advances have again increased by £685 to £3,358. With £4,477 spent on the purchase of a new estate and £2,282 on its development the block account less depreciation is now £102,481 against which there is nothing at all in the shape of a reserve. As the issued share and debenture capital only amounts to £95,000 further funds were badly needed, but since the date of the balance-sheet £15,000 has been raised by debentures.

Indo-European Telegraph Company.—Revenue from messages, &c., was £136,579 in 1907, an increase of £11,969, and expenses were £591 less at £73,053, including £25,435 spent on maintenance. After paying income-tax, but crediting the balance brought forward, the free revenue was £69,203, out of which £18,145 has been set aside to meet further depreciation in the company's investments, and from what remains the dividend is made up to 6 per cent. for the year, beyond which a bonus of 20s. per share is declared. It is also proposed to distribute 15s. per share or £12,750 out of the interest upon certain investments as was done a year ago. All these payments are made free of income-tax. The company has a very excellent list of investments, and for that very reason the depreciation is severe, but its financial position is quite strong.

Liverpool Exchange Co., Limited.—Gross receipts for year ending December 31 amounted to £33,441, and expenses to £17,082, leaving a profit of £16,359, showing a decrease in receipts of £527, but of £1,018 in nett profits, the additional expenditure being occasioned by internal painting and cost of maintenance of the news room telephone. With £6,763 brought in £23,122 is available and a dividend of 4 per cent. is paid, leaving £7,122 to go forward. Expenditure on capital account totals £561,165 or £27,998 in excess of capital and loans. Rents are due to the sum of £5,561 and £1,912 is owing to sundry creditors, £900 for ground rent, and £825 to bankers, while £60 cash is in hand. Reserve is £13,792, but only a book entry.

Mercantile Bank Assets Company.—Slowly, but on the whole in a satisfactory way, this product of the wreck of the old Mercantile Bank of Australia is working out to a conclusion, and out of a total issue of £268,952 or 3 per cent. debenture stock originally authorised for the purpose of taking up and nursing the assets only £81,305 is outstanding, and the directors continue to invite tenders from holders of the remainder. In a circular recently issued they pointed out that the present market price of this stock is about 85, and they seem to think that holders should be content to accept payment at a discount of about this amount. The accounts show that the bank had rather more than £12,000 in hand on December 31 last, it having received during the year £22,954 as proceeds of sales, including instalment payments and £3,637 in the shape of calls from contributories of the Mercantile Bank of Australia, besides £6,633 from other sources, out of which £21,966 was disbursed in redemption of debenture stock and the current charges met.

North British Canadian Investment Co., Limited.—Interest on mortgages produced £10,181, giving with £262 received in this country and £3,827 brought forward, a gross credit to income account of £14,270 for the year ended December 31. Outgoings amounted to £5,153, including the modest sum of £300 for directors' fees, leaving a balance of £9,116, which is applied in paying 4 per cent. on the paid-up capital, and adding £2,000 to reserve, leaving £3,116 to go forward. Loans on mortgages come to £188,595 and £4,033 is held in stocks, debentures, &c.; £3,993 is due to the company on account of interest accrued, and £2,250 from feu duties. Cash totals £4,377. With the present contribution the reserve is £28,000 and £69,029 has been borrowed on debentures.

Oldham, Ashton and Hyde Electric Tramway, Limited.—This is another B.E.T. enterprise which makes a certain progress, and last year the total revenue was £33,296 and the expenditure, including £1,600 paid as debenture interest and £1,716 set aside to a renewals account, £26,547. This left £7,243, including £494 brought forward, out of which the directors add £1,000 to the depreciation and reserve fund, raising it to £13,500, pay the preference dividend and give 6 per cent. for the year to the ordinary shares, leaving £243 to be carried forward. Working expenses were slightly higher than in the previous year, otherwise the comparison runs wonderfully close, although the increase in the number of passengers carried was about 232,000 at a total of 6,238,000.

Pataling Rubber Estates Syndicate.—The crop gathered in 1907 amounted to 58,064 lbs. dry or an increase of 14,754 lbs., but owing to the slump in the market the nett average price realised was 1s. 5⅞d. less at 3s. 8¼d. Profits therefore were slightly lower, and with £1,047 from sales of seeds and plants and £76 from interest, &c., amounted to £8,658 of which London expenses, interest, &c., took £1,425. Adding £714 brought forward the disposable total was £7,948, and the directors pay dividends aggregating 35 per cent. Outlay on the estates was £4,319 and on buildings, &c., £1,146, making the total expenditure on the property £32,345, and as the share capital is only £20,000, it would have been more to the purpose if, instead of paying big dividends some attention had been given to the accumulation of a reserve. The company owes £7,500 on mortgage and floating liabilities are also pretty heavy at £3,496. Against the latter stocks of rubber stand at £3,654 debtors come to £430 and coast advances to £232, but cash amounts to no more than £45, while £5,000 has to be found for the balance dividend now declared. The directors planted 142 acres of the reserve land during the past year, and will plant another 110 acres, which will bring the total up to 1,538½ acres, and in order to meet this expenditure they propose to make a further issue of shares.

Poonagalla Valley Ceylon Company.—The 1907 crop of tea was 23,809 lbs. larger at 641,826 lbs., or 509 lbs. per acre against 488 lbs., and the average price improved by 0.26d. to 6.59d. per lb., but outgoings were heavier and nett profits were actually £70 down at £1,738. Adding £313 or £347 less from the previous accounts the disposable total came to £2,451 compared with £2,438, but instead of providing £1,000 for redemption of "B" debentures as in 1906 the directors content themselves with writing £500 off cost of rubber extensions. They are, therefore, able to repeat the dividend of 5 per cent. and to raise the sum carried out by £113 to £726. Sundry creditors have risen by £2,294 to £5,898 against which debtors owe £1,213 or £990 more, and produce in hand is £255 up at £2,586, but cash has dropped by £1,674 to £1,390. Coast advances have gone up in somewhat alarming fashion and now total £1,193 compared with £670 a year ago. During the year the estates were increased by about 435 acres through the purchase of Hockworthy Estate and some 98 acres of Crown grants, but there is no trace of these transactions in the balance-sheet unless they are included in the £1,814 spent in rubber, as the block account remains at £40,190.

Rubber Estates of Johore.—During the past year 1073 acres were planted at a cost of £18,870, and the block account, including £10,000 paid for the property, now stands at £33,336. London office expenses less £537 from interest and fees took £613 and agency charges were £150, making a total under these two heads of £1,279, and another item to be cleared off out of future profits is £1,935 for preliminary expenses. Creditors and bills payable come to £5,441, but the company still has £7,226 in cash out of its issued capital of £38,750. The directors state that owing to a variety of causes the cost of bringing the planted area into bearing is likely to exceed the original estimate.

Stagg and Mantle.—Trading profits for the year ended February 9 were £11,010, but as the company was only incorporated on July 2, 1907, £4,094 of this goes to the vendor. Adding £416 for interest and transfer fees and deducting expenses, including £323 for preliminary expenses and £474 put to reserve the nett balance is £4,268. Preference dividend having been met the directors get £221 as extra remuneration and a dividend at the rate of 7 per cent. is paid on the ordinary shares leaving £710 to be carried forward. Debtors at £8,291 exceed creditors by £3,340, stocks are valued at £27,089 and cash comes to £13,508. Leases stand at £18,217 and a redemption policy for £25,000 has been taken out to provide for the extinction of this asset, furniture and fixtures come to £8,200 and goodwill is £29,246. Other assets consist of £3,244 due from the vendor, £446 for insurance, &c., in advance and £647 balance of preliminary expenses.

Brierfield Mills.—Trading for six months to March 31 produced £4,235 and sundry receipts added £495. Debenture interest, depreciation and directors' fees absorb £4,002, leaving £728 to be added to £4,185 brought forward at September 30. Out of this the preference dividend is paid and 9d. per share on the ordinary, and £1,664 is carried forward. Property, machinery, &c., is valued at £140,720, stocks at £21,002. Debtors at £12,471 fall short of the amount due to creditors by £9,840. Cash is £2,776, and "investment" £1,600. Reserves, which aggregated £49,200, were apparently getting troublesome, so a bonus of 2s. a share was paid on the ordinary shares last November and the general reserve debited £5,000.

TRADE AND PRODUCE.

Wheat.—A much stronger tone has prevailed since the markets reopened. Demand for all grades of spot parcels has been good, and prices have ranged from 2d. to 4d. per cental over last week's, while from the Argentine come cables reporting that 1s. advance is being asked for prompt shipments of parcels of both North and South varieties. The forecast, also, that shipments from that quarter will be much reduced has given strength to the position. American markets fluctuated sharply at first, but the strength here and on the Continent steadied them later, and together with a sharp advance in cash interest increased speculative buying, in spite of favourable weather, news from the interior, and a bearish "prices current" report.

Wool.—No improvement can be noticed in the general run of trade. Business in raw materials is still restricted to immediate requirements, and even the low quotations are not considered sufficiently tempting to entice buyers. Merinos are in bad plight, and crossbreds in worse, if anything, and in English wools dealers are willing to consider low bids for the coming clip. No confidence is felt in yarn prices, and until warm weather sets in nothing is to be expected from the manufacturing branches. Statistics, says the *Manchester Guardian*, are not encouraging to holders of colonial wools. "When the last London auctions came to an end it was found that no fewer than 80,000 bales were held over for the May series, which begins a fortnight next Tuesday. Up to the present about 232,000 bales have arrived, out of which there have been forwarded direct about 100,000 bales. It is to be feared that most of the trouble in the trade is being caused by these direct forwardings. They have to be financed, and weak holders are obliged to realise; hence the very low prices now being accepted at Bradford for tops of both merino and crossbred qualities for either present or future delivery. Reports from the Continental centres are quite as bad as those from Bradford. The price of tops on the terminal markets both at Antwerp and Roubaix fall steadily week by week, and are weakest for delivery towards the end of the present year, which shows that no revival is expected for some months to come."

Cotton (from our Manchester correspondent).—Our market has presented a generally quiet appearance throughout the week, and owing to the holidays business has not been attempted on a large scale. The outlook all round does not improve. The drooping tendency in the price of the raw material causes buyers of yarn and cloth to exercise considerable caution in operating. Still lower values are anticipated, and wherever possible orders are being nursed in view of expected better terms later on. In practically all quarters a most irregular feeling has shown itself. There has been very little doing in piece goods for any market. A few more offers have come through for India and China, but in few cases are shippers anxious to place orders of any weight. The various smaller markets both East and West remain dull, and advices being received from the Levant and Egypt are not of a character to encourage exporters to anticipate future requirements. Home trade cloths have not commanded much attention. Clearances in the retail establishments are disappointing owing to the unfavourable weather. Light fancy goods are dragging in demand, and stocks tend to increase in the wholesale houses. Printing cloths as made in Burnley have moved off very slowly. Producers find it extremely difficult to keep down stocks. Manufacturers who both spin and weave are badly situated. In American yarns for home use only a retail trade has transpired. Rates have been easier with considerable irregularity. Twists are getting more abundant, and no difficulty is experienced in getting deliveries. A little more business has been done in export bundles for China, but many of the offers cannot be entertained. Bolton yarns remain in slack demand, and prices all along the line favour buyers.

Sir Jacob Behrens and Sons' report states that American cotton is still offered freely, owing to the favourable prospects of the next crop and the curtailment of production in the American print mills. Quotations are about ¼d. per lb. lower than last week. Egyptian cotton keeps very quiet, and prices have lost ¼d. per lb.

Coal.—The holidays naturally brought about a curtailment of demand and deliveries, but otherwise there is no change to note in the satisfactory condition of this trade, which is not suffering so much as other industries from the general depression. Exports from the North of England continue good. The re-opening of navigation to the Baltic ports ought soon to make Yorkshire coalowners busy and stiffen their attitude towards the trawling contracts now under negotiation. The cold weather has spurred house coals to unusual activity at this time of the year, with no sign of any reduction in prices. Exports from Scotland also keep good, though revised quotations where rates had not been altered for several weeks show a reduction of 3d. to 6d. per ton. Welsh trade all round is quiet and firm.

Copper.—Only a small business has been transacted and that under difficulties, owing to the widely diverging views between buyers and sellers. Prices fluctuated within narrow limits, and yesterday closed at £58¼ cash and £58¾ three months. To-night the prices are cash 57½-58, three months 58¼-½. Messrs. Henry R. Merton and Co., Limited, give the visible supply as 23,702 tons, against 23,265 tons at the end of March. Supplies for the first half of April were 19,768 tons and the deliveries 19,331 tons, making the stocks in England and France 15,877 tons, as against 15,840 tons at the end of March. The Chili charters total 1,300 tons.

Tin.—Support from influential quarters gave a firm undertone to the market, which also developed considerable activity towards the close. Thursday's buying orders for May and forward delivery sent cash metal up to £145, and three months' hardened to £143 15s. To-day market steady at 144¼-¾ cash, and 143½ three months.

Iron and Steel.—Hematite trade prospects grow more and more gloomy, and both East and West Coast business seems to be at a standstill for the present. Prices are nominally unchanged, but producers and merchants would both accept less to do a "deal." Finished iron and steel works have prolonged the holidays this week because business is so dull, and consumption of pig-iron has accordingly been even less than usual with a consequent increase in stocks. An increase that must be in producers' hands, as stocks at Connal's Stores have not been added to very much.

Sugar.—During the past two weeks the market prices have been maintained chiefly through the news from Cuba which gives further reductions in receipts. The number of factories at work, Mr. Czarnikow reports, are now reduced to 47, and it is doubted if even the low estimate of 900,000 tons will be reached. Receipts at six ports this week were only 18,000 tons. The European sowings are late this year, which is generally not in favour of exceptional yields, but last year's yield was only very good in Austria, which country might easily produce 100,000 tons less, whilst in Belgium a reduction in sowings might be made good by an improved yield. Russia might likewise give less, but Russia had better be taken as contributing 100,000 to 200,000 tons more to the European deliveries anyhow. In Germany, Holland, and especially France, a few hundred thousand tons more might be produced with favourable weather, but all this is music of the future. Whether we sow 1 or 2 per cent. more or less, excluding Russia, matters very little, as the weather has made, and can easily make, 10 per cent. more or less in various countries. There is much discussion just now about the coming Cuban crop, which seems to be suffering from drought, but the weather during January-March is not so important as during April-December, because 80 per cent. of the crop is grown from old stools, which get permanently damaged only by very prolonged drought. At the same time the crop gets a bad start unless new leaves cover the ground soon after cutting. Last season the drought lasted from December far into June with unprecedented severity; this year it is not by any means so bad yet, but the weather is watched all the more anxiously now after previous experience. Owing to holidays and to the proximity of the Budget demand from consumers is not so active as the speculative market, and though it is not expected that the sugar tax will be abolished, buyers are only supplying their pressing wants. Refiners bought very little up to 11s. 9d., when sellers' price was raised to 11s. 10½d., and a few 80 per cent. records sold at 10s. 3d. to 10s. 3¾d. The American market has also gained strength under the influence of the Cuban position. Planters were able to obtain the advance asked, establishing the quotation for 96 per cent. Centrifugals at 4.49 cents. Receipts at the three ports for this week were 49,000 tons and meltings 39,000 tons, raising stocks to 237,000 tons.

Letters to the Editor.

M. B. FOSTER AND SONS, LIMITED.

Sir,—I have read with interest, not unmixed with amusement, the letter signed "X.," in your issue of the 4th inst. Your anonymous correspondent states that "We now know, without any help from Messrs. Harris and Co. . . . the causes of our decay in recent years." If it had not been for the efforts of Major Harris and those associated with him, the shareholders of M. B. Foster and Sons, Limited, would still have remained in abysmal ignorance of the manner in which their affairs are mismanaged. "Please do not shoot the organist. He is doing his best"—so ran the famous notice in a Californian church. "X" urges a similar plea for clemency towards "our chairman (Mr. Glasson), and the directors working with him." Unfortunately, their best is not nearly good enough.

But it is in the final paragraph of his letter that "X" excels himself. "I am not surprised," he writes, "that the small shareholders should feel disappointed, but *some of us who have invested largely have the right to call the tune, and we shall do so.*" The italics are mine. It is notorious that in M. B. Foster and Sons, Limited, the family of the vendor, with their friends and dependents, not only "call the tune," but play every instrument in the orchestra that is worth playing, including their own trumpet. Those who, like myself, "have invested largely" in the undertaking are for the moment powerless to give the bugle band either an efficient conductor or capable musicians.

Our powerlessness is due to the fact that when goodwill was written off a few years ago, and the nominal value of the ordinary shares scaled down from £10 to £4, their voting power was maintained intact. Another writing-down scheme is about due, however, for the ordinary share capital is now wholly unrepresented by available assets, unless, indeed—as one speaker satirically suggested at the recent meeting—the present directors can be regarded as such! In any reorganisation of the capital account it will be just and requisite to provide that, whatever deferred interest in the profits of the company may be retained by the holders of the ordinary shares, the voting power shall pass into the hands of the preference shareholders. When this salutary reform has been carried through, it is possible that "X," and his friends may cease to "call the tune."

Yours, &c.,

H. S. E. Vanderpant.

April 15, 1908.

NEXT WEEK'S MEETINGS.

Monday, April 27.

African City Properties Trust.—Cannon Street Hotel, noon.
Atlas Assurance.—Cannon Street Hotel, noon.
British Assam Tea.—10, Lime Street, E.C., noon.
Imperial and General Securities.—Winchester House, 3 p.m.
Ivanhoe Gold.—Salisbury House, noon.
Johnson and Phillips.—Winchester House, noon.
Melbourne Trust.—Waldorf Hotel, 11.30 p.m.
Pacific Loan and Investment.—Liverpool, noon.
Peter Jones.—31, Symons Street, S.W., noon.
River Plate Electricity.—Moorgate Place, E.C., 11 30 p.m.
St. David's Gold Mines (1903).—Institute of Chartered Accountants, 2.30 p.m.
Tarapaca Waterworks.—Winchester House, noon.
Whim Well Copper Mines.—Winchester House, 2.30 p.m.
William Griffiths and Co.—Great Eastern Hotel, noon.

Tuesday, April 28.

British Central Africa.—57½, Old Broad Street, E.C., 1 p.m.
British Moss Litter.—61, Gracechurch Street, E.C., noon.
Ceylon (Para) Rubber.—138, Leadenhall Street, E.C., 2.30 p.m.
Ceylon Tea Plantations.—20, Eastcheap, E.C., noon.
Cork Electric Trams and Lighting.—83, Cannon Street, E.C., noon.
H.H. The Nizam's Guaranteed State Railways. — Winchester House, 3 p.m.
Indo-European Telegraph.—18, Old Broad Street, E.C., noon.
J. Baker and Sons.—Winchester House. 11.30 p.m.
Liberian Development.—Salisbury House, noon.
London and Brazilian Bank.—7, Tokenhouse Yard, E.C., 12.30 p.m.
London and Provincial Trust.—Cannon Street Hotel, 12.30 p.m.
London Trust.—Cannon Street Hotel, 2.30 p.m.
Primitiva Gas and Electric Lighting of B.A.—153, Leadenhall Street, E.C.
United States and S. American Investment Trust.—Winchester House, noon.

Wednesday, April 29.

Alliance Assurance.—Bartholomew Lane, E.C., noon.
Anglo-Malay Rubber.—London Chamber of Commerce, noon.
Brisbane Electric Tramways Investment.—Winchester House, noon.
Edinburgh Investment Trust.—Edinburgh, 12.30 p.m.
Egyptian Markets.—Winchester House, noon.
Golden Horseshoe Estates.—Winchester House, noon.
Great Boulder Perseverance.—Salisbury House, 2 p.m.
London Life Association.—81, King William Street, E.C., noon.
Myalls and Peak Hill Goldfields.—Institute of Chartered Accountants, noon.

Workington Brewery Co.—Nett profits for the year ending February 29 amounting to £11,731 exceeded any of the last four years, despite increased cost of upkeep and dearer coal. With £707 brought in £12,528 is disposable, out of which £2,500 is placed to reserve, £1,000 to depreciation account, the preference dividend paid, and 10 per cent. on the ordinary shares for the eleventh consecutive year. Property is £5,790 up at £251,900, stocks stand at £8,700, cash at £3,471, investments £1,288, and debtors owe £4,656 against creditors for £2,255 and mortgage loans £2,000. Reserve will now total £27,500, depreciation account £7,000, and equalisation of dividends fund £1,288, but only the last is represented by investments.

The London Life Association, Limited.—This old insurance company worked its business last year at a cost of £4 10s. 1d. per cent. of the premium income or of £2 1s. 5d. per cent. of the total income. It nevertheless does a small and select business, which last year resulted in an increase of £14,507 in the assurance fund, now up to £4,871,446. The premium income of the year was £375,312 and the interest income £203,546, besides which £5,147 was netted as profit on realisations. Claims and surrenders took together £252,181 and £216,412 was devoted to reductions in premiums. These reductions ranged from 115 per cent., that is to say from a contribution of 15 per cent. by the company instead of any premium at all being demanded of the policyholder, to 50 per cent. as a minimum.

COMPANY MEETINGS.

THE UNION BANK OF SCOTLAND, LIMITED.

The annual meeting of shareholders was held on Wednesday within the bank premises in Ingram Street, Glasgow. In the absence of Sir Edward P. Tennant, Bart., M.P., chairman of the bank, the Right Honourable James Parker Smith occupied the chair.

In regard to the motion of which he had given twelve months' notice, Mr. Hugh Mayberry explained the grounds on which he did not now move that representatives of the Press be invited to attend the meetings of the shareholders of the bank.

In moving the adoption of the report, the Chairman described the year 1907 as a remarkable one so far as the foreign trade of the country was concerned, our exports and imports exceeding even those of 1906. But the home trade was less satisfactory, especially in the autumn. Among our local industries the depression was probably greatest in the building trade and in shipbuilding. In the latter there was a gradual falling off month after month, and at the end of the year many of the yards were almost idle. The labouring classes, at the same time, had to reckon with a considerable rise in the prices of provisions. Owing to a deficiency in the world's crop there was a material rise in the price of wheat. There was, indeed, a higher range of prices generally; we had to pay £20,000,000 more for imports than if we had purchased at the prices of 1906. The fall in prices which began in the second half of 1907, and which still continues, has been a relief to the working man, but it is also evidence of diminishing trade, which tells immediately on the profits of manufacturers and traders. The financial year just closed was marked by a very serious panic in America, which may be said to have begun in October when the Knickerbocker Trust suspended payment. The suspension was immediately followed by an almost unprecedented withdrawal of deposits. It led to a practical suspension of cash payments by the banks in New York and throughout the United States generally, to gold currency running to a premium of 3 or 4 per cent., and to hoarding of coin by the people to a disastrous extent. The state of affairs in America and also in Germany was acutely felt in this country, and bankers passed through a most trying and most anxious time. The first half of our financial year did not witness a lower rate than 4 per cent., a most unusual experience. The American panic brought us a 5 per cent. rate in November, quickly followed by a 6 and a 7 per cent. The quite abnormal rate of 7 per cent. had not been known in this country for 34 years, and it was productive of a vast amount of suffering and loss to capitalists. Happily in a time of widespread panic the production of the world's gold mines went on steadily. It was practically the same as in 1906, namely £82,000,000, the decrease being only one-third of 1 per cent. In regard to Stock Exchange securities, neither *bond fide* investors nor speculators could escape the dislocation of the markets caused by dear money. Consols fell in August to 80¾, the lowest price touched since their conversion to two and a-half per cents. The home railway market suffered for a lengthened period from fears of a general strike among the employees and from contracting traffic returns. American and Canadian securities suffered seriously from the financial troubles in the States. It was a period of great difficulty and no little anxiety to bankers in this country, for they all lend against Stock Exchange securities to stockbrokers and other customers. The difficulty and anxiety lay in getting customers to maintain the market margins above the bankers' loans. There was a fair recovery in market values with the advent of cheaper money. In referring to the bank's balance-sheet and contrasting it with that of the previous year, there were really no very important changes to record. The results were regarded as satisfactory, the profits indeed being the largest declared in the history of the bank.

Mr. Archibald R. C. Pitman, W.S., Edinburgh, seconded, and the report and accounts were unanimously adopted.

Mr. William H. Hill, LL.D., Glasgow, proposed, and Mr. William Crouch, C.E., Glasgow, seconded the re-election of Sir Edward P. Tennant, Bart., as chairman, and Mr. John Young Buchanan, F.R.S., as deputy-chairman of the bank, which was cordially approved.

On the motion of Mr. Robert Allison, Paisley, seconded by Mr. Matthew Greenless, Glasgow, the Right Honourable James Parker Smith and Mr. David Ritchie were re-elected ordinary directors.

On the motion of Mr. George S. MacLellan, Glasgow, seconded by Mr. Thomas Stout, writer, Mr. Herbert W. Haldane, C.A., Edinburgh, and Mr. Charles D. Gairdner, C.A., Glasgow, were appointed auditors.

BUENOS AYRES GREAT SOUTHERN RAILWAY.

The ordinary half-yearly general meeting of the Buenos Ayres Great Southern Railway Company, Limited, was held on Wednesday at River Plate House, E.C., Mr. Jason Rigby, chairman of the company, presiding.

The London Manager and Secretary (Mr. H. C. Allen) read the usual notice.

The Chairman said that but for the fact that the accounts were made up annually, and that the first half of the year was no criterion of the whole, they would have some reason to feel disappointed that the continuous record of prosperity had, on the present occasion, been temporarily checked so far as the gross earnings were concerned. At the previous meeting they knew that the whole of the wheat crop of 1907 had been transported

previous to July 1, and that the maize crop was likely to be a practical failure. The six months' earnings were also prejudiced by the sudden stoppage of the transport of wool in consequence of the fall in prices last November, which caused the producers to retain their stock pending an improvement in the quotations. Thanks, however, to the continued development of some of the other sources of traffic, coupled with the more economical conditions of working which the additions and improvements recently effected had now rendered possible, they were able to establish a further record in the nett profit, which was £3,407 in excess of anything previously shown under this heading for the corresponding period of any year. But they must take the year as a whole. From the latest cable advices they found that the traffic earnings for the 42 weeks of the current financial year showed the substantial increase of £142,836 against the decrease of £48,315 at December 31 last; and, notwithstanding the largely increased business, the expenses for the nine months up to the 31st ult. were £13,766 less than they were for the corresponding period of last year. The company, therefore, were in reality about £187,886 to the good up to that date. With figures like these before them, he did not think there was any cause for anxiety as regarded the results the board would be able to present at the meeting next October. After paying the usual 6 per cent. dividend they were only able to carry forward to the second half of the year £106,596 against £205,239 in the previous year. The new issue of £2,000,000 5 per cent. preference stock would not come against revenue until after March 1 next. The directors hoped, therefore, that in the circumstances the dividend declared would be accepted as satisfactory, more especially as he thought they might feel fairly sure that the final dividend would not be in any way prejudiced by the reduced balance carried forward. He explained the bearing on the undertaking of the Mitre National Railway Law, and said that the board had notified the Government that they would accept the conditions of this law which applied to their existing lines, and they believed that this action would greatly facilitate the granting of new concessions which would fall naturally into the general system. The question of capital expenditure would be fully explained at the October meeting. He mentioned, in this connection, that the directors did not contemplate any further issue of capital at present, as the recent issue had provided for all known requirements. In conclusion, he moved the adoption of the report, which was seconded by Mr. David A. Shennan. A cablegram, dated the 15th inst., was read giving the latest information regarding the position and prospects of the railway. It stated that the passenger traffic continued to increase satisfactorily, and that the movement of general goods traffic was good. The maize tonnage would barely equal last season's, the crop being poor on account of drought. General prospects were fair. During the winter months traffic should be normal. Camps, assisted by recent rains, were improving, but more rain was needed. A later cablegram stated that traffic receipts for the week ended the 19th inst. were £84,892, being a decrease of £14,071. Traffic was weakened by holidays (Holy Week). Since the 15th inst. it had rained all over the company's system. After a short discussion, the report was adopted.

GREAT WESTERN OF BRAZIL RAILWAY.

The annual general meeting of the Great Western of Brazil Railway Co., Limited, was held on Thursday, April 16, at River Plate House, E.C., Mr. Jason Rigby, M.Inst.C.E. (chairman of the company), presiding.

The Secretary (Mr. H. Tattam) having read the notice convening the meeting and the auditors' report,

The Chairman said that the shareholders would naturally be disappointed to see that, though the company had been working a longer line, the earnings had been considerably less than in the previous year, but this was due to natural causes of a temporary character. The Northern States of Brazil were subject to great variations of climate, and these variations seemed to occur in cycles. Since 1902 the rainfall had been below the average, with the result that the reserve of water stored in the ground had been reduced, and the growing crops were more than ever dependent on the rain falling at the proper time. In 1906 they gave the planters a specially low rate for transporting their sugar, with the object of assisting them and encouraging them to plant largely for the following crop. This had the desired effect, and the area planted for the last crop was large; but, though the beginning of the season promised well, the promise was not fulfilled. The partial drought which followed seriously affected the growing cane, and the yield turned out much smaller than might have been expected. This was very bad for the railway, but the price of sugar had been so good this season that the shortness of the crop had not affected the planters as it would otherwise have done, neither had it been necessary to continue the specially low rates which the company deemed it expedient to put in force the previous year. Although, therefore, the quantity of sugar hauled had decreased by 40 per cent., the receipts from this item had only fallen by 35.36 per cent. The two principal cereal crops, maize and mandioca, were also seriously affected by the absence of seasonable rains. Fortunately, the large decreases in produce caused by the very dry season were counterbalanced by increases in other items, and although, owing to the partial failure of the sugar and cereal crops, they lost over £65,000 worth of traffic, the nett decrease in the gross receipts was only £46,497. But for the lower rate of exchange which ruled throughout the year the sterling receipts would have been about £7,500 greater than they were. The nett result of the year's working was a balance of £142,105, against £156,765 in 1906, and after bringing into account such items as transfer fees, interest, &c., there remained an available balance of £143,621. From this must be deducted the percentages payable to the Government as well as a contribution to the amortisation fund. Deducting the interest on debentures and interim dividend and interest payable on the new capital to December 31 last, there was a balance of £30,571, which had enabled the board to recommend a final dividend at the rate of 3 per cent., and to increase slightly the amount carried forward. The policy adopted during past years of building up reserves and strengthening the company's financial position enabled them to look more confidently at the present state of affairs. After referring to the completion of the Pesqueira and Campina Grande extensions, he said that the board had been approached by the Federal Government, who were anxious to provide work for the people in the Northern States who had been seriously impoverished by last year's drought, inquiring as to the terms under which the company would build for their account some short extensions. The prospects for the coming crop, so far as he could form an opinion from the information to hand, were distinctly favourable. Mr. E. K. Hett seconded the motion for the adoption of the report, which was unanimously agreed to.

KIMBERLEY WATER WORKS.

The 28th annual general meeting of the Kimberley Water Works Company, Limited, was held on Wednesday at the Cannon Street Hotel, E.C., Mr. James Jackson (chairman) presiding.

The Secretary (Mr. William Vincent) read the notice convening the meeting and the auditors' report.

The Chairman, in moving the adoption of the report and accounts, said that at the last meeting he laid stress on the fact that owing to the flourishing condition of the De Beers Mines Kimberley was a marked exception to the general rule, in that it enjoyed immunity from the commercial and financial depression that hung like a cloud over the whole of the rest of South Africa, and he then stated that in the absence of the unforeseen this company might look forward to another prosperous year. Faithful to the paradoxical tradition, the unexpected had happened; the diamond industry had undergone a reverse, the intensity of which not the most pessimistic of prophets could have foretold. Notwithstanding this they had had a fairly prosperous year. The consumption of water showed as compared with 1906 a falling off of 14,000,000 gallons, while the revenue, owing to the larger allowances necessary under the new concession, showed a larger proportionate decrease in the money takings. During the year a marked improvement was effected in the quality of the water that they supplied to their customers. For many years past the muddy condition of the water when the Vaal River was in flood had always given trouble, and it had been a difficult problem to devise means by which it could be rendered even reasonably fit for domestic purposes. Fortunately the experiments to which he referred last year were brought to a satisfactory conclusion, and they were now supplying water of a clearness hitherto unattained. This improvement also had the advantage of increasing the duty of the filters, as there was less deposit in them, and they required to be cleaned less frequently. The dam or weir at De Hoop's drift was now being pushed on rapidly in order that the ample supply of water retained might be available during the expected dry season in the coming South African winter. After comparing the figures of the accounts with those of the previous year, the Chairman continued, stating that the well-being or otherwise of the De Beers Company was such an important factor in vitality affecting the prosperity of this company that a more extended reference to the position at the mines would not be out of place. Taking the De Beers shares at the market price before the collapse, they represented a capital value of between 40 millions and 50 millions sterling, whilst last year no less than six millions worth of diamonds were recovered from the mines and dividends of no less than 70 per cent. were paid on the deferred shares. In little over six months a complete change came over the aspect of affairs. The dividend was passed and the value of the deferred shares went down to a little more than two-thirds of their former price. The cause of the trouble was not far to seek. America had been the greatest market for diamonds. In booming times it seemed to have a boundless capacity for absorbing diamonds. When the collapse in Wall Street came, and economies resulted perforce, the former fruitful channels for the disposal of diamonds were closed, and De Beers found themselves faced with the impossibility of finding an adequate market. The shareholders of this company must console themselves with the reflection that as the decline of De Beers' fortunes was rapid and unforeseen, so might the recovery be also. Of the ultimate stability of the diamond trade there could be no small doubt, but the immediate future could not be without its anxieties for this company. Things were likely to be worse before they were better, but they would have to be a great deal worse than they were to-day before this company ceased to earn a respectable dividend. Fortunately for them, they dealt in a commodity that occupied the same position at the extreme of necessity that diamonds did at the extreme of luxury, and as long as Kimberley had a population at all they might depend on deriving a revenue from the sale of water.

Mr. William Mendel seconded the adoption of the report and accounts, which was unanimously agreed to.

Anglo-Mexican Oilfields, Limited.—Drilling commenced in February, and cable advice from Mexico has now been received that oil has been struck at 407 ft. and again at 426 ft., and that the oil is now flowing slowly over the top of the boring.

DIVIDENDS ANNOUNCED.

BANKS.

Bank of Adelaide.—For past half-year at the rate of 9 per cent. per annum, placing £20,000 to reserve, and carrying £21,014 forward.

Bank of Montreal.—Usual quarterly of 2½ per cent.

Imperial of Canada.—For quarter ending 30th inst. at the rate of 11 per cent. per annum upon the paid-up capital stock.

National of South Africa.—4 per cent., placing £20,000 to pension fund, and carrying forward £16,361.

North of Scotland.—Interim of 5s. 3d. per share.

MINES.

Alaska Mexican.—50c. per share, payable April 28.

Alaska Treadwell.—75c. per share, payable April 28.

Great Laxey.—10 per cent. on the priority shares.

Oriental Consolidated.—50 cents per share.

MISCELLANEOUS.

Argentine Land and Investment.—4 per cent. on £131,044 income stock, and 5 per cent. on the capital paid up on the ordinary shares, payable May 22.

Broxburn Oil.—17½ per cent., placing £10,000 to reserve.

Buenos Ayres (New) Gas.—4 per cent., or 8s. per share for six months ended Dec. 31, carrying forward £26,273.

Burmah Oil.—On the ordinary shares of £1 each 1s. 6d. per share, making 15 per cent. for the year, and a bonus of 3s. per share placing £85,000 to field reserve account, £25,000 to insurance fund, and writing off investment account £10,000, placing to general reserve £200,000, and carrying £30,002 forward.

Chinese Engineering and Mining.—Interim of 7½ per cent., or 1s. 6d. per share, for year ended Feb. 29

Clan Line Steamers.—Final of 5s. per share, making 5 per cent. for year ended Dec. 31, carrying forward £2,808.

E. J. Morris and Co.—First of 15s. in the £ has been declared by the liquidator of E. J. Morris and Co., Limited (in liquidation), and the same may be received at the offices of Chantrey, Chantrey and Co., 57, Moorgate-street, on or after 27th inst.

James Nelson and Sons.—7½ per cent. for 1907, carrying £45,757 forward.

James Shipstone and Sons.—10 per cent. (20s. per share) on the ordinary shares for past year, placing £20,000 to reserve, and carrying forward £5,467.

Montreal Light, Heat, and Power.—1½ per cent. on the paid-up capital stock, being at the rate of 6 per cent. per annum for the quarter ended April 30.

West End Clothiers.—4 per cent. on the preference shares for year to July 31, 1906.

MINING RETURNS.

Alaska Mexican.—Crushed 20,409 tons, value, $30,255; saved 265 tons sulphurets, value, $19,929

Alaska United.—Crushed 35,727 tons, value, $42,205; saved 605 tons sulphurets, value, $27,033.

Broken Hill Proprietary.—Crude ore amounted to 47,614 tons; 45,822 tons ore treated, producing 7,478 tons leady concentrates and 6,116 tons smelter slimes; retreatment plant 6,292 net tons dump tailings, producing 475 tons leady concentrates and 546 tons slimes.

North Broken Hill.—Treated 2,170 tons crude ore assaying 16.4 per cent. lead and 6.9 ozs. silver per ton, producing 387 tons concentrates containing 268 tons lead and 8,282 ozs. silver.

Ouro Preto.—6,040 tons, 2,022 ozs.

Tasmanian Copper.—Shipments of ore 1,029 tons.

Westralia Mount Morgans.—Crushed 5,750 tons, 801 ozs.; cyanided 2,800 tons, 437 ozs.; slimes 2,425 tons, 464 ozs.

Whim Well Copper.—Copper ore 105 tons, 24 per cent.

Zinc.—Week April 8: Treated 2,300 tons averaging 18 per cent. zinc, 7 ozs. silver, 4½ per cent lead for 677 tons zinc concentrates averaging 44 per cent. zinc, 6.5 lead, and 13.5 ozs. silver; and 21 tons lead concentrates averaging 58 5 per cent. lead, 38.5 ozs silver, 13 per cent. zinc. Week April 15: Treated 2,800 tons averaging 18 3 per cent. zinc, 7 ozs. silver, 4.5 per cent. lead, for a yield of 887 tons zinc; zinc concentrates averaging 44.2 per cent. zinc, 13.3 ozs. silver, 7.2 per cent. lead; and 14 tons lead concentrates averaging 56 per cent. lead, 36.5 ozs. silver, 13.4 per cent. zinc.

Books Received.

Nitrate Facts and Figures, 1908. By A. F. Brodie James, F.S.S. (London: F. C. Mathieson and Sons, 16, Copthall Avenue, E.C.) Price 3s. nett. (A valuable and accurate annual full of facts and containing three maps and five photographs.)

The Official Year-Book of New South Wales, 1905-6. H. C. L. Anderson (Director Intelligence Department and Bureau of Statistics). W. A. Gulleek, Government printer, Sydney. (This is the second issue of a most useful book dealing with every national interest and every industry of the colony.)

Every Man His Own Financier. By F. Mignon, B.A. (London: T. Werner Laurie, 13, Clifford's Inn, Fleet Street, E.C.) Price 6s. nett.

Messrs. J. Henry Schröder and Co. have received a cable from their Santos agents advising them that they have further encashed £5,600 in respect of the sur-tax collected weekly for the service of the State of San Paulo 5 per Cent. Exchequer Bonds, making a total of £736,150 encashed since August 1.

Abridged Prospectus.

DOMINION OF CANADA.

The CANADIAN NORTHERN RAILWAY Co.

(INCORPORATED UNDER ACTS OF THE PARLIAMENT OF CANADA.)

Issue of £2,000,000 4 per Cent. Perpetual Consolidated Debenture Stock,

PART OF AN ISSUE LIMITED AS WITHIN MENTIONED.

The stock bears interest at the rate of 4 per cent. per annum, payable by warrant, half-yearly on the 30th June and 31st December in each year.

The half-year's interest, due on December 31st next, will be paid in full on the stock now offered for subscription, and after July 1st this stock, when fully paid up, will rank *pari passu* with stock already quoted.

THE PRICE OF ISSUE IS 92 PER CENT.,

Payable as follows:—£5 per cent. on Application; £10 per cent. on Allotment; £37 per cent. on June 15th, 1908; £40 per cent. on July 15th, 1908.—£92 per cent., or the whole may be paid up in full on Allotment, or on any Monday before July 15th, 1908, under discount at the rate of 4 per cent. per annum, and interest at the rate of 5 per cent. per annum will be charged on any instalments in arrear.

The above-mentioned Debenture Stock is issued under the powers given by Acts of the Dominion Parliament, and in pursuance, and under the authority of Resolutions of the Directors and Shareholders of the Company.

The Debenture Stock is perpetual and irredeemable, and ranks *pari passu* in all respects with the 4 per cent. Perpetual Consolidated Debenture Stock now officially quoted on the London Stock Exchange.

The Trust Deed provides that the total amount of Debenture Stock shall not exceed £2,000 per mile of line for the time being open and operated, and an amount not exceeding the cost price of securities of independent corporations from time to time deposited with the Trustees, but the Company cannot issue any Debenture Stock against such securities without the consent of the Trustees.

The Debenture Stock is secured by a general charge upon the undertaking, property and assets (other than land and money subsidies) of the Company, subject to the £1,180,600 of bonds primarily charged on the Ontario Division of the Railway (287 miles), and to charges created, or to be created, not exceeding $10,000 per mile of line, other than the above-mentioned 287 miles of line in Ontario, or $15,000 per mile if guaranteed by the Parliament of the Dominion, or any of the Provinces of Canada, and is a specific first mortgage upon certain securities deposited with the Trustees, particulars whereof can be obtained at the Company's office.

The Company is now operating 2,874 miles, which includes 710 miles of leased lines, and in addition has already constructed 350 miles of new branches, which will shortly be opened, and has some further mileage partly constructed.

Copies of the Annual Report for the year ending June 30th, 1907, can be obtained at the Offices of the Company. For the nine months from July 1st, 1907, to March 31st, 1908, the gross earnings show an increase of $1,907,500, and the net earnings of $657,400 as compared with the corresponding period of the previous year.

Allottees will be entitled, if they so desire, on payment of the instalments payable on application and allotment to exchange their allotment letters for script certificates to bearer under the hands of the Registrar and Local Secretary, and, after such exchange, the bearers of such script certificates will be the only persons recognised by the Company as being entitled to the stock in respect of which they are issued. All Provisional Scrip Certificates must be surrendered for registration on or before the 16th day of November, 1908.

The Subscription List will open on Wednesday, the 22nd day of April, 1908, and will be closed on or before Saturday, the 25th day of April, 1908, at 12 noon.

It is intended to apply, in due course, to the London Stock Exchange, that the stock now offered may be added to the stock now officially quoted.

Full Prospectuses (upon the terms of which applications will alone be received) and Forms of Application can be obtained at the offices of Sperling & Co., Bond Court House, Walbrook, E.C., or of the Company's Bankers, Lloyds Bank, Limited; Bank of Scotland; The Canadian Bank of Commerce, and their respective branches.

Bond Court House,
Bond Court, Walbrook, London, E.C.
16th April, 1908.

DOMINION OF CANADA.

The SUBSCRIPTION LIST OPENED on FRIDAY, the 24th day of April, 1908, and will CLOSE at or before 4 o'clock on TUESDAY, the 28th day of April, 1908.

KAMINISTIQUIA POWER COMPANY, LIMITED,

OF MONTREAL, CANADA

(Incorporated under the Laws of the Dominion of Canada).

SHARE CAPITAL - - - $2,000,000

In 20,000 Shares of $100 each, the whole of which have been issued.

First Mortgage 30-Year 5 per cent. Gold Bonds, $2,000,000, in Bonds of $500 or £102 14s 10d, or $1,000 or £205 9s 8d.

Present Issue, $1,325,000. Reserved for the Vendor, $175,000. Reserved for Future Issue, $500,000.

Messrs KITCAT, MORTIMER & AITKEN are authorised to receive Subscriptions on behalf of the Company for **$1,325,000 OF THE ABOVE-MENTIONED BONDS. PRICE OF ISSUE, 97 per cent.**, or £99 13s 3d per Bond of £102 14s 10d, or $500, payable as follows—£5 on application; £14 13s 3d on allotment; £25 on the 17th day of June, 1908; £25 on the 3rd day of August, 1908; £30 on the 21st day of September, 1908; £99 13s 3d per Bond of £102 14s 10d or $500. Or the whole may be paid up in full on Allotment, or on the due date of any instalment under discount at the rate of 5 per cent. per annum.

The Bonds are secured by Trust Mortgages, dated February 22, 1907, and March 12, 1908, in favour of the Royal Trust Company, of Montreal, as Trustee, constituting a first mortgage and charge upon the whole of the undertaking, property and assets of the Company present and future with the exception of certain lands (not required for the power plant) which are referred to in the letter from the President of the Company set out in the body of this Prospectus.

Interest on the Bonds will be payable by coupon on the 1st day of January and the 1st day of July in each year at the office of the Company, or the Royal Trust Company in Montreal, or at the Agency of the Bank of Montreal in the cities of New York and London, in currency or sterling at the holder's option. Interest from the due dates of the various instalments to June 30, 1908, will be provided for by coupons annexed to the Provisional Scrip Certificates, and the Bonds now offered for subscription will have annexed thereto the coupon for a full half-year's interest due on January 1, 1909.

The Bonds are repayable at par in gold on January 1, 1937, but the Company reserves the right on and after January 1, 1917, to redeem the whole of the Bonds then outstanding at the price of 105 per cent. and accrued interest on giving 90 days' notice in accordance with the provisions of the Trust Mortgages. The Trust Mortgages provide that 1 per cent. of the outstanding Bonds shall be redeemed on January 1, 1917, and on each succeeding 1st day of January at 105 per cent., the particular Bonds to be redeemed on each occasion, unless previously purchased by the Company in the open market, to be determined by drawings.

The total authorised issue of Bonds secured by the said Trust Mortgages is limited to $2,000,000, of which the last $500,000 can only be issued when the net earnings of the Company from all sources (other than sales of property) after paying all operating expenses, renewals, &c., have for the 12 months preceding such issue been at least one and a-half times the amount of the yearly interest on all the Bonds then outstanding, including the further Bonds then proposed to be issued.

PROSPECTUS.

The following is a copy of a letter from the President of the Company with reference to the property and earning capacity of the Company, viz.:—

Montreal, March 9th, 1908.

Messrs KITCAT, MORTIMER, AND AITKEN, South Sea House, Threadneedle street, London, E.C.

Gentlemen,—The Kaministiquia Power Company was incorporated under the Dominion of Canada Companies Act, 1905, for the purpose of acquiring and exercising extensive water power rights granted in perpetuity by the Provincial Government of Ontario for the development of the power of the Kakabeka Falls on the Kaministiquia River in the Province of Ontario.

DISTRICT SERVED.

The Company's Power House is distant 18 miles from the thriving twin Cities of Fort William and Port Arthur. These Cities, which are only four miles apart between centres and which are in commerce regarded as one City, are situate on Thunder Bay at the head of Lake Superior, a famed shipping point and the strategic port for the Western Commerce of all the Canadian North-West. Here rail and lake transportation meet, as a consequence of which the three greatest Railways of Canada, viz., the Canadian Pacific, the Canadian Northern, and the Grand Trunk Pacific, have selected this point for the location of their central terminals. Practically all lines of Lake steamers utilise these ports, as they are the Canadian ports nearest to two hundred million acres of fertile agricultural lands in the North-West and to immense areas of timber and mineral lands. Here are located some of the largest grain elevators in North America, with a present capacity of 19,575,000 bushels. It was the great possibilities of these cities which made feasible the development of the water power at Kakabeka Falls, and ensured a market for the power therefrom.

WATER POWER AVAILABLE.

At Kakabeka Falls the Kaministiquia River falls 180 feet in a distance of 6,500 feet, thereby affording natural conditions exceptionally favourable for the economical development of water power. The Engineers' reports submitted to you show that the natural flow of the River during the comparatively short low water period of the year is sufficient to develop upwards of 15,000 horse-power on the water wheel shaft.

The Kaministiquia River has a drainage area of 2,800 square miles, including Dog Lake, Shebandowan Lake, and other large Lakes, which, in exercise of its legislative rights and at comparatively small expense, the Company can utilise to secure to it at all times throughout the year a minimum of 30,000 h.p., as more fully set forth in reports by Consulting Engineers, Messrs R. S. Kelsch and W. B. Bennett, already furnished you.

DESCRIPTION OF WORKS.

The works and plant of the Company as constructed have been carried out under the supervision of the best engineering skill available with the object of stability, permanency, and efficiency at a total cost of upwards of $1,600,000. The dams, intake and forebay, have been completed to the intended capacity of the plant, viz.: 30,000 h.p., the aqueducts 25,000 to 30,000 h.p., and the penstocks to a capacity of 15,000 to 20,000 h.p., of which power there is presently completely developed in the form of electricity 15,000 h.p. The Power House as constructed is of concrete and steel structure, fireproof in every particular, and has been completed for the entire development, viz., 30,000 h.p., with the exception of an extension of 100 feet for additional generators and water wheels. From the Power House duplicate transmission lines at present equipped with circuits capable of transmitting in excess of 20,000 h.p., and by reason of the duplication ensuring continuous and satisfactory delivery of current, have been built to the Cities of Fort William and Port Arthur, where at a central point the Company has erected a substantial and absolutely fireproof terminal station from which electric current is delivered in various directions to its consumers.

CONSUMERS.

The Company's plant was put into operation in December, 1906, and has since continuously delivered power to customers with whom contracts had previously been made. All these contracts are at the rate of $25 per h.p. per annum, and it is to be observed that in some cases the maximum power contracted to be taken has already been exceeded. These contracts include the supply of power to the

City of Fort William for general municipal purposes, including the lighting of its streets, as well as its commercial and residential houses; the

City of Port Arthur, for traction purposes; the

Canadian Pacific Railway for the operation of its extensive workshops, grain elevators, coal docks, &c.; the

Ogilvie Flour Mills Company for the operation of its elevators and Flour Mills, which are considered the most modern in America, having a capacity of 3,000 barrels of flour per day; the

Canadian Iron and Foundry Company for the operation of its extensive works; the

Consolidated Elevator Company for the operation of its elevators, &c., and to several manufactories for various purposes.

REVENUE.

The Annual income from the sale of power under the contracts already made (on the basis of a verified statement for the three months ending January 31, 1908) is	$118,367.64
The operating expenses are	18,142.32
Leaving a net revenue of	$100,225.32
Whereas the interest on the Bonds now offered for subscription will only require	75,000.00
Showing a surplus of	$25,225.32

N.B.—It is to be observed that Annual income as above is not inclusive of revenue from two comparatively large contracts which did not become operative until February 1, 1908, or subsequent to the three months' period which forms the basis of the figures given. The estimated revenue from the operation of the contracts in question will amount to at least $12,000, and will augment the net revenue and surplus by a corresponding amount, as no additional expense is entailed in serving the contracts mentioned.

When arrangements have been made for placing the whole of the output available from the present development, namely, 15,000 h.p., the net revenue of the Company should be not less than $225,000, and this should be more than doubled when the total available power, namely, 30,000 h.p., has been developed.

PURPOSE OF ISSUE.

The present issue of Bonds is made for the purpose of discharging liabilities incurred by the Company in the construction of the Power Plant, and for the general purposes of the Company.

SURPLUS LANDS.

The Company is the owner of over 6,000 acres of land situate near Port Arthur and Fort William, which will not be required in connection with the development of the power. These lands have been excepted from the mortgage securing the Bonds, as it is intended to dispose of them as and when a favourable opportunity arises and with a view to development of the business.

Yours truly,

(Signed) H. S. HOLT, President.

Messrs Kitcat, Mortimer, and Aitken have received information by Cable, dated April 10th, 1908, that a Contract with the Grand Trunk Pacific Railway Company has been concluded for the supply of their full power requirements at the Fort William terminals for 10 years from the commencement of supply.

The Trust Deed makes provision for the registration of the Bonds at the option of the holder on a Register to be kept by the Royal Trust Company at its office in Montreal.

Provisional Scrip Certificates to Bearer will be issued in exchange for Allotment Letters, and after such exchange the bearers of such Scrip Certificates will be the only persons recognised by the Company as being entitled to the Bonds in respect of which they are issued. Each Provisional Scrip Certificate will have annexed thereto a Coupon providing for the payment of the interest due up to and inclusive of the 30th day of June, 1908. All Provisional Scrip Certificates must be exchanged on or before the 1st day of December, 1908, for Definitive Bonds, which will carry a coupon for a full half year's interest, payable 1st January, 1909.

A copy of the Trust Mortgages above-mentioned and copies of the Acts of the Legislature of Ontario under which the Company is operating, can be seen by intending subscribers at the office of Messrs Linklater and Co., 2 Bond court, Walbrook, London, E.C., during usual business hours, whilst the list remains open.

The whole of the Bonds now offered have been underwritten.

It is intended to apply to the Committee of the London Stock Exchange for an official quotation of the Bonds.

Applications should be made on the accompanying form and forwarded with a cheque for the amount payable on application to the Bankers for the issue, the Bank of Scotland, Head Office, Edinburgh; London and Branches; or the London Joint Stock Bank, Limited, London and Branches.

If no allotment is made the deposit will be returned in full, and where the number of Bonds allotted is less than that applied for, the surplus will be credited towards the amount payable on allotment, and the balance (if any) will be returned to the applicant.

Interest at the rate of 6 per cent. per annum will be charged on all instalments not paid on the due dates, and failure to pay any instalments when due will render all previous payments liable to forfeiture, and the allotment liable to cancellation.

Prospectuses and Application Forms may be obtained from the Bankers or from the Brokers.

TRUSTEES FOR BONDHOLDERS.

THE ROYAL TRUST COMPANY, Montreal.

DIRECTORS.

H. S. HOLT, Montreal, President (President Montreal Light, Heat, and Power Company; Vice-President Royal Bank of Canada; Director Dominion Textile Company, Montreal; National Trust Company, Toronto).

FREDERIC W. THOMPSON, Montreal, Vice-President (Vice-President Ogilvie Flour Mills Company, Montreal; Director Royal Bank of Canada; Liverpool and London and Globe Insurance Company, Canadian Board).

CHAS. R. HOSMER, Montreal, Director (Director Canadian Pacific Railway; Merchants' Bank of Canada; Royal Trust Company; London and Lancashire Life Assurance Company, Canadian Board).

W. A. BLACK, Winnipeg, Director (Managing Director Ogilvie Flour Mills Company, &c.).

J. E. ALDRED, Montreal, Director (Vice-President and Managing Director Shawinigan Water and Power Company).

BANKERS.

In London—The Bank of Scotland; the London Joint Stock Bank Limited.

In Canada—The Bank of Montreal.

SOLICITORS.

In London—Linklater and Co., 2, Bond Court, Walbrook, London, E.C.

In Canada—Beatty, Blackstock, Fasken, and Chadwick, Toronto, Ont.

BROKERS.

Kitcat, Mortimer, and Aitken, South Sea House, Threadneedle Street, London, E.C.

Dated April 23, 1908.

The Investors' Review

EDITED BY A. J. WILSON AND SON.

Vol. XXI.—No. 539. New Series. SATURDAY, MAY 2, 1908. (Registered as a Newspaper.) Price 6d.

Replies to Inquiries about Stocks and Shares.

These are given each week in the INVESTORS' REVIEW on the following terms:—

One Reply to **One** Question — **One Shilling.** Any number of questions may be put and will be answered at the rate of **One Shilling** each. The questions should be numbered and a copy kept, as securities cannot be named with comments in the printed replies.

For a fee, however, of **One Guinea** per annum paid in advance, a **Key** to the previous week's replies will be sent early in the following week to Subscribers.

Deposits of "Query Money" may be made in advance, and will be acknowledged in the "Answers" column. Notice of exhaustion will also be given there.

If tempted to speculate by circularising brokers Readers should pause and ask the INVESTORS' REVIEW first; its reply will probably save them from many a loss.

Telegrams advising about new securities cost **Half-a-Crown** each, plus cost of the telegram.

Private Letters in answer to inquiries can be had if desired. The minimum charge for such letters is **Ten Shillings,** but for this three questions will be answered if desired. For every question beyond three replied to in any one letter the charge is **Half-a-Crown per question.**

Correspondents can have their lists of investments overhauled and advised upon by letter on precisely the same terms.

Also models of grouped investments will be supplied according to directions given and on the following terms, each list being distinct and never a mere repetition:—For any number of stocks up to **Five, One Guinea;** for from **Six to Ten** securities **Two Guineas,** and so on at the rate of **One Guinea** for each **Five.**

Deposits may be made for letters just as for replies given in the Paper, but letters are never volunteered.

PUBLISHERS' NOTICES.

The Investors' Review is a Subscription Journal, and will be delivered to subscribers in London by the first post, or sent to the country and abroad by the first mail, on Saturday Mornings on the following terms:—

One Year - £1 1s. Six Months - 11s. Three Months - 5s. 9d.

Short of Three months the Price is **6d.** per Copy *Inland*, and **6½d.** *Abroad, Post Free.*

Subscribers can change their address as often as they please, but notice of change must reach the Publishing Office not later than the First Post on Friday Morning.

For a fortnight before the Subscription expires the **Investors' Review** will be forwarded in a different coloured wrapper.

Cloth cases for binding the Half-Yearly Volumes price **1s. 6d.** postage **4d.** extra. Bound Volumes **15s. 6d.,** or **16s. 3d.** post free.

Cheques and P.O. Drafts should be made payable to

CLEMENT WILSON,
"Investors' Review" Office,
Norfolk House, Norfolk Street,
London, W.C.

The Editors cannot undertake to return rejected communications.

Letters from correspondents must, in every case, be authenticated by the name and address of the writer.

The Editors desire it to be understood that a charge is made for the insertion of reports under the heading of Company Meetings, and they cannot accept responsibility for statements made therein.

The Investors' Review.

Canadian Borrowings in 1908.

In the four months ended April 30 new capital issues to the nominal amount of £16,133,300 have been publicly made by the Canadian Government and various municipalities and joint-stock enterprises in the Dominion. This is really an appalling total for so short a time, and in the interests of the people of Canada, as much as in those of the British investor, we hope some check may now be put upon this indiscreet assiduity. Promptly at the beginning of the year the Canadian Pacific Railroad Company led off with an issue of £4,867,200 in its ordinary shares, offered at par, so that the morsel might be greedily swallowed. At the time that issue was made we expressed an emphatic disapproval of this description of finance, and it is unnecessary to say more about that now. Sooner or later the stockholders will bitterly regret the imprudence, and when too late, become anxious to know what was done with the money. Not to be behindhand the Grand Trunk Company followed with £1,000,000 of its Grand Trunk Pacific 4 per cent. guaranteed bonds offered at 94, and soon after £1,000,000 of its own 4 per cent. guaranteed stock was put upon the market at 92½, neither of these issues being absorbed to any large extent by the investor. Much of them, therefore, remains in the hands of the underwriters, and burden the banks under advances to them. Recently the Grand Trunk Company again came upon the market for £2,000,000 of its 4 per cent. Pacific bonds, offered at 94½, and finally the Canadian Northern has asked for £2,000,000 in 4 per cent. bonds at 92, the whole of these issues together amounting to nearly £11,000,000 nominal, of which £4,000,000 nominal is attributable to the Grand Trunk, nearly £5,000,000 to the Canadian Pacific, and £2,000,000 to the Canadian Northern. That is the amount of new railway capital, in other words, for which the people of Canada have made themselves responsible within a period of four months, because upon them the obligation to find the interest and dividends on this new capital falls. Even patient, easily gulled England will not for ever find capital with which to pay interest.

Not to be behindhand, the Canadian Government came for £3,000,000 in its 3½ per cent. stock offered at par. Half of this money, however, was held against an equal amount of the 4 per cent. bonds of the Inter-Colonial Railway, maturing on April 1 last, and was presumably exchanged for these, so that the new debt amounted to only £1,500,000. Even so, it is probable enough that a considerable amount of the exchanged bonds found a lodgment in our market for the first time. Municipal borrowing has also been active, although it has not all appeared through prospectus advertisements or public issue of any kind. We hear on good authority that the City of Toronto for one has been busy selling its bonds here privately through commission houses in London, but whether these bonds represent fresh capital demands or not is more than we can yet say. The "City" of Regina, however, has raised nearly £114,000, offered at 101 because the interest was 5 per cent., and not to be outdone another embryo city of the Canadian North-West, Edmonton to wit, has put £187,400 of its 5 per cent. bonds on the market also at 101, and the rate offered

has made them go off. This week the City of Montreal has come for £1,000,000 in 4 per cent. sterling registered stock at the price of 99, so that altogether £1,301,100 in new debt has been publicly contracted by municipalities. There was a report current some little time ago to the effect that Winnipeg is getting ready to offer us £1,500,000 of new debt to be raised on its behalf, and there are no doubt plenty of other places equally ambitious. Another amount of £460,000 has also been raised for the Montreal Street Railway Company in 4½ per cent. sterling debentures offered at 96, and the Montreal Light, Heat, and Power Company raised £80,000 a short time back in 4½ per cent. bonds offered to the public at 96½, so that Montreal has asked for £1,540,000 all told, and almost all of a heap, the joint-stock borrowings for the city being £540,000, in addition to its municipal debt of £1,000,000. One or two other joint-stock enterprises have also come here for money, including the Richlieu and Ontario Navigation Company, which asked for £200,000 on its 5 per cent. bonds, and last week the Kaministiquia Power Company raised £265,000 in 5 per cent. bonds offered at the sterling price of £99 13s. 3d. per cent. This makes another £465,000 in all, and brings up the total of Canadian demands made so far this year to the amount named at the beginning of this article.

If we try to imagine what the effect of this diligence in raising new capital here may be, we are driven to recall the past, which offers examples of recoil and liquidation in Canada painful to contemplate. After all, the Canadian Dominion has not yet a population of 6,000,000 all told, and a large proportion of its inhabitants are new settlers privately in debt to the amount of an indefinite number of millions sterling. The capital obligations of the joint-stock enterprises of Canada are also exceedingly heavy, aggregating at the present time something like £250,000,000. The debts of the Dominion Government and of the various provinces and municipalities are also quite large enough for the sparse population to be obliged to meet, and what the country really required was a season of rest and recuperation. Instead of rest, however, it is being subjected with augmented energy to the forcing process, and no doubt the sudden renewal of energy in capital raising is partly due to the strain put upon the country by its exhausting commitments, private, corporate, and Governmental. The gross debt of the Dominion Government alone has risen from $28.74 per head in 1868 to $65.36 per head in 1903, in spite of the missionary and mercenary zeal displayed in drawing immigrants in. It was the boast of Canadian politicians and bankers during the progress of the United States crisis that Canada was financially sound and free from any elements calculated to create anxiety. That could only have been a relatively accurate statement of the case at the very best. The strain was endured for the time, and only just endured. Without the help of additional money drawn from the old country in ship loads a breakdown must have come at the beginning of the present year, because feverish energy has characterised the progress of Canada for a good many years past. Its resources have been exploited under all pretexts, and its financiers and political leaders have plunged into adventures of many kinds, not only within the Dominion itself, but in other quarters, and have drawn heavily upon English and Scotch capital in order to start their undertakings and keep them moving. It is really time to call halt in many directions, and we trust the disposition to indulge in drafts upon capital, mostly borrowed capital, will now receive a check, else it would have been better for the ultimate economic health of Canada that its financial affairs should have been thrown last autumn into the cauldron, where those of its neighbour the North American Republic were seething and boiling over.

Apologists for the tremendous fury of capital-raising the Dominion has displayed in recent years, with a culminating outburst in the beginning of the present year, always point to the trade of the country "Look how it has developed," they tell us, and no doubt it has rapidly developed. That is a most gratifying fact, indeed. As recently as 1881 the total imports of the Dominion were valued at little more than £21,000,000, and the exports barely reached £20,000,000, whereas in 1903 the latest figures we possess in the official "Statistical Year-Book of Canada" imports amounted to £48,243,000 and exports to £45,170,000. *Bradstreet's* recently gave some particulars about the industries of Canada illustrative of its growth, and these may be quoted in continuation of the official year-book. In 1900 the total capital embarked in the country's industries was £89,400,000, and by 1905 this had risen to £166,800,000, an increase of nearly 86½ per cent., the average capital per firm having more than doubled in five years. But the number of persons employed rose by only 44,000 to 383,000, an increase of barely 13 per cent., and the wages and salaries advanced from £22,650,000 to £32,431,000, which has a growth of little more than 43 per cent. The increase in the value of the products was less than 47 per cent., the total for the two dates being £96,206,600 and £141,290,000. Such figures unquestionably indicate great progress, which we hope it will continue, but the most conspicuous part about it is the excessive growth of capital. The mere fact that the trade of the Dominion is expanding with unusual rapidity must not be allowed to disguise the other and still more significant fact that Canada in recent years has sinned in mortgaging its future and in conducting its current business on credit to an extent and at a speed the least provident of our Australasian settlements never outstripped. It has gone on at such an inconsiderate pace that when the reaction does come, as it must and will, the suffering is likely to be extreme, not only for the Canadian people, but for imprudent investors here at home. Montreal, for instance, is about to enter upon a career of port expansion destined, the correspondent of the *Financial Times* says, to make it "but slightly inferior to New York" in capacity and facilities for handling traffic, and it is by no means a certainty that the money sunk in this way will prove remunerative. It can hardly do so in the course of one generation, because the ambition to be fully grown up all at once is too unbridled, and the outlays are in consequence excessive, all outlays of borrowed money, be it remembered, and borrowed abroad too. Canadians must try and go slow for a while. They are at present disregarding alike the warnings conveyed by their past and the circumstances of the present time.

Economic and Financial Notes.

The Insurance of German Workmen.

We are glad to see that some figures relative to the sickness and old-age pensions for workmen in Germany have been issued to the House of Commons. But before these statistics can be of any great use to us they ought to be supplemented by all the information obtainable about other German systems of poor relief, if any. Are there any other State provisions in Germany for keeping the aged, the destitute, the "can't and won't works," the insane, and the vagrant alive at the expense of the local authorities, of the still at work? Any old-age pension system organised here by the Government and sustained by drafts upon taxation must, as matters are, come in as supplement to the costliest, most inhumane, and corruptly wasteful and inefficient organisation for "the relief of the poor" ever brought into existence as an insurance against revolution. The total amount spent in the three kingdoms on mere poor relief is to-day at least £17,000,000, and the total amount raised under the poor rate is not far short of £40,000,000 a year. According to the return relating to workmen's pensions in Germany, the total insurance receipts from all

sources there were £16,742,000 in 1905 under all heads, and of this the State would seem to have provided between £2,000,000 and £3,000,000. If this represents the only help given to disabled and aged workmen within the empire, it is nothing to boast about, but if it comes in as supplement to the contributions drawn from the payers of local assessments, then it may be an intolerable addition to the burdens already borne. Will the Ministry clear this point up before proceeding to endow certain privileged and molly-coddled classes with old-age pensions at the expense of those still able to keep their heads above water? If we are to have old-age pensions at all, let us have them as substitutions for, not as supplements to, the existing poor rate doles, comparatively little of which really ever reach the poor. Were a reform of that nature brought forward whereby the degrading and extravagant workhouse system would be done away with, and the insufferably costly and rotten machinery of poor law administration as well, it might be something worthy of support. Catch-vote politics it might not be, but it could easily be real reform, not an unwholesome and decadent pandering to ignorant and factionary agitation.

The Ministry might also, by way of preliminary, devote a little attention to the why and wherefore of German pensions to workmen. In amount the bounty is not large. The State constitutes only £2 10s. per annum to each pension, and in 1906 that seems to have involved an outlay of no more than £2,397,000, the workmen themselves furnishing half the balance of £8,365,000 which the pension list demanded. In the matter of contributions, however, the men paid £8,806,000 in 1905 compared with only £4,585,000 furnished by the employers. In short, the pension system is a kind of mutual insurance on a modest scale, the chief burden of which is directly borne by the employees, the employers ranking next and the State coming in at the bottom with its barrack-yard beneficence. But why the necessity for all this elaborate arrangement to prevent men from dying of hunger? Is it not an open confession that the military system, with its necessary corollary, high tariffs and excessive cost of living, has pushed the working classes down into a condition of impecunious helplessness from which most of them can never hope to have a chance to escape? Old-age pensions and all-devouring militarism are thus part and parcel of the same dehumanising or imperialising process whereby individualism is crushed down and mankind, so to say, reduced to the moral level of automatic machines. Without the doles imperial magnificence and the parade and glory of drilled hordes of armed man-killers would stand in imminent danger always of getting swept out of existence by revolution. It is in no spirit of charity, therefore, that the German Government and its Kaiser have brought into existence a sickness and disablement or old-age pensions agency, but rather from an instinct of self-preservation; and are we on the road to be confronted by the same danger, in spite, too, of our profligately wasteful system of poor law relief? If not, what are our Ministers bent on establishing old-age pensions for? Surely the English ideal of Government has always professedly been liberty of the subject, the open road along which all men were free to follow their bent, the free career open to every citizen? If the ideal existed for the most part only in our dreams, it none the less helped to mould our social policy. But now all is to be changed; the citizen is to become a machine, a slave to "interests" and classes; as individuals we must go the way we are ordered, and strip ourselves at the word of command, so that State beneficence may have scope and the "working man" come by more than his own. But perhaps, mankind on the average being a featherless parrot, an imitative animal, our good Ministers are merely intent upon copying the Germans without in the least knowing why.

More About German Imperial Finance.

Some interesting facts about German Imperial finance have been furnished by the Berlin correspondent of the *Times*. Gross receipts from Customs and Excise in the year ended March 31 last were nearly £2,700,000 more than was estimated at £52,000,000. Customs alone produced £2,133,000 more at £32,150,000, and compared with the receipts of the year before the increase was almost £4,422,000. For all that the Germans would seem for the present to have pretty well reached the limit of their tax-paying capacity, for the new taxes introduced in 1906 have only brought in about two-thirds of the estimated revenue of £4,640,000, and even if that estimate had been fulfilled there would not have been nearly enough to meet the outlays of the Government. The cigarette tax yielded £633,300, or nearly £60,000 more than the estimate, and nearly £300,000 more than in 1906, when, of course, the impost was not in full swing; but the duty on passenger tickets continues to be a conspicuous failure, yielding only £930,000 against an estimate of over £1,500,000. Receipts from the tax on motor-cars and on directors' fees also fell some 50 per cent. below expectations, but the impost on bills of lading yielded a little more than was expected at £782,000. On the other hand, the tax on inheritances gave only £1,283,000 against an expected £1,800,000, and the depression on the Bourse reduced the revenue from stamps, which at £1,401,500 was £787,000 less than in 1906. So also the Excise duty on sugar produced less than was expected at £6,926,000, but the salt tax gave £122,500 more than was expected at £2,888,283, and there was an increase of more than £500,000 in the Excise duty on spirits, which reached £5,632,000. Both the spirit and brewery duties would seem to be still light in Germany, and perhaps the Imperial Chancellery may see its way to get a little more money in that direction. The brewery tax yielded only £2,559,000, which was £30,000 less than expectation, but £413,000 more than the previous year gave. Our brewers give us more than £13,000,000 to help us to build our war vessels and to buy our epaulettes and feathers. The revenue from State lotteries was also below the estimate, but private lottery tickets yielded nearly £500,000 more than was expected, and perhaps some of that money came from this country, which has been inundated for years with touting circulars offering German lottery tickets of all descriptions. The Imperial Railways were more remunerative, largely in consequence of the abolition of cheap rates for local postage, but the posts and telegraphs gave only £29,855,000 gross or £650,000 less than was looked for. On the whole, however, the Imperial receipts for 1907 show a surplus of £175,000 over the estimates, which, considering the new taxes and that the flush of prosperity was at its height last year, is rather an indication of exhaustion than something to boast of.

The British Westinghouse Electric and Manufacturing Co., Limited.

What is described as the eighth annual report of this company has at last made its appearance and it covers the year 1907. That, however, leaves a gap, because formerly the accounts were made up to the end of July. A separate balance-sheet is accordingly appended illustrating the position of the company as at December 31, 1906, but no profit and loss exhibit is made for the second half of that year. This balance-sheet is, therefore, useful only as a help to interpreting the present state of the company after the capital has been written down in the manner previously described in these columns. Altogether, £1,375,000 has been written off the original capital as lost, and we are still a long way from any hope of return to that sanguine time when the board was able to issue £1,000,000 in £5 preference shares at 10s. per share premium. As it now stands, the share capital consists in £500,000 10 per cent. preference shares of £3 each, and 75,000 ordinary shares of £5 each, or £1,875,000 in

all, but for all the prospect we can see of a dividend being earned, even on the preference shares, they might just as well have been endowed with a 20 per cent. expectation. In 1907, indeed, it is claimed that the "trading profits" amounted to £92,383, but this figure is arrived at by including the "estimated profit accrued to date on contracts in progress," and that is not a wholesome way of reckoning. Profit thus on the way ought not to be distributed or dealt with, not reckoned at all, indeed, if a business is to be kept in an umembarrassed condition. As it is, the "profit" thus arrived at is sufficient to cover the interest on the debenture stock, which took £49,654, together with £14,379 demanded as interest on temporary loans, while £17,009 is written off for sundry depreciations not ascertained at the time of the reduction of capital. All this done, £11,341 is left in the bookkeeping to be carried forward, and we try to hope it will prove to be actual cash by and by.

For the company does not seem to us to be even now in a comfortable position from any point of view. The writing down, to begin with, has been quite insufficient, and obviously had it not been that the directors were able to place £250,000 out of an authorised £300,000 of 6 per cent. prior lien debentures (offered at 98), the concern must have been in danger of coming to a complete standstill. Even with this money there can be very little elbow room for the business, since the balance-sheet made up to December 31 last shows the company to be in debt to its bankers to the amount of £123,053, which is only £46,373 less than it was owing at the end of 1906. It also owed the American Westinghouse companies £186,374, but this debt is stated in the report to have "been liquidated by the transfer to the American companies of shares in the Traction and Power Securities Company, Limited, at their par value." That is a welcome riddance, no doubt, but still we do not like the show, and cannot really feel satisfied that the property of the company is worth as much altogether as the £1,241,353 of 4 per cent. mortgage debenture stock outstanding, and now shoved down to a secondary position by the prior lien issue. Look, for instance, at purchase money of patents and goodwill. This item has been written down nearly £420,000 since the end of 1906, but it still stands at £375,000, and that must be an illusory total. Are the patents, &c., really worth the odd £75,000? Worse still, the works at Trafford Park, Manchester, are entered in the balance-sheet at only £148,000 less than 12 months before, and a nett addition of £4,358 has been made to the expenditure thereon during the past year, bringing up the present book value to £934,935, which is an excessive figure, were it for no other reason than because of the enormous size of the works. There is no electric manufacturing business going on, or doable, indeed, in present circumstances, capable of giving works of this magnitude full employment. What would the property be worth if put upon the market? Could the works be sold for £250,000? The same question may be asked about the machinery, plant, tools, patterns, furniture, &c., all now entered together at £775,774, or only £135,485 less than the total of 12 months before. Here likewise there has been a nett addition of £734 to the capital cost during the year, a trifle which is yet a bad sign because the company is in no position to allow of even one shilling of additional capital outlay. But is this machinery, plant, &c., worth the amount it now stands at in the books? We doubt much if it is worth one-third of that amount, and consider the balance-sheet to be in these and other respects still a self-deluding product of the sanguine temperament and too merciful auditing. We doubt even whether the stock of material, &c., on hand, which is down nearly £120,000 on the year at £527,594, is worth the figure, but waive this point and accept also the valuation of completed work on contracts not yet paid for at £384,909, which is about £103,000 less than twelve months before, and we have yet one other item which cannot but be regarded as inflated, viz., shares and debentures in other companies, against which £473,950 stands, or £6,527 more than in the previous balance-sheet. These paper possessions have no Stock Exchange quotations, the directors candidly admit, but have been valued by them at cost or under, and there is a contingent liability on them of £9,129. What is this paper really worth? Would it fetch 50 per cent. of the nominal value if put up to auction, or 25 per cent., or 10? And how comes it that this total should actually be up in spite of the transfer of the shares in the Traction and Power Securities Company to the American companies? Really, we trust some explanation upon these and other points will be given at the forthcoming shareholders' meeting, else we shall doubt more decidedly than ever the advisability of continuing this business, at least without another drastic reduction in the capital. Cash is suggestively small, at £13,086, which is nearly £3,000 less than at the end of 1906, when the difficulties of the company were rapidly coming to a head, but the entire display is comfortless.

American Business Notes.

Shiftings about of credit went on in New York last week, with the result that the average of the loans and advances of the Associated Banks showed a decrease of £1,042,200, while those of the outside banks and trusts showed an increase of £1,680,000. Although something like £1,200,000 in gold left New York for Europe during the week, such is the stagnation of industry and commerce throughout the Republic that the specie average of the Associated Banks showed an increase of £1,612,200 and there was also an increase of £455,000 in the holding of greenbacks, but thanks to the decrease in the loan average, nett deposits were up by only £1,059,000. The surplus reserve, however, was £1,802,200 higher at £11,797,000 against £2,470,000 at the same date the year before, so there is plenty of scope yet for gold exports, which accordingly continue, in spite of the Pennsylvania loan sold in Europe and the calling in of Treasury balances by Mr. Cortelyou. He is said to be contemplating the withdrawal of still another £10,000,000 from the banks in order to stop the exports of gold, which already amount to about £3,000,000. But the expenses of the Government may also be forcing him to take this step.

Coming to the non-Associated Banks and trusts—that is to say, those outside the New York Clearing House—we find their total of loans and investments raised to £162,954,200, by the week's increase above mentioned. The specie average of these institutions, however, was only £11,800 up at £9,385,000, but there was an increase of £208,400 in the average of greenbacks held, the total of which was almost £2,437,000, and the deposits, &c., were up £390,000 to £131,303,200. Officially the proportion of reserve to deposits is given as 31.5 per cent., compared with 30.6 per cent. in the previous week, but, taking the figures as they stand, the actual proportion seems to be little over 9 per cent. How is the proportion reckoned officially? Are investments treated as outside the reckoning? We presume so, and if that is correct, why lump the two together?

The great "stagging" success of the Pennsylvania Railroad loan of £8,000,000 has whetted the appetite of borrowers in the United States to an uncontrollable extent, and we shall be inundated with all manner of issues from the same quarter. But in acting thus, our Yankee friends will probably find they are making a mistake. Investors in this country know the Pennsylvania Railroad of old, and, however much they may object to the extravagant character of its management in recent years, and the consequent rapidity with which its capital commitments are being increased, they believe that a genuine mortgage bond of the company is just about as good as an English Railway debenture stock. Moreover, the fact that the names of Baring and Rothschild were associated with the issue predisposed the market to welcome it with favour, and as the scrip was quoted at a substantial premium before issue, the temptation was irresistible to rush in with applications. It was a rush of "stags" injurious

rather than helpful to the permanent placement of the security, and giving no clue whatever regarding the sentiment of investors towards the general run of United States railroad papers.

Quite another show will therefore be seen if, for example, the Messrs. J. P. Morgan and Co. should attempt to float here that £5,000,000 of Metropolitan Inter-Borough bonds they have bought. Happily, our market has not been openly tested, the bonds having been sold in New York or at least underwritten. We are not at all sure, though, that even the speculative elements here or on the Continent will welcome that £10,000,000 issue of the Union Pacific Railroad which Messrs. Baring and Rothschild are said to be about to offer here. We love not the habits of Harriman. All this grab after money implies distress rather than recuperation, and the news about American business continues the reverse of encouraging. Bank clearings still continue to indicate reduced trade and so do railroad earnings. Failures are multiplying rather than diminishing in number, and the disastrous collapse in the cotton market, due as much to the failing attempt to prevent prices from going down as to reduced consumption, forbids anyone to be sanguine about the immediate future. By dint of bold finance and mortgaging regardless of consequences it may perhaps be possible for corporations in the United States to surmount their difficulties without a further panic or solution of continuity in credit, but at present the one hope of relief seems to rest in a good harvest. And it is rather suggestive of distress than of confidence that we are almost daily invited to put confidence in the state of the ungrown—and partly unsown—crops. The chief of the Agricultural Department at Washington is described as "most sanguine" of a bumper harvest. Winter wheat is said to be in fine condition, spring wheat sowings completed, ploughing for the maize sowings in full swing, and everything in order to insure a first-class harvest; but the wheat and maize have to grow yet and to be reaped, and Mr. Wilson's department cannot yet insure weather to order. The same tactics are followed by the debt-bound, the stranded, and the money hungry in Canada.

On Wednesday the turnover of shares on the Wall Street Stock Exchange exceeded 1,000,000 for the second time of this year. The market seemed to go crazy, but it was probably only "stage management shaded with suicide," as a cynic remarked to us. The bears had been over-confident, and got hunted in, and now Wall Street is weaker than ever, as rotten as a last year's medlar. Prices broke badly on Thursday led by Westinghouse Electric stock. The reorganisation by assessment plan will not go through, it is said, and the business will have to be sold. Railroad stocks were also flat—Pennsylvania dividend coming back to 6 per cent., 376,000 freight cars idle, and so forth.

Statistics of the United States foreign trade for March are not quite so comforting to the debtor country and its banks as those of the earlier months of this year, thanks mainly to the sharp decline of nearly £3,700,000 in the value of the cotton exported. The total of the month's exports is down about £4,000,000 to £28,280,000. Exports of maize were also less, and had it not been for improvements in the outflow of provisions and oil the show would have been a poor one for a debtor country, and it is made worse, so far as the ability of the United States debtor to pay his way in Europe is concerned, by a slight increase in the value of the imports, the result of which was that instead of an increase in what the wrong-headed calculators describe as a "favourable trade balance," the excess of exports of merchandise over imports was only £10,456,750 for March. This was still well above March, 1907, when the excess was only £5,715,000 better also than for March, 1906, when it was £6,382,626. The average for the first three months of the year was also most cheering for us at £51,200,000. Imports have been contracting in luxuries, and the March importations of precious stones at New York were valued at £77,903 against £660,000 in 1907 and £758,000 in 1906. For the past four months, including December, 1907, and up to March 31, the value of precious stones imported was only £300,000 all told compared with £3,200,000 in the same four months of 1906-7. If the United States goes on at this rate it might be able to draw gold from Europe in the autumn without being driven to create accommodation bills, and almost without further sales of new securities on our Stock Exchange.

United States Steel Trust profits for the first quarter of this year scarcely appear to support the policy of the directors in keeping prices up, no matter whether the demand warrants their maintenance or not. Nett earnings fell to £3,645,800, a pretty figure by itself, but it compares with £6,511,000 in the December quarter and £9,101,000 in the June quarter of last year, which bulged the largest in the company's history. Compared with the first quarter of 1907, the nett profits show a decline of £4,178,600, and the surplus, whatever that may be, is on the same comparison down £735,400. For all that, the board pays the same dividend at the rate of 2 per cent. per annum on the common stock, being doubtless of opinion that if prices are to be maintained dividends should likewise be prevented from shrinking. Until the full figures are to hand, even if then, we cannot say whether this distribution was made in any degree out of real earnings or not. However, the prospects for its maintenance are not specially cloudless, for the unfilled orders at the end of March amounted to only 3,765,000 tons compared with 4,624,553 tons at the end of last year and 8,043,858 tons at the end of March, 1907.

The *Journal of Commerce*, New York, has been counting up how much money the industrial and railroad corporations of the United States will require this year, and comes to the conclusion that the amount needed to meet notes coming due will be £24,256,400, in addition to which expiring bonds to a gross value of £13,114,600 will have to be provided for. Over and above this there are instalments due upon securities already issued aggregating £19,399,000, so that altogether the United States will require about £57,000,000 of money, of which a considerable portion will be new money this year, in order to keep its industries and carrying companies in a state of solvency. The Pennsylvania issue, whose success has resounded throughout the civilised world, is therefore only a small beginning of what promises to be a persistent demand for European money. What we are surprised at is the modesty of the demand, and we feel sure the industries of the States could do with twice as much.

It is stated by the New York correspondent of the *Daily News* that there are over 2,000,000 of unemployed workers in the United States, but the trade unionists say that nearly double this number are still out of work. Agriculturists are selling their lands, and hundreds of them making for the Canadian North-West, where their position is likely to be worse rather than better. If this news is correct, and we fear it is so, we should like to know what explanation Protectionists here can offer for such a lamentable state of affairs. They give us to understand that if you better the labourer in all ways by restricting his market and raising the cost of living, the compensation will be continuous employment, but in the United States, as in Germany, there is at the present time a much more aggravated situation in regard to want of employment than in our own country. It must be remembered that this mass of unemployed in the United States exists in spite of the fact that the spring demand for farm hands should now be at its highest.

Besides the £5,000,000 of Inter-Borough bonds New York within one week has seen the emission of about £5,000,000 for other needy borrowers, including a loan of £1,000,000 for the city of Philadelphia.

Russian Petroleum and Liquid Fuel.—Production of crude oi for week ending April 25, 211,000 poods, equals 3,402 tons.

Passing Events.

We are very glad to see that Mr. Buxton, the Postmaster-General, has decided to put a stop to the circulation through the post of newspapers containing the advertisements of "premium bond" hawkers. It was high time that a step like this should have been taken, for the impudence of the premium bond touts has been growing more and more intolerable the longer they were let alone. A correspondent sent us this week a sample of a circular issued by one of these fraud-perpetrating agencies. It reeks with dishonesty, and there are only too many of a similar kind continually passing through the post. Doubtless the simple are often caught by the audacious falsehoods the concoctors of these swindles put forward, but some amount of good at least must follow from Mr. Buxton's action, and we hope he may be able to go further still and prevent the Post Office from being utilised to disseminate lottery circulars of any description whether sent out from agencies in the United Kingdom or originating abroad.

Sir Joseph Ward is nothing if not optimistic, but if the colony of New Zealand really has gathered in a revenue for the financial year ended March 31 last amounting to £9,055,940, then indeed it should be prosperous. This revenue exceeds by £656,870 that of the previous year, and Sir Joseph Ward boasts that there is an available balance of £850,000 in the Treasury after paying off Treasury bills to the amount of £150,000 and handing £800,000 from revenue to the Public Works Department. Since 1891 this department has altogether received £6,430,000, which Sir Joseph apparently asks us to believe the ordinary revenue provided. But last year public works altogether absorbed £1,855,590, and presumably over £1,000,000 of this was borrowed, and the probability is that when the Budget figures appear New Zealand will be found to have again added upwards of £2,000,000 to the aggregate of its debt. While that borrowing system lasts it is impossible to believe in either the present or the future prosperity of the country.

Apart altogether from the sympathy and grief excited by the sinking of the *Gladiator*, that and other recent naval catastrophes surely ought to impel Members of Parliament to insist upon a systematic inquiry into the condition of the Navy. We see that Lord Esher has been delivering himself, in the congenial pages of Mr. Maxse's *National Review*, of the opinion that the navy ought to be "audited" as well as the accounts of the money spent upon it. That would be all right, and we should be very glad to see something approaching to instructed intelligence devoted to an investigation of such a kind. We have long, in sympathy with Mr. Gibson Bowles, demanded that the estimates of spending departments ought to be overhauled by Committees of the House before they are submitted to it, but that we fear is a perfect state of business arrangements not to be thought of as long as members of committees receive no pay for their work. It is, however, conceivable that enough men of patriotic spirit and brain capacity might be found to form a committee whose business it would be to examine into the whole principles underlying our present system of naval construction. Why did the *Gladiator* tumble over on its side when struck by the American liner *St. Paul?* Why did the *St. Paul's* bow penetrate the ribs of the cruiser with such extreme ease and with such disastrous consequences? Are our warships really efficient to serve the purposes for which they are built? We have long doubted it, and if it be true, as we continually hear, that not only is the principle of armaments unwise, but the guns and other portions of the equipments defective, then indeed an audit of the navy is imperatively demanded. But how many vessels will be left to "audit" if they go on sinking each other in "manœuvres" in the way now fashionable? Bah! that's good for trade. So are the frequent explosions on board ships. "Lives are lost?" Well, what are the lives there for?

The directors of the Great Central Railway announce that they are prepared to receive applications for £800,000 3½ per cent. second debenture stock at the price of 92 per cent., payable 5 per cent. on application, 37 per cent. on May 18, and 50 per cent. on June 30. This is not enough if the company is to free itself from the crushing weight of its floating debt, and meet the current outlay on capital account, but probably it is all the board dare venture to ask for in the circumstances. And no doubt this stock is, at least for years to come, sufficiently covered by the revenue. Yet it is anything but a first-class security, and can hardly be deemed cheap at the price offered. For all that, we trust the directors will get the money, not only for the sake of the company itself, but so that their banks may be relieved from an account which must lock up an amount of their resources at times inconvenient.

Some particulars of the Congo State were bestowed upon the Belgian Chamber this week. M. Franck, the leading Liberal Deputy from Antwerp, gave a glowing description of the potential wealth of the territory, quoting the reports of English engineers on the Katanga copper belt, and dwelling upon the actual position of the country's finances and debt. This debt, it seems, is only £1,400,000 all told, and Mr. Franck described it as a bagatelle compared with the budget of Belgium, which reaches over £27,000,000. The seven companies working the resources of the Congo have increased their original capital of £5,780,000 by £3,280,000, and have distributed in dividends and interest £3,200,000. "If you add," he said, "the dividends of the three chief concessionary companies, the return is increased to £8,800,000. Compare these results with those we have obtained in Russia," he added, and the observation was received with laughter. "Between 1897 and 1906 Belgian goods were imported into the Congo to the value of £6,200,000." That is something, but, after all, little to boast about if the country is so enormously rich and capable of producing metals and rubber to the extent the supporters of the existing *régime* would have us believe.

Mr. Borden, the Leader of the Opposition, gave some particulars last week in the Dominion House of Commons about immigration into Canada. Between 1896 and 1908, he said, the total arrivals numbered 1,209,437, of which 250,259 came in under the bonus system, and the rest of their own sweet will, and yet the population of the West was 200,000 less than it should have been according to the immigration figures. No explanation of the discrepancy was forthcoming from the Government, he added, but probably silence is best in these circumstances, for no doubt disappointed immigrants who can get away and reach climates less subarctic, are glad to do so, sneak out of the country and say nothing. Last year 215,000 people came into the Dominion without any bonus, and Mr. Borden contended that the day of bonuses was surely over. In that we agree with him, for it is a system which has led to many abuses, and whose results to its victims have too often been anything but beneficial. It is almost impossible to prevent frauds on the part of those who work to secure these bounties.

The chairman of the San Paulo Railway of Brazil was optimistic at the shareholders' meeting, and seems to have had good reason to be so. Traffic has been remarkably expansive, and although working expenses have also risen that is partly the inevitable result of greater business, partly the consequence of extraordinary outlays by which the property is being improved, no less than £140,000 having been thus laid out last half-year. And assuredly the San Paulo is a wonderful railway. The bugbear of competition was trotted out at the meeting, and rightly too, but the chairman made light of it. There had been two competing lines to Santos in being for about three years past, he said, but beyond getting their licences renewed from time to time the concessionaires have hitherto done nothing. It would take at least five years to get the money and the lines built, and by that time the San Paulo will be able to look after itself.

The Government of South Australia have instructed the Bank of Adelaide to give holders the option to surrender the South Australian Government 4 per cent. bonds for £1,440,100, maturing July 1, for cash payment, with accrued interest to date of surrender

(principal and interest payable three days after lodgment of bonds with the Bank of Adelaide), or of converting not exceeding £500,000 of the bonds into 3½ per cent. inscribed stock, on the following terms:—For every £100 of these bonds up to £500,000, with coupon attached due July 1, surrendered to the bank, the South Australian Government will issue £100 3½ per cent. inscribed stock, 1926-1936, and also pay £1 in cash. No application for conversion will be entertained after the £500,000 has been applied for. The inscribed stock will be dated January 1, and a half-year's interest will be payable on July 1.

Continental Memoranda.

An unofficial estimate of the San Paulo, Brazil, coffee crop for this season puts it at 8,303,000 sacks. Should it turn out so, this will mean no opportunity for the Brazilian Government to unload its huge stock bought with borrowed money in order to prop the price.

An interesting summary of the wealth of Russia has been published by the *Revue des Deux Mondes* from the pen of the Vicomte d'Avenel. He accepts in absolute faith the official Budget statements of the empire, and shows that they stand the test of analysis. Between January 1, 1886, and the same date of last year Russia raised £102,040,000 in loans and paid out £104,150,000 more than the revenue credited in the Budgets. This, M. d'Avenel contends, shows that more than the whole of the borrowed money is accounted for. In 1886 the entire Russian debt was at par £520,000,000, taking the rouble at 2s., and of this £200,000,000 represented old or recent war borrowings, £10,000,000 of it representing the balance of the debts created in the war with the first French emperor. Another £63,000,000 was left over as a legacy of the Crimean, Hungarian and Polish wars, and the Turkish war of 1887 involved the raising of £140,000,000 of fresh money. Then £74,200,000 were spent in redeeming the serfs from the nobles, and the balance of about £230,000,000 has all gone into Russian railroads, either State-owned, like lines from the German frontier to Petersburg and from Petersburg to Moscow and the Black Sea, or owned by joint-stock proprietors. The writer goes on to describe the effects of various financial operations entered into during the interval, and especially the great conversion operation whereby £430,000,000 of old loans was reduced in interest; but he does not seem to notice how the burden upon the Russian Exchequer was lightened by the change, especially the change in the date of final redemption, which was rather unscrupulously postponed.

At the present day the National Debt of the Russian Empire amounts to £980,000,000, although between 1885 and 1904 nearly £100,000,000 has been supplied from ordinary revenue to meet special expenditure. Of the existing debt no less than £480,000,000 is due to war, the Japanese war alone having cost more than £200,000,000. Another £300,000,000 has been absorbed in the repurchase and construction of railways, and the land banks of the nobility and the peasants have had £122,500,000 handed over to them, while the amount bestowed upon the serfs stands at something beyond £200,000,000. In 1886 the debt charges absorbed 35 per cent. of the receipts from taxation, but in 1903 this proportion is said to have been little more than 11 per cent., and at present it is but 15 per cent. The contention, therefore, is that the security to the foreign creditor is ample, and we are inclined to agree with this view, provided the people are not meanwhile goaded to revolts.

It is said that the Polish foundries will not enter the new metal combine being formed for Russia, but it will include ten of the largest establishments in the South of Russia, and also the Goujon Foundry at Moscow. Only three of the companies to be absorbed, a great Moscow ironmaster states, are working at a profit; the others, although splendidly equipped, produce only up to half their capacity, and therefore work at a tremendous loss. That is why properties which cost £6,000,000 are to be had for £1,000,000. Particulars are given as to the production of nine of the companies to be embraced which combined to form the backbone of the cartel, but they are not of much interest here. They are said, however, to represent 82.97 per cent. of the whole output of Southern Russia and 52.53 per cent. of the total output for the whole country, and it is proposed to endow the combine with a capital of £17,136,000, of which £10,120,000 will be in shares and £6,910,100 in bonds. The assets of the various companies in the combine are said to exceed their liabilities by £15,666,000, and the working capital is to be about £1,828,000, while the expenses of founding the trust are put at £558,200. Profits in a normal year are expected to reach £850,000, and that estimate is based on a reduction in the selling price.

Failures continue to happen on the Continent, but they are not either so numerous or so important in Germany as they were earlier in the year. A very bad state of affairs, however, appears to have come to the surface in Catalonia, and is causing the greatest anxiety there. Several Barcelona houses have already stopped payment, and the crisis has become so acute that the Bank of Spain has sent its Inspector-General to learn precise details on the spot, and to decide upon the best means of overcoming the difficulty. It is said to be resolved to do all possible to prevent a series of failures which would have a fatal effect throughout Catalonia, and considerable credit facilities are also being afforded by the Government. The liabilities of the houses threatened with bankruptcy are said to amount to more than £1,600,000, and the Bank of Spain is to put, say, £1,000,000 at the disposal of business men in the form of loans or bills. None the less is the trouble on the increase, and extending to Madrid when a large commission house in the cotton trade has stopped payment. Barcelona has been overdoing production for years.

A report has been circulated abroad originating in London to the effect that the Japanese Government intends to proceed with a general reorganisation of its foreign debt. All its foreign loans are to be converted, and in order to get ready for this step experts attached to the Japanese Embassy in London have lately been studying the financial history and methods of the British Government. They believe that a conversion would be perfectly justified by the fact that during the last five years the revenue of the Japanese Treasury has increased by nearly £30,000,000. We are not quite sure whether the investing public would welcome a step of this kind, supposing the report true, and think that prudence would counsel the Government of Japan to wait a little.

Those Prusso-German loans have been covered in "a most niggardly manner," the German papers say, and the scrip promptly went to a slight discount when dealings began after the Easter holidays. Indeed, it would have gone lower, the story is, had it not been that the Seehandlung and the Reichsbank intervened to support the market by making important purchases. The 3½ and 3 per cent. funds of these Governments naturally suffered from this cold welcome given to the new issues.

German railway earnings are falling off now in a rather marked way, and it is explained that they kept up throughout the earlier period of the crisis because old orders were being fulfilled. For the month of March, however, the decrease was barely £35,000, but it is said that the re-selling of old stock has produced much more than a year ago, so that the actual earnings for the past month are considerably worse than the published figures indicate. What that explanation means we cannot guess.

That the trade of Germany is declining, however, is beyond question, and cotton manufacturers are wisely

considering the advisability of reducing competition. A great number of spinners assert their willingness to take this step. Stocks on hand are increasing rapidly, and the export trade is falling away at the same time that the home market is in no position to absorb the goods to an extent corresponding with the existing rate of production. This rate has been much increased during the past two or three years, and the result now is that the textile trade of Germany in general is much depressed owing to the piling up of stocks for which there is no demand. That is always a consequence of Protection. Competition is choked out of the home market, and then the home market is gorged because the first stimulus drives the trade into an expansion for which there is no justification.

A remarkable article upon what may be called the overstraining of credit appeared last week in the *Frankfurter Zeitung*. It points out that the demand for capital has been in excess of the supply. If all the money in the world were placed in one huge reservoir it would be gradually drawn off into the various countries by a delicate system of channels, called the international Money market, and for some time back there has been a greater demand for this capital than could be met. The outflow has been greater than the inflow, so that finally the German reservoir was drained dry. Higher cost of living, the indulgence in luxuries, which mean waste, and the too often forced expansion of trade have all contributed to either diminish the supply or increase the demand, and the recent dearness of money all over the world is simply the expression of this exhaustion. A valuable table is given in illustration, setting forth the amount of bills in circulation in Germany at various dates. Thus, in 1894 the total was only £737,400,000, and last year it rose to £1,538,300,000. The figures of the Reichsbank over a series of years accurately reflect and gauge this expansion in the dependence upon credit.

The German South American Bank is not going to pay any dividend for the past year, any more than for 1906. There is said to be a considerable deficit. This institution is the child of the Dresdner and Schaafhausen Banks.

The Week in Mines.

Kaffir Shares.

The past week seems to have excelled all others in the matter of business stagnation. We certainly cannot remember a time when the reports from the Kaffir Circus were so distressing, and the only satisfaction that can be assumed is that things cannot conceivably get worse, and the semblance of a market still exists. It is nothing more than that now, and the position is such that no attempt is made to pull things together and give the various mining sections an appearance of activity. Dealers seem to have quite lost heart, and frankly confess that nothing within their memory can compare with the existing misery. Nor does there seem the slightest prospect of an early change. The Kaffir Circus can hardly expect to come first in any general Stock Exchange revival, and there is no sign that the attitude of the public towards the general run of securities is about to alter. Even the best class things are left untouched; new issues are not bought until they have fallen to a substantial discount, and seldom then, and on all hands evidence accumulates that the ordinary market speculator is either cleaned out or is dissipating in other ways any small balance that he has managed to retain. On some days not 50 shares of the most important counters change hands, and price movements are minute in the extreme. Paris always seems on the selling side these days, although doing very little, and if the market occasionally brightens for an hour or so it is because Yankees are blazing or something of that sort. It is never owing to any change for the better in the Kaffir Circus itself. The whole situation is quite lamentable, but there seems no help for it.

Land, Rhodesian and Diamonds.

Nothing of an encouraging nature can be said of any of these divisions. Land and Finance things are just as idle as Gold shares, and anything that goes up 6d. or so one day usually loses it the next. There is no stability in the market, and as to Rhodesians their state is quite pitiable. The market in Chartereds is almost dead again, and they slipped below 14s. once more. One or two Copper shares added a trifle, and efforts were made to arouse some interest in Bankets, but Tanganyikas, Zambesias, and other so-called favourites were neglected and dull. De Beers were sold from Paris and lost further ground, closing right at the worst, and Premiers went the same way, but Jagers picked up a trifle, and there was a spurt in Roberts Victors from 1 to 1⅛ on a rumour that fresh blue ground had been struck, and that a dividend would be paid. If true the latter achievement would be remarkable considering the present condition of the diamond market. The last distribution, one of 5s., was made in August. The situation between the syndicate, De Beers, and the Premier apparently remains unchanged, meaning that from May 1 the Premier resumes its complete independence.

Australasian and West African.

Since we last wrote in this column two Broken Hill companies, the Proprietary and Block 14, have announced the temporary suspension of dividends, but nothing else had been expected, and prices were not much hurt. At the end of last week the Colony was a free buyer, probably to cover shorts now that the worst is known regarding dividends, and prices rallied appreciably. Subsequently the tendency became dull on the absence of sustained support, but a rally near the end prevented a wind up at the worst. Two or three important West Australian mine meetings have been held during the week, and the prospects held out were generally quite cheering, but prices were not assisted to any extent. Ivanhoes slipped back steadily, and any gains consisted of a few pence only. New Zealands held their prices well, and West Africans may be passed over.

Copper, Tin, and Miscellaneous.

The Copper share market has not been very animated, and prices have shown a backward tendency as a rule. The metal was easier early in the week, and Paris sold Tintos with some persistence, reducing the price to 63, and others eased off as well, despite the rush up in Yankees. Famatinas were affected by a misfortune to a well-known firm of brokers in the Miscellaneous market, defalcations by an absconding clerk being the trouble. A rally in Tintos to 63¾ produced a better feeling all round, and as Yankees were still blazing prices picked up. Tin shares were mostly lower. Among Miscellaneous counters Mexico mines of El Oro had a rise on the fine return for March, and Esperanzas and El Oros opened firm, but the latter were affected in the same way as Famatinas. Alaska Treadwells and Uniteds were better, while Oroville Dredging showed dulness. Nundydroog's and Champion Reefs lost ground in the Indian section.

MINING NEWS.

*** *Frank and unbiassed answers are given to all questions relating to Mines. Address Editor Mining Section and enclose* One Shilling *for each question asked. No bucket shop circular or advertisement should ever be responded to without first consulting the* Investors' Review.

Robinson Gold Mining.—Unlike the Ferreira, this Wernher Beit company has had its capital inflated to a tremendous extent, and the dividends paid are therefore comparatively small. It has a longer life than the other, but only by a year or so. For 1907 the tonnage crushed, the value of the gold recovered, and dividends exceed those of any previous year, while working costs show a further marked reduction. Ore milled was 410,927 tons, producing 216,824 ozs. of gold, and in addition 272,477 tons of sands yielded 65,332 ozs., 137,372 tons of slimes 18,554 ozs., and 15,858 tons of sands and slimes accumulated 3,091 ozs. Added together these figures make a total output of gold of 303,801 ozs., the value of which was £1,277,198, being £3 2s. 1.942d. per ton or 5s. 5.588d. more than for the previous year. On the other hand, the working expenses were only

£372,928 or 18s. 1.807d. per ton, a decline of 3s. 7.713d., of which 1s. 3¾d. was due to decreased development. During the last three months of the year, when working costs averaged 14s. 6d. per ton milled, development expenses on the same basis were just about 8d., and for these three months the actual working expenses, that is the cost of mining, sorting, and the running of the reduction works, were 13s. 10d. per ton milled as against 19s. 8d. in 1906, a saving of no less than 5s. 10d. "Assuming for a moment," said the chairman at the annual meeting, "that the average working costs in the future will be about 15s. 6d., the gain to shareholders when compared with the working costs of 1906 will represent a globular million sterling or in the neighbourhood of 35s. per share." Working profit for 1907 was £904,270, being £2 4s. 0.135d. to the ton, a remarkable figure for the Rand. To this is added £98,040 brought forward and £23,799 sundry revenue, making the disposable sum £1,026,109. Profits tax for 1907 was £81,037, and a further £5,361 was payable on account of 1906, making £86,398 in all. Capital expenditure for the year takes £34,105, and after paying two dividends of 10 and 14 per cent. respectively, there remains the big sum of £243,840 to be carried forward. Ore reserves are calculated at 2,779,236 tons, averaging 11.97 dwts. to the ton, being an increase of 598,536 tons and a decline of 2.25 dwts., due to an increase in the estimated ore to be won from the upper levels of about 200,000 tons and to an increase in the estimated stoping widths, so as more closely to agree with the work now being done.

Geldenhuis Deep.—Tonnage crushed during the year ended December 31, 1907, beat all previous figures at 367,870, the increase compared with the previous year being 64,545 tons. Battery yield was 90,406 ozs., in addition to which 244,533 tons of sands gave 32,664 oz. and 123,850 tons of slimes, 7,260 ozs., bringing the total production to 130,330 ozs. Yield per ton was 2s. 8.498d. less at £1 9s. 8.652d., but the working costs were pulled down 2s. 2.497d. to 19s. 8.526d. per ton. Value of the yield was £546,674, the total mine expenditure £362,545 and the nett credit £185,096. Capital outlay charged to profits comes to £29,217, Government taxes took £18,020 and the two dividends of 15 per cent. and 17½ per cent. respectively required £97,500, leaving £40,360 to be carried forward. Ore reserves are estimated at 1,411,385 tons of 6.2 dwt. ore, an increase in quantity of 200,260 tons, but a drop in value of 1.4 dwts. In addition there are standing in the mine 838,189 tons of an average value of 3 dwts., which represent the accumulation of low-grade ore developed since the commencement of mining operations.

Rose Deep.—The gold produced in the year to December 31 realised £502,614 and working expenses were £341,831, leaving a profit on operations of £160,783. With £33,059 brought forward, the disposable sum is £195,823, and after providing capital expenditure, Transvaal Government taxes, &c., two dividends aggregating 27½ per cent. are paid and £47,097 is carried forward. There was an increase in the tonnage milled of 49,800 tons at a total of 365,450 tons, and the mill production was 79,162 ozs., in addition to which 238,832 tons of sands gave 31,798 ozs. and 125,236 tons of slimes 8,965 ozs., or a total of 119,926 ozs. Yield per ton was £1 7s. 6.079d. or a decline of 2s. 2.455d., but that was practically neutralised by a drop in working costs of 2s. 2.429d. at 18s. 8.489d. Development operations were retarded for some months owing to the miners' strike, but the ore reserves have been increased 376,628 tons, to 1,393,512 tons; although the value at 6.2 dwts. is just a trifle lower. The quantity of low-grade ore developed is 222,094 tons, worth 2.8 dwts. per ton. The general manager thinks working costs can be further reduced, and this, coupled with the increased scale of operations, causes him to regard the outlook as improved.

Ferreira Gold Mining.—This mine takes rank among the greatest on the Rand, and the results achieved have been magnificent, mainly because no attempt was ever made to water its capital. But its days are numbered, and in five or six years from now actual mining and milling operations are expected to cease. Meanwhile it is earning splendid profits, and the dividends paid last year amounted to 300 per cent. Ore crushed was 268,603 tons yielding 109,039 ozs., 172,050 tons of sands produced 30,754 ozs. and 85,253 tons of slimes 7,655 ozs. A quantity of accumulated sands and slimes was also treated giving 9,844 ozs. and 100 ozs. came from dump treatment, so that under all heads the output of gold was 157,392 ozs. Value of the gold was £662,365 or £2 9s. 3.831d. per ton, a drop of 2s. 1.720d. compared with the preceding year, but the total working costs were 2s. 2.974d. less at £1 1s. 5.016d. per ton, the total outlay being £287,647. Balance of profit was £374,718, to which are added £155,655 brought in and sundry revenue of £13,055, making £543,427 in all. The dividends paid required £285,000, and after providing profits tax and other charges there remains a credit of £219,514 to be carried forward. Ore developed in the mine at the end of the year was estimated at 1,220,097 tons of an average assay value of 10.14 dwts., showing a reduction in quantity of 52,875 tons, while the value is .03 dwts. lower. A very small amount of development remains to be done and will be completed during the current year.

Crown Deep.—The year 1908 was the best in the history of this famous South African mine. Number of tons milled was 399,012, being an increase of 57,548 over the previous twelve months, and the yield of gold averaged 9.227 dwts., equivalent to 38s. 8.4d. per ton, an improvement of 5s. 2.8d. compared with 1906. Value of the output was £772,000, and the working costs came to £384,017 or 19s. 3d. per ton milled, and the profit on operations was £380,063 or 19s. 5.4d. to the ton. These results show an increased working revenue of £200,755 and improved working profits of £144,359. In addition to its ore revenue, the company received £59,189 in dividends on its holding of Robinson Central Deep shares, and £25,386 as proceeds of 4,912 shares of the same company sold, making with £68,012 brought forward a disposable revenue of £547,282. Capital expenditure took £11,507, and £37,296 was payable for Government profits tax, but after providing two dividends aggregating 110 per cent., there remains £168,479 to be carried forward. Development work was pushed forward with great activity throughout the year, and at the close the ore reserves were 1,323,253 tons, averaging 8.3 dwts., an increase over the previous year of 231,349 tons and an improvement in grade of 0.4 dwts. The ore classed as unpayable is 104,396 tons, or very much less than in the previous year, due to the fact that the continued fall in working costs means a corresponding reduction in the quality of ore that can be profitably worked. At the annual meeting the chairman described the financial position as one of exceptional strength, "and with the excellent prospects of the mine shareholders may confidently expect increased dividends in the near future."

May Consolidated Gold.—In the year to December 31 this company milled 174,985 tons of ore, and the yield from all sources was 68,556 ozs., which includes concentrates, sands, and slimes. Value per ton was 33s. 2.75d., and the working costs, including outlay on mine development 17s. 0.60d., leaving a profit of 16s. 2.15d. Profit on the operations was £141,555, the value of the gold being £290,735, and the working costs £149,180. Balance from previous account was £27,826, and sundry revenue gave £4,698, making a total of £174,079. Dividends aggregating 45 per cent. account for £129,937, profits tax amounts to £10,250 and £7,228 is allowed for depreciation, leaving £26,664 to be carried forward. Dividends paid to date amount to £937,094. Tonnage of payable ore is estimated at 561,094, worth 10.14 dwts. per ton.

Roodepoort Central Deep.—During 1907 the tons milled came to 101,642 which produced 25,725 ozs. of gold, and 13,341 tons of concentrates gave 6,078 ozs., a further 6,137 ozs. coming from 57,029 tons of sands, and 36 ozs. from by-products, so that the aggregate yield was 37,976 ozs. Value of the gold was £160,976 or £1 11s. 8.102d. per ton milled, and the working expenses were £132,671 or £1 6s. 1.266d. per ton, including 3s. 3d. for redemption, leaving a profit of £28,305 or 5s. 6.836d. for each ton. Balance from previous account was £19,663 and rents, &c., produced £672, making up a total of £48,641. Debenture and other interest, depreciation, and profits tax were among charges, which totalled £23,774, and the balance carried forward is increased to £24,866. The company's indebtedness to Messrs. Goerz has been reduced by £10,430 to £36,258, and arrangements have been made for an extension of the time of repayment and also for further loans, the whole debt not to exceed £50,000 including interest. Ore reserves are estimated at 250,800 tons assaying 8.2 dwts. and 14,100 tons assaying 5.2 dwts., the former amount standing in the books at 2s. 4.8d. per ton as against 2s. 9.8d. for the previous year.

French Rand Gold Mining.—There was only a very slight increase in the tonnage crushed during 1907 at 217,060 and yield per ton was less by 1s. 11.286d. at 26s. 6.834d., so that the value of the gold recovered was reduced from £309,334 to £288,359. On the other hand, the working expenses were lowered by £18,021 to £240,655, being 1s. 8.005d. per ton less, and the balance of profit suffers by less than £3,000 at £47,704 or 4s. 4.745d. to the ton against 4s. 8.026d. Yield from the battery was 42,086 ozs., 164,800 tons of sands gave 21,314 ozs., 51,669 tons of current slimes 2,505 ozs., and 26,291 tons of accumulated slimes 2,714 ozs., bringing up the entire yield to 68,619 ozs. To the balance of profit are added £47,704 brought forward, and other items aggregating £3,743, a total under all heads of £96,882. A dividend of 7½ per cent. takes £38,550 and debenture interest £3,599, the balance to be carried forward being £53,810. Ore in reserve at the end of the year was estimated at 336,108 tons of an average assay value of 7.24 dwts. Owing to the reduction in working costs the payable limit has been taken at 5.5 dwts. as against 6 dwts. last year, and as a result a considerable tonnage previously classed as unpayable is now included. The ore of less than 5½ dwts. amounts to 634,873 tons.

South Rand Gold Mining.—Comparatively little work was done in the mine during the year ended December 31, 1907. The miners' strike last May caused all operations on behalf of the company to be suspended, and afterwards work was hampered by the fact that the two incline shafts of the Crown Deep, by means of which the mine is at present being explored, were heavily taxed in supplying the Crown Deep mill. The work accomplished indicates, so the chairman says, "that there is every prospect of finding very rich ore in our mine." No definite scheme for bringing the mine to a producing stage has yet been put forward, but the matter is under consideration, and it is the directors' intention "to form at the earliest opportunity an important working company, of which the bulk of our claims will form an integral part." This clearly points to a consolidation with other companies, and it may be pointed out that an arrangement has been made with the Crown Reef, which has a large deep level claim area adjoining this company's main block, whereby a vertical shaft is to be sunk for joint account. Altogether an active policy will be undertaken, and doubtless the Rand Mines and Consolidated Goldfields Company will continue to do the necessary financing.

Apex Mines.—Up to the present this company has devoted most attention to the coal section of the business, and reports an output for 1907 of 229,967 tons. Development has been satisfactory, and all plant, machinery and buildings have been main-

tained in good order. The company has become a member of the Coal Owners' Association. Mining operations on the gold section were stopped in May, 1907, owing to the funds for that section being exhausted. The seven-compartment shaft had reached a depth of 1,116 ft. at the time work was suspended, and was therefore 284 ft. short of the depth at which it was estimated the main reef series would be intersected. The question of providing effective capital for the exploration and development of this section of the property has been constantly before the board, but financially the times have not been propitious. The lease of the stone quarry was continued during the year, but owing to the continuance of the depression in the building trade the company only received a minimum rental. As to the plantations and farming, the former have been thinned out, and part of the cost will be recovered by the sale of wood, while a portion of the property has been let for agricultural purposes. Net profit on operations was £27,396 and £16,748 was brought forward, making £44,144. Two dividends of 10 per cent. and special remuneration to directors take £31,275 and £12,869 will be carried forward.

Transvaal Gold Fields.—Things have got to be pretty bad before the directors of South African gold mining or holding companies give way to pessimism, and an admission that the outlook is still dark and clouded is in marked contrast to the utterances of some. In the report of this concern for the 12 months ended December 31 the directors refer to the progress of the mining industry and the reduction in working costs, but are compelled to admit that there is no appreciable revival of interest in South African companies on the part of investors. They are therefore reluctantly forced to the conclusion that the prospects of profitable new business are not sufficiently attractive to compensate for the heavy expense of administration both here and in Johannesburg. They therefore propose to wind up the company, and "have no doubt that the realisation and distribution of assets will prove the value of the company's shares to be substantially in excess of the value reflected by present market quotations." We should think the course a wise one. Depreciation was heavy last year, and the directors provide over £80,000 for wastage and reserve for doubtful debts. To do this means the transfer of the reserve of £80,000. Revenue for the 12 months was £8,615, and after providing charges of various kinds there remains a credit of £2,493, including £2,442 brought forward. The liquid assets represent about 7s. per share, and the current market quotation is 12s. 6d.

Modderfontein Deep Levels.—Another year has slipped by, as the chairman sagely remarked at the annual meeting last month, but in view not only of the financial position of the company, but more especially the general money market outlook, the directors have not been able to take in hand any active mining operations. So that all there is to do is to note with satisfaction or otherwise the progress made by neighbouring and adjacent companies. The company continues to be financed by the parent, A. Goerz and Co. A fresh agreement was concluded in February, 1907, under which Messrs. Goerz extended the time for the repayment of money advanced and provided fresh sums required up to February 28 last. For this they got an option over 10,000 shares at 32s. 6d. up to the date mentioned, and have now undertaken to provide a further amount not exceeding £17,500 and not to be repayable until March 31, 1909, at the earliest. In consideration of these facilities Messrs. Goerz have been given an option over 10,000 shares at 20s. during the currency of the agreement. The indebtedness to Messrs. Goerz at the end of December was £14,337 and the balance of expenditure over revenue stands at £24,079.

Modderfontein Extension.—Operations have not yet been resumed on this company's property, and the directors much regret that the financial conditions recently prevailing have prevented them from formulating a scheme for the provision of further capital. Meantime it is noted with satisfaction that the neighbouring New Modderfontein is steadily increasing its monthly profits, thanks to greater tonnage milled, reduced costs and an improvement in the grade of ore. It is considered reasonable to hope that somewhat similar values will be revealed in this company's mine when it is possible to further open it up. Expenditure during 1907 was £11,247, chiefly interest on loans, and the revenue was only £240, leaving £11,007 to be added to the general expenditure, making £41,116 to be distributed over the various construction accounts when milling commences. Balance of liabilities over cash assets is £128,889.

Sacke Estates and Mining.—This company's report for the year 1907 will not do much to restart a South African boom. It managed to get a revenue of £2,083 during the twelve months or £12 more than the expenditure, but other losses were heavy. A further amount of £10,858 was written off shareholdings, and the directors have decided to write off "options on properties abandoned £51,439," so that the debit brought forward of £11,183 is increased to £73,463. The investments which are now written down to £28,520, originally cost the company £71,479, a total depreciation of £49,250. However, a certain proportion of the capital is still intact, the excess of liquid assets over liabilities being £85,604.

New Steyn Estate Gold Mines.—Active development on this property is still deferred, and as operations must be undertaken on a larger scale it is considered inadvisable to commence mining operations until money market conditions admit of the raising of the additional working capital which would be required to complete the scheme of development and bring the company to a producing stage. The company has liquid assets over liabilities to the amount of £280,117, including £203,196 in cash. Investments have been written down to market value, and now amount to £75,518. Revenue for 1907 was £12,487 and the expenditure £4,702, leaving £7,785 to be added to the amount brought in, making £77,492. Of this £21,242 was required for writing down investments and £56,250 is carried forward.

Rand Collieries.—At present this company is concentrating its energies on the gold-mining rights, leaving the coal-mining area for future exploration. Shaft sinking was continued throughout the year, and in the middle of February the reef was intersected in No. 1 shaft at a vertical depth of 2,730 ft. But its value was less than a pennyweight per ton, over the full width of 43½ inches, a terribly disappointing result, having regard to the high values disclosed by the two boreholes put down a few years ago, which gave 26.8 dwts. and 20.6 dwts. respectively over a width of 48 inches. Where intersected the reef was considerably disturbed, and Mr. George Albu, the company's chairman, is confident that the low values are due entirely to the disturbed formation. The cause is the close proximity of a dyke which was met with in the shaft at 2,570 ft. on December 30 last, in the course of sinking, and which remained in the shaft for a further depth of 60 ft. The Van Dyk, which is on the Rand Collieries' western boundary, has ore averaging 10¾ dwts., and this is held to encourage the belief that when settled conditions again prevail payable values will be secured. No. 2 shaft was suspended at a depth of 1,816½ ft., funds being insufficient to sink both shafts to the reef in addition to providing for subsequent development. In consequence of this cautious policy the company has cash to the amount of £30,000, which will allow of considerable exploitation being carried out underground. Revenue in the past twelve months was £2,958, and the expenditure £9,096, which amount has been distributed between permanent works, machinery and plant and buildings. In March, 1907, the General Mining and Finance exercised its option over 50,000 shares at par.

Prestea Mines.—This Jungle company's accounts cover the period from October 31, 1904, to December 31, 1907, three years and three months, but the directors give no reason for hurrying up their issue. It is almost needless to say that they now have little of an encouraging character to tell. The debenture debt of £100,000 was due on March 31, and the holders refused to agree to an extension. They put in a receiver, and appointed a committee to consider what steps should be taken in their interests. A scheme has been prepared, under which the debenture holders are asked to agree to a reduction in their principal by 50 per cent. in exchange for 100,000 shares of the Prestea Block A, and the call of a further 25,000 at par until March 31, 1912. Interest from October 31 is to be waived both on old and new debentures, but the security is to be repayable at par on December 31, 1917. Should the property be sold, with the consent of the holders, as agreed, 80 per cent. of the proceeds will go to the debenture holders, and if that percentage exceeds £50,000, the surplus will be used to pay interest from October 31, 1907. So far the Prestea Block A has not been a conspicuous success. Ore reserves at January 31 last were 335,000 tons, the average value being 12.9 dwts., and the "average" tonnage crushed per month for the twelve months to December 31 last was 6,514 tons, and the "average" value of the bullion recovered for the same period was £16,170. "Working costs at the present time are high, but very material reductions are expected when the railway from Tarkwa to the mine is completed." This information is more or less useless. What we want to know is, is the Prestea Block A earning profits? Debit to sundry expenditure account is £28,348 and debenture issue expenses with accrued interest are £27,597. Shares and interests in other companies appear at £179,837 (some unquoted), and the directors admit that the depreciation upon them was "at least £65,000."

Whim Well Copper Mines.—The first general report of this company made up to December 31 last seems encouraging, and since the date of the statutory meeting held on October 1, 1906, work has been continuously carried on at the Whim Well Mine. A large amount of development has been done, and considerable bodies of high-grade ore have been blocked out in the stopes. A quantity of the high-grade ore exposed by these developments was brought to the surface, and 2,400 tons were bagged and shipped to smelters in England. The average copper contents were 22 per cent., and the amount realised £36,753. The profits would have permitted a dividend payment, but owing to the unpropitious times, a new share issue for the purpose of providing for capital outlays was not deemed advisable, and it has been decided to appropriate revenue to this account. The equipment of the property is proceeding steadily, and the railway to the port at Balla is already finished, practically the whole of it being in operation and working satisfactorily. Town sites have been acquired at the township of Balla, and two other partially developed mines (the Balla Balla and Mons Cupri), together with plant and machinery, have been purchased by the company on very favourable terms. It should be pointed out that these mines in the past have not been successful, and the company originally owning them has been or is being wound up. Summing up, the mine manager in his annual report says:—"Generally the prospects are very satisfactory. A successful future for the next few years is practically certain, and a successful future for many years may be hoped for." Thanks to the appropriations from profits, the total expenditure at the mine since July 4, 1906, to the date of the accounts, together with general expenses, appears at only £11,129, but the company is now short of cash.

Burma Mines, Railway and Smelting Company.—The attempt made by this company to raise money on debentures met with only partial success, and in order to complete the construction of the railway to the mines a further amount of £25,000 must be provided. Reconstruction would be very expensive, so the directors propose the creation of 450,000 shares of 2s. each, to be entitled to 95 per cent. of any profits remaining after providing for the debenture services, and on a winding up to the same proportion of surplus assets. The shares at present issued and the balance of the capital other than the amount converted into 2s. ordinary shares will become deferred shares, and for the purposes of voting all shares will be considered of £1 nominal value. Of the 450,000 2s. shares 260,000 will be offered *pro rata* to deferred holders, and the remaining 190,000 will be reserve for exchange by debenture-holders should they desire to exercise their rights, which are to be transferred from the new deferred shares to the new ordinary shares. It is proposed to change the name of the company to Burma Mines, Limited. Purchase price of the lands and mines appears at £259,993, and up to date £148,962 has been laid out on the smelter, railway, plant, stores, &c.

Critical Index to New Investments.

Metropolitan Water Board "B" Stock.

The board announces that it is prepared to receive at the Bank of England tenders for £1,500,000 of this stock, for which the minimum price that will be accepted is 90. It is a 3 per cent. stock secured on the water fund and on all the revenues of the Board. In the event of any deficiency therein the stock becomes a charge upon the rates levied by the Common Council of the City, the Councils of the Metropolitan Boroughs, and the Councils of the other boroughs and districts within the area of the Board, whose aggregate rateable value exceeds £56,000,000. A first dividend, being a full six months' interest, becomes payable on September 1. Tenders must be delivered at the Chief Cashier's office, Bank of England, before 2 p.m. on Thursday next, accompanied by the usual 5 per cent. deposit. The Board states that the money is required to pay off all its outstanding bills and to meet further expenditure in connection with the construction of reservoirs, filter beds, engine houses and machinery, extension of mains, and other authorised purposes. The whole of the loan is to be paid up by July 16, when the final instalment of 30 per cent. falls due, an instalment of like amount being payable on June 30, but the whole may be paid up in full under 3 per cent. discount on and after the 18th inst.

Southern Nigeria Government Loan.

On behalf of this colony the Crown Agents for the Colonies invite applications for an issue of its 4 per cent. four-year convertible bonds, sufficient to raise £3,000,000. The price at which these bonds are offered is 99 per cent., and after they are fully paid up holders have the option to convert them into Southern Nigeria (Lagos) Government 3½ per cent. inscribed stock at bonuses in the stock diminishing the nearer the date of exchange is to 1911. [For scale see advertisement.] The stock into which the bonds will in this way be turned is to be identical with the existing 3½ per cent. inscribed stock, and will be repayable on March 15, 1955, by a sinking fund to be formed in this country under the management of the Crown Agents who are appointed trustees. All this money is required for public works, and particulars are furnished relative to the progress already made in Southern Nigeria. It is gratifying progress, and the aggregate revenue surplus over a period of ten years has been nearly £621,000. The trade, too, has risen from £1,641,000 in imports and £1,657,000 in exports in 1898 to £4,439,000 imports and £4,336,000 exports in the past year. The British Cotton Growing Association is rapidly developing a new trade in cotton, the shipment of which from the colony last year amounted to nearly £100,000 in value against nothing at all five years before. The previous issue of debt by this colony was well received, and this also seems worthy of the confidence of investors. They will have railways and harbour works as security over and above the general revenues.

Pennsylvania Railroad Company.

An issue of £8,000,000 or $40,000,000 4 per cent. consolidated mortgage bonds, redeemable in 1948 was made by this company in the end of last week, half in bearer bonds of £200 each on the London market and the remainder in $1,000 bonds in New York. The London portion was in the hands of Messrs. Baring Bros. and Co., Limited, and Messrs. N. M. Rothschild and Sons, who placed one-third of the amount and offered the balance for subscription at the price of 96 per cent. It is worth noting that the bonds are secured by the consolidated mortgage dated July 1, 1873, which is a continuing lien upon certain of the company's property to secure the payment of bonds which may be issued from time to time up to a total of $100,000,000. This mortgage is a first lien, subject only to $19,997,820 general mortgage bonds due July 1, 1910, on the main line and various branches between Pittsburg and Philadelphia, and is further secured by the pledge of certain leases and of securities of an estimated present value of over $50,000,000. The issue was apparently a great success, as although the lists were nominally only opened on Monday applications were sent in so promptly that they were closed early that morning; but we doubt whether the genuine investor had much to do with that result, good though the bonds are.

City of Montreal.

On behalf of itself and others the Bank of Montreal offered £1,000,000 4 per cent. sterling registered stock of the above city for subscription at the price of 99. The stock is issued for the redemption of debt and the carrying on of necessary public works, and is redeemable on May 1, 1948, presumably at par, as the prospectus makes no mention of any figure. According to information furnished by the City Treasurer, the consolidated debt, exclusive of this issue, is £6,000,000, while the taxable real estate in 1907 was valued at £43,200,000 and the property exempt from taxation at £11,200,000, the last item including £3,000,000 for water works and other properties owned by the city.

London Electrobus Co., Limited.

When this company started in April, 1906, it offered the whole of its ordinary capital of £300,000 in £1 or shares, but the invitation met with a very poor response, only 81,851 shares being taken up. Another 41,405 were allotted later, but following on this the allotment of 80,615 was cancelled, leaving the issued capital at £46,641. Further attempts were made from time to time to get shares placed, with varying success, until the issued capital amounted to 54,271 £1 ordinary shares and 8,000 5s. deferred shares. Business was started in July, 1907, and on the strength of the results for the nine months to April 14 last the directors are making another effort, and this week invited subscriptions for 240,000 ordinary shares and 20,000 deferred shares. The prospectus is full of the directors' opinions regarding the future of the electrobus, which, it is needless to say, are decidedly optimistic, but they refrain from giving any particulars of profits earned by the vehicles now working. Average takings per car mile are given, it is true, but they are of little use without corresponding figures of cost, and until actual results are given the shares cannot be regarded as other than decidedly speculative.

The Yokohama Specie Bank, Limited, announce that they are prepared to transmit to Japan applications from holders of Imperial Japanese Government first series Exchequer bonds who wish to exchange the same into Imperial Japanese Government 5 per cent. bonds (Internal), provided such applications be received before May 30, 1908. Full particulars may be obtained on application at the above-mentioned bank.

RAILWAY TRAFFIC RETURNS.

FOREIGN.

Alberta Railway and Irrigation.—Earnings for the 7 days ended April 21, $2,908, decrease $1,322; aggregate from July 1, $191,152, increase $38,346.

Argentine North Eastern. — Traffic receipts for week ended April 24, £2,885, decrease £2,020; aggregate from July 1, £135,248, decrease £8,246.

Assam Bengal.—Traffic receipts for 7 days ended March 28, Rs. 92,500, increase Rs. 1,501; aggregate from Jan. 1, Rs. 11,42,825, decrease Rs. 80,028.

Bilbao River and Cantabrian. — Traffic returns for March £8,355, increase £544; aggregate from January 1, £24,583, decrease £4,019.

Buenos Ayres Central. — Gross receipts for March £11,436, decrease £1,133; aggregate from Jan. 1, £93,412, decrease £3,664.

Canadian Northern Railway.—Traffic receipts for 7 days ended April 21, $181,100, increase $54,900; total from July 1, $7,510,900, increase $2,064,200.

Egyptian Delta.—Traffic receipts for week ended April 4, £2,741, decrease £1,604; aggregate from April 1, £2,741, decrease £1,604.

Lucknow Bareilly Railway.—Traffic receipts for 7 days ended March 28, Rs. 40,311, decrease Rs. 17,156; aggregate from January 1, Rs. 4,48,026, decrease Rs. 53,735.

Midland Uruguay.—Receipts for month of March, £4,957, decrease £1,597; aggregate from July 1, £50,386, decrease £4,660.

North Western of Uruguay.—Traffic receipts for March, $21,300, increase $736; aggregate from July 1, $175,429, decrease $11,930.

Quebec Central Railway.—Traffic receipts for the 3rd week of April, $24,359, increase $2,897; aggregate from January 1, $308,736, increase $75,151.

Quebec and Lake St. John.—Traffic receipts for Feb. $31,941, decrease $2,037; aggregate receipts $68,216, decrease $1,606.

Rohilkund and Kumaon Railway.—Traffic receipts for 7 days ended March 28, Rs. 23,838, decrease Rs. 5,599; aggregate from Jan. 1, Rs. 2,74,517, decrease Rs. 29,206.

Uruguay Northern.—Gross receipts for month of Feb., £1,200, decrease £943; aggregate from July 1, £14,009, decrease £699.

White Pass and Yukon Railway.—Traffic receipts for week ended April 14 amounted to $10,200.

ENGLISH.

Cleator and Workington Junction.—Receipts for week ending April 25, £1,405, decrease £106; aggregate from January 1, £19,552, decrease £3,418.

Cockermouth and Keswick Railway.—Receipts for week ending April 25, £770, decrease £17; aggregate from January 1, £11,432, decrease £1,023.

East and West Yorkshire Union Railways.—Traffic receipts for week ended April 25, £340, decrease £123; aggregate from January 1, £7,525, decrease £14.

TRAMWAY AND OMNIBUS RECEIPTS.

HOME.

Bath Electric.—Traffic receipts for week ending April 22, £1,001, increase £281; aggregate from Jan. 1, £9,705, decrease £1,082.

Blessington and Poulaphouca.—Traffic receipts for week ending April 22, £24, increase £15; aggregate from Jan. 1, £119, decrease £18.

Bristol Tramways and Carriage.—Traffic receipts for week ending April 24, £5,899, increase £1,217; aggregate from Jan. 1, £78,420, decrease £2,401.

British Electric Traction.—Receipts of all the Associated Companies for the week ending April 24, £32,158; 430¾ miles.

Burnley Corporation.—Traffic receipts for week ending April 25, £1,195, increase £37; aggregate from January 1, £21,553, increase £330.

Dublin and Blessington.—Traffic receipts for week ending April 22, £167, increase £55; aggregate from January 1, £1,666, decrease £59.

Dublin and Lucan.—Traffic receipts for week ending April 24, £176, increase £64; aggregate from Jan. 1, £1,681, increase £44.

Dublin United.—Traffic receipts for week ending April 24, £5,608, increase £333; aggregate from Jan. 1, £78,533, increase £648.

Hastings and District.—Traffic receipts for week ending April 23, £1,676, increase £749.

Isle of Thanet.—Traffic receipts for week ending April 25, £528, increase £173; aggregate from Oct. 1, £8,253, decrease £394.

London County Council.—Traffic receipts for week ending April 18, £31,984, increase £2,988; aggregate from April 1, £82,134, increase £8,161. Miles 119½, against 113½.

London General Omnibus.—Traffic receipts for week ending April 25, £18,930, decrease £1,424; aggregate from Jan. 1, £302,649, decrease £20,965.

London Road Car.—Traffic receipts for week ending April 25, £7,093, decrease £901; aggregate from Jan. 1, £111,468, decrease £6,672.

London United.—Traffic receipts for week ending April 25, £6,952, increase £1,508; aggregate from January 1, £89,741, decrease £2,472.

Provincial Trams.—Traffic receipts for week ending April 25, £1,972, increase £524; aggregate from Oct. 1, £44,075, increase £656.

Rossendale Valley.—Traffic receipts for week ending April 17, £215, decrease £31.

Sunderland District.—Traffic receipts for week ending April 22, £669, increase £262; aggregate for 25 weeks £11,359, increase £1,220.

Yorkshire (West Riding) Electric.—Traffic receipts for week ending April 26, £1,348, increase £226; aggregate from January 1, £18,530.

FOREIGN.

Anglo-Argentine.—Traffic receipts for 7 days ending April 22, £17,393, decrease £218; aggregate from January 1, £294,844, increase £33,622.

Auckland Electric. —Traffic receipts for 28 days ending March 27, £11,212, increase £1,366; aggregate from January 1, £37,100, increase £4,948.

Brisbane. — Traffic receipts for month of March, £14,490, increase £1,291.

British Columbia Electric.—Nett earnings for March $53,475, increase $9,102. Aggregate nett earnings, including income from investments from July 1 to Mar. 31, $727,130, increase $196,689.

Buenos Ayres Grand National and New Tramways.—Traffic receipts for 7 days ending April 28, £7,351, increase £553

Calcutta. — Traffic receipts for week ending April 25, Rs. 44,464, decrease Rs. 1,286.

Cape Electric.—Traffic revenue for month of March, Cape Town, £10,448; Port Elizabeth, £4,265.

Carthagena and Herreiras.—Traffic receipts for the month of March, £1,849, decrease £4,389; total from January 1, £6,621, decrease £10,508.

Geneva Trams.—Earnings for March, fr. 174,112; decrease fr. 1,660.

Kalgoorlie Electric. — Gross receipts for March, £4,264; aggregate from January 1, £11,319.

Lisbon Electric.—Earnings for March, milreis 120,041.

Madras Electric.—Traffic receipts for fortnight ended April 15, Rs. 18,861, increase Rs. 2,031; aggregate from January 1, Rs. 135,225, increase Rs. 14,650.

Melbourne Tramways and Omnibus. — Traffic receipts for March, £49,500.

Mexico.—Nett earnings for month of March, $207,846, increase $34,789; aggregate nett earnings from January 1, $598,469, increase $180,800.

Monte Video United.—Gross receipts for March, £22,513, increase £2,569.

Perth (W.A.) Electric. — Gross receipts for week ended April 17, £1,445, increase £16; aggregate from January 1, £22,615, decrease £1,059.

Rio de Janeiro.—Gross earnings for 15th week 1908, $25,755; increase $1,493.

Sao Paulo.—Traffic returns for March: nett earnings, $131,943, increase $6,809; aggregate from Jan. 1, $381,762, increase $22,791.

Twin City Rapid.—Traffic receipts for the month of January, $469,891, increase $13,054; aggregate from January 1, $469,891; fncrease $13,054. Nett traffic receipts, $211,690, decrease $2,049; aggregate from January 1, $211,690, decrease $2,049.

The Investors' Review.

The Week's Money Market.

Bank Rate 3 per cent. (Reduced from 3½ per cent. on Thursday, March 19.)

Norfolk House, Friday Evening.

Cheap money without comfort is still the description of our market. Discount business is narrower and the three months' bank bill is sometimes weak at 2¾ per cent. and sometimes firm. Yesterday the tendency was towards 2 11/16 per cent. Loans, however, have never been cheap, although seven-day money has usually been procurable at 2½ per cent., but the market has frequently been hard up, and the Bank has sometimes been applied to for assistance. On the week, as the Bank return shows, the debt of the market to the Bank has been reduced by £732,000, but the calls on new issues, which were very heavy on Wednesday, and which are multiplying as time goes on, help to keep the market in an impecunious condition, and we really do not see how it is to improve until a check is given to the borrowing and capital multiplying zeal or until the false credit or counterfeit bankers' money with which all markets are now surcharged has been swept out of existence. Generally speaking the Bank of England return may be considered favourable, although all the movements in it are really insignificant. The reserve, however, has gained only £276,000 on the week, and the improvement in the stock of coin and bullion has been little more than £379,000. Coin, in other words, has come back from the circulation to the amount of £335,000, and in spite of the foreign demand for gold the Bank has secured £44,000 of the imported metal during the week, but notes have gone out. Treasury balances have slipped back by £374,000 within the week, but are still £665,000 higher than they were a year ago, and the market is not rich, for although other deposits are £370,000 better, notwithstanding the above-mentioned repayment on other securities, their total is still £2,873,000 below the figure of a year ago. The Bank, however, is adding to its Government securities, which show an increase of £454,000 on the week, and that should help to release money.

Little went on to-day either in loans or discounts. The market paid off a fair amount due at the Bank—yesterday it had to add to its debt—and call loans outside touched 2¾ per cent. Generally speaking 24 hour loans were quoted at 2¼ to 2½ per cent., and seven-day loans at 2½ per cent. as before. The discount rate, however, eased to 2⅝ per cent. as a fine "working" rate for three months' bank paper, and long bills were melted—fours at 2⅝ and sixes at 2¾-2⅞ per cent. Inland rates were likewise easier.

One has only to look at the weakness of the Paris cheque to see that our market in spite of its low rates and apparent abundance of means, remains liable to be pounced upon for gold at any moment. Why the Paris cheque should be so depressed nobody seems able to explain, but, for one thing, we have not yet paid back all the gold we owe to the Bank of France, and for another the astute Paris financiers are diligent in strengthening their position lest the credit storm should some fine morning break out in a fresh place with greater virulence than ever. There seems also to be a dispute raging between the banks and the *Agents de Change* which tightens money up. That is to say, the banks, in resentment at what they regard as attempts on the part of the *Agents de Change* to cut their throats with their own knife, so to say—sharing rates in the market, and then trying to beat the banks down so as to re-borrow at a profit—are holding their money up. Paris is, none the less, drawing in gold from London and from the United States, and has been forwarding part of its supplies to Barcelona to prop the tottering fabric there. Germany also wants gold, and would take a great deal more than its capacities to buy at present permit. It follows that we cannot look for anything like unruffled ease in our market. It is oppressed by many troubles, and as the trade reaction progresses may have to cope with some exceedingly awkward liquidations.

Although the Imperial Bank of Germany has materially improved its position recently, so much so as to be able to reduce its discount rate to 5 per cent., financial affairs in Germany appear to be steadily going from bad to worse, and the Reichsbank is not yet strong in cash, notwithstanding the fact that its note circulation was shown in the return of April 23 to be £4,902,000 below the tax-exempt legal maximum. Cash had come back to the amount of £2,603,000 and the note circulation fell off by £3,356,000, bringing about this result; but the president of the Bank has been warning the market not to look for steady ease in money, and he was prudent in so doing. And although the Bank of France has also been strengthening its position by pulling in gold, its note circulation jumped by nearly £8,000,000 last week to a total of £199,674,000, against which it held only £113,886,000 in gold, a total which represented an increase of £1,061,000 on the week. The proportion of gold to the note circulation is therefore considerably lower than it was, and that likewise helps to explain why the Bank is pulling in the metal from whatever quarter it can be found.

Calls due next week amount to but some £1,516,000 all told, viz.:—Monday, Tientsin-Pekin Railway bonds £485,025 and Nigra Land and Rubber shares £10,000; Thursday, Salvador 6 per cent.

£220,000 and B.A. and Pacific Railway 4 per cent. debenture stock £300,000; and Friday, Grand Trunk Pacific 4 per cent. £500,000.

Silver.

Not only has the amount of silver offered in the London market this week been heavy, but America and the Far East have both sold more freely. At the same time the Indian demand has been moderate, and even with the help of a little bear "covering" was not sufficient to absorb the large supplies available. Prices consequently have fallen sharply, and at 24 7/16d. per oz., the cash quotation is only ½d. above the lowest figure of last year, while the premium on future metal is reduced to 7/16d. at 24⅜d. per oz. The prospects of a recovery seem somewhat remote, as not only is the bazaar demand likely to continue small, but according to information received by Messrs. Samuel Montagu and Co. the United States Treasury has no present intention of resuming its purchases of the metal before July. Tenders for the Rs. 10,00,000 of Council drafts on Wednesday were again small at Rs. 1,95,000 all in bills, and of these only Rs. 45,000 at 1s. 3 29-32d. per rupee were accepted. Next week another Rs. 10,00,000 will be offered. Sales of drafts on London in Calcutta amounted to £205,000, making a total of £1,775,000 to date.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict. cap. 32, for the Week ending on Wednesday, April 29, 1908.

Union of London and Smiths Bank.—Deposit and current accounts on April 22, came to £34,695,824, acceptances and liabilities by endorsement to £3,244,562 and other liabilities to £650,434, while assets consisted of cash in hand and at Bank of England £5,682,405 money at call and short notice £6,294,212, investments including reserve fund £5,952,684, and discounts, loans and other advances £20,604,100.

The Stock Markets.

If one is to believe the investment broker there are really no Stock markets at present, and he is not far from the truth, for business of a solid kind is thinner than at any time since before the Yankee crisis of last October. The market is choked up by new issues and groups of securities are subjected to manipulation by cliques or finance houses, but genuine investment business is meagre in the extreme. People blame the weather, and find all sorts of excuses for the stagnation, but there the fact is, and we still fail to discover symptoms promising a better state of affairs in the near future. The truth is that markets are floating on a credit bubble, and with industries recoiling all over the world, profits diminishing, dividends tending to decrease or disappear, there cannot be any genuine revival of activity. Just look at the news in this morning from Germany. After talking about the establishment of a sinking fund, by which the existing Imperial debt of £200,000,000 would be redeemed within a hundred years, the secretary of the Imperial Treasury announced that within the next five years the Empire must borrow a minimum of £50,000,000. In other words, sinking funds, as usual, give excuse for free borrowing. And in Germany it is not the Empire alone which has an insatiable hunger for loans, but every State within its borders. Many municipalities and industrial undertakings of all descriptions also want money. And meanwhile the trade of Germany is shrinking rapidly, its banks are only beginning to experience the results of their over-eagerness to expand, and yet people talk of business reviving soon. It cannot do so.

"Oh, but look what has happened this week in Wall Street," we are told. "Prices have been flying up there in an unrestrained manner, so that shares like Milwaukee, Illinois Central, Louisville, Union Pacific and Southern Pacific are from $5 to $9 higher than they were in the end of last week." That is so, but why should prices have gone up in this manner? They have been lifted because the Pennsylvania Railroad has made a successful issue of bonds which it sold to the underwriting syndicate at 93, which the public took at 96, and forthwith worked up to 2¾ premium. The price closed last night at about 2¼ premium for the special settlement, and on the strength of this market success there has been a "bear drive" organised, carried out on Wall Street. That kind of success leaves the market weaker than it was before. The more the bear is killed the hollower markets grow, and with industries all over the Republic declining, with railroad earnings diminishing week by week, it is impossible to regard a demonstration of this kind as solidly based. The Yankees continue to act on the assumption that water will run up hill.

At home here the same conditions exist in a modified degree. We have not so many people unemployed as there are in Germany and the United States, but the lowest point of our industrial reaction has not yet been reached or nearly. How, then, is it possible to look for a genuine revival of business on the Stock Exchange? It is not possible, and we know nothing at present more disheartening to those who have money to invest than the existing hollow condition of prices on all Stock Exchanges.

Trustee and Foreign Government Securities.

Consols have receded and pulled other trustee securities down with them, in spite of the low rates for money, the easier contangoes—for they have been about ¼ to ½ per cent. easier all round—and the lightness of the account. That is all we can say about this market. Even Colonial stocks have betrayed a tendency to go down, particularly those of the Cape, Natal, New South Wales, and Queensland, but the market has seldom been tested. Prices, in our opinion, must go lower, would be lower now but for the size of the bear account in the few stocks that can still be speculatively dealt in.

Apart from Japanese and Russian 1906 bonds, business has been well nigh extinct in the foreign market, but Argentine issues have been fairly steady, Japanese have improved, and there has also been some recovery in Portuguese 3 per cent.'s on the news that a London merchant banking house has come to the rescue of Portuguese finance with an advance of £500,000. None the less is the political condition of Portugal explosive, and its financial circumstances ruinous, urgently in need of reorganisation and a new public loan.

Home and Other Railway Stocks.

Our railway market has followed the Consol market and gets no support from people with money to lose. Why should it get any support with traffics shrinking, with labour troubles threatening, not only between the North Eastern Company and its men, but in the shipping trade, and in more than one branch of our great textile trade, and with business contracting. The wonder is that prices keep up as they do; but on the week hardly an ordinary stock in the whole list except Lancashire and Yorkshire and South Western has resisted the downward pressure, and some of them have been lamentably weak. The weakness, moreover, becomes more emphatic in the debenture, guaranteed and preference categories where there is not a single change for the better in any security worth noticing, except North Staffordshire debenture stock. There has been no appreciable selling, but the market is simply dead and shies at the slightest mention of business. Thus a whole army of North British preferences have been put down £1 with rarely a transaction in any one of them. Traffic receipts for the past week were £72,372 down, bringing the total loss for the 17 weeks of the half-year up to nearly £701,000. Are expenses being reduced in proportion? We fear not.

In the Colonial group, however, the example of Yankees, together with the portentous size of the account open for the fall in Canadian Pacific shares, has exercised some influence in keeping the market up, and Canadian Pacific shares have risen to about 160. The market for these is being helped as much as possible by the optimism of Sir Thos. Shaughnessy, who sees nothing but bowers of roses or sheaves of golden grain in the Canadian outlook. Naturally Sir Thomas takes this view, and if Canada can continue to borrow money on any pretext or none, his vaticinations may be justified, otherwise it only needs another middling or poor harvest in the Canadian North-West to bring the dreary imposture of Canadian prosperity to the light of day. Grand Trunk stocks have been depressed, and some of the Grand Trunk Pacific issues have lost £1 or £2, but there has been little or no business anywhere.

It is unnecessary to say anything more about Yankee Railroads, speculative business in which, however, has been most adroitly fomented this week, causing a large flow of gambling orders to be executed in Atchison, Milwaukee, Missouri, Pennsylvania, Reading, Southern Pacific, and above all Union Pacific common stocks. The trading is international or arbitrage and purely a gamble, but there it is. Bonds, too, have naturally been helped by the Pennsylvania success which has been worked to death as a market stimulant, and as the public is paying little or no attention to this gigantic fomentation of unreal market values we need not particularise.

As for the Argentine group of railways, the best we can say is that they have kept tolerably steady; yet declines are noticeable there, although not to a serious extent at any point, and they are offset by a few rallies of an insignificant description. Elsewhere prices continue unsatisfactory, Mexican Railway stocks being heavy through neglect, but Leopoldina stock has been lifted to 76½ on favourable dividend anticipations which should have little foundation. San Paulo stock, on the other hand, has gone back a little, notwithstanding the admirable display of optimism made at the shareholders' meeting. The weakest stocks, however, are still Cuban, and United of the Havana ordinary have dropped back to little more than 57. "Is the turn coming soon here?" people ask us, and we cannot definitely answer. In another month or six weeks it may be possible to speak with some assurance. Meanwhile the board has notified the postponement of the question of a dividend on the ordinary stock until the end of the company's year.

Banks, Breweries and Commercial Securities.

Changes have been fairly numerous in the Bank share group, and more often unfavourable than not, but the only decline of any importance has been 1½ in the new shares of the Chartered Bank of India. This merely brings them into line with the old shares. London and Brazilian Bank shares are also depressed, and the only noticeable firmness has been in Hongkong and Shanghai shares and in the shares of some of our great London banks.

The Brewery market has not rallied, and may be said to continue to sink on its merits in spite of some higher quotations for debenture issues of a minor class. Watney, Combe's preferred stock went out last night at 20-30, and we should not care to buy it at 20. All week the debate on the second reading of the Licensing Bill has dragged along, but has not illuminated us much. We still want to know what the Government will do for revenue if the Bill becomes an Act and promotes temperance, and also what it will have gained at the end of 14 years in power to control licences beyond what it possesses now.

Dock stocks are steady on the whole, with no disposition to play in them. The test of the Port Bill will come when we know what is to be done to cleanse, control, and deepen the river, and to organise the Port services.

There is little movement either amongst Commercial and Industrial securities; at any rate, very few of a description calculated to cheer holders up, but the declines, except for debentures, are usually minute fractions, and it is unnecessary to go over the ground sufficiently indicated in our price movements. Motor company securities are offered, and unpleasant rumours circulated about the Humber Company. Nitrate shares are still out of favour, and incline downward. The securities of the monster hotel companies also incline to dip, and very little strength is shown amongst the shares of drapery and other trading companies, but in the circumstances the show might be very much worse. One drop of 10 has occurred in the debentures of T. Tilling, Limited, which were dealt in yesterday at 65, and no wonder for the report just issued is disastrous.

There is no life at all in the Electric group, and shares mostly stand where they did, but noticeable declines have taken place in Canadian General Electric shares, and in the debentures of Edmundson's Electricity Corporation, as well as in the stock of the Mexican Light and Power Company. The relapses may be in part sentimental, though Edmundson's is in a bad way.

Miscellaneous Securities.

Financial Land and Investment securities have also been heavy, with few exceptions, but the decline in Peruvian Corporation stock has not made further progress, and Hudson's Bay shares have been worked up to 81. Peel River Land shares, on the other hand, have been dealt in as low as 144½. There is nothing to say about Financial Trust issues, which move down when looked at, and in which there is scarcely any business.

Gas Light ordinary stock has been offered, and has dipped as low as 94½. Insurance shares have likewise given way in a few instances, the Indemnity Mutual being down as much as ¾, but North British, Ocean Accident, Sun, and some other shares are higher on the week.

Movements amongst Iron, Coal, and Steel shares and debentures have been the wrong way with very few exceptions, but Carnegie Steel things are higher, with Yankee Railroad shares, and in defiance of the ugly return for the past quarter. Dealing, however,

has been confined to the common shares and to the gambler by profession. Clayton and Shuttleworth's various securities are still flat, and apart from an improvement of ½ in Vickers second debentures, there is nothing comforting to point to.

Shipping shares have also lost ground, where any movement has taken place, and Pacific Steam have gone back to 20½, but Shell Transport shares are rather better.

Prices are fairly good likewise for Eastern Telegraph stock, and the whole Telegraph and Telephone market may be said to keep up, better at any rate than most of the other sections where any life is. Tramway and Omnibus securities offer nothing to comment upon of a cheering description, although there are a few gains to be seen on the week's comparison.

To-day the Stock Exchange is taking its usual May Day recess, and we have, therefore, no Friday news.

THE WEEK'S PRICE MOVEMENTS.

BRITISH FUNDS.—Fall: 2½ Ann. 1905 and Acct. both ½, to 84⅜-5½, Local Lns. Acct. ½, to 98½-¾, Bk. of England 1½, to 266-71, Bk. of Ireland 3, to 309-15, India 1931 Acct. ½, to 99⅞-100¼. do. 1948 Acct. ½, to 91-½, do. 1926 Acct. ½, to 77-8, Indian Rupee Paper 1854-5 ½, to 63-4.

CORPORATION AND COUNTY STOCKS.—Rise: Mersey Docks 1, to 96-8. **Fall:** Metro. Water "B" Acct. 1, to 90-2, Metrop. 3½ p.c. Cons. 1, to 101⅛-2½, do. 3 p.c. ½, to 92½-3½, L.C.C. 3 p.c. Acct. ½, to 91-2, Metro. Water "A" 1, to 89-91, Manchester 4 p.c. 1, to 117-9.

COLONIAL AND PROVINCIAL GOVERNMENT SECURITIES.—Rise: W. Australia 1915-35 ½, to 97½-8½. **Fall:** Cape Dbs. 1917 1, to 99½-100½, Canada (Dom.) 3½ p.c. ½, to 99½-100⅜, Cape 3½ p.c. Ins. ½, to 93¾-4½, do. 3 p.c. Ins. 2, to 80-2, Natal 3½ p.c. ½, to 96½-7½, N.S.W. 4 p.c. Ins. 1, to 108-10, do. 3½ p.c. 1930-50 ½, to 98⅛-9½, Queensland 1924 1, to 105-7.

COLONIAL AND FOREIGN CORPORATION STOCKS.—Rise: Hobart (Tas.) 4 p.c. 1, to 102-4, Rio de Jan. 1, to 86-8, Rosario Series "A," "B," and "C" 1, to 54-6. **Fall:** Johannesburg 1. to 87-9, Rosario Series "D" and "E" 1, to 53-5, Tokyo ½, to 94-6.

FOREIGN STOCKS, BONDS, &c.—Rise: Argentine B.A. Water ½, to 102½-3½, do. 1907 Intern. ½, to 98½-9, Chilian 1887 1, to 87-9, do. 1895 and 1906 Ln. both 1, to 85-7, Japan 4 p.c. Stlg. ½, to 81-½, do. 4½ p.c. Bds. ½, to 88½-9, do. 1907 Stlg. ½, to 97-½, Russian 1906 Ln. ½, to 95-½, Swedish 1880 1, to 97-9, Argentine Cedulas ⅛, to 46-7, Italian Rnts. ½, to 102½-3½. **Fall:** Brazilian 1889 ¼, to 82-½, Brazilian 1907 Ln. ⅜, to 91½-2½, Chinese Silver Ln. 1, to 97½-8½, Colombian Con. ¼, to 42½-3, Greek 1881 ½, to 48-9, do. 1884 ½, to 47½-8½, do. Mon. 1887 ½, to 48½-9½, do. 1889 Rnts. 1, to 36-7, Guatemala 1, to 26-7, Honduras 1867-70 ½, to 7¼-⅜, Russian 1894 Rnts. 1, to 74-8, Siamese 4½ p.c. Stlg. ½, to 94-5, Uruguay 3½ p.c. ½, to 69¾-70¼, Venezuela 1, to 44½-5½, Prussian Ste. Ln. 1, to 79-81.

HOME RAILWAYS.—Rise: Centl. Lon. Pfd. 1, to 84-6. **Fall:** Barry Ord. 1, to 165-70, Caledonian Pfd. 1, to 63-4, do. Dfd. No. 1 ½, to ½-⅜, E. Lon. ½, to 2¼-½, Glas. and S.-W. Pfd. 1, to 58-60, do. Dfd. ½, to 29-30, Gt. Nthrn. "A" 1, to 36½-7½, do. "B" 3, to 138-41, Barnsley ½, to 46-½, N. Lon. 3, to 72-7, N. Staffs. 2, to 88-90, Plymouth, Devon 2, to 66-71, S.-Estrn. Pfd. 1, to 100-2, Taff Vale ½, to 75½-6½.

Debenture.—Rise: N. Staffs ½, to 84-7. **Fall:** Bakerloo 1, to 88-91, Caledonian 1, to 115-8, Cambrian "B" 1, to 87-90, Gt. Centl. 2nd 1, to 92-4, Gt. Nthrn. ½, to 87-90, Gt. Wstrn. 4 p.c. 1, to 116-9, N.-Westrn. 1, to 89-91, Sth.Wstrn. "A" and Cons. both ½, to 88-91, Chatham Arbtn. 1, to 116-9, Midland 1, to 72-4, Neath and Brecon "B" 1, to 75-80, N.-Estrn. 1½, to 88-90.

Guaranteed.—Fall: Furness 2, to 102-5, Gt. Estrn. Irred. 1, to 108-11, Gt. Nthrn. Prp. 1, to 111-4, G. Wstrn. 5 p.c. and Cons. both 1, to 140-3, Lancs. and Yks. Cons. ½, to 111-4, N.-Wstrn. 1, to 113-5, Midland 1, to 69-71, N.-Estrn. 1, to 113-5.

Preference.—Fall: Furness Cons. 1, to 97-100, Gt. Centl. 1872 2, to 120-4, do. 1894 2, to 38-43, Gt. Estrn. 4 p.c. 2, to 104-7, Gt. Nthrn. 4 p.c. 1, to 108-11, do. 1898 and 1899 both 1, to 80-2, Gt. Wstrn. 1, to 138-41, Barnsley 1899 1, to 87-9, N.-Wstrn. 1902 1, to 109-12, S.-Wstrn. 1881 1, to 110-3, Chatham Arbtn. 1, to 72-4, do. 2nd 1, to 37-40, N. British No. 2. 1, to 105-7, do. 4 p.c. 1884-8-90-2-7-1901 and 1904 all 1, to 104-7, N.-Estrn. 1, to 110-3.

INDIAN RAILWAYS.—Rise: Nizam's 4 p.c. Reg. 1, to 98-101. **Fall:** Scinde Punjaub "B" ¼, to 23¾-4¾, Nizam's 3½ p.c. Bds. 1, to 87-90, do. Reg. 1, to 86-9, W. of I. Portuguese Guar. 1, to 91-5.

COLONIAL RAILWAYS.—Rise: Grand Trunk 1st Pf. 1, to 99-100, Klerksdorp ½, to 104½-6½. **Fall:** Can. Nthrn. Quebec 2, to 91-3, Can. Northrn. 4 p.c. Perp. Cons. Deb. 3, to 90-2, Grand Trunk of Can. 4 p.c. Mt. Stg. 2, to 21-3, do. £25 pd. 1, to 21-3, do. Lake Sup. 2, to 91-3, do. £25 pd. 1, to 21-3, do. 1955 1, to 21-3, do. 4 p.c. Deb. 1, to 92-4, Grand Trunk Guar. 4 p.c. 1, to 89-90, do. £50 pd. 1, to 47-9, do. 2nd Pf. ½, to 82½-3½, do. G.W. Bd. 2, to 123-5, Mashonaland 1st Mt. 1, to 65-9, Qu'appelle 1, to 93-5.

AMERICAN RAILROADS.—Rise: Atchison Pfd. 1, to 91-2, Atlantic 1st Leased 3, to 105-6, Chicago G.W. Com. ½, to 5-6, Chicago Mil. Pfd. 5, to 145-55, G.N.R. 5, to 129-32, Northrn. Pac. 7, to 135-8, Rock Island ½, to 15½-6½, Southern Pfd. 1, to 41-2, Wabash Pfd. 2, to 19½-20½. **Fall:** Alabama N.O. "A" ½, to 4½-5, Erie 1st Pfd. ½, to 34-5, Mex. Cent. 1, to 15-6, Nat. of Mex. 2nd Pfd. ½, to 16½-7½, Union Pac. Pfd. ½, to 82-4.

Bonds (Gold).—Rise: Atchison 50 yr. 4 p.c. 1, to 91-3, do. 10 yr. 1, to 102-4, Chesapeake 1935 1½, to 110-5, Colorado and S. 2, to 80-4, Denver 1939 4½, to 85-95, Missouri 1936 3. to 78-80, N.Y. Cent. 3½ p.c. 1, to 79-81, do. Coup. 1, to 80-2, Norfolk and W. 1934 2, to 120-5, do. 1932 1, to 84-6, Pennsylvania 1915 1, to 94-6, Reading 1997 1, to 98-100, St. Louis Bdge. 2, to 123-9, Southern 4½, to 95-100, Terminal of St. L. 1939 3, to 105-9, Union Pac. 1927 1½, to 89½-90½. **Fall:** Baltimore 1923 1, to 99-101, Long Island 1, to 95-7, Mex. Cent. 1911 ½, to 82-3, do. 1939 ½, to 16-7.

Bonds (Sterling).—Fall: Alabama "C" 1, to 89-91.

FOREIGN RAILWAYS.—Rise: Bahia Blanca and N.W. Guar. 1, to 85-7, Bilbao River ½, to 7¼-¾, B.A. and Pacific 4 p.c. Cons. Deb. 1, to 103-5, B.A.G.S. 5 p.c. Pf. 1, to 122-4, do. ½, to 11¾-12, Cent. Uruguay West Ext. 1, to 82-4, Cordova and N.W. 1,

The following circular has been issued by the board of the United Railways of the Havana and Regla Warehouses, Limited:—"In view of the very serious falling off in the receipts from the company's railways, owing to the great shortage in the sugar crop due to the drought in Cuba, which is believed to be unprecedented (especially in the districts served by the company's railways), your directors have considered it advisable to refrain from declaring an interim dividend upon the ordinary stock of the company, which has been usually paid about this time of the year. In addition to the loss of traffic due to the above-mentioned cause, the company's business has been adversely affected by the strike which occurred in September last. This continued until January of the present year, although most of the company's trains were kept running during the whole period. Your directors are glad to be able to state that the strike was eventually terminated on conditions satisfactory to the company, and though the loss in receipts due to this cause was comparatively slight, the necessity of having to employ inexperienced labour in the working of trains and in maintaining as fully as possible the railway service, rendered the expenses of working the traffic greater than under normal conditions. With regard to the future crop the general manager states that new planting has been commenced on a somewhat large scale, but operations have been restricted by the absence of rain. A telegram received on April 29 reports, 'Drought is diminishing, there being rain at intervals throughout our territory.' In these circumstances your directors consider it advisable to leave the question of the dividend on the ordinary capital of the company until the final results of the year's working are ascertained, and the prospects for the future more fully assured."

The directors of the Lunuva (Ceylon) Tea and Rubber Estates, Limited, have entered into a provisional contract for the purchase of the Unugalla Estate for £7,000 in cash and £9,000 in ordinary shares. In order to provide for this purchase and further developments which they have in view they ask the shareholders to sanction the issue of £30,000 of the reserve capital, of which £21,000 will be offered to existing holders at par in the proportion of one new share for every four held. When making this announcement the directors state that the crop for 1907 was 1,265,398 lbs., or 43,602 lbs. less than the prospectus estimate, the decrease being due to exceptional drought in Uva. Gross profits were £13,238, of which debenture interest and sinking fund took £3,503, and the directors propose to pay dividends aggregating 6 per cent., which will leave £3,995 to provide office and administration expenses, agents' fees, and proportion of preliminary expenses.

Company Reports and Balance Sheets.

**** *The Editors will be much obliged to Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-sheets direct to the Office of the* Investors' Review, *Norfolk House, Norfolk Street, W.C., so as to ensure prompt notice in these columns.*

PUERTO CABELLO AND VALENCIA RAILWAY CO., LIMITED.

A heavy decrease of 38,102 in the number of export cattle carried by this railway during the year ended December 31 was accompanied by a drop of £6,687 in receipts, and there was also a reduction of £1,578 in the down goods traffic, due mainly to the smaller quantity of coffee carried. The decline in the latter item was more than made good by an increase of £2,025 in the up traffic, chiefly in coal, and passengers produced £361 more, but these were the only gains worth mentioning, and the revenue from all sources was consequently £5,362 lower at £30,033. Savings were effected of £1,040 in locomotive expenses, £370 in traffic expenses, and £959 in general charges, while maintenance of way cost £836 more and the total outgoings were only £1,547 at £30,777. The nett result was a loss of £745 compared with a credit of £3,072 a year ago, while £8,500 was required for the service of the 5 per cent. first charge coupon bonds, and after deducting £2,224 or £1,181 more received from interest and transfer fees there was a debit balance of £7,021 to be carried forward. Last year the directors took £4,385 from renewal account to meet the deficiency on the coupon bonds, but there is now only £2,615 to the credit of that fund, and help of the kind is not available on this occasion. The balance of the award was received during the year, and after deducting expenses and providing for income-tax amounted to £17,799, of which £1,596 was charged to capital expenditure and £9 to rearrangement of debenture capital expenses, leaving the total credit balance on the appropriation of award account at £66,949. The total amount received in London on account of the award is £229,285, to which is added £2,509 for loss on exchange and agency expenses in Venezuela, making a total of £231,794. Nothing has been paid by the Government for guarantee, and its indebtedness under this head has risen by £36,744 to £144,959.

LA GUAIRA AND CARACAS RAILWAY CO., LIMITED.

A very different story is told by this undertaking, partly no doubt because it has little or no live stock traffic. All branches of revenue showed improvements in 1907, the most important being £1,309 in goods, £469 in passengers, and £559 in special trains, and the total income was £2,329 higher at £80,006. At the same time, while locomotive expenses were £735 heavier, maintenance of way cost £1,396 less, and with small reductions in other items, working expenses showed a decrease of £925 at £43,505, the proportion to receipts being 54.38 per cent. against 57.20 per cent. a year ago. Nett revenue therefore was £3,254 up at £36,501, to which were added £642 for balance of interest on award by the Anglo-Venezuelan Mixed Commission and £1,692 or £275 more for other interest transfer fees, but a smaller balance of £862 was brought forward, making a total of £39,696 against £36,422. Debenture interest, loss on exchange and other charges absorbed an extra £161 at £21,721, leaving the surplus revenue £3,113 better at £17,975, out of which the directors pay an extra ½ per cent. at 4½ and raise the sum carried forward by £1,363 to £2,225. The reserve and improvement and renewal funds are unaltered at £53,408, and are represented by £10,000 of £10,000 and loans of £38,500, while cash and

districts being tested encouraging results have been obtained which point to the probability of a considerable tract of valuable oil-bearing land being added to the company's holdings, and in the meantime developments in the older territories have continued satisfactory. Tankers and tank installations show a decrease on balance of £26,591, additions being £29,028 against £55,618 written off. Investments were increased by £38,561, mainly as the result of operations in Persia, which have so far been without success, and the directors say that unless satisfactory results are shortly obtained this enterprise will be abandoned. A substantial profit, however, was made on securities realised, and £42,839 derived from this source has been applied to reduce the total cost, leaving it after deducting depreciation at £76,018 or £14,277 less. Pipe lines cost £347,181 during the year, making a total of £393,500 spent to date for which 122 miles out of the total of 275 miles had been laid, and in the first three months of the current year a further 114 miles have been added. New work of this kind cannof have suffered material depreciation as yet, but the directors prefer to be on the safe side, and have written off £7,360, making the total provision to date £17,819. Stocks of products are £11,131 lower at £327,958, but stocks of stores have been increased by £36,403 to £264,454, sundry debtors have risen by £72,625 to £241,674 against an increase of no more than £4,560 to £142,194 in sundry creditors, and cash is £95,652 up at £887,489. A wonderful exhibit in every respect. Against all these items are accumulations of various kinds, amounting in the aggregate to the handsome figure of £975,201, this figure including the £200,000 now transferred from revenue.

JAMES NELSON AND SONS, LIMITED.

Another drop has taken place in the trading profit of this company for its year ended December 28 last, but the decrease is only £3,890 this time, whereas a year ago the decline was £42,345. The total, including £151 from transfer fees, was £61,551, and as the various charges against this revenue increased by £1,558, it follows that the nett revenue balance of £39,634 was £5,532 down. With prudent forethought, however, the directors have for some time past kept a large profit balance in hand, so that £42,624 representing that balance was added to the nett profit, giving £82,257 in all for distribution, and out of this the directors meet the preference dividend, and give the ordinary shares 7½ per cent. for the year against 10 per cent. twelve months back. By so doing they increase the balance carried forward by £2,633 to £45,757, and in view of the fluctuating nature of the meat business no one will question their prudence. The report states that usual provision for depreciation has been made in the profit and loss account, but the amount is not separately stated. The entire cost, however, of maintaining in an efficient condition all the properties of the company has been paid out of revenue. Keen competition is blamed for the unfavourable outcome of the past year, which was also adversely affected by the United States crisis and by the high prices ruling for both cattle and sheep in the River Plate throughout the year. The board, however, has every confidence that the results of the year's operations "cannot be regarded by the shareholders as otherwise than satisfactory," and perhaps they are right. In the balance-sheet the nett value of the property, including goodwill, has risen by £13,135 to £548,429, no less than £19,921 having been spent on capital account during the year against which £6,786 was written off shop fittings or credited as unspecified receipts. If that is supposed to represent depreciation it is not enough. Assets of the Las Palmas Produce Company, however, have been written down by £20,955 to £383,900, that amount including the entire capital of the company, together with stocks and other assets less current liabilities. Thus the nett reduction in the entire property owned is £7,820 at a total of £932,330. Reserve for depreciation, however, on plant, machinery, &c., has been increased by £5,000, and now amounts to £105,348. Investments stand as before at £25,000. Cash is £21,493 up at £115,239, and stocks are £19,981 down at £245,643. Debtors, bills receivable, and charges paid in advance aggregate about £39,221, and show an increase of £7,611. Among the liabilities the most prominent, apart from the share capital and debenture debt, is creditors on open account and bills drawn in South America against shipments, the aggregate of which is about £249,000, showing an increase of £6,776. The reserve account of £300,000 remains as before, as well as the special reserve invested in Mersey Dock and Harbour Board 3½ per cent. debenture stock, its amount being £25,000.

CALIFORNIA OILFIELDS, LIMITED.

This company bounds onwards from one stage of prosperity to another, and in 1907 earned a profit of £171,553, making with the £716 brought forward £172,269 available for distribution, out of which the dividend upon the company's share capital is made up to 40 per cent. for the year by a final payment of 25 per cent., all tax free. Then £10,000, or the same as a year ago, is added to the reserve fund, and the carry forward is increased by £7,553 to £8,269. This is a remarkable feat when the increase in capital is taken into account and when amongst the expenses we find £6,785 representing forfeited option money written off current revenue because a proposed purchase was not completed. The production of petroleum in California continues large and the company last year turned out 830,708 barrels more than in 1906, the total being 3,242,942 barrels. It has now 59 producing wells and a number of new wells are being drilled. A large amount of work has been and is being done in reconstructing wells controlled by private owners, bringing them into efficient condition. Other reorganisations are also in course

of execution which will concentrate management and result in savings and economy. These developments and readjustments have implied large capital expenditure and increased the amount carried as assets in the equipment and development account and in the operating stores account. All this expenditure, however, seems to have been amply justified, for the profits on working, after providing for depreciation and administration and management charges in California, show an increase of £108,177 at £206,757. Interest and transfer fees also yield £3,652 more, or over £5,700 in all, so that altogether the revenue was up £111,829, against which expenses, including the forfeit already mentioned, rose by £14,688, leaving £97,140 more as distributable revenue. In the balance-sheet there is a credit of £437,500 against share premiums, which is more than the total paid-up capital of £385,000. Sundry creditors are owed £38,047, and sundry debtors owe the company £37,166. Investments are entered at cost £30,456 and were worth £28,415 on December 31, but there is still £30,447 representing discount and expenses on the new issues of shares and debentures carried in the balance-sheet as an asset. It is, however, being rapidly reduced, and £15,224 was written off it out of the year's profits. Bills receivable and cash amount to £81,587, and the position looks wonderfully strong.

THE INDUSTRIAL AND GENERAL TRUST.

When we examine the list of this company's multitudinous investments faithfully arranged at the end of the report it is impossible to avoid thankfulness that the trust is under no necessity to realise a good many of its possessions. Not that they are bad, but many of them must be quite unmarketable in present circumstances, and on some there must be severe depreciation. For all that the list embraces such a multitude of different securities that we can believe the directors when they assure their shareholders that the market values at the date of the balance-sheet of such of the investments as are quoted in the official list of the London Stock Exchange (more than two-thirds of the whole), and the estimated values of the securities not there quoted show the aggregate amount at which they stand in the balance-sheet to be fully represented. There is no trust known to us more catholic in its affections than the Industrial and general, and a certain proportion of its holdings of shares probably represent comparatively little cash disbursed. At any rate in the year 1907 the income earned was £11,574 up at £141,167, but the increase comes from the increased investments, product of the additional £250,000 in 4½ per cent. cumulative preference shares issued in July last at 5s. per share premium and now converted into stock. The balance of profit on realisations was, on the other hand, £30,948 down at £10,328, but, as the directors say, this is necessarily a most fluctuating source of gain, and the second half of last year at least was certainly no time in which to realise. A year ago the revenue was swollen by £3,851, representing special disbursements recovered, but there is no item of that kind in the accounts for 1907. It follows that the total revenue of £151,620 is £23,268 lower than that of the previous year, and the nett balance of £105,609 left after paying the debenture interest and all working expenses shows a decrease of £24,774. The directors, however, are able to make up the dividend on the ordinary stock to 7 per cent. for the year, including a bonus of 1 per cent., which is the same as the payment for 1906, but they only carry £25,000 to the reserve fund against £50,000 a year ago, so that the balance carried forward is £2,828 up at £38,168, but the preference dividend took £6,531 more. With the addition now made the total of the reserve fund is £275,000, and £150,000 of that is invested in trustee securities, a total always kept up to the book valuation by fresh purchases. In the balance-sheet the general investment list foots up to £2,488,870 and the trust has £66,332 entered as loans, advances, and sundry assets. Cash stood at £41,726, and there is a cross entry representing liability in respect of instalments payable and calls made but not yet due to the amount of £39,015. Premiums received on the issues of conversion and preference shares amount to £17,715, and purchases for future settlement are entered at £10,200, while sales for future settlement figure for only £1,998. It is added in a note that in addition to the amount of £21,317 not yet payable in respect of debentures and debenture stocks subscribed for, the trust is contingently liable for £31,359 in respect of shares held not fully paid up, and for a sum estimated not to exceed £20,000 in respect of business in course of completion.

UNITED STATES AND SOUTH AMERICAN INVESTMENT TRUST CO., LIMITED.

The full effect of the addition to this company's resources through the issue of £100,000 4¼ per cent. debenture stock was not felt during the year ended April 4 when the total income from all sources increased by £2,625 to £58,846. On the other hand £1,809 had to be found for interest on the new stock and after providing for administration charges the improvement in nett profits was only £703 at £39,547. The dividend on the preferred stock having been paid the deferred stock again receives 4½ per cent. and another £5,000 is transferred to capital reserve, leaving the larger balance of £1,442 to be carried forward. In addition to the £5,000 from revenue the capital reserve was increased by £5,116 from profits on change of investments after deducting discount and expenses of issue of the second debenture stock, but £9,533 was written off for depreciation of securities, so that on balance the fund is only £583 up at £29,249. The total investments stand in the balance-sheet at £1,263,800, but the trustees state that owing to the universal fall in the market price of securities there was a depreciation on April 4 of 5½ per cent. This is considerably in excess of the amount of the reserve fund, but the position on the whole is better than might have been expected.

ALLIANCE TRUST CO., LIMITED.

Nett revenue from investments for the year ended January 31 amounted to £126,440 or an increase of £3,922 and miscellaneous receipts gave £71 more at £197, but as the sum brought forward was slightly smaller the total income was £3,885 up at £128,490. After providing for management and foreign charges and taxes and writing off £1,035 for expenses of debentures the amount available was £115,801 out of which interest on borrowed money took £22,876 compared with £23,131 in the previous year. The directors now propose to increase the dividends on the ordinary shares and "A" stock by 1¼ per cent. to 12, and in order to do so they reduce the appropriation to reserve by £2,500 to £25,000 leaving £1,956 to be carried forward. No list of securities is given, but the total after deducting the contingent fund is £2,211,686 and the position seems eminently satisfactory as the auditors certify that the present valuation shows an excess over the aggregate amount in the balance-sheet. The extinction of the uncalled liability upon 25,000 ordinary shares continues to make satisfactory progress, and at the close of the year 14,814 shares had been paid up and converted into £29,628 "A" stock and £118,512 4 per cent. preference stock. Since then another 1,950 shares have been paid up or arranged to be paid up.

MELBOURNE TRUST, LIMITED.

A very large decrease is exhibited in the realisation of properties during the past year, the amount of £54,880 comparing with £117,600 in the previous year. Actual receipts in respect of these and previous sales, however, are only £4,000 lower at £57,000. The result of the year's operations has been an increase of £15,757 as compared with £31,923 in realisation reserve account. Adverse weather has affected both sheep stations and sugar estates. None the less nett profits for the year show an increase of £6,040 at £15,965 with £1,429 brought forward and £1,000 transferred from dividend equalisation reserve the available sum of £18,394 is produced. Out of this a dividend of 3d. per share, slightly over 6 per cent., is paid as against 2d. for 1906 and £1,311, subject to income-tax, is carried forward. Gross receipts amounted to £34,602 including £3,103 from sheep and sugar properties and expenses including debenture interest £6,413 to £18,637. Property is taken at £364,362, but as explained in the 1906 report more nearly approximates £532,000. Purchasers' balances outstanding are £108,349, money on loan amounts to £37,820, London investments to £8,656 and cash £22,696. The debenture debt has been reduced during the year by £38,886, making a total of £241,792 so redeemed and leaving £150,693 outstanding at December 31 last, while £56,700 has since been extinguished. Realisation reserve account now stands at £89,637, including £15,757 added during the year and dividend equalisation fund at £2,500 after transferring £1,000 to profit and loss account.

ANGLO-AMERICAN DEBENTURE CORPORATION.

Last year ended March 31 was a bad one for this company, whose gross earnings were £15,480 down at £81,962. Expenses went up in various directions, with the result that the nett profit balance of £44,797 was £20,994 less than that of the previous year. There were, however, amongst the outgoings £1,851 representing expenses in connection with the issue of debenture stock and £3,000 was written off as loss sustained by securities which were written down in 1894. Interest on debenture stock and loans took £20,941. The company, however, paid a dividend of 7 per cent. upon the ordinary stock as compared with 10½ per cent. in the previous year, but £9,021 less at £6,988 was written off as depreciation on investments and nothing at all was carried to reserve against £2,000 a year ago. The balance to be carried forward was, therefore, only a few pounds less than the balance brought in at £3,337. The balance-sheet indicates that the amount of money sunk in investments, taken at cost or under, has increased during the year by £95,163 to £1,367,017, and it is noted that there is a depreciation on these investments, for which apparently no provision has been made for last year beyond the small amount just mentioned, which brings the depreciation provision up to £26,000, and the reserve of £124,000. Altogether £150,000 is thus accumulated, and we should very much doubt whether this amount covers the shrinkage in price. No full list of the investments is given, but 59 per cent. of the total is in United States securities, an increase of 1 per cent. on the previous year, 28 per cent. in Mexican, South American, and other Foreign securities, or 2 per cent. more, while the decrease in British and Colonial securities has been 3 per cent. on the year. It is noted in the balance-sheet that there is a contingent liability in respect of shares not fully paid up and on transactions not completed, but the amount of this liability is not mentioned.

CAR TRUST REALISATION CO., LIMITED.

The revenue from interest received and accrued during the year ended December 31 amounted to £27,726, and showed an apparent decrease of £690, which is no doubt due to the fact that the previous report covered a period of just over 14 months. Expenses were reduced by £2,551 to £4,799, but debenture interest took £394 more at £10,000, and the nett profits were £1,476 better at £12,927. Adding £3,026 brought forward, the disposable surplus was £15,953, out of which two instalments of interest, aggregating 3os. 6d. per cent., have been paid on the income bonds, and £2,653, representing interest accrued but not received, is carried to the new account. Further realisations of investments and loans taken over from the Car Trust Investment Company, amounting to £34,710, have been made, reducing this item to £920,575, and in their place new investments and loans have been increased by £40,264 to £88,082,

while cash balances are £4,355 down at £15,619. The share capital is £329 larger at £22,777 and income bonds have been issued to the extent of £9,060, bringing the total up to £714,120, but these operations merely represent the liquidation of an equal amount of the purchase consideration for the assets acquired. The balance outstanding on this account is now £25,603, which is to be satisfied in a similar manner by the allotment of fully paid income bonds and ordinary shares.

THOMAS TILLING, LIMITED.

This company's accounts are made up to December 31, and might surely have appeared earlier in the year, but it is quite easy to understand why the directors should be in no particular hurry, for the exhibition made is a lamentable one. The profit for the year was only £3,221, which is just £24,809 less than that of the previous year, so that the directors are not only quite unable to pay any dividend on the ordinary shares, but have only £11,185 left after paying the dividend on the preference shares, and even this could not have been done had not £27,464 been brought forward from the previous year. Gross earnings, however, were only £12,559 down at £434,304. This is exclusive of various minor items from advertising, discounts, interest on investments and transfer fees, which brought the entire revenue of the year up to £439,392. Working expenses, however, were considerably higher at £436,171, and the directors say that the principal causes of this were the abnormally high price of corn, especially during the second half of the year, and very unseasonable weather. The omnibus section was also unprofitable, and had it not been for the jobbing business the exhibit would have been much worse. There is, unhappily, nothing in the report to excite hope that the display for the current year will show improvement, although the directors state that the motor omnibuses owned by the company have been brought to a high state of efficiency. Are they yielding a profit? Nothing beyond the heavy special outlays has been written off for depreciation either on the motor or horse-drawn vehicles for the past year, and the diminution in the book value of the stock of horses hardly seems commensurate with the statement that the amount of the horse stock has been reduced in proportion to the substitution of motor vehicles for horse-drawn. Thus, at the directors' valuation, horses are at £217,425, only £6,903 less than a year ago, and there is an increase of £16,701 in the valuation of horse-drawn and motor vehicles at cost, less depreciation, the total being now £65,558. Moreover, goodwill and omnibus "times" still figure in the balance-sheet at £117,001, in spite of the fact that £35,000 in shares was transferred by the directors to trustees for the company in order to wipe out the "times" item. Cash is moderate at £12,457, but debtors owe the company £52,262 nett, which seems rather a large sum against the £38,584 due by the company to trade creditors. It also owes £14,146 on loans and interest, and the debenture debt, including interest, is £76,500. The business is thus clogged more or less, but we should not say that it is in a hopeless position, only its capital account will have to be severely pruned and much revenue devoted to writing down before it can be brought into a really strong position. What is the use of transferring £1,500 to reserve on a capitalisation of £475,000 exclusive of debenture and other debts? Had adequate provision for depreciation been made, would there have been any money for the preference dividend?

DUDLEY, STOURBRIDGE AND DISTRICT ELECTRIC TRACTION CO., LIMITED.

Gross receipts for the year ended December 31 amounted to £46,254 of which power and running expenses took £15,132, repairs and maintenance, including £2,000 put to renewals account, £9,756, and administration charges £4,937. Deducting debenture and other interest and preference dividend and adding £1,050 brought forward the available surplus was £7,949, out of which the sinking fund and depreciation reserve get £1,000 each and a dividend of 5 per cent. is paid on the ordinary shares leaving £949 to be carried forward. Purchase of the old line stands at its original figure of £58,132 and £317,120 has been spent on electrical construction, making a total of £375,252, and against this the reserves of various kinds amount to £36,050 or about 9½ per cent. Of this, however, only £9,612 is represented by investments. In addition to a paid-up capital of £200,000 and a debenture debt of £85,200 the company owes £59,000 to the Birmingham and Midland Tramways for balance of purchase price of the Kinver Light Railway. Creditors come to £11,901 against £1,091 due by sundry debtors, £2,929 in stores and £5,634 in cash, so that the position is hardly a comfortable one and the balance-sheet is not improved by the appearance as an asset of £3,853, cost of Dudley arbitration proceedings. The appeal of the Dudley Corporation to the House of Lords on the special case as to the basis of the purchase of Light Railway No. 5 was decided in its favour, with the result that the company will receive £16,028 less than if the line had been purchased under the Light Railways Act, but the rent to be paid under the lease will be correspondingly reduced.

WOLVERHAMPTON DISTRICT ELECTRIC TRAMWAYS, LIMITED.

The revenue from all sources for the year ended December 31 amounted to £25,125 and after providing for debenture interest and all charges, including £3,714 for repairs and maintenance and £1,000 put to renewals fund, the nett profits were £2,622. Adding £547 brought in the total available was £3,166, out of which £500 is transferred to depreciation and reserve and the ordinary shares receive a dividend of 1¾ per cent. leaving £269 to be carried forward. In view of the fact that £9,086 will be received from the Dudley Corporation as the purchase price of the company's lines in Dudley the directors have not thought it necessary to set aside anything for sinking fund. That fund stands at £2,673 and other reserves come to £3,767 or £6,440 in all against a capital outlay of £264,954, or about 2½ per cent., which does not seem over liberal. Liabilities to creditors amount to £6,604, but the company is not so badly off as it has £6,472 in cash and £458 due to it, while its investments are valued at £3,121.

SHAW, SAVILL, AND ALBION COMPANY.

The accounts of this shipping company do not tell us much, but in this respect they are not worse than most shows of the kind. Still, we should like to see an exhibit of the fleet and tonnage, so as to have some means of judging whether the valuation is a prudent one. This is the more necessary because every year the total mounts. In 1907, for instance, £38,562 was added to the fleet valuation after deducting depreciation and vessels sold during the year. This brings the total up to £724,843. The directors, however, are able to pay 5 per cent. dividends upon both the preferred and deferred shares with £3,255 left to carry forward. Profits came to £22,793, and of this £10,000 was carried to the renewal, repair, and boiler fund, and £2,500 to the insurance fund, in addition to depreciation, whose amount is not mentioned. In the balance-sheet bills payable amount to £36,449 and debts due to the company to £51,915. Cash, bills, and debts due to the company together foot up to £68,720, which is about £15,800 less than the same items amounted to a year ago. In addition to the above-mentioned bills payable, moreover, the company owes £93,860, and its total reserve funds, including £20,000 of a dividend equalising fund, and the above-mentioned renewal, &c., fund, stand at only £110,000. The business is none the less a good one, carefully worked, as the absence of any mishap of consequence proves, and the fleet is being strengthened by new vessels, of which one has been delivered and made her first voyage.

WILLIAM GRIFFITHS AND CO., LIMITED.

The hopes raised a year ago that this company had seen the worst have been rudely dispelled, and it is once more faced with a serious loss as the result of the trading for the 12 months ended October 31. For this outcome the directors blame the depression in trade, which they say was the worst ever experienced, owing to municipal authorities continuing rigid economy and to both public and private work being curtailed through the state of the money market. Very little constructional work was done, and gross profits fell off by £5,836 to £17,152, against which trade expenses, salaries, maintenance of plant, and other charges were reduced by £2,247 to £17,501, leaving a loss of £349 compared with a profit of £3,240. Interests and transfer fees produced £315, but directors' fees and managing director's salary took £1,500, insurance on managing director's life cost £131, and with £28 for income-tax the deficit for the year was increased to £1,693, of which, it is explained, £1,000 is due to debts brought forward which have since been found to be irrecoverable. This loss is added to the debit balance brought forward, making a total of £15,860 without taking into account the three years' arrears of preference dividend, and the position of the company appears to be well-nigh hopeless. Sundry creditors, it is true, are £31,258 smaller at £20,654, and nothing is now due in bills payable compared with £6,431 a year ago, but these reductions have only been made possible by decreases of £26,126 to £4,638 in cash and investments and £7,138 to £77,618 in sundry debtors. The settlement of questions on amounts in suspense or subject to dispute has brought this item down by £10,270 to £18,578, but other debtors are higher with the result just stated. Works in progress are valued at £8,452 or £20,848 less, but another £866 has been spent on an uncompleted tramway scheme, making a total under this head of £4,771, and stocks have risen by £3,673 to £49,087. Goodwill stands at the old figure of £49,733, the Guernsey and Griff quarries show a decrease on balance of £910 at £71,390, and plant, machinery, &c., is only £196 down at £14,201, against which the reserve remains at £11,840, but it is some satisfaction to note that the amount is separately invested in Consols even although these are taken at about 92. The directors are hopeful that the current year will bring about a change in the company's fortunes, as negotiations are in progress for a considerable quantity of construction work, and it is also expected that the improved state of the money market will enable municipal authorities to take in hand some of the much-needed repairs of the public roads and highways.

BRITISH SOUTH AFRICAN EXPLOSIVES CO., LIMITED.

Up to the end of October 31 last, when this company's year ends, no trace of anything like a crisis was visible in its accounts. On the contrary, the trading profit, interest receipts and other income was £11,124 up at £159,147, and including other items of income the gain on the entire revenue of £160,612 was £11,289. Of this increase an additional £2,336 at £30,020 was written off for depreciation, and £2,852 more went to the workmen's insurance and compensation fund, while other items of outgoing increased slowly, so that the free balance of £94,335 was only £5,561 higher. The balance brought in, however, amounted to £57,252 or £17,275 more, so that the directors can comfortably pay the 5 per cent. dividend upon the share capital of £1,100,000 now made into stock and have £96,586 left to carry forward or £39,334 more than was brought in, and £56,609 more than the undistributed balance of two years ago. Such prudent management is much to be commended, in view of the approaching end of the company's monopoly. Extremely severe competition is looked for this year when the contracts of the company with the mines expire, and the directors are busy endeavouring to get railway rates on raw materials substantially reduced, as well as in effecting other changes calculated to put

them at least on an equality with their competitors. This is the only explosives manufacturing company in the Transvaal, but when the new order of things is established competition from other quarters will become keen. The Transvaal Government, however, appears to be alive to the danger affecting their local manufactory, and will doubtless do everything possible short of coddling a monopoly, which cannot be regarded as wholesome, in order to enable the company to hold its ground. Urgent representations have been made to the Government, the directors say, on behalf of this company that "the very grave injury done to our interests may become quite irreparable" if the present railway tariff be not quickly revised. That indeed is the company's only hope, because in its origin it was an unwholesome De Beers monopoly.

NORTHERN ASSURANCE COMPANY.

Very steady progress continues to be made by this fine old Scotch company. Its fire premium last year amounted to £1,268,468, being £40,510 more than that gathered in 1906. Losses took £622,876 or 49.1 per cent. of this, and expenses of management of every kind absorbed £444,053, or just 35 per cent. of the premium income, being 1.1 per cent. more than in the previous year. The losses, however, were much below the average experience of the company's since it began business, for that was 58.7 per cent., or, including its provision for losses on current risks, 61.1 per cent. After setting aside £634,234, being 50 per cent. of the premiums of the year, which is £30,255 more than the amount brought forward at the end of the previous year, the balance of profit and loss is £181,284. In the life department the accepted new insurances yielded £15,887 of new annual premiums and £8,965 of single premiums, the total premium income of the year being £289,327. Interest, &c., in this department gave £138,148, so that the total income was £427,475, and of this amount claims absorbed £283,807, of which £84,022 was for endowments and endowment assurances payable during life. Expenses of management were, as usual, limited to 10 per cent. in the life department and 5 per cent. in the endowment department. In the annuity branch £76,834 was received for annuities sold, and at the end of the year the funds of the life branch amounted to £4,816,467, an increase of £132,696 on the year. In the employers' liability and general accident section, which is a new branch of business, the results were insignificant. After setting aside 50 per cent. of the premiums of the year to provide current risks the employers' liability section gave a profit of £8 and the general section a loss of £66, but this is only the beginning, and in order to strengthen these departments £10,000 has been set aside, half to each of the two accident accounts to form a nucleus of a fund. Profit, including interest on investments not belonging to any of the departments, amounted to £309,495, and the balance brought forward was £95,523. Out of this £22,536 has been disbursed to purchase of compensation and guarantee fund business and sundry other charges and losses have been writen off, making about £8,014 in all, while £100,000 has been added to the fire fund, raising it to £900,000, and from a balance a final dividend of £2 per share has been declared, making £3 for the year, while a third instalment of 5s. per share is distributed from the life bonus together with a bonus of 10s. per share, making in all £3 15s. for the year or 97½ per cent. on the paid-up capital of £300,000. The aggregate funds of the company, everything included, now amount to £7,535,623.

SAN JORGE NITRATE CO., LIMITED.

So far from any improvement taking place in this company's position, its affairs have gone from bad to worse, and the report for the year ended December 31 makes melancholy reading. The unfavourable conditions mentioned in the previous report continued throughout the year, the material worked having been of low grade, while stores were dear and labour scarce, with the result that gross profits fell another £7,469 to £8,867, this decline following one of £12,372. Owing to a drop in exchange from 14d. to 10d., the loss under this head amounted to no less than £5,960 compared with about £1,100, and as London office expenses and income-tax required £3,297 notwithstanding that the directors gave up £1,000 of their fees, the nett profits, including £829 or £63 less from interest and transfer fees, were only £430 against £11,574 a year ago. With £2,055 brought forward the available total is only £2,494, and shareholders, who last year saw their dividend cut down from 7½ per cent. to 3¾ per cent., have now for the first time in the company's history to go without a distribution. Nothing has been added to the depreciation fund since 1905, and it may well be questioned whether the £50,000 at which that fund stands adequately represents the wastage of the property valued in the books at £294,265. Liabilities to sundry creditors and on bills payable amount to £11,578 against £8,697 due from sundry debtors, but stocks and stores are valued at £24,950, and as the company has £30,427 in cash its current position is sound enough.

SAN DONATO NITRATE CO., LIMITED.

The past year was not a good one for the nitrate industry, and all things considered this company perhaps did as well as could be expected. Gross profits in 1906 showed a big advance of £22,552 owing to the large quota allotted, and all that happened during the past twelve months was a set-back of £8,224 to £35,223. Interest and transfer fees gave £287 less at £57, but the balance brought forward was £3,371 smaller at £2,073, and the available surplus was only £38,253 compared with £44,135. In order, therefore, to maintain the dividend at 15 per cent. the directors write off £2,000 against £5,538 for depreciation and £7,000 or £624 less off new machinery, and reduce the sum transferred to reserve by £1,000 to £3,000 leaving £2,253 to be carried forward. After making these adjustments the property account will stand at £128,000 and the reserve at £20,000, while there is still £7,000 to be wiped out on new machinery account. Floating liabilities are £13,403 up at £21,103 against which bills receivable and sundry debtors come to £20,113 more at £38,110 and cash has risen by £6,232 to £11,230, but stocks have dropped by £1,027 to £21,412.

KIMBERLEY WATER WORKS CO., LIMITED.

So closely associated with the interests of the diamond mine it was to be expected that the accounts of this company would reflect the vicissitudes of the diamond market, and it is not surprising, therefore, that the sales of water show a decrease. Although the amount sold during the year ended December 31 has declined 14½ million gallons to 215,972,500 they are still over 13 million gallons above the average of the past five years. Gross receipts were £61,981, including £1,438 interest on investments, working expenses absorbed £20,395, the chief items being salaries and wages £9,167, pumping £3,454 and maintenance £4,774. The three directors divide £1,500 and income-tax in this country at £1,782 is nearly £200 more than that paid in South Africa. Debenture interest and the usual depreciation allowances take £2,933 leaving £32,133 available. This sum is applied as to £12,000 in writing off construction account, repeating last year's reduction, in transferring £3,273 to contingency fund and £1,111 to investment fluctuation reserve or practically writing down investments that amount since the fund is left only £4 higher and in paying 5 per cent. on the share capital for the eleventh year in succession. With the year's reduction and the addition of £6,205 works now represent £344,511. Property is valued at £9,704 including furniture in London and Kimberley taken at £1 in each place, so that the allowance for depreciation in these items must be forming a hidden reserve. Stocks of coal, stores, &c., total £12,827, debtor and creditor accounts are £6,200 and £4,038 respectively; investments at present prices stand at £36,938 while reserves total £58,587 and cash amounts to £51,859.

CITY OF SANTOS IMPROVEMENTS CO., LIMITED.

Revenue for the year ending December 31 showed a small increase at £50,264, but although London expenses were £530 higher at £3,559 and income-tax took £567 more at £1,105 there was £1,359 less paid in interest, so that the nett profit comes out £560 better at £45,364. Adding the balance of £2,631 brought in £47,995 is disposable. Debenture interest and preference dividend provided for, £4,000 is placed to reserve, £2,000 to tramways renewal, both similar to the previous allowances, and 7 per cent. is paid on the ordinary shares, leaving £3,125 to go forward. In capital expenditure £10,785 was added, about £8,000 less than a year ago, bringing the total to £603,014. Plant stands at £24,792. Stores £48,257. Bills receivable £4,253. Cash £3,130, and debtors are £21,222 against £19,656 owing to creditors. Various reserves and share premiums totalling £83,219 are employed as capital, while the note as to liability of 600 contos of reis for tramway purchase is repeated. To provide funds for electrification of a section of tramway and for other purposes an issue of £150,000 debentures is being made. Gasworks, waterworks, tramways and electric lighting all show an increase in business.

NUWARA ELIYA TEA ESTATES CO., LIMITED.

Owing partly to favourable weather, but still more to the systematic liberal cultivation of recent years, the crop for the past season rose by 153,735 lbs. to 1,601,626 lbs., or the largest ever gathered by the company. An improvement of 0.22d. to 8.46d. in the price and a reduction of 0.40d. to 4.92d. in the cost resulted in nett profits being £6,118 up at £23,892, but against this must be put the smaller balance of £1,090 brought forward. Debenture interest and other charges having been met the available total was £3,113 larger at £22,203, out of which £2,000 is again written off for depreciation, but only £1,100 or £900 less is transferred to reserve, after which the dividend is increased by 1 per cent. to 8 and £3,103 or £2,013 more is carried forward. Only a trifle was spent on the estates during the twelve months, with the result that the block account is actually £1,947 down at £231,253 against which the reserve now totals £13,600. Sundry creditors have been reduced by £1,787 to £3,465, and on the other hand while stocks are £1,543 lower at £6,002, debtors have risen by £228 to £538, and in addition to an increase of 1,407 to £2,243 in cash balances the company has £6,500 out in loans at short call. A substantial reduction of £1,093 has been made in coast advances, but this item can stand a further considerable decrease, seeing that it still totals £6,573.

PANAWAL TEA CO., LIMITED.

The directors of this company adopted a new plan in dealing with their crop for the past year, and in December, 1906, sold forward the output for the season at an average price of 34 cents per lb. They chose an unfortunate time for inaugurating the change as they admit that but for this contract the price realised would have been about ¼d. better. As it was, a modest increase of 4,200 lbs. to 323,356 lbs. gave a gross revenue of £7,353 or £504 more, and with a biggish saving in freight and warehouse charges, &c., the nett proceeds were £8-4 up at £7,165. In addition £81 was received from the sale of 168 lbs. of rubber at 4s. 4.72d. per lb., making a total of £7,246 against £6,200, but expenditure in Ceylon and London rose by £506, and although nothing had to be written off compared with £55

for loss on sale of investments a year ago, the nett surplus was only £505 better at £1,108. Reserve and depreciation are, as usual, ignored, and after paying the preference dividend the ordinary shares receive 4 per cent., or 2½ per cent. more, leaving £26 or £20 more to be carried forward. Outlay on rubber was £1,491, making the total cost of the estates £24,330 against which the reserve is only £1,800, and is all in the business. Liabilities to creditors, thanks to the issue of the remaining preference shares, have been reduced by £821 to £404, but on the other hand, while stocks are £103 larger at £822, cash has dropped by £293 to £392. Advances to coolies are a trifle higher at £1,509.

SUNNYGAMA (CEYLON) TEA ESTATES CO., LIMITED.

The directors state that owing to the wide planting of the rubber throughout the tea there is no apparent deterioration in the tea bushes so that the gloomy prophecy of the expert made two years ago has not as yet been justified. As a matter of fact, last year's crop was better than ever, the increase amounting to no less than 71,974 lbs. at 1,269,358 lbs., and as the price realised rose by 1.43d. to 7.11d. the nett revenue showed an increase of £2,799 at £8,569. With £589 brought forward and £40 from miscellaneous receipts the disposable surplus was £3,020 up at £9,198, and after putting an extra £1,000 at £2,000 to reserve the dividend is raised from 6 per cent. to 10 with a reduction to £504 in the balance carried out. Expenditure on rubber, apart from the upkeep of the trees amongst the tea, was £1,753 against which £281 came in from sales, making the total outlay to date £9,572, and it is estimated that a further £2,700 will be spent during the current year while a crop of 10,000 lbs. is looked for. Block account remains at £72,490 and the reserve now amounts to £5,000. Creditors and bills payable come to £6,651 or £4,463 more but the overdraft of £2,487 has disappeared, and on the other hand stocks have risen by £896 to £8,098, sundry debtors are £780 up at £1,834 and cash is £616 higher at £1,978. Advance account has been reduced by £209 but is still too large for comfort at £1,733.

CEYLON TEA PLANTATIONS CO., LIMITED.

Although the crop from this company's own estates for 1907 fell off by 18,265 lbs. to 4,038,635 lbs. and 56,751 lbs. less was made from bought leaf, the tea manufactured for others increased by 81,266 lbs., and the total output was therefore 7,060 lbs. larger at 4,678,431 lbs. The average price realised was 0.40d. up at 8.22d. and the revenue rose by £2,751 to £133,087, commissions, &c., brought in £8,150 or £1,964 more, and receipts from coconuts were £499 up at £12,042 as the result of an increase of 158,022 in the crop. The rubber harvested was 13,426 lbs. against 7,132 lbs., but the price realised was 1s. 6¾d. less at 3s. 9¾d., and with £2,406 from this source the total income amounted to £155,685. Adding £8,073 or £1,935 more brought forward and £23 from differences in exchange, the increase in revenue was £9,397 at £163,781, but expenses were £4,235 heavier at £109,547, leaving a gain of £5,162 at £54,234 in nett profits. For the twenty-first consecutive year a dividend of 15 per cent. is paid, and although £2,000 less at £8,500 is set aside for rubber development the directors resume their provision for the future by adding £3,000 to reserve and writing off £5,000 for depreciation, leaving £7,235 or £838 less to be carried forward. Including the present addition the reserve will stand at £109,000 against tea estates valued at £268,032, while against rubber lands costing £21,939 there is now a development account of £19,000. Of the reserve £35,658 is represented by unspecified securities at cost and £73,284 is in the coconut estates. Liabilities on bills payable and sundry creditors have been reduced by £14,870, but are still heavy at £95,950, while on the other hand sundry debtors are £1,589 down at £27,849, and stocks are £8,668 smaller at £30,944, but cash has risen by £569 to £2,448. Advances against produce are £3,252 up at £19,274 and advances to coolies have also been increased to £18,353, but against the latter item there is a reserve of £4,588. Excluding these the free assets do not seem to be adequate for the company's needs, and the directors propose at an early date to make an issue of preference and ordinary shares on favourable terms *pro rata* to the shareholders and the Ceylon staff.

ANGLO-MALAY RUBBER CO., LIMITED.

During the year ended December 31 68,236 trees were tapped for a crop of 224,778 lbs. or about 3.29 lbs. per tree against an estimate of 150,000 lbs. and an actual output for the previous 14 months of 100,019 lbs., but the average price realised dropped from 4s. 11½d. to 3s. 9d. per lb. The coffee crop was 1,084 cwt. smaller at 626 cwt. owing to most of the bushes having been cut out as unprofitable, and the revenue from the sale of seeds and stumps was only £3,508 compared with £6,810. Gross receipts from all sources, including £357 from interest and transfer fees were £47,596, and after paying all charges, writing off £447 for depreciation and £439 for preliminary expenses £27,464 was left. Out of this dividends aggregating 20 per cent. are paid, £500 is reserved for possible commission to the staff in the East, and £3,350 is carried forward. Expenditure on development now amounts to £30,346, and on buildings and machinery to £7,544, making with £97,694 paid for the estates a total capital outlay of £135,584, and the directors are in too great a hurry to pay big dividends to have time to spare for the consideration of such things as reserve funds. Floating liabilities total £23,482, while on the other hand debtors owe £3,126, produce is valued at £17,651, and cash comes to £5,752, but the final 10 per cent. now declared has to be found out of these assets, and the position is therefore not so comfortable as it looks.

MINOR NOTICES OF COMPANY REPORTS.

Alliance Investment Co., Limited.—A good deal of realisation seems to have been carried out by this company during the year ended April 15, and the selling must have been effected with no small judgment seeing that redemptions and sales of securities during the year resulted in a profit balance of £11,333. On the whole of the company's investments, however, there is still depreciation, although they make a good list upon the whole with no excessive commitments in any one class of security, but the better the investments it is often the worse the show. Revenue altogether, including £368 received for arrears of interest, came to £50,928 after deducting income-tax, and with £2,436 brought forward gave £53,371 for distribution. Out of this the interest charges are met as well as the full dividend on the preferred stock, with enough left to give the deferred stock 3 per cent. for the year, after which £2,102 is left to be carried forward. This is an improvement on the preceding year, and the depreciation account shows a considerable increase on the year thanks to the gain on redemptions and the transfer of £5,000 from revenue. At the beginning of the year the balance was £71,524, and at the end it is £78,214.

British Moss Litter Company.—Owing to a slightly reduced tonnage sold and lower prices revenue from sales was reduced to £19,660, and the income from all sources for 1907, including £450 fees received by directors from the Peat Moss Litter Supply Company, came to £20,883. Expenses, fees and debenture interest absorb £4,887, depreciation and wastage of moors, &c., is allowed £3,500 and £1,000 is put to reserve for minimum rents, leaving £11,495, which with £729 brought forward gives £12,224 disposable. Out of this the ordinary shares get 6 per cent. against 7½ per cent., £1,000 or £1,500 less is put to reserve and £424 carried forward, subject to extra remuneration of directors. Property account with £1,125 added for new machinery is taken at £214,184, cut peat and moss litter is valued at £37,784 and cash comes to £10,006. Shares in Peat Moss Litter Supply Company stand at cost £4,000, and Consols at cost £13,289, debtors at £7,642, and minimum rents, rates and insurance paid in advance, less reserve, £2,278. Debentures to the value of £1,200 have been redeemed and cancelled during the year. Creditors want £3,761 and reserves aggregate now £54,450, but it is intimated that two of the moors have been worked out.

British Assam Tea Co., Limited.—The crop for 1907 was practically the same as for the previous year at 646,560 lbs., but the average price improved by 0.21d. to 7.84d. and gross receipts amounted to £21,208. Expenditure increased by £2,387 mainly owing to the addition of 240 coolies to the working force, and after paying manager's commission a surplus of £3,866 was left. With £538 brought forward and £32 from adjustment of the 1906 accounts the disposable total was £4,436, out of which arrears of preference dividend for two years are paid compared with four years in 1906, and as these are now wiped out the ordinary shares get 5 per cent. and £886 is carried forward. Block account stands at the 1904 figure of £50,698, and it is unnecessary to say that the company has no reserves of any kind. Liabilities to sundry creditors and on bills payable amount to £7,379 and £2,305 is due on overdrafts, against which tea on hand is valued at £8,987, cash comes to £548 and there is an investment of £1,000 in the Tezpore Balipara Tramways. The issue of £15,000 5 per cent. debentures becomes payable at the end of this month, but the directors have arranged for a fresh issue of a like amount for 10 years, which, however, will bear interest at 6 per cent.

Burnside Tea Company of Ceylon.—Only a moderate increase of 8,738 lbs. at 424,834 lbs. was obtained in 1907, but prices were higher and nett profits improved from £152 to £1,712. Deducting the debit balance brought forward the disposable total was £1,371, but the shareholders derive no immediate benefit from the change in fortune. No provision for depreciation has been made for eight years, and under the circumstances the directors deem it advisable to write £1,000 off estates leaving £371, which is carried forward. Estates will now stand in the books at £33,065 or about £28 15s. per cultivated acre. Floating liabilities are £2,422 down at £6,344 and on the other hand stocks come to £2,837 or £1,280 more, debtors have risen by £164 to £181 and cash is £293 better at £2,837, while there is a welcome reduction of £498 to £1,004 in coast advances.

Canada Life Assurance Company.—In 1907 this Canadian life company's income from premiums and capital paid in for annuities was £740,349, brought up to £1,049,811 by interest, &c., amounting to £309,462. This is an increase of £51,768 on the previous year. Claims and surrenders absorbed about £385,000 or say 52.40 per cent. of the premium income, and expenses and commission, leaving out of account dividend to shareholders, taxes, and loss on the sale of securities, as well as £82,274 representing the loss on the market value of securities brought out by revaluation, amounted to nearly 24 per cent. of the premium income. A complete list of investments is appended to the report, and that is a valuable help to the understanding of the company's position.

Ceylon (Para) Rubber Company.—During the past year a further 589 acres were planted, bringing the total under cultivation up to 2,008 acres. Outlay on land purchase was less than estimated owing to the reduced area acquired, but the expenditure on cultivation was larger and the total outlay was on balance some £500 under the original estimate at £9,795. The total spent to date is £26,468, of which £19,310 is for cost of planting and upkeep, £5,544 for purchase of 1,678 acres, £1,000 for bonus to Mr. Forsythe and £613 for London charges. During the current year the extensions will be limited to 215 acres,

which will complete the planting programme, and it is estimated that this will cost £7,700 apart from any increase in factory advances, and the directors propose to call up the final 2s. per share on the 35,000 shares issued.

Ghoir Allie Tea Company.—An increase of 19,950 lbs. to 185,639 lbs. in the 1907 crop was unfortunately accompanied by a drop of 0.82d. to 8.75d. in the average price, and gross receipts consequently rose by only £136 to £6,745. Sales of tea seed yielded £457 more at £682, making the total income £593 better at £7,427, but expenses took an extra £720 at £6,219, and with £38 brought in the nett surplus was £109 down at £1,259. Of this £100 is again put to reserve, but the dividend is reduced from 30 per cent. to 27½, leaving £59 to be carried forward. Sundry creditors are £2,625 up at £3,060, but against this produce in hand is valued at £2,851 and debtors have risen by £139 to £1,395.

Civil Service Co-operative Society.—The gross revenue for the twelve months ended February 29 amounted to £71,526, and after providing for all charges and writing £548 off fittings the nett profits were £6,608. Adding £3,595 brought forward the disposable balance was £10,203 out of which a dividend of 5 per cent. and a bonus of 2s. per share are paid and £250 is put to provident fund leaving £2,603 or £992 less to be carried forward. The reserve fund has only been increased by £500 for life tickets lapsed, but amounts to £54,500 against a paid-up capital of £100,000. Freehold premises are valued at £99,941, leaseholds, less a redemption account of £18,561, at £18,398, fittings, &c., at £6,518 and additions, &c., at £2,973. Creditors including deposit accounts and a loan of £24,000 come to £111,897, against which stocks are valued at £128,549, debtors owe £9,922 and cash is £10,535.

Dundee Floorcloth and Linoleum Company.—During the year ended January 31 this company made a loss on manufacturing account of £4,329, and after charging £2,628 for interest, £2,677 for depreciation, and £872 for upkeep and repairs the total deficit was a loss of £10,505 reduced to £10,227 by the credit balance brought forward. This disastrous result is ascribed to the high cost of jute cloth, oil and other raw materials, but a good proportion of it would seem to be due to lack of adequate capital. Property and raw and manufactured stock, all given as one item, is valued at £106,119, and as the capital is only £78,200 the company has had to borrow pretty heavily and owes £20,000 on heritable loan and £17,750 on temporary accommodation. Debtors at £16,905 exceed the amount due to sundry creditors by £4,291, but preliminary expenses of £2,000 are carried as an asset and cash is trifling at £12, in spite of an overdraft of £6,692 at the bank.

International Banking Corporation.—This company's report has never before reached us, and a certain courage is implied in the fact that it should have been sent now. Apparently the bank is a New York one, but it has a cosmopolitan body of directors, chiefly, however, citizens of the United States resident in New York, and it has branches in India, China, Japan, Mexico, and Central America. Yet in spite of this wide ramification it does not seem to have been well treated last year. On account of the decline in the value of some of its investments the half-year ended December 31 was a disappointing one, the balance at credit of profit and loss being only £12,093, which is not much upon a capital and reserve amounting together to £1,300,000. A large falling off has taken place in the company's exchange business, and we fear it will be difficult for any American bank to take a prominent place in international commerce as long as the trade of the Republic is conducted on the dog-in-the-manger system, or as its industries flourish by borrowing in Europe.

Highland Tea Company of Ceylon.—An increase of 26,961 lbs. to 293,952 lbs. in the crop accompanied by a small improvement in the price at 7.24d. sent the nett profits for 1907 up by £620 to £3,128. Balance brought in, however, was £133 smaller at £82 and the disposable surplus was only £480 better at £2,782, but by putting £50 less at £250 to reserve the directors are able to raise the dividend by 1½ per cent. to 7½ and to add £50 at £132 to the sum carried forward. Floating liabilities are light at £1,045, while debtors owe £1,111 or £504 more, and stocks are £260 up at £2,077, but cash has dropped by £198 to £1,354. Coast advances seem rather burdensome at £1,064. Estates are valued at £29,421 and against this all that the company can show in the shape of a reserve after twenty-two years of existence is £1,250 of which £1,000 is in cash on deposit.

Locket's Merthyr Collieries (1894), Limited.—For the year ended February 29 profits were £49,518, or adding £737 brought forward, £50,255, out of which the dividend on the ordinary shares is made up to 30 per cent. for the year and £18,000 transferred to reserve, leaving £8,255 to be carried forward. The year was therefore a remarkably good one, and the company is largely in funds, having £45,972 in cash at bankers. Sundry debtors owe it £22,286, and it owes sundry creditors £21,803.

London and Lancashire Fire Insurance Company.—The income of this company in 1907 from premiums was £1,471,088, out of which £711,133 was paid in losses, equal to 48.33 per cent. of the premium income. Expenses and commission took about £466,000 or another 31.67 per cent., and £274,785 was left as profit. In the accident department the premium income was £432,766, and losses paid and outstanding came to £151,831. The fire fund was raised by £20,000 to £590,000 and the accident fund was raised by £100,000 to £170,000, leaving in this case £29,879 to be transferred to profit and loss. In the marine department £48,985 was received as nett premiums, since the acquisition of the Standard Marine Company and the nett losses paid came to £25,658. The sum of £90,000 has been transferred from the funds received from the Standard, and with the balance of the marine account has been utilised to create a marine fund of £113,618. From all sources the available surplus profit of the company was £160,583, and out of this the dividend is made up to 16s. per share for the year, which will absorb £84,520, leaving £107,758 to be carried forward as against £104,068 brought in.

London and Provincial Trust.—Income for the year ended March 31 shows a slight falling off at £9,299. After providing for administration expenses, £7,813, or £73 less, the nett revenue, making with £228 brought in a total of £8,042. Debenture interest, preference dividends and income-tax having been met the ordinary shares again get 4 per cent., but the carry forward is reduced to £126. Of the investments which total at cost £201,259, securities to the amount of £123,934 are quoted on the Stock Exchange, and these show a depreciation of 9.6 per cent. Another £50,000 is represented by debentures regularly paying the interest, and £27,324 by stocks of a fluctuating character, any possible loss on which the directors express the pious hope will be covered by reserves. Loans made against securities amount to £8,224 and cash to £1,613, while £10,000 has been borrowed on securities. With £176, balance of profit on realisations, the reserves total £11,334.

Lonsdale and Bartholomew.—Profits for the twelve months ended December 31 fell a little short of the highest figures given in the prospectus of May last. According to that document the profits for 1906 after making provision for bad debts and depreciation were £15,261, but the report now issued shows a trading profit of only £14,320 before deducting £864 for depreciation. Bonus to customers, interest, &c., took £1,976, and income-tax £561, leaving a nett surplus of £10,919, out of which £523 was paid for interest on purchase price, preference dividend to April 1, 1908, took £1,496, and £540 was written off preliminary expenses. Then the ordinary shares, which were all taken by the vendors, get 10 per cent. and £2,000, including proportion of profits earned between January 1, 1907, and the date of incorporation, is transferred to reserve, leaving £1,237 to be carried forward subject to directors' remuneration. Land and buildings, machinery, goodwill, &c., stand in the balance-sheet at £72,855, and as we know from the prospectus that £45,861 of this represents goodwill the provision for depreciation seems totally inadequate. The amount written off preliminary expenses leaves £2,160 outstanding, and judging from this the directors propose to take five years to wipe out this nominal asset. Sundry creditors come to £22,662 against £11,723 held in stocks and £34,933 due by sundry debtors and held in cash.

Mellersh and Neale.—Profits of this Reigate brewery for 1907, after providing £2,776 for repairs, depreciation, &c., amounted to £9,690, and with £741 brought forward gave £10,431 for disposal. After providing for administration charges, debenture interest and preference dividend the ordinary shares receive 5 per cent., £1,500 is put to reserve and £435 or £306 less is carried forward. Properties are valued at £147,305 against which the reserve will now stand at no more than £5,585, but only £1,310 of this is separately invested. Debtors of £5,771 exceed creditors by £667, and in addition the company holds stocks worth £4,217 and £3,290 in cash, so that the current position is fairly comfortable.

Oxford Canal Navigation.—Total receipts for the half-year ended December 31, including £368 dividends on reserve and unclaimed dividends invested, amounted to £9,510. Expenses absorbed £5,171, so that with £433 brought forward £4,772 is available. Dredging account is credited £200. A dividend of £2 5s. is declared, making £4 12s. 6d. for the whole year, and £553 is carried forward. In the preceding half-year £4,976 was dealt with, £200 being put to dredging account and £100 to land and buildings. The share capital is £178,648, reserve £30,000, and land and buildings fund £698.

River Plate Electricity Company.—Receipts on running account rose for the year ended December 31 by £7,002 to £32,466. But expenses took £853 more, so that the balance of revenue account was £6,149 higher at £22,862. Sundry receipts, including £7,500 interest on German transoceanic electric obligations, added £10,152. London expenses showed little change, but £712 more is set aside for depreciation, and with £5,302 brought forward £22,592 is available. Preference and ordinary again get 6 per cent. each, £40,000 is added to reserve and £5,410 is carried forward. With the addition of £38,668 to property this account now stands at £282,366. The holding in German electric company obligations is £150,000, while sundry investments are valued at £19,432. Other items are stores £9,811, tools, &c., £1,840, debtors £5,358, bills receivable £3,000 and cash £7,270. Creditors are heavy at £14,040 compared with debtors, and reserves now amount to £17,200.

Schultze Gunpowder Co., Limited.—Last year was a lamentable one for this well-known company. Its sales of powder fell off considerably, the game season having been a poor one, but a new powder called the "Schultze Cube Powder" has been perfected, and will, perhaps, do something to retrieve affairs. As it was, instead of a profit there was a loss last year of £1,060, bringing the total loss to date up to £3,694. In the balance-sheet £250,000 is still set against goodwill, secret processes, trade marks, &c., and that alone is sufficient to keep the company in a water-logged condition. It owes sundry creditors £6,738 and had cash amounting to £5,178 in hand at the date of the balance-sheet, besides £15,708 due by sundry creditors. Stock-in-trade was put at £27,277 and investments in other powder companies at £15,055. No less than £6,253 additional was spent upon the freehold property during the year, bringing the total up to £12,034, and depreciation does not seem to be allowed for anywhere on a liberal scale.

Standard Tea Company of Ceylon.—The output for the year ended December 31 amounted to 1,322,182 lbs. or 148,060 lbs. more and in spite of a drop of 3/8d. to 7 3/4d. in the price realised nett profits were £1,568 up at £14,397. Deducting home charges, interest, &c., and adding £1,258 brought forward the disposable surplus was £704 better at £14,087, and the directors pay a dividend of 15 per cent. for the thirteenth consecutive year. Then £2,100 or £300 more is written off for depreciation and another £1,400 is put to reserve leaving £1,662 to be carried forward. After making these adjustments the estates will stand at £80,543 and the reserve at £17,200 or 21.35 per cent. During the year £1,000 of the loans was paid off leaving £9,000 outstanding, while creditors have only increased by £110 to £7,281. On the other hand stocks are £103 up at £6,390, cash is £389 higher at £11,410, and the company holds a Treasury bill for £953. Coast advances although still heavy have been reduced by £362 to £1,298. The directors have purchased 177 acres of land for rubber growing, of which they have already planted 138 acres.

Tarapaca Water Works Co., Limited.—Nett profits on sales of water for the year ended December 31 amounted to £45,853, converted at the rate of 9 1/8 pence per dollar, but equivalent to £57,024 at 14d., the rate of exchange current in December, 1906. Deducting £3,198 London charges £43,895 remains as nett profit, and with £21,874 brought forward £64,747 is available. A final dividend is paid of 4 per cent., making with the interim of 3½ per cent. 7 per cent. for the year, £34,000 is added to reserve as against £10,000 the previous year and £747 is carried forward. Capital expenditure was increased by £802 during the year, and, after deducting the sum of £1,897 held in suspense on account of exchange, now stands at £407,201. Stores in Iquique and in transit are £7,785. Debtors owe £5,582 against creditors for £1,869, and cash and bills receivable seems large at £78,120. With the year's addition and £1,000 transferred from the reserve for doubtful debts general reserve now aggregates £80,000, largely represented by cash on deposit. The cleaning-up of the balance-sheet seems to pave the way for the proposition to be put forward by the directors at the meeting to gradually reduce the capital of the company.

Tea Corporation.—The crop of tea for 1907 fell off by 24,036 lbs. to 1,074,719 lbs., but some compensation was found in the increase of 0.93d. to 7.18d. in the price realised. Gross receipts were £29,552, of which expenses took £23,331 and £391 was written off for loss on rice, leaving a profit of £5,831. Establishment charges, debenture interest, &c., amounting to £3,826 having been met the balance of £2,007 is deducted from the debit brought forward, leaving £3,710 still to be wiped out. Creditors amount to £7,555, but produce on hand is valued at £6,877, and in addition to £4,056 in cash the company has £509 invested. Considering the results obtained capital account seems heavy at £108,708, and the burden of £4,105 for advances to coolies must be decidedly onerous.

The Assets Co., Limited.—This is a "relict," to use a Scotticism, of the City of Glasgow Bank, and it will doubtless gradually wear to an end as its directors realise the properties taken over when the bank was in course of liquidation. Last year's profit balance was £8,071 including £669 brought forward, out of which a dividend of 5 per cent. and a bonus of 3 per cent., tax free, will be payable on the 8th inst., and when these distributions are made, less than £71 will remain to be carried forward. With the interim dividend in July, the year's distribution is 13 per cent., yet the profits from New Zealand properties fell off by £3,172 to £4,433. "Lordships" from Udston Estate and feu duties, rents, &c., gave £10,053, of which one-sixth was credited to capital account. Amongst the liabilities is £37,837 for notes, deposits, &c., of the City of Glasgow Bank, for which the company has liability, and there is an item of £10,391 representing suspense account for surplus assets. There is still amongst the assets £8,163 expected to be recovered from the estates of contributories of the City of Glasgow Bank, the properties representing this money being now vested in the company. Properties in New Zealand, including wool clip, are entered at £42,328, a decrease of nearly £7,000, and properties in Scotland stand at £68,134, which is about £833 down. £29,064 represents cash and money lent by the company.

The London Trust Company.—This company's year closes on March 31 and the credit shown on the revenue account at that date was £28,605, made up to £34,528 by £5,923 brought forward. Out of this the cumulative preferred dividend has been paid, £6,000 transferred to the reserve fund, and 4 per cent. distributed on the deferred stock. This will leave £3,828 to be carried forward. A balance of profit on change of investments is entered at £2,437 and placed to reserve and depreciation account. Middle Stock Exchange prices of March 31 show a depreciation of about 6 per cent. on the company's investments since reconstruction, and the profit and loss account shows that the dividend and interest income was £5,471 down at £67,064, while the other earnings, commissions, transfer fees, &c., aggregating about £3,000, show a decline of £118. Interest paid, £36,531, showed an increase of £604, but expenses at £2,249 are £2,838 lower. Directors', trustees', and auditors' fees, however, aggregating £2,710 are £500 up, and the available balance is thus £3,869 less than the year before. The preferred stock dividend took £5,700 less, and £4,860 more at £6,000 was credited to reserve and depreciation account. The company's loan from its bankers was reduced during the year by £20,000 to £12,000.

Yorkshire Fire and Life Insurance Company.—In 1907 this company's fire premium income was £259,683, and losses took £129,303 of this, or 49.8 per cent. as against 53 per cent. in the previous year. Expenses and commissions at about £92,000 took nearly another 35½ per cent., but there was a credit balance of £30,000 to carry to profit and loss after placing £13,000 to purchase of business account. In the life department the premium income was £130,882, including £15,545 of nett new premium income, and at the end of the year the funds were increased by £100,831 to £1,636,630, expenses and commissions having taken about 15.26 per cent. of the premium income. In the accident and general branch there was also a premium income of £126,793 received and £3,000 was available for profit and loss from that branch, while the accident fund was almost doubled to £40,000. Out of the entire nett free balance of £126,793 £25,041 was paid as dividend to the shareholders and £5,000 placed to investment reserve, besides £2,000 debited to expenses not embraced in the various separate departments. This left £31,690 to carry forward against £28,606 brought in. The dividend was at the rate of rather more than 45.

DIVIDENDS ANNOUNCED.

MINES.

Battlefields (Rhodesia).—Interim of 2s. per share.

Jubilee.—5s. per share.

MISCELLANEOUS.

Anglo-Egyptian Bank.—Interim of 5s. per share, being at the rate of 10 per cent. per annum, for half-year ended Feb. 29.

Bankers' Investment Trust.—For half-year ending April 30 at the rates of 4½ per cent. per annum on the preferred stock and 5 per cent. per annum on the deferred stock.

Colorado Nitrate.—Interim of 15s. per share.

Carthagena and Herrerias Steam Tramways.—At the rate of 2 per cent., making 5 per cent. for 1907.

City of Buenos Ayres Tramways.—1s. 3d. per share for three months to March 31.

Eastern Extension Australian and China Telegraph.—For quarter ended Dec. 31 of 2s. 6d. per share, and a bonus of 4s. per share, making 7 per cent. for 1907.

Eastern Telegraph.—Final of £1 5s. per cent. and a bonus of £2 per cent., making 7 per cent. on the ordinary stock for 1907.

Illinois Car and Equipment.—Interim at the rate of 4 per cent. per annum for half-year ended Dec.

Land and Mortgage of Egypt.—5 per cent. for six months ended March 31, making 10 per cent. for the year; also a bonus of 1 per cent.

Liverpool Nitrate.—Interim of 22s. 6d. per share.

Nobel-Dynamite Trust.—For year ending April 30 on the ordinary shares at the rate of 8 per cent., and a bonus at the rate of 2 per cent., carrying forward £20,000.

Manaos Improvements.—Interim on the preference shares at the rate of 7 per cent. per annum for six months ended Dec. 31.

Pan de Azucar Nitrate.—Interim of 6 per cent.

Santa Fé Land.—Interim of 2½ per cent. in respect of the year ending June 30, payable May 25.

MINING RETURNS.

Carrington's United.—410 tons smelted for 70 tons matte; bliste copper produced, 22 tons; gold produced, 97 ozs.

Chinese Engineering.—Output of coal, 24,500 tons; sales, 20,000 tons; consumption, 1,275 tons.

Broken Hill Proprietary Block 10.—Treated 10,049 tons crude ore, producing 1,641 tons concentrates, containing 968 tons lead and 52,512 ozs. silver.

Broken Hill South Silver.—10,670 tons crude ore produced 1,631 tons concentrates, containing 1,174 tons lead and 32,620 ozs. silver.

Cobalt Central.—884 tons ore, value $15,032.

Duff Development.—Total, 148 ozs.

Esperanza.—Crushed 14,754 tons dry ore; concentrates shipped 461 tons; value, $143,167; concentrates, $85,677.

Komata Reefs.—Crushed 2,070 tons, £4,000.

Mexico of El Oro.—Crushed 7,745 tons ore; value U.S. $120,000. In addition 160 tons high-grade ore shipped; net proceeds, U.S. $11,756.

Mount Lyell.—Treated 31,421 tons. In addition 132 tons purchased ore and metal bearing fluxes; converters produced 671 tons blister copper, containing 663 tons; lver, 47,977 ozs.; gold, 1,363 ozs.

North Broken Hill.—Treated 2,250 ns crude ore, assaying 15·8 per cent. lead and 6·5 ozs. silver per ton, producing 390 tons concentrates, containing 268 tons 18 cwts. lead and 8,385 ozs. silver.

"O.K." Copper.—Treated 673 tons crude ore, producing 48 tons fine copper.

Raub.—Crushed 5,821 tons, 1,079 ozs.

Sulphide.—Milled 14,536 tons, producing 2,696 tons lead concentrates which assayed 33 ozs. silver and 61 per cent. lead per ton together with 4,741 tons zinc concentrates, assaying 18 ozs. silver, 13 per cent. lead, and 40 per cent. zinc per ton. In addition, 7,528 tons dump tailings treated, producing 2,761 tons zinc concentrates, assaying 15 ozs. silver, 11 per cent. lead, and 45 per cent. zinc per ton. At Cockle Creek 1,707 tons leady concentrates and 2,897 tons purchased ores smelted, producing 1,518 tons lead bullion, containing 139,656 ozs. silver and 6,679 ozs. gold; also treated 330 tons zinc concentrates, producing 89 tons spelter.

Waihi Grand Junction.—Crushed 4,104 tons; £5,034.

Zinc.—Treated 1,770 tons, averaging 18·4 per cent. zinc, 7 ozs. silver, 4·7 per cent. lead, for a yield of 523 tons zinc concentrates, averaging 45 per cent. zinc, 7·6 lead, 12·7 ozs. silver; and 7 tons lead concentrates, averaging 57 per cent. lead, 37 ozs. silver, 13·7 per cent. zinc.

TRADE AND PRODUCE.

Wheat.—Imports from abroad continue heavy, and last week we received 681,007 qrs. against 458,733 qrs. in the same week last year, while the quantities on passage to the United Kingdom were estimated at 3,495,000 qrs. compared with 3,760,000 and to the Continent 2,415,000 against 2,710,000. But markets keep steady in spite of heavy supplies; stocks are not excessive and farmers have less in hand than they had a year ago. Their deliveries last week were only 32,534 qrs. averaging 30s. 10d. against 62,656 qrs. averaging 26s. 11d. in the same week of 1907. From 1s. to 1s. 6d. per quarter advance was quoted on the week. River Plate samples were 1d. per cental higher. All varieties of spot commanded full prices, and there was some attempt to raise quotations of cargoes, but buyers do not respond. American markets opened quiet and depressed under favourable crop news, but they hardened under reports of frost, and bear covering, with some good, active, speculative buying, strengthened them still further. The visible supply shows a decrease of 667,000 bushels on the week.

Wool.—Very gloomy are the forecasts as to what prices will fall to at the next series of colonial sales. A decided slump is expected, and those buyers who rushed out to Australia to get the clip first hand will probably find that they might have saved their passage money, and bought the wool cheaper into the bargain if they had stayed at home. Bradford market remains as depressed as ever. An absence of export yarn business does not help to improve matters, and in the raw wools there is neither inquiry nor demand. English and Irish wools as well as colonial are at a standstill, and merchants will not even make a bid for the new Irish clip. Business was never worse is the general cry, yet there are some who consider that the worst is over, and that, taking into account the very low range of values in crossbred wools, the possible necessity of prompt realising of imports will check the downward movement. Some manufacturers are employed on orders received before Easter, but new business is slow.

The Agent-General for Victoria, Australia, has received a cablegram from the Government of the State informing him that the quantity of wool produced in Victoria last season weighed 93,000,000 lbs., of the value of nearly £4,000,000, which is the largest production on record.

Cotton (from our Manchester correspondent).—There has been a better tone in our market towards the close of the week, and sellers have been encouraged by the increasing inquiry for yarn and cloth. After a considerable decline in the price of the raw material during the last two months an upward movement has occurred, and buyers being anxious to get in at bottom rates have been more ready to place orders. The business so far arranged cannot be described as important, but we seem decidedly nearer more active operations. Offers for piece goods have come through on a larger scale, and in shirtings and light goods India buyers have bought to a moderate extent in small lots. There is still some lack of confidence, however, and the hardening tendency of cotton will have to be maintained if the business is to increase. China shippers on the whole are still waiting for a more decided tone in the market. Small sales have been arranged for one or two of the lesser markets of the Far East, such as Singapore. In goods of a miscellaneous character buyers for the Levant have shown rather more activity. Very little has been done for Egypt, however. South American offers for printing cloths have been more numerous. In home trade cloths better distribution will have to take place before makers can expect large lines. Quotations for all kinds of piece goods are very irregular, and buyers have not much difficulty in getting in at low rates. Narrow goods are especially poorly situated, scarcely any sales having transpired for some weeks. T-cloths and Mexicans remain dull on the whole, but the prospect for producers is improving. Yarns have been steadier in both American and Egyptian descriptions, and the turnover shows a little improvement. Prices secured, however, do not give much satisfaction, the margin in most counts and qualities having disappeared. An increasing turnover is very welcome to producers. Twists are in abundant supply, and several mills are restricting their output. An increasing business has transpired for China in twofold descriptions, and producers of 2/32's are more extensively sold than for some time past. Very little can be done for the Continent, and agents are having difficulty with old high-priced contracts.

Sir Jacob Behrens and Sons report that the decline in the market is now thought to have been too rapid, and that now as confidence is gradually established values will improve. They consider the state of the yarn market if anything worse than before, and it is difficult to see how matters are going to improve. Of course, the curtailment in production which is gradually being forced upon the trade, and the falling off in exports will in time bring their own reward, but the process is slow, and in the meantime values are likely to be unduly depressed. A large quantity of high-priced contracts, both for the home trade and for export, have still to be liquidated, and it is this factor which depresses the market more than anything else.

Coal.—Gas coal contracts are occupying the trade a good deal just now. In the North of England many of them are already placed at prices ranging from 10s. 3d. to 11s. f.o.b., or rather less than those of a year ago. Further south coal owners are holding out for higher prices if anything than last year on the contention that wages have advanced, but buyers consider that as steam coals are cheaper they ought not to pay more, and consequently few contracts have up to the present been settled. House coals are still firm, and though the warm weather may induce owners to lower them a little, there is no sign of it at present. Welsh trade prospects are regarded as fair, it will not be wise it is thought to hold out for lower prices, but those who anticipate a boom are, on the other hand, likely to be disappointed, according to those in authority.

Copper.—Some abnormally heavy clearances from Atlantic ports caused a set-back in prices at the opening, and selling for three months' delivery by large dealers did not improve matters. But on Wednesday this pressure was removed, and prices rallied a little only to react again on Thursday, easing off to £57 10s. for cash and £58 2s. 6d. three months.

Tin.—After opening firm the market suffered a sharp set-back on Tuesday and under depressing operations, and lower Eastern quotations three months dropped to £141. Values subsequently recovered to £144 5s. cash and £143 5s. three months, but yesterday business was dull. Messrs. A. Strauss and Co. give the visible supply as 13,262 tons against 15,755 tons a month ago. The quantities on the spot and in the course of landing aggregate 5,877 tons against 5,427 tons at the end of March. The monthly deliveries in London amounted to 1,602 tons and in Holland to 1,082 tons, making a total of 2,684 tons against 2,345 tons for March. The Straits shipments are 3,362 tons, of which 2,250 tons are for London, 672 tons for America, and 440 tons for the Continent.

Iron and Steel.—If it were not for exports, the hematite trade would be absolutely at a standstill, and even so its prospects cannot be called encouraging. In the West Coast only 20 furnaces are in blast, and they produce more than is required to meet home consumers' demands, and from this quarter exports also are poor, few inquiries from either Continent or colony coming to hand. Business in Cleveland pig-iron seems to be in the hands of speculators more or less, and legitimate buyers therefore are afraid to do business, except for prompt delivery. Everywhere the state of affairs is unsatisfactory. All branches of manufactured iron and steel are poor, except rails, and no improvement is expected as long as the shipbuilding industry is in its present disturbed condition.

Tea.—This week's markets continued as steady as those before the holidays. In the Indian auction, where 28,583 packages were brought forward, all teas over 7½d. showed a hardening tendency, and the better sorts improved from ¼d. to ½d. per lb. 26,807 packages were sold on garden account, and averaged 7.86d. per package, against 8.30d. for 34,154 packages last year. Ceylon improvement was hardly as marked as Indian, but the market was firm for all teas over 8d. per lb., and for the week 7.90d. was the average obtained on 27,492 packages brought forward. Java offerings were larger than usual at 4,220 packages, and demand for better kinds was particularly good, with occasionally higher rates. Messrs. Gow, Wilson, and Stanton, Limited, in a note on the Northern Indian crop, state that it is said to have closed 7½ millions short of last year, and with the further increase in the total outside the United Kingdom, the amount available for home consumption should not be far short of 19 to 20 millions less than in 1907. Heavier imports of China teas have to some extent discounted this shortage, but the position is still a strong one. With much less tea remaining in growers' and importers' hands than was the case at this period last year, it seems probable that prices may touch a higher level before the teas of the new crop arrive. Private advices state that the season will be late in opening, owing to severe drought and to exceptional heat experienced in the growing districts.

Sugar.—A report that about 20,000 tons beet had been sold to the United States on Friday at about 11s. 9½d. f.o.b. sent prices up to about 12s. in Hamburg, but November-December only improved from 10s. 6d. to 10s. 6½d., in spite of the abnormally bad weather of a week ago. May beet also dropped again to 11s. 8¾d., notwithstanding that Cuban receipts were very small, only 10,000 tons in six ports, says Mr. Czarnikow, which, according to previous years, is not what might have been anticipated from 36 centrals still at work. Regarding sowings, continues Mr. Czarnikow's circular, there is very little to be said as yet. With a moderate increase in France and Holland, and a small decrease in Austria and Belgium, and about the same area in Germany as last year, it seems that on balance the chief differences in old Convention countries will be brought about by the weather, which hitherto has somewhat delayed sowing or germination. The Cuban news remains unfavourable to the growing crop; in Java the weather at present is normal, and if it continues a timely beginning will be made with grinding. The yield may show 10 per cent. decrease, but the deficiency of 20 per cent. reported by some is not anticipated, and for Western statistics Java yields more than last year. New York spot quotations fell at first, owing to the sale of a parcel of arrived sugar at 4.42 cents, but went up later to 4.50 cents and 4.48 cents. Business has been fairly active. Cuban planters are realising the balances of their crops at fully previous values, and with reports that grinding is nearly finished, there is no pressure to sell. Landings in the three ports for the week were 66,000 tons, and with meltings 39,000 tons, stocks increased to 264,000 tons.

The Peruvian Corporation, Limited.—Issue of £1,[illegible] debentures. Scrip certificates in respect of the above issue can now be exchanged for corresponding allotment letters and bankers' receipts. Certificates will be forwarded by post on request, and at the risk of allottees.

COMPANY MEETINGS.

ALLIANCE ASSURANCE COMPANY, LIMITED.

The annual general court of this company was held on Wednesday at the head office, Bartholomew Lane, E.C., the Rt. Hon. Lord Rothschild, G.C.V.O. (Chairman of the company) presiding.

The Secretary read the notice convening the meeting and the auditors' certificate.

The Chairman, in moving the adoption of the report, which was taken as read, said that before referring to the business of that corporation during the past year, he thought they would agree with him that it was right and proper to refer to the loss which the company had sustained by the demise of four of their old directors and friends. Mr. Fletcher, whose opinion was always highly valued by his colleagues on the board, was a director of the company for many years, and knew all about its work and prosperity almost from the inception. Mr. Lawrie, who, unfortunately, had just died, was a very active member of the board in connection with the marine business, and he took a very great part in promoting those amalgamations which had proved so beneficial to the company during the last few years, and which he hoped would be of great advantage in the future. Both Lord Battersea and Major-General Sir Arthur Ellis took great interest in the company, and were connected with undertakings which brought a large amount of business to that office. In asking the shareholders to consider, he hoped favourably, the report which the directors presented, he said they would notice that in the life department the company received 2,869 proposals for life insurance representing £2,034,000, and that 2,319 of these cases were completed for the sum of £1,548,576. The new premiums were estimated at nearly £70,000—£14,500 being in single premiums. Of the amount assured £207,400 was re-insured with other offices. A sum of £35,877 was received as consideration for new annuity bonds. The rate of mortality was favourable during the year, the claims by death being only 70 per cent. of the amount expected according to the valuation basis. The total life premium income, including the figures of the Imperial and Provident funds, was £860,559, and the combined life assurance and annuity funds amounted to over £12,000,000. In connection with the life business, the quinquennial valuation of the Provident life fund was made at the close of last year, and in making that quinquennial valuation the funds of the Provident Life office were written down to market value. The surplus on that account available for distribution was £317,457, of which £308,426 belonged to the participating policy holders in the Provident fund, and £9,031, less the expenses of the valuation, would be credited to the shareholders' account for the current year. The nett fire premium income for the year amounted to £1,352,679 and the losses and expenses, including commission, to £1,082,277, leaving a surplus, exclusive of interest, of £270,402, which had been carried to profit and loss. In the marine department the premium income amounted to £166,026, and there remained a surplus, after deducting losses, expenses, and commission, of £20,427, which had been carried to credit of profit and loss. As shareholders were aware, an accident and burglary department was opened by the company in March last year, and the account attached to the report showed that the premium income for the nine months amounted to £61,655. The short period of working thus far was no indication of what the department would lead to in the future. After deducting losses, commission, and expenses, there was a surplus (including interest), which had been left on the fund of £32,291. The accumulated fund, in respect of the leasehold investment and general account, amounted to £434,729, being £41,695 in excess of the amount at the end of the previous year. The premium income of the company from all accounts amounted to £2,526,204, and the interest (less income-tax) from investments to £620,432, making a total income of £3,146,636. The total funds of the company, including the reserves made for outstanding claims, expenses, and commission, bills payable, and sundry creditors, amounted to close on £17,000,000. All these figures were most satisfactory, and represented the greatest credit to the assiduous officials of the company, who had always the interests of the company at heart, but he wished—indeed, it was his duty to do so—to call their attention to one very important point in connection with all insurance offices. It would be within their recollection that a few years ago their auditor called attention to the fact that the book value of a certain number of their securities was in excess of the market value. On the advice of their auditor, instead of distributing the total amount of profit they had on profit and loss account, an entry was made in their books called investment reserve fund. This year the auditor said that as there was a considerable amount of money at credit of profit and loss account it was the board's duty to write down the securities in the shareholders' account, and also in the Provident Life account, to their market value. That had been done. He thought that next year when they had to deal with the life account of the Alliance a similar policy would have to be pursued. That policy was pursued this year with the life account of the Provident. He trusted that the shrinkage in the value of the securities would not be of a permanent character. Some of these which they had written down had no doubt recovered considerably since December 31. Others had not recovered, and he was not sure they had not shrunk further. In mentioning this fact to them he did it first of all that they should thoroughly understand not only the position in which the company and similar companies might be placed, but that they should also consider very carefully what might be the result to them as shareholders and to the relations of policyholders if rash legislation interfered with the value of property. (Hear, hear.) That was not a political meeting or he could say more. He would only conclude by asking them as shareholders to exercise all their influence in procuring business for the company. Before putting the motion he invited any shareholder who desired to speak.

Mr. F. A. Bevan seconded the motion, which was carried unanimously.

The Chairman declared a dividend of 10s. per share out of the profits and accumulations of the company at the close of 1907. He said an interim dividend of 4s. per share was paid on January 6 last, and a further amount of 6s. per share would be payable on July 4 next.

After the transaction of formal business the proceedings concluded.

SCHIBAIEFF PETROLEUM.

The ordinary general meeting of the Schibaieff Petroleum Company, Limited, was held on Wednesday at Winchester House, Old Broad-street, E.C., Mr. C. J. Cater Scott (chairman) presiding.

The secretary (Mr. W. A. Turner) having read the notice convening the meeting and the report of the auditors,

The Chairman said: My first duty is to apologise to you for the delay in issuing the report and accounts for the period under review. This delay, which we regret, certainly has not rendered easier my task to-day. It is not an easy one, and certainly not a pleasant one. In passing I might say that I think few shareholders can have any idea of the anxieties and difficulties that your directors have had to face during the last two or three years in connection with the carrying on of the work at Baku. But I should like to remind you that the period covered by the accounts was one of continuous disaster to all the oil trade at Baku. We had a succession of strikes, partly labour and partly political, and these finally culminated in the great strike which began on June 20, 1906, and went on until August 24. During the whole of that time everything was absolutely at a standstill, though, unfortunately, we were subjected to very considerable extra expense in trying to preserve our property. As soon as the strike was over there was an attack made on Mr. Urquhart, our late general manager, that necessitated his resignation, because in his opinion his life was not safe in going back to Baku. Then we were face to face with the difficulty all last year of providing for the management of your business. We gave the matter our most careful attention, and finally decided that the only possible course at that moment was to work it by a committee. Now, I am not saying that such an arrangement is an ideal one. I think we sitting at this board would have preferred, if we could, to have had one man with full control and full responsibility at the head of affairs, but it was not possible. There was a great danger if we had appointed any one man that he would be at once a centre for all sorts of attacks, partly by anarchists and partly by labour. We have had all through this time of strikes from labour and political causes to face an absolute want of support from the authorities; in fact, you may say that out in Baku the authority of the Crown has practically ceased to exist, while so far as the police were concerned they were worse than useless; we should have been better without them altogether. The result has been that we have had to carry on our business under difficulties. I do not know that anyone can realise what those difficulties were. The cost of everything has increased enormously, the quality of the work done has been as bad as it could be, and the result to us is that to-day we find it costs us about 15 copecks per pood, whereas in former years we used to consider 4 copecks per pood as a proper cost. Under these circumstances perhaps you will not be altogether surprised that we come before you to-day with an account which we must confess at once is most disappointing. First of all I will take the profit and loss account of the Russian Company, where you see that the gross profits amount to £44,499. The oilfields have shown a very considerable profit, although not so much as they ought to have done, because we have had to face a reduced output in consequence of the strikes and an extra cost also on account of the labour and political disputes. Unfortunately that profit has been dipped into very largely by the refinery and the distribution business. The refinery has suffered from the same cause as the oilfield—increased cost of working, and also from our not being able to work full time in consequence of the strike. Then in connection with the distribution, there is another matter which has seriously affected us this year. Messrs. Nobell and Mazout practically have a monopoly of the sale of oil in the interior of Russia, and with the high prices current in Baku we considered that they ought to have got very high prices in Russia, so that there should have been a very substantial profit on the distribution business. Unfortunately our friends who are selling for us took a different view, and they sold forward to a very large extent at prices which were certainly not profitable—scarcely remunerative. Now, if you will turn to the other side of the account there are two items only to which I think it is necessary to draw your attention. The first is trade expenses, which stand at £16,829. A year ago I told you that the proper amount for the 12 months—the previous period covered by the accounts was 17 months—was about £18,500, so that on that we have made a saving of £1,700. The next and only other item to which I need draw your attention is the discounts, commissions, &c. The word "commissions" is somewhat misleading; it is not, in fact, a commission such as we usually understand, but it is the money paid to our

bankers for their credits. I may remind you that when you get an English Bank rate of 4 per cent. or 5 per cent. it is a good deal for us here; but probably in a country like Russia you have to pay 8 per cent. or 9 per cent. for your money. The balance down, being loss for the year, is £53,835. That puts it at its worst, because we have received back from the Société Anonyme of Antwerp an amount of £10,925, which represents our share in the trading of that company, so that really the loss for the year comes down to £42,910. Now, may I ask you to go back for one minute to the question of commissions and discounts? This, I think, is really the serious thing for us to face. If we could only get steady working and anything like normal conditions I should look to the oilfields yielding us a very good profit indeed. Similarly with the refinery under normal conditions, although we should never expect to make a very large profit out of it, at any rate, there ought to be no loss, and with the distribution business we might look, I think, for some profit—certainly no loss. Unhappily, this distribution business means great demands for cash for carrying it on, owing entirely to the climatic conditions of Russia. Practically the country is snowed up and ice-bound for six months out of the twelve, and consequently we have to carry enormous stocks. This, of course, requires us to do a great deal of financing, and it also requires us to get from our banking friends credits for carrying on our business, for which we have to pay. I think, therefore, that we should very seriously consider whether we cannot put our business on a sounder footing even at some little sacrifice to ourselves, and then I think we might look forward to the future fairly hopefully.

Mr. G. Grinnell-Milne seconded the motion for the adoption of the report.

In the course of a discussion a shareholder expressed the opinion that the company should terminate its agreement with the undertaking which distributed in the interior of Russia, and Mr. King suggested that it would be far better to wind up the company. The Chairman replied that the company could not, on account of the expense, sell for themselves in the interior of the country. The motion was carried with one dissentient.

NEXT WEEK'S MEETINGS.

MONDAY, MAY 4.

Abonkir Company.—Palmerston House, E.C., noon.
British Westinghouse Electric and Manufacturing.—Hamilton House, E.C., noon.
Craigpark Electric Cable.—Glasgow, 12.30 p.m.
Esperanza Copper and Sulphur.—Winchester House, noon.
Mexican Central Railway Securities.—Winchester House, noon.
Steel, Coulson and Co.—Glasgow, noon.
Swedish Central Railway.—11, Ironmonger Lane, E.C., 4.15 p.m.

TUESDAY, MAY 5.

Buenos Ayres Gas.—1, East India Avenue, E.C.
California Oilfields.—Winchester House, 2 p.m.
City of London Real Property.—Cannon Street Hotel, 1 p.m.
Egyptian Mines Exploration.—Winchester House, noon.
Equitable Life Assurance.—Mansion House Street, E.C., noon.
Frontino and Bolivia Gold Mining.—Winchester House, 1 p.m.
Imperial Continental Gas.—Cannon Street Hotel, 2.30 p.m.
Lamb Brewery.—Frome, 2.30 p.m.
Nitrate Railways.—Winchester House, noon.
S. Blanckensee and Son.—15, Ely Place, E.C., 3 p.m.
San Jorge Nitrate.—Winchester House, 2 p.m.
Thomas Tilling.—Cannon Street Hotel, 3 p.m.
Transvaal Goldfields.—Cannon Street Hotel, noon.

WEDNESDAY, MAY 6.

Kalgoorlie Electric Power and Lighting.—Winchester House, 2.30 p.m.
Kalgoorlie Electric Tramways.—Chamber of Commerce, noon.
Libiola Copper Mining.—Winchester House, 11 a.m.
Northern Assurance.—Aberdeen, 1 p.m.
Quebec Central Railway.—5, Great Winchester Street, E.C., 11.30 a.m.
Scottish Union and National Insurance.—Edinburgh, 2 p.m.
Shelford Rubber Estate.—Glasgow, 2.30 p.m.

THURSDAY, MAY 7.

Anglo-American Debenture.—Cannon Street Hotel, 12.30 p.m.
Anglo-Russian Cotton Factories.—4, St. Helen's Place, E.C., 2.30 a.m.
Balijan Tea.—1, Great Winchester Street, E.C., 3 p.m.
Caledonian Insurance.—Glasgow, 2.30 p.m.
Highlands and Lowlands Para Rubber.—2, Oxford Court, E.C., noon.
Industrial and General Trust.—Winchester House, noon.
James Nelson and Sons.—Winchester House, noon.
La Guaira and Caracas Railway.—Finsbury Pavement House, E.C., 2 p.m.
Pacific Trust.—Liverpool, noon.
Puerto Cabello and Valencia Railway. — Finsbury Pavement House, E.C., 2.30 p.m.
SanDonato Nitrate.—Liverpool, 3 p.m.
Schultze Gunpowder.—Cannon Street Hotel, 2.30 p.m.
Sir Elkanah Armitage and Sons.—Manchester, noon.

FRIDAY, MAY 8.

Arauco Company.—Winchester House, noon.
Mabira Forest (Uganda) Rubber.—Winchester House, noon.
North British and Mercantile Insurance.—Edinburgh, noon.
Scottish Australian Mining.—Winchester House, noon.

Answers to Correspondents.

****** A Key to these Answers will be posted early each week to Subscribers of ONE GUINEA per annum, 11s. for six months, or 5s. 9d. for three months.***

Deposits against future queries may be lodged with the Publisher.

Jateas.—(1) Hardly yet, wait at least a month. (2) Not till the end of the company's year. (3) Probably not till Oct.

R. D. P.—There is no hurry to sign anything. Report has got been sent in; we should be glad to see it if you can borrow it for us.

T. C.—Even if the dividend is 20 per cent. there is no great prospect of a substantial rise, but you might buy a few shares if you are prepared to write down cost out of dividends. There is no liability. The balance to your credit is 25s. 3d.

B. W. J.—It seems a pity to try and force a sale when everybody is avoiding the thing. Let it rest for a while.

J. B. G.—(1) Perfectly safe investment. We fear you will not get it much below the current price. (2) No. The prospects are by no means bright, and we do not trust the people. Let it alone. (3) The bonds are too dear. (4) Yes, we think you might buy a few to average. You have sent more than the fee, and we have added the surplus to your credit on deposit, which now stands at 2s.

Letters to the Editor.

MEXICAN CENTRAL FOUR PER CENT. MORTGAGE BONDS AND THREE PER CENT. FIRST INCOME BONDS.

SIR,—I am of opinion that the proposals set forth in the plan of "readjustment and union" of the National Railroad Company and the Mexican Central Railway Company should not be accepted by the holders of the bonds of the latter railway.

The 4 per cent. mortgage bonds must be paid off at par (say £100) in 1911 and carry full interest till that date, so it is apparent that holders would lose considerably by exchanging them for the new company's securities, the value of which is indicated by the present Stock Exchange quotation of these bonds, namely, about £83.

With regard to the Mexican Central First Income Bonds, these rank for dividend immediately after the mortgage bonds, and it is difficult to see why holders should exchange them for second preference shares in the new company.

It is significant that the prices of both classes of the Mexican Central Bonds have fallen considerably since the publication of the plan of "readjustment and union."

I have held a considerable quantity of Mexican Central Mortgage Bonds and Income Bonds ever since the date of their issue. I shall be glad to hear from other holders who would be willing to co-operate with me in protesting against the proposed conversion, and also (if found desirable) in making arrangements for our joint protection.

Yours faithfully,
(Signed) J. S. BALLIN.
5, Clarence Terrace, Regent's Park, London, W.,
April 29, 1908.

Shawinigan Water and Power Company.—Earnings for March were $55,520 being at the rate of $666,240 per annum, compared with $43,296 or at the rate of $519,552 per annum a year ago.

SOUTH AUSTRALIAN GOVERNMENT FOUR PER CENT. BONDS FOR £1,440,100.

Maturing 1st July, 1908.

The Government of South Australia is now prepared to pay off prior to Maturity the Four per cent. Debenture Bonds for £1,440,100, maturing July 1st next, with accrued interest to date of surrender. Bonds must be lodged with the Bank of Adelaide, 11, Leadenhall Street, London, E.C., and the principal and interest will be payable three days after lodgment. The South Australian Government is prepared to CONVERT not exceeding £500,000 of these Bonds into Three-and-a-Half per cent. Inscribed Stock on the following terms:—

For every £100 of these Bonds (up to £500,000) with Coupon attached due 1st July, 1908, surrendered to the Bank, the South Australian Government will issue £100 Three-and-a-Half per cent. Inscribed Stock 1920-50, and also pay £1 in cash. No applications for conversion will be entertained after the £500,000 has been applied for. The Inscribed Stock will be dated January 1st, 1908, and a half year's interest will be payable on July 1st, 1908. Copies of the Act under which this Stock will be issued can be seen at the office of the Agent General for South Australia, 28, Bishopsgate Street Within, E.C., or at the Bank of Adelaide, 11, Leadenhall Street, E.C. Full particulars and forms of application can be obtained from the Bank of Adelaide or from Messrs. R. Nivison and Co., 76, Cornhill, E.C.

J. G. JENKINS,
Agent General for South Australia.
London, April 30th, 1908.

SOUTHERN NIGERIA GOVERNMENT LOAN.

Issue of £4 per cent. Four Year Convertible Bonds sufficient to raise £3,000,000.

Authorised by Ordinance No. 7 of 1908.

Price of Issue £99 per cent.

£5 per cent. on application, and the balance payable as under:—

£19 per cent. on the 12th May. **£25 per cent. on the 13th July.**
£25 per cent. on the 15th June. **£25 per cent. on the 14th August.**

The Bonds are convertible at the option of the holders during their currency into Southern Nigeria (Lagos) £3½ per cent. Inscribed Stock 1930—1955 on the terms mentioned hereafter.

A coupon payable on the 15th September, 1908, for Seventeen Shillings per cent., representing interest at the rate of £4 per cent. per annum from the dates of the instalments, will be attached to the Scrip Certificates, but a full half-year's interest will be payable in the case of the Stock.

The Government of Southern Nigeria having complied with the requirements of the Colonial Stock Act, 1900, Trustees are authorised to invest in this Stock, subject to the restrictions set forth in the Trustee Act, 1893

The loan is raised for the construction of Harbour Works and for the completion and construction of Railways in Southern and Northern Nigeria, the principal works being the construction of the Baro-Kano Railway, about 400 miles in length, and of the works necessary to effect a junction, about 250 miles in length, between the trunk line now in course of construction from Lagos, towards Kano, of which about 200 miles are already open for traffic, and the Baro-Kano line. These Railways will open out the cotton-growing districts in Nigeria.

THE CROWN AGENTS FOR THE COLONIES, on behalf of the Government of Southern Nigeria, hereby invite applications for the above Loan.

The Loan is secured on the General Revenues and Assets of the Government of Southern Nigeria, and will be raised in the form of Bonds representing £1,000, £500, and £100 respectively, bearing interest at the rate of £4 per cent. per annum, payable half-yearly on the 15th of March and 15th of September in each year.

Any Bonds which may remain unconverted on the 15th of March 1912, will be paid off at that date.

Applications, which must be accompanied by a deposit of £5 per cent. on the nominal amount, will be received at the Offices of the Crown Agents for the Colonies, Whitehall Gardens, S.W., and No. 1, Tokenhouse Buildings, E.C.

The list will be closed on or before Wednesday, the 6th day of May.

In case of partial allotment, the balance of the amount paid on deposit will be applied towards the payment of the first instalment. If there should be a surplus after making that payment, such surplus will be refunded by cheque. Applications may be for the whole or any part of the issue, and no allotment will be made of less amount than £100 or multiples thereof.

The first payment must accompany the application, and the subsequent payments are to be made at the Crown Agents' Transfer Office, No. 1, Tokenhouse Buildings, E.C., not later than the dates above mentioned.

Payments may be made in full under discount of £2 per cent. per annum on the 12th day of May—the allotment date—or any subsequent date prior to the 14th of August.

In the case of default in the payment of any instalment at its due date, the deposit and instalments previously paid will be liable to forfeiture.

After payment by the allottees of the instalment due on allotment, they will receive at the Crown Agents' Transfer Office, No. 1, Tokenhouse Buildings, E.C., in exchange for the Letter of Allotment and Receipt, Scrip Certificates representing the Bonds to which they will become entitled.

CONVERSION INTO STOCK.

The holders of fully paid Letters of Allotment or of Scrip Certificates, as soon as they are paid in full, and of the Bonds, will have the option at any time prior to the 15th August, 1911, on surrender of the Certificates or Bonds, of converting the same into Southern Nigeria (Lagos) Government £3½ per cent. Inscribed Stock, 1930—1955, on the following terms. At any time between the following dates—

The 12th May, 1908	and the 15th February, 1909	..	£104	Stock.
The 16th February, 1909	,, 15th February, 1910	..	£103	,,
The 16th February, 1910	,, 15th February, 1911	..	£102	,,
The 16th February, 1911	,, 15th August, 1911	..	£101	,,

for each £100 of Debentures.

The Stock will be in addition to and identical with the Southern Nigeria (Lagos) £3½ per cent. Inscribed Stock already quoted in the Official Stock and Share List, and will be repayable on the 15th of March, 1955, by a Sinking Fund to be formed in this country under the management of the Crown Agents, who are appointed Trustees; but the Government of Southern Nigeria will have the option of redemption at par on or after the 15th of March, 1930, on giving six calendar months' notice by advertisement in the *London Gazette* and in the *Times* newspaper, or by post to the then Stockholders at their registered addresses.

The interest, at the rate of £3½ per cent. per annum, will be payable half-yearly, on the 15th of March and 15th of September in each year, the first full half-year's interest, viz., £1 15s. per cent., being payable on the 15th September next by Dividend Warrants, which, if desired, may be transmitted by post.

The Stock will be transferable at the Crown Agents' Transfer Office, No. 1, Tokenhouse Buildings, E.C., without charge and free of stamp duty, but Principal and Interest will be payable at the Head Office, Whitehall Gardens.

Stock Certificates to Bearer, of the denominations of £1,000, £500 and £100, with coupons for the half-yearly dividends attached, will be obtainable in exchange for Inscribed Stock at the Crown Agents' Transfer Office. No. 1, Tokenhouse Buildings, E.C., on payment of the prescribed fees, and such certificates can, if desired, be re-inscribed.
